**CLARENDON NURSERY
COMPANY**

FRUITS

**A. L. BRUCE & SONS
CLARENDON, TEXAS**

— **FRUIT TREES, SHRUBBERY and FLOWERS** —

INTRODUCTORY

We carry a full line of the leading varieties best adapted to this section. Our specialties are: Plums, Cherries, Grapes and Berries. The president and founder of this company has had forty years experience in the nursery business, half of which has been spent in the Texas Panhandle testing and originating varieties that have made fruit-growing a profitable industry when his advice is sought and carefully followed. This service is free.

While the founder of this nursery carefully looks after every interest of the customer, his two sons who have grown up with the business, each contribute to the success of the firm, Paul M. Bruce being sales manager while A. L. Bruce, Jr. performs the duties of secretary.

Every order is carefully packed and bears the state nursery inspector's guarantee that it is free of dangerous disease and insect pests, thus assuring you of a clean, sturdy stock grown in a section famous for tree vitality and fruit producing value. We guarantee our stock to be true to name and as represented.

Our terms are CASH with order.

Cabbage plants, frost proof, per hundred, .50

My 40 years nursery experience—20 in the Panhandle—has shown me the necessity of growing and planting out good, clean vigorous stock which has steadily grown scarcer since the beginning of the World war when importation of foundation stock stopped. In my work here I shall see to it that only the best grade of good, sturdy high producing stock free from dangerous insect pests and fungus diseases is supplied our customers—the kind of trees and plants that will produce the best possible results in your orchard and yard.

In buying stock of us you are sure of getting a careful selection of trees and plants of varieties best adapted to this section that will prove most profitable to our customers.

I want to render the very best service possible to our friends and customers in advising the best selection of suitable varieties, also in the planting and care of your orchard. I hope you will take advantage of this service and write or come to see me when in need of such advice.

Visitors are always welcome at our nursery and every effort will be made to make your visit both entertaining and instructive.

A. L. BRUCE,

President.
