INCORPORATED

IN presenting our whole-sale catalogue in this new form we do it with the belief that it is a more convenient size for you to keep and refer to.

In the growing of our stocks we endeavor to give most careful attention to cultivation, to insure prime quality, and we have taken great pains to keep our stocks pure and true to name.

In making up this catalogue we have eliminated many items that we consider not worth growing, in view of later and better ones now on the market.

It is our wish to offer our customers only the best in the stock that we offer.

Gladioli in Mixtures

We build our mixtures to order, as we believe this is the only way a true mixture can be kept to standard. We know perfectly well that mixtures can be bought at almost any price, but after testing most mixtures on the market we have come to the conclusion that our customers want and should have something better than the average. So we build our mixtures from named varieties and seedlings of merit.

Regarding our mixtures under color, we are most careful to have them true and pure, in fact, as well as in name; and they are mixed with great care from named sorts.

Our Guaranty

We are so very anxious to give our customers satisfaction, and we are so very sure that we have satisfactory goods, that we stand ready to "make good" by replacing anything that does not turn out as represented, from any fault of ours.

"Primulinus Hybrids"

In recent years these Hybrids have come to be extremely popular and they deserve every word of praise they get; they are graceful, easy to grow, moderate in price, artistic in colors, which range from sulphur-yellow to chrome-yellow, all shades of orange with now and then a cream and pink among them, but Nasturtium colors predominate; they are the last word in Gladioli for dainty decorations.

Avalanche —(Crousse, 1886)—Avalanche, in our estimation is one of the finest Peonies grown. Large, convex bloom of perfect form; color, milk-white with cream-colored center; has ruby-colored markings of rare delicacy and beauty on some of its petals. A superb Peony. None better	6.00	40.00	
Couronne D'Or —(Calot, 1875)—Immense, very full imbricated bell-shaped blooms; color snowy with yellowish reflex with light carmine edges on a few center petals. Grand cut-flower sort. Comes in after all other long-stemmed whites are done	6.00	40.00	
Duchess De Nemours —Very fine cup-shaped bloom, sulphur-white with greenish reflex; fine bud	4.00	30.00	
Eduilis Superba —(Lemon, 1864)—This is the famous Decoration Day Peony. Color, a beautiful bright, clear pink, with silvery reflex	3.50	25.00	
Eugenie Verdier —(Calot, 1864)—Pale hydrangea-pink, collar lighter; center deeper flecked crimson; fragrant; very distinct from Eugene Verdier, with which it is often confused	8.00	60.00	
Felix Crousse —The ideal of self-colored red Peony, large, globular and compact, an even shade of bright red without a trace of any other color	8.00	60.00	
Festiva Maxima —Enormous, full double bloom; petals very broad; color, pure white with an occasional carmine spot; very vigorous grower	4.00	25.00	
L'Indispensable —(Origin unknown)—Lilac-white, shading to violet-rose toward the center; a very double handsome flower of immense size	6.00	40.00	
Monsieur Jules Elie —(Crousse, 1888)—This is king of all Peonies, and is without question M. Crousse's masterpiece. Color, an ideal glossy lilac-pink, shading to deeper rose at the base of the entire

ISMENE CALATHENA

Those who are familiar with the true Ismene cannot say enough in praise of its beauty and purity. The flowers are of a very large size, like an Amaryllis, novel form and of snowy whiteness, and are also exceedingly fragrant. It is really one of the most lovely of all the great Amaryllis tribe, having a peculiar grandeur which one can appreciate at sight, but cannot describe. Bulbs are large and strong and begin to flower in two or three weeks after planting..... .90 6.00 50.00

LYCORIS SQUAMIGERA, OR AMARYLLIS HALLII

Description—Lycoris Squamigera produces in early spring attractive green foliage which grows until July when it ripens off and disappears, and one not familiar with its habits would think the bulb had died, but about a month later, as if by magic, the flower stalks spring from the ground to a height of two or three feet, developing an umbel of large and beautiful lily-shaped flowers three to four inches across and from eight to twelve in number, of a delicate lilac-pink shaded with clear blue.

Culture—As the bulb is perfectly hardy without any protection it can be planted either in the fall or spring, but we consider fall the best time as the bulbs will have a chance to get established before flowering time. Cover the crown about four inches. Very useful for the border or among shrubbery. 4.00 30.00
