My Garden Favorites

Summer
1922

Why do we dream of roses,
When the garden is buried in snow ?
Ever the future encloses
The beauty we're longing to know !

Why, in our hearts, keep thronging
The visions that elude us so ?
Truly, faith is prolonging
The ideal, that we may grow !

—From "*Outdoors and In.*"

My Garden Favorites

SUMMER EDITION

Holland Bulbs

In the midst of your early Summer planting and while you are still revelling in the recollection of the beauty of your Springtime beds of tulips, daffodils, hyacinths and the brilliant blooms that greeted you during the Winter, we send you the Summer Edition of MY GARDEN FAVORITES, our complete announcement of Holland Bulbs, so that you may make your selection, to insure even a larger measure of joy and happiness for the coming year.

Our system of shipment of bulbs direct from the grower in Holland to our customers, adopted three seasons ago, has proven the most satisfactory and gratifying arrangement ever made in the distribution of Holland bulbs to the American garden lover.

All waste and the needless charges for cartage, storage and handling are eliminated by this method and our customers are assured of select sound stock of a trueness to type, color and variety never before possible under the old wasteful practices, and at prices actually lower than they formerly paid for nondescript selections.

There is one very, very important point—ORDERS MUST BE SENT IN EARLY, to permit the Holland growers ample time for selecting and individually packing your complete selection for September shipment.

Let us urge you to **make your list promptly and generously** in the full confidence that you will receive the choicest stock, DIRECT from the best nurseries in Holland.

ALL BULB ORDERS SHOULD REACH US NOT LATER THAN JULY 15TH

Summer Vegetable Seeds

It is not yet too late to complete your supply of vegetable seeds for July, August and September planting and to put in the seeds that were overlooked in your first order. The special listing in this Summer Edition will serve as a reminder of the varieties that are especially desirable for sowing during the Summer months. Orders will be shipped same day as received to insure prompt delivery.

Hardy Flower Seeds

A selected listing of old fashioned hardy flowers from seeds is another feature of the 1922 Summer Edition, that will repay perusal. You will find dozens of your favorites in this list, many of which have been strangers to your garden for years and you will have the added enjoyment of welcoming them back to your heart. They are all suitable for planting up to August first.

Strawberry Plants

What is more delightful than a dish of strawberries right out of your own home garden? The varieties we offer are abundant croppers and if planted in July or August will give you a bountiful supply of fruit by next Spring, perfect in shape and flower. By a judicious selection from the June, Mid-season and Late varieties you can enjoy a continuous crop almost until frost.

Altogether, the 1922 Summer Edition is another evidence of that "Just Delightfully Different" service that we endeavor to extend to our customers. If it will assist your gardening effort we will feel eminently repaid.

MAURICE FULD, INC.

Paul E. Atkinson, President.

NOTE.—"The Culture of Bulbs," by Maurice Fuld, containing invaluable information and instructions on the proper care and cultivation of bulbs for indoor and outdoor purposes—in fact everything you need to know on the subject of bulbs—is now issued as a separate publication in convenient form for ready reference. A copy of "The Culture of Bulbs" will be included with every bulb order.

*"Just Delightfully
Different"*

THE NEW LILY FLOWERED TULIP

This handsome and distinct new race of tulips has been derived from crossing *Tulipa retroflexa* with a pink Darwin variety, and the result is a sturdy growing form with large, substantial flowers that still retain the form and elegance of *retroflexa*, all segments reflexing a little at the tips.

	Doz. Per 100	
Adonis , long shaped flower, with reflexed petals, vivid rosy-red.....	\$2.50	\$17.00
Artemis , long stemmed, elegantly reflexed petals, bright carmine rose with pure white base.....	2.50	17.00
Marvel , very distinct, sweet scented variety, inside old gold, outside salmon rose edged yellow.....	3.00	20.00
Siren , First Class Certificate R. H. S., London. A very beautiful flower. The color is rich cerise pink, with pale pink at the margins of the segments and a white base.....	2.50	17.00

These bulbs were offered to the American public in 1920 for the first time and only a limited quantity will be allowed to come here this fall. Why not outdo your neighbor and grow something he does not have in his garden?

