JOHNSON'S

1922 CATALOGUE OF

STRAWBERRY PLANTS

E. W. JOHNSON & COMPANY

SALISBURY, MARYLAND

Instruction to Customers

Orders should be sent in just as soon as possible after receiving this catalogue. We will book your order, and ship your plants when most convenient for you. Be sure to write plainly your name and postoffice address; also your shipping address, if it is different from your postoffice address. Be particular to state how plants are to be shipped, whether by mail, express or freight. All orders will be promptly acknowledged and notice will be sent when goods are shipped.

GUARANTEE—We guarantee our plants to reach our customers in good condition when shipped by mail or express, if taken from express office and opened on arrival. But we cannot become responsible for stock that is permitted to lie about express office, for neglect of purchaser or his employees to properly care for stock after it has been received. We guarantee our stock true to name with the understanding and agreement that we will refund the purchase price paid for such or replace it with other stock that is true to name, but not liable to damages other than herein named.

PAYMENT—Cash must accompany all orders, or one-third cash with order, balance to be paid on or before day of shipment. Of course, we will book orders, and hold them a reasonable length of time, awaiting remittance.

OUR PRICES are all F. O. B. Salisbury, Md. If desired sent by mail add 25 cents per hundred plants for postage. All plants are packed so as to reach you in good condition.

TIME OF SHIPMENT—From the time you receive this catalogue until May 15th.

YOU ARE TAKING NO RISK. We send just what you order or refund your money, unless you tell us to substitute the order with the nearest to it we have should we be sold out on your order.

REFERENCE—Salisbury National Bank.

Friends and Patrons

ANOTHER YEAR has passed since we approached you with our only salesman, asking you for at least a part of your orders for Strawberry Plants. As we enter into the new year we are sending our representative again to inform you that we are in a position to supply you with the same high grade plants that you have always received from us. We really believe we have as nice a lot of plants for spring delivery as ever was offered to the public regardless of price. We have been informed that in many sections there is a great shortage in strawberry plants, owing to the poor seasons for making a good bed of plants. The season with us was ideal for making plants until September. We have the plants and we are making our prices very reasonable, much cheaper than we could afford to do had we not been so fortunate in growing such a nice lot of plants.

We wish to thank our friends that have been dealing with us so long for their continued support, and to express our hope, and belief that we may serve you with as much satisfaction this year as we have done the former years. To those who have never dealt with us we invite you to join our many friends and be convinced of our ability to serve you with satisfaction and profit.

With due appreciation of past favors and best wishes for a profitable season, we are, E. W. JOHNSON & CO.

P. S. We respectfully solicit your orders.

Some Varieties We Grow

<p>AMANDA—(Per.) Among the best mid-season varieties. Plants are very large, very vigorous and healthy, making enough plants for a good fruiting row. Very prolific of extra large</p>	<p>BUBACH—(Imp.) An old and very popular variety. The fruit is very large and handsome, moderately firm and of good quality. Commands fancy prices for those having a local market</p>
---	---

BIG JOE

<p>bright glossy red berries, of good quality, and firm enough for distant shipment. It is a good one and you will be pleased with it.</p>	<p>or the shipping distance is not too great. In plant growth it is vigorous, but does not throw out excess of runners. If you have a nearby fancy mar-</p>
--	---

GROWERS OF PURE-BRED STRAWBERRY PLANTS

ket you will be pleased with the Buchach.

BIG JOE—(Per.) This is as splendid variety, that is being extensively grown in this county, and in our judg-

productive of extra large good quality berries that bring top prices in market. It is a larger berry than the Chesapeake, ripens a few days earlier and has as fine appearances as any strawberry that we have ever seen. It is

CHESAPEAKE

ment it is second to none, all points considered. It has been grown in this section several years, each year netting as much or more money per acre than any other variety grown for commercial purposes. It is wonderfully

uniform, well colored and firm enough for distant shipment. The plants are strong growers and a good plant maker with luxuriant light green foliage. You can make no mistake by including the Big Joe in your order.

E. W. JOHNSON & COMPANY, SALISBURY, MARYLAND

CHESAPEAKE—(Per.) This is a good late variety that is admired by many growers, making enough plants to give best results in fruiting. The fruit is a dark red with prominent yellow seed, uniformly large, averaging larger than Gandy, more productive and of good quality. Flavor excellent.

COLBORN'S EARLY—(Per.) It is as early or a few days earlier than any variety that we have ever seen. Very productive of medium sized berries that color all over, very firm, and of good quality. The plants are medium sized, very strong and healthy, and one of the very best plant makers. Colborn's Early will please anyone wanting an extra early variety and medium sized berries. We guarantee them to please you, or we will refund every cent paid for such.

↙ **ELATE**—(Imp.) This is an excellent late variety, fully as late or a few days later than the Gandy. The plants are large, strong growers and a good plant maker, with a tall dark green foliage that shows no blemish or rust. The berries are large to extra large, well colored, with beautiful green caps, very uniform in shape and firm enough for distant shipment. We introduced this variety in the spring of 1917, and sold quite a lot of them under our guarantee that the purchaser should be pleased with them or we would refund every cent paid for them, and until this date we have never received a single complaint against them. We

know of no better recommendation we could give than this.

