EVERGREENS

Evergreens are a speciality with us as we have the right soil and Evergreen Climate. (It is conceded by growers and Horticulturists that most Evergreens develop stronger and better in cold temperate Mountain climate than they do in warmer zones). Our climate produces trees with snap and vigor. We are 1000 feet above sea level bordering on the foot hills of the Catskill Mountains. All of our trees have been several times transplanted and have developed wonderful fibrous roots and shapely tops.

If you are in the market for a quantity of this line of goods we will be pleased to quote you giving exact specifications on same. We can save you money as well as make a great deal of money for you in this line of goods, for further information I would refer you to our general catalogue "The Price of Trees" free on application.

Abies, Douglassi (Douglas Fir) Commonly called Douglas Spruce, very hardy and satisfactory.

4 to 6 inches	-----	\$ .09	each
6 to 8 inches	-----	.22	each

5 to 7 feet, B & B	-----	3.50
7 to 9 feet, B & B	-----	5.00
10 to 13 feet, B & B	-----	10.00
15 to 18 feet, B & B	-----	20.00

For all the year round satisfaction Evergreens fill the bill. There's hardly any use to which they can't be put. They're the best for screening obtrusive buildings, and the laundry-drying green. They break up sharp corners; make wonderful backgrounds for your garden; and form the most ideal retreat for the garden lounging place. For boundary marking, there's no better thing than Evergreens.

By all means you ought to plant Evergreens.

You ought to plant plenty of them. They are easy to care for. And you'll find them strong stalwart friends, who will work, and sing, and be beautiful for you all your life long.

BROAD LEAF EVERGREENS

The great beauty of the broad leaf Evergreens make them most valuable for garden purposes. Many are among the most gorgeous flowering shrubs, while their broad attractive leaves are most useful throughout the year, especially when many of the trees and shrubs are without foliage. A liberal use of this class of plant will result in charming effects.

Andromeda, Leucothoes Catesbaci. 1 to 2 feet ----- \$.35 each

Andromeda, Floribunda (Fetter Bush). 12 to 18 inch ----- \$1.00 each

Aralia, Spinosa (Hercules Club)

STANDARD TREE BANDS

Protect your trees against all climbing Worms, Caterpillars, Moths and Insects. Our bands are Waterproof and will last a Season. They are easily applied. Simply cut length to encircle tree trunk, joining the ends with a tack, which forms an umbrella or Mushroom shape, the under side of which is covered with a sticky substance of which the insects and worms cannot Negotiate. This method has the endorsement of Foresters and Fruit growers everywhere.

25 Foot Roll postpaid	\$1.75
100 Foot Roll postpaid	6.75