FULD'S FAVORITE DARWIN TULIPS

	Doz. Per 100	
Ant. Roozen , gigantic flower of brilliant rosy pink, height 24 inches.	\$.080	\$5.50
Baronne de La Tonnaye . Begonia rose edging to geranium pink. It grows to a height of 24 inches, and when we look into the heart of the flower there is revealed to us another beautiful color combination; namely, deep at the base, there is a circle of pure white, further beautified by rich black anthers. If you grow a bed of these in the garden, always edge it with a pink English Daisy, which is almost of the same shade, and it looks as if the ground was the mirror of the flowers above.	.70	4.50
Clara Butt . The most popular variety of garden Tulips, perhaps. Its height is 18 inches, the color a beautiful, soft salmon pink. It is distinct in color and looks lovely when combined with the lavender shades.	.70	4.50
Edmee . Glowing salmon pink, showing in the interior a blue base and black anthers; height, 21 inches.	.85	6.00
Erguste . Height 24 inches, dark heliotrope, inside violet with white base, extremely handsome and rich.	.70	4.50
Europe . Soft scarlet, showing a pink midrib in each petal. The inside reveals a blue base and blue anthers; height 18 inches.	.85	6.00
Feu Brilliant . Height 24 inches. The most brilliant scarlet garden Tulip, enhanced in the interior by a well-defined base of deep blue margined white. This outline at the base is one of the masterpieces in nature.	.85	6.00
Flambeau . Height 18 inches. Brilliant rosy carmine, showing an interior with a blue base and blue anthers.	.80	5.50
Fra Angelico . A gigantic flower of a rich deep purplish maroon. The flowers themselves are enlightened by a gloss which makes them most attractive when seen. Height 21 inches.	.70	4.50
Gretchen (See Margaret).		
Isis . Height 24 inches. Its shade of scarlet is slightly lighter than Feu Brilliant. It shows a well-defined base of deep steel blue, with narrow edgings of white.	.70	4.50
Kate Greenaway . Extremely pale lilac, often described as white, because the white is the background of the lilac shading. When lavenders are desired in variety, this sort is very essential to have a more complete combination.	.70	4.50
King Harold (Mahony). Height 18 inches. Deep vermilion, showing in the interior a black base and black anthers. A real monster of a flower.	.85	6.00
La Tristesse . Gigantic flower on a massive stem, attaining a height of 24 inches. Color is purplish mauve, with a flush of bronze in the midrib of each petal. The base in the interior is quite distinct; namely, being pale green and with the black anthers above, we have a combination that cannot quickly be approached.	.70	4.50
Margaret (Gretchen) . Height 18 inches. Rather a small flower when compared with the other gigantic sort, but its color is so distinct and so pleasing that we always want it in the garden. Pale cream pink, showing in the interior a base of delicate porcelain lavender. The anthers are quite small, but distinct blue.	.70	4.50
Mauve Clair . A giant among the Darwins. The flowers are really gigantic. The color, a very pale mauve, with silvery edge. The base is dark blue. Height 24 inches.	.80	5.50

FULD'S FAVORITE DARWIN TULIPS—Continued

Doz. Per 100

Mr. Farncombe Sanders. Height 24 inches. A tremendously large flower of clear scarlet, showing in the interior a white base and black anthers.....	\$0.85	\$6.00
Mrs. Potter Palmer (Mr. D. F. Fish, Fashion). Dark colors among the Darwins are not so very numerous, and when they are clear they are most desirable in our combination of blues in the garden. The flowers of this variety are rather elongated and very large and appear in a glowing purple as no other variety can show. Height 21 inches.....	.75	5.00
Nora Ware. Pale heliotrope. Height 20 inches. Flowers very large	.70	4.50
Philippe de Commynes. Height 22 inches. The color is purplish crimson or what some may call "true mahogany." The interior shows us a large purple base and purple anthers. One of the richest colors in Darwin Tulips; and as to size, we have yet to find a larger flower.....	.75	5.00
Pride of Haarlem. A dazzling color which is not easy to describe. "When, during the flowering season, I made my personal observation notes as to the color, I jotted down 'that wonderful pink shade I know in the Paeony, called 'Mons. Jules Elie,' with a sheen of rosy scarlet.'" It is brilliant in the extreme; it has all the warmth a color could wish for. It looks at you from a distance and makes you stop in front of it with a true gardener's exclamation, "Oh, how beautiful!" The size of the flower is immense. It shows us on the inside a deep blue base and blue anthers. The height of stem is 24 inches.....	.75	5.00
Professor Rauwenhof. Height 18 inches. Brilliant rosy scarlet, showing in the interior a well-defined circle base of steel blue and blotches of white. The anthers are clear blue. The size of the bloom is of a giant.....	.90	6.50
Psyche. Here again we have a very popular sort, due to its refreshing color. One can find as many different descriptions of this Tulip as there are catalogues. It is a pink of a most refined nature. Our suggestion would be to always use it in connection with such varieties as Rev. Ewbank or Nora Ware, for it seems to lean toward these shades, and when we combine the three in a vase, they are really handsome. The height of the stem is 24 inches. The flower is very large and shows up in the interior a pale blue base and black anthers.....	.75	5.00
Rev. H. Ewbank. One of the best of the lavender shades, better described as "deep mauve," showing in the interior a white base and black anthers. The height of the stem is 24 inches. In size it is a giant.....	.65	4.00
The Sultan. By many described as the "Black Tulip." It is very similar to the variety "La Tulipe Noir." The flower is but of medium size, the shade a maroon black. In the interior we see three white stripes, which look rather attractive. The anthers are black. Height 22 inches.....	.65	4.00
White Queen (La Candeur). Almost pure white, showing at the edges a faint flush of soft pink. Height 20 inches.....	.75	5.00
Yellow Darwin Tulip. This name has been given by the trade to the variety which, in reality, is a May flowering Tulip and correctly named "Inglescombe Yellow." (See May-flowering Tulips.)		