KELLOGG'S PRIZE—(Imp.) A good late variety, very productive of high quality, bright glossy red berries, with yellow seeds, slightly imbedded which makes a beautiful appearance when

MISS

packed for market. Plant Kellogg's Prize with Big Joe and you will have a winner.

KELLOGG'S PREMIER—(Per). One of the very best extra early varieties, with but few if any its equal. It is a strong grower which seems to succeed on most soils and produces a

GROWERS OF PURE-BRED STRAWBERRY PLANTS

heavy crop of large bright red berries of good quality and flavor. Surely it is one of the real money makers.

KLONDYKE—(Per) Considered by many growers to be one of the very best early varieties, being very popular with the growers locally in this coun-

ARY

ty. Plants are of medium size, makes a vigorous growth and a great plant maker. Fruit large and of best quality. It is one of the best shippers and commands the top price in market.

LUPTON—(Per). A good late variety. Plants are healthy, strong growers, making enough plants for

a good fruiting row. Foliage dark green. Very productive of beautiful brilliant red berries that resemble Chesapeake in shape. Ripens perfect and an excellent shipper.

MISSIONARY—(Per). While this variety is often compared with the Klondyke, we fail to see much resemblance more than in plant growth. In plant growth they are very much alike. It has been well tested in almost every state in the union and generally becomes a favorite where an early variety is wanted. It is being extensively grown in the south, owing to its wonderful shipping qualities and handsome appearance in the package. Plants are medium large, healthy, strong growers and a great plant maker. It is productive of large, good quality berries that hold their size well through the season. One of the very best commercial varieties.

NIC OHMER—(Per). A good variety to plant for fancy trade. Berries an extra large, bright glossy red, of good quality and flavor. A good shipping variety, also excellent for local market or home garden. It is really a fancy berry that commands top prices wherever it is seen. It is a good plant-maker. Makes enough large, strong plants for best results in fruiting.

E. W. JOHNSON & COMPANY, SALISBURY, MARYLAND

SENATOR DUNLAP—(Per). The plants are very hardy and vigorous, and where they have an average chance can be absolutely depended upon. Some varieties may surpass it in some respects, but as an all around berry it has few equals. Fruit med-

maker and one of the most productive of the fall bearers. The fruit is medium to large, dark glossy red, colored all the way through, ranking with the very best in quality.

SUPERB—(Ever-Bearing). This va-

NIC OHMER

ium, large, very uniform in shape and size. Color dark red, with a glossy finish, shading to a deep scarlet on the under side.

PROGRESSIVE — (Ever-Bearing). Described by many as the best of the fall bearing kinds. It is a good plant

riety is admired by many growers. It is a good plant-maker, making as many plants as desired for a good fruiting row. The fruit of the Superb is very large and attractive. With us not quite so productive as the Progressive. Fruit larger and equally as good.

GROWERS OF PURE-BRED STRAWBERRY PLANTS

PEERLESS— (Ever-Bearing). The plants are large and healthy, and a fair plant-maker, with luxuriant light green foliage. It is not so productive as the Progressive, but the berries are very large and attractive.

IDEAL — (Ever-Bearing). Berries

Chesapeake.

1017 MINNESOTA— (Ever-Bearing).

In our judgment this is one of the best of the fall-bearers. The plants are very healthy, strong growers, and the best plant maker of the fall bear-

A FIELD OF PURE-BRED STRAWBERRY PLANTS

are very large and attractive, and of good quality, resembles the Peerless very much. We consider them so much alike that one description could be easily taken for either variety. Ideal, Peerless and Superb resemble the

ing kinds. Foliage very dark green. It is very productive of beautiful dark red berries that ranks second to none in quality. We consider it the only rival to the Progressive.

MARYLAND STATE HORTICULTURAL DEPARTMENT	
<small>MARYLAND STATE COLLEGE OF AGRICULTURE AND EXPERIMENT STATION</small>	<small>DEPARTMENTS OF ENTOMOLOGY AND VEGETABLE PATHOLOGY</small>
CERTIFICATE OF NURSERY INSPECTION	
No. 76. Duplicate.	
To Whom It May Concern:	
THIS IS TO CERTIFY, That on the 19th day of August, 1922, we examined the Nursery Stock of E. W. Johnson & Co. Nurseries growing in their nurseries at Salisbury County of Wicomico State of Maryland, in accordance with the laws of Maryland, 1898, CHAPTER 287, SECTION 58, and that said nurseries and premises are apparently free, so far as can be determined by inspection, from the San Jose Scale, Peach Yellows, Pear Blight and other dangerously injurious insect pests and plant diseases.	
This Certificate is issued after August 19th, 1922 and does not include nursery stock not grown within this State, unless such Stock is previously covered by Certificate and accepted by the State Entomologist and State Pathologist.