You will note that we have been very particular in our descriptions to give a very detailed account of the interior of each flower, because this constitutes the best guarantee that, if you find these descriptions correct, you know you have the true variety.

FULD'S DELIGHTFUL MIXTURE

Would you believe that with the growers in Holland one can find fully one thousand distinct varieties of garden Tulips? Entirely too many sorts for any one to catalogue, but then we often desire in our gardens effects that spell extreme gaiety, and with no other flower can we create this effect than with the Tulip. The Darwin Tulip today is the finest exponent of its family, and we offer a mixture which is absolutely unrivalled as to the unlimitedness of its varieties; but, at the same time, we still consider the critical gardener whose eye for color harmony is quite sensitive, and we have tried to avoid in this mixture any such colors which might be considered unharmonious in a collection. We promise you the greatest delight if you make a planting with this mixture.

Per Doz., \$0.55; per 100, \$4.50; per 1,000, \$40.00

COMPLETE LIST OF DARWIN TULIPS

Special Offer

To introduce this wonderful class of Tulips to every garden, we will offer a special collection of 25 choice sorts—our selection—10 bulbs of each sort or 250 bulbs in total at.....\$15.00

	Doz.	Per 100
Allard Pierson, bloodred.....	\$0.75	\$5.00
Andre Doria, velvety dark chestnut.....	.80	5.50
Anton Mauve, enormous flower, deep bluish lilac.....	3.00	20.00
Ariadne, crimson scarlet, violet center.....	.85	6.00
Bartigon, fiery red, forces well.....	.90	6.50

COMPLETE LIST OF DARWIN TULIPS—Continued

	Doz. Per 100	
W. Copeland (Sweet Lavender).....	\$0.85	\$6.00
This is the best early forcing Darwin Tulip and may be had to perfection early in January. Its color, when forced, is a delicate lavender, very rare at that time of the year. For outdoor growing, we cannot recommend it, as the color is a common rosy lilac in the open.		
Whistler , crimson scarlet, blue base, edge white, extra fine	.85	6.00
Wm. Goldring , brilliant dark carmine rose, with crimson shading, center electric blue and white.....	1.75	11.00
William Pitt , deep, scarlet, tinted purple, blue and white center; excellent for pots.....	1.00	7.50
Zulu , dark purplish black, extra.....	.80	5.50
There is scarcely another spring-flowering bulb to rival Darwins in garden planting, for it is there that the stately, noble and dignified character of the plants gain fullest expression.		

MAY FLOWERING OR COTTAGE
GARDEN TULIPS

This class of Tulips differ from all others in that they are late flowering, coming in bloom with the "Darwins." They are very stately and have different forms, and taller than the single early sorts, but not quite as tall as the Darwins. The heights vary from 12 to 18 inches. Some of the varieties, as "Picotee," "Retroflexa" and "La Merveille" are superb when grown in solid beds or in clumps in borders. These are also hardy and may be left in the ground during summer. For this reason, they should be planted 6 inches deep and 6 inches apart.

FULD'S FAVORITE SORTS

	Doz. Per 100	
Fuld's Superfine Mixture. If you want variety of Tulips in your garden, this mixture will surprise you, for in this class there is a greater variety of colors than in any other. Really every sort known in this class is found in this mixture.....	\$0.40	\$3.50
Bouton d'Or (Ida, Golden Beauty). A very roundish flower. Fully 2 inches in depth, of a lemon chrome yellow. It is most beautiful when combined with the "Trollius Europeus," the double yellow buttercup. Let it rise through a carpet of mauve Aubrietia or edge it with a double white Arabis. Another good combination is when you plant it with the lavender Phlox Divaricata Canadensis, or the blue forget-me-not.....	.70	4.50
Elegans , a very elongated flower, which appears very early, of a dark crimson color, and when fully matured the petals reflect, showing a glowing interior.....	.70	4.50
Ellen Willmott , a soft, creamy yellow, elongated flower, reflects petals. This is a noble flower, of a most delightful shade, and exceedingly handsome when combined with the yellow Doronicum.....	.75	5.00
Fairy Queen , rosy heliotrope, edged amber yellow. A wonderful color and most artistic; splendid for exhibitions, or in clumps in the border.....	.65	4.00
Fulgens Maxima Lutea (Mrs. Moon). Rich, golden yellow. So frequently mentioned in Mrs. Francis King's delightful book, entitled "A Well-Considered Garden".....	.85	6.00
Gesneriana Aurantiaca Major (Orange Beauty). Height 19 inches. A cup-shaped flower of great depth (3 inches), true crimson, with a sheen of plum on the outer petal. When you peep into the cup, you behold a rich, deep steel blue, almost black base, enhanced by black anthers and yellow piston. The most brilliant of all garden tulips.....	.80	5.50

MAY FLOWERING TULIPS—Continued

Doz. Per 100

Inglescombe Pink. The very deep elongated flower, held erect by a stout stem. Height 18 inches. The shade of pink is very pleasing, delicate and vivid.....	\$0.75	\$5.00
Inglescombe Yellow. Also called "The Yellow Darwin Tulip." The form is exactly like the preceding variety, but in color a glossy canary yellow. It is exceedingly handsome, and just as attractive as it could be both in the border and for cutting.....	.65	4.00
La Mareveille. A lily-like flower of unusual size, form and color. Height 17 inches. As a bud, the form is that of a magnolia. The outer petals are several shades lighter than the inside. The color is best described as a true oxheart cherry red. The interior shows us a base of a correct maltese cross shape, is of pale yellow with a remarkable broad ray-like edge of deep green; anthers and piston are of drab color.....	.75	5.00
La Reve (Sarah Bernhardt). One of the most artistic-colored tulips in the entire collection of the May-flowering type. The stem is exceedingly erect 15 inches in height, and is crowned with an egg-shaped flower of that particular shade of pink which the artists describe as "tapestry rose".....	1.50	10.00
Moonlight. Height, 20 inches. A stately tulip of elongated form, with pointed petals, which are fully three inches deep. The color is identical to the shade described in Dr. Ridgway's color chart as "Pinard Yellow." When you peep into the flower, you will find the shading a little deeper than on the outside, but all other attractions, as anthers, piston and base, being of the same color as the flower. When combined with the yellow buttercup or the yellow Iceland Poppies, or immediately in front of pink Azaleas, it forms one of the loveliest pictures.....	.80	5.50
Mrs. Moon (See Fulgens Maxima Lutea).....	.85	6.00
Picotee (Maiden's Blush). Here is a flower which is a perfect delight to watch developing from a bud to an open flower. As a bud it is pure white, gradually taking on a pencil-edge of deep pink. This edge enlarges as the flower progresses from maturity, and when the flower is passing it is pink throughout. The form is elongated and very deep, and is really most interesting and attractive.....	.60	4.00
Retroflexa. A flower that can only be appreciated when seen growing in the garden. The long, pointed petals which hold tight in the bud finally reflect until the flower becomes the loveliest of all lilies and it remains in this form throughout the entire period of perfection. Long rows of these tulips in front of shrubbery or filling a narrow border have all the appearance of the finest garden lily. Its color is a cool, pale yellow.....	.70	4.50
The Fawn. One of the most artistically colored flowers in the whole collection. Height, 19 inches. A rather plum-shaped flower, shows us three colors which are combined as follows: The center or largest part of the petals are of an exquisite apricot form, delicately edged, peach pink, but all this is surrounded by a fairly large margin of plush white. The bases of the petals are of a picric yellow, and so are the anthers and piston.....	.60	4.00

TULIPA FLORENTINA ODORATA

A tulip species of special merit. The flowers are long and narrow and possess one of the sweetest odors. They are fairly early and are especially desirable for the border or rockery. They are absolutely hardy and remain with us for years without replanting. Plant six inches deep and four inches apart.....	.80	5.50
--	-----	------

COMPLETE LIST OF MAY FLOWERING TULIPS

	Doz. Per 100	
Avis Kennicott , rich yellow, black base, large flower.....	\$0.90	\$6.50
Belle Lisette , white, with cherry rose flames, beautiful.....	.90	6.50
Bouton d'Or (Ida, Golden Beauty), pure golden yellow.....	.65	4.50
Bridesmaid , violet, red striped.....	.65	4.50
Caledonia , orange, scarlet, center greenish black.....	.65	4.50
Carnation , the true old English picotee tulip; flower larger than the common picotee tulip, white, gradually changing into carmine rose	.75	5.00
Cottager , deep rosy red, with yellow base.....	.70	4.50
Columbus (syn. Gala Beauty), golden yellow, with vermilion blotches	.90	6.50
Coronation Scarlet , vermilion scarlet, with large black center; very brilliant.....	.80	5.50
Crested Crown , yellow and scarlet flames, with a greenish crest outside	.90	6.50
Crimson Pompadour (maculata globosa the Nigger), deep crimson, large flower.....	.85	6.00
Daybreak , soft yellow, shaded purplish violet.....	.80	5.50
Doris , rosy lilac, shaded silvery gray.....	.75	5.00
Elegans , dark crimson, reflexing petals.....	.70	4.50
— Alba (White Crown), creamy white, carmine edge.....	1.00	7.50
— Lutea Maxima (Golden Spire).....	1.00	7.50
— Lutea Pallida (Leghorn Bonnet).....	.75	5.00
Ellen Willmott , soft creamy yellow, reflexed petals, elongated flower	.75	5.00
Emerald Gem , coral red, deep green center.....	.75	5.00
Fairy Queen , rosy heliotrope, margined amber yellow.....	.60	4.00
When grown under glass, this variety has a most beautiful silvery heliotrope shade. Very much recommended.		
Fulgens , crimson.....	.75	5.00
— Maxima Lutea (Mrs. Moon), rich golden yellow.....	.85	6.00
Gesneriana , Alba (Rosaline), white.....	.75	5.00
— Alba Marginata , white with magenta edge.....	.75	5.00
— Aurantiaca Masculata (Orange Globe) orange.....	.75	5.00
— Aurantiaca Major (Orange Beauty), scarlet.....	.75	5.00
— Ixioides , pale yellow, fine black center.....	.90	6.00
— Lutea , fine golden yellow, very useful variety.....	.60	4.00
— Lutea Pallida (Mrs. Keightley), pale primrose, fine form, fragrant	.65	4.50
— Major (Spathulata), true, rich crimson, scarlet with blue black center; extra.....	.75	5.00
— Rosea , rosy carmine.....	.75	5.00
Glare of the Garden (Maculata globosa grandiflora), fine crimson, black center, with yellow margin.....	.80	5.50
Gold Dust , extra deep yellow, with delicate markings of red on margin of petals.....	.75	5.00
Golden Spire , enormous flower reflexing petals of a deep golden yellow, finely edged orange scarlet, extra.....	1.00	7.00
Goldflake , orange scarlet, striped gold.....	.75	5.00
Hammer Hales , mahogany brown, edged orange, large, long shaped flower.....	2.25	15.00
Henry Hudson , deep, brilliant scarlet; black base.....	.75	5.00
Illuminator , deep yellow, flamed orange.....	2.50	18.00
Inglescombe , pink.....	.75	5.00
— Scarlet , intense scarlet, black base.....	.80	5.50
— Yellow , large globular flowers, glossy canary yellow, very beautiful, cup-shaped; may be called the yellow Darwin tulip; a very fine tulip for borders and cutting.....	.60	4.00
Isabella (Blushing Bride) (Shandon Bells), creamy white, with carmine rose.....	.65	4.50

Yellow (Golden) Crown , yellow edged with red.....	.65	4.50
Yellow Picotee , pale yellow, carmine rose edge.....	.80	5.50

THE OLD DUTCH BREEDER TULIPS

It was from these that the first Darwin Tulip broke and so they are very similar to them. Of the same height, same flowering season and same robustness, they differ in a long elongated flower of unusual size and in their wonderful colorings. These are quite old as to their existence and have been neglected for many years. The present taste of artistic colors has, however, called them into prominence once

THE OLD DUTCH BREEDER TULIPS—Continued

more. Nature's happiest color combinations of purple and bronze, grey and lilac, yellow and bronze, brown and orange, are revealed to us in this group. The flowers are mostly large, but of perfect form and are borne on tall strong stems.

They may be successfully brought into bloom in the greenhouse by the first week in April.

They are ideal for the hardy border or in groups before shrubbery.

Garden Culture: Plant 6 inches deep and 6 inches apart and use in the same way as Darwin Tulips.

	Doz. Per 100	
Adeline Pattie , large flower, deep wine red, shaded lilac, fine white base, edged steel blue.....	\$2.00	\$13.00
Alcide , yellow tinted bronze.....	.85	6.00
Apricot , deep bronze orange.....	.90	6.50
Archeron , brown red.....	.80	5.50

Noir Veritable (Black Chief), dark purple black.....	.80	5.50
Phoebus , pale dull lilac, edged bronze.....	1.25	8.50
Plutarchus , bronze with terra cotta base.....	1.50	11.00
Prince of Orange (Sunset), terra cotta with orange edge, very fine..	.85	6.00
Queen Alexandra , primrose, shaded orange, black anthers.....	.70	4.50
Rose des Rames , rosy red.....	.90	6.50
Ruby , deep maroon red with greyish bloom, pointed petals.....	.90	6.50
Sabrina , a fine coffee brown with narrow edge of golden bronze.....	.85	6.00
Superba , chestnut brown with golden brown edge.....	1.00	7.50
Velvet King , dark purple, white base.....	2.50	15.00
Violata , rosy lilac with a tinge of bronze at margin, yellowish center, edge slaty blue, large flower.....	1.00	7.00

SINGLE EARLY TULIPS

What are single early tulips? This question we must answer from a standpoint of preference. These are the tulips we used to plant in days gone by, when we used to have circles and stars and crescents in the lawn and we made what was then called artistic color combination of red and yellow, and the more glaring the red the better we liked them. These are all days of the past, never to return again, and no one will mourn them. Who doesn't know the tulip "Keizerkroon?" That big flower in red with broad yellow edge. Would you want them again?

Now we don't want you to understand that the entire class is no longer needed, for it is, and we want to tell you why.

This class of tulips grows dwarf 8 to 12 in. high and comes to bloom early in May, and is usually all over by May 15th. Where we have formal gardens we can use these, particularly the delicate colored ones, and then we can lift them by Decoration Day and plant our annuals and bedding plants. Of course you can also use them for whatever purpose you plant any other tulip, but one thing must be observed. The bulbs must be planted only 4 in. deep and only 4 in. apart to be effective, and they must be lifted when the leaves turn yellow and must be allowed to dry and then stored in a dry, airy place until the Fall, when they are planted again.

The second year they are much poorer in quality and after that are worthless. They really ought to be replaced with fresh bulbs each year.

FOR GROWING IN POTS

They are superior to any other class of tulips for this purpose, for they succeed better and look better.

FAVORITE SELECTION

In order to assist our customers in selecting Tulip varieties for beds, borders, etc., we beg to give herewith a list of the most popular bedding varieties classed in very early, early and late varieties, the relative height of stems is indicated by T. tall, M. medium and D. dwarf.

Very Early Varieties.—D. Scarlet Duc, D. White Duc Maxims, M. Crimson King, T. King of the Yellows, M. La Reine, M. Maas, T. MacKinley, M. Montresor, M. Primrose Queen, D. Vermilion brilliant, D. Immaculee, M. Prosperpine, M. Rembrandt.

Early Varieties.—D. Artus, D. Bachus, D. Belle Alliance, M. Canarybird, D. Cottage Boy, M. Chrysolora, D. Cottage Maid, M. Calypso, M. Cromson King, M. Duchesse de Parma, M. Dusart, M. Fabiola, T. Golden Queen, D. Gold Finch, M. Joost van Vondel, T. Keizerskroon, D. Jenny, M. Lady Boreel,

SINGLE EARLY TULIPS—Continued

M. La Grandeur, M. La Riente, M. Primrose Queen, M. Ophir d'or, T. Pottebakker White, T. Pottebakker Yellow, M. President Lincoln, T. Prince de Ligne, D. Princess Marianne, T. Princess Wilhelmina, M. Prosperity, M. Queen of the Netherlands, T. Red Admiral, D. Rose Grisdelin, T. Sir Thomas Lipton, D. Stanley, T. Thomas Moore, M. van Berchem, M. van der Neer, T. White Hawk, M. Wouwerman, D. Yellow Prince.

Late Varieties.—T. Crimson Brilliant, D. Cerise Grisdelin, T. Couleur de Cardinal, T. Le Reve, T. Pink Beauty, T. Prince of Austria, M. Princess Helene, M. Rosamundi Huikman, M. Rose Luisante, D. Royal Standard, T. White Swan.

Varieties for Exhibition of Amateur Collections

The following new and choice varieties are recommended: Brilliant Star, Cottage Boy, De Wet, Enchantress, Flamingo, Golden Lion, Jaune Aplat, Lady Boreel, La Grandeur (Grand Scarlet), La Remarquable, McKinley, Pink Beauty, President Taft, Unique, Red Admiral, Sir Thomas Lipton, Rising Sun, White Beauty.

Duc Van Thol Tulips

This class of tulips is rather small, but very early, and are perhaps the prettiest tulips when massed in shallow pans for the house.

Not less than six bulbs of any tulip will be furnished unless they are offered by the single prices.

	Doz.	Per 100
Cochineal, rich vermilion, large flowering Duc, extra early.....	\$0.70	\$4.50
Rose.....	.70	4.50
Scarlet.....	.65	4.50
White Maximum, improved White Duc, larger flower.....	.65	4.50

Wouwerman, claret-purple.....	.75	5.00
Yellow Prince, yellow, sweetscented.....	.60	4.00

DOUBLE TULIPS

Double Tulips have a merit. They stay longer in bloom as they require longer time to unfold their many petals and be used for all purposes in the garden as well as for growing in pots. They come into bloom a few days after the single Early Tulips, but stay perfect fully a week longer.

Varieties for Exhibition or Amateur Collections

The following new and choice varieties are recommended: Bleu Celeste, Boule de Neige, Brimstone, Electra, Golden King, Peach Blossom, Prince of Orange, Rose d'Amour, Schoonoord, Sweetheart, Toreador, Velasquez.

	Doz.	Per 100
Rainbow Mixture, extra fine.....	\$0.50	\$3.50

William the Third , bright red, very large flowers, excellent bedder..	.80	5.50
Yellow Rose , true, deep yellow, late.....	.75	5.00

PARROT TULIPS

This class has become very popular of late, and is remarkable for its fantastic form and coloring. It has just one fault: that the flower is too heavy for the stalk, and, after a storm, the flowers bend.

The flowers are large and each petal is gracefully fringed, while the colors are of such wonderful combination that they resemble the plumage of a beautiful parrot. Bulbs should be planted close (four inches) so that the plants support each other. Plant four inches deep.

In groups of one sort they are delightful in the border or rockery, or even in masses in an open bed they are gay in the extreme.

	Doz.	Per 100
Coffee Color , brown and yellow.....	\$0.65	\$4.50
Constantinople , red, shaded orange.....	.65	4.50
Cramoisi Brilliant , deep crimson, extra.....	.65	4.50
Lutea Major , yellow striped.....	.65	4.50
Markgraaf , true yellow inside, red scarlet striped outside.....	.65	4.50
Perfecta , light scarlet, striped on greenish yellow ground.....	.65	4.50
Preciosa , red, gold striped.....	.65	4.50
Superfine , mixed.....	.55	3.50

NARCISSUS, DAFFODILS OR JONQUILS

The above terms are often misused, for what one understands to be a Daffodil another calls Jonquil, and vice versa, and all, of course, are Narcissus.

In comparing bulbs of different classes, we must frankly admit that this class here mentioned proves the most satisfactory of all, and one gets more real value from them.

A garden without Daffodils is a garden without poetry, and a garden without poetry is one minus the greatest charm.

There are two seasons of the year when we welcome great masses of gold in the garden, for it means sunshine, and we welcome sunshine both in the early spring or in the late fall. No other flower gives us the wealth of gold as the Daffodil.

In connection with pot culture, we want to impress our readers with one fact, namely: that the "double nosed bulbs" are preferable for this purpose, because they throw up several flowers and thus make a more effective showing.

The best varieties for pot culture are prefixed (P).

Daffodils do splendid when grown in vases filled with fibre.

Outdoor Culture: The depths in which to plant these bulbs vary according to the size of bulbs and so this information is imparted with each sort. Daffodils should always be planted close, no farther than six inches apart. They look splendid when grown in clusters of twelve or twenty-five in the border or in stately rows in front of shrubbery or massed in open beds.

LARGE TRUMPET DAFFODILS

The varieties offered under this heading are all of the single form with a broad cup or perianth and a long, extra large trumpet.

The usual form of bulbs we furnish is the largest size round form, which produces one specimen flower. With a number of varieties you will notice that we offer two sizes, namely: "double nose blub" and "first size round bulbs." "Double nose" means that the bulb is a composition of several connected under one skin or by one root base and such bulbs throw up two to four flower spikes. If you want masses of flowers, order the "double nose" size, but if you want perfection and size of bloom, use "first size round" bulbs.

MY FAVORITE SORTS

Doz. Per 100

(P) Emperor. Deep primrose perianth, rich full yellow trumpet, flowers of enormous size and grand texture, extremely showy, and having enormously large bulbs. Plant 6 inches deep. Extra fine double nose bulbs.....	\$0.90	\$6.50
First size round bulbs.....	.70	4.50
(P) Empress (Bicolor). Perianth pure white and of great substance. Trumpet bright yellow and extremely large. The exact counterpart of Emperor in form and size, but having a white cup instead of yellow. Most attractive by this color combination. Plant 6 inches deep.		
Extra fine double nose bulbs.....	.90	6.50
First size round bulbs.....	.70	4.50
(P) Golden Spur. The entire flower is of a rich, golden yellow, very large but not so expanded as Emperor. Plant 4 inches deep.		
Extra fine double nose bulbs.....	1.00	7.50
First size round bulbs.....	.75	5.00
(P) King Alfred. One of the latest introductions, being simply monstrous in size. The perianth is golden yellow and the trumpet is of the same shade. At the same time, the mouth is very deeply frilled, giving it a most refined form. It is extremely bold and the prize winner in flower shows. Only a limited quantity for sale. Plant 6 inches deep.		
Extra large double nosed bulbs.....	2.00	15.00
First size round bulbs.....	1.75	11.00
(P) Madame de Graaf. A most exquisite flower and very refined in appearance. It is the nearest to a pure white, large trumpet Daffodil. The perianth is pure white; the trumpet at first is soft primrose but passes gradually to the purest white. Very beautiful. Plant 6 inches deep.		
First size round bulbs.....	.90	6.00
(P) Olympia. A splendid novelty. The trumpet is yellow with a perianth of slightly paler shade. The flower is much larger in size than Emperor and, besides, being very effective for potwork. This is a remarkably fine Daffodil—one of the very best. In appearance it is rather bold but has a negligee look. In color it is much the same shade of yellow as Emperor. If anything rather deeper. Plant 6 inches deep.		
First size round bulbs....	2.25	16.00
(P) Van Waveren's Giant. This is the largest of all Daffodils. The flowers are of huge dimensions, perianth primrose yellow, with bright yellow trumpet. It is just ideal for pot culture and as an exhibition flower it cannot be excelled. Plant 6 inches deep.		
First size round bulbs.....	2.50	17.50

LARGE TRUMPET DAFFODILS—Continued

Doz. Per 100

(P) Vanilla. An elegant flower, growing on an extremely long stem, with a broad cup of sulphur yellow and a narrow extremely long trumpet of deeper yellow. Its greatest virtue is its distinct perfume, namely, that of vanilla. Plant 4 inches deep.....	\$1.15	\$8.00
(P) Bicolor Victoria. One of the boldest varieties for planting in the garden; at the same time it is exceedingly handsome when grown in pots. The perianths are creamy white, while the open trumpet is of a rich, golden yellow. It is not as large as Empress, but far more effective when grown out-of-doors. Plant 6 inches deep.		
Extra fine double nose bulbs.....	1.00	7.50
First size round bulbs.....	.70	4.50

Please note that the depth indicated with each variety to plant is intended for outdoor culture; for pot culture, the depth is all alike.

COMPLETE LIST

Cornelia , deep yellow trumpet, broad yellow perianth (Award of Merit R. H. S., 1905) (Improved Emperor).....	1.25	8.50
Glory of Leyden , immense trumpet and perianth, deep yellow.....	.90	6.50
Grandis (Bicolor), white perianth, long yellow trumpet, late flowering, dwarf.....	.80	5.50
Henry Irving , broad yellow perianth, fine yellow trumpet, extra early, good forcer.....	.90	6.50
Horsfieldii (Bicolor), white perianth, yellow trumpet, early, extra mother bulbs.....	.80	5.50
Round bulbs.....	.75	5.00
J. B. M. Camm (Bicolor), perianth white trumpet, creamy yellow, handsome flower.....	1.50	10.00
Madame Plemp (Bicolor), twisted perianth, golden yellow trumpet.....	.90	6.50
Major , yellow, old variety.....	.70	4.50
Mrs. Thompson , pure white, early strong grower.....	.85	6.00
Obvallaris (Tenby Daffodil), distinct pure yellow.....	.85	6.00
Princeps , yellow, sulphur white, perianth, extra stock, best double nosed bulbs.....	.70	4.50
Princess Ida , white perianth and trumpet, edged yellow.....	.90	6.50
Spring Glory , clear white perianth, with long petals and long chrome yellow trumpet, reflexed brim.....	2.75	20.00
Silver Spur , very early bicolor, opening a few days later than Golden Spur.....	1.50	10.00
Weardale Perfection (Bicolor), perianth white, trumpet sulphur. This is one of the finest daffodils for growing under glass. The flowers last a long time and possess a delicate charm seldom met with in other varieties.....	Each \$.35	3.00 22.00
William Goldring , pure white, perianth, primrose trumpet.....	.75	5.00
Von Sion (Spurius), pure yellow, large expanded trumpet, excellent for forcing single.....	.70	4.50
W. P. Milner , sulphur trumpet.....	.90	6.50

MEDIUM TRUMPET DAFFODILS

Under this title, we classify all such single Daffodils where the trumpet is much shorter than in the preceding class, and the flower thereby has a rather different appearance. It looks more like a "cup and saucer," for the saucer is much larger than the cup, and in quite a few of the varieties the cup is really so small that it appears more like an eye, but, notwithstanding these shortcomings, flowers have a certain grace and beauty and in my mind are just as attractive as those with the giant trumpet. Great advance has been made within recent years in this short-cupped class by introducing more color into the flower. In some of the latest varieties the cup is almost bright scarlet, making it most beautiful.

MY FAVORITES

	Doz.	Per 100
(P) Barri Conspicuous. The best in this class, both for graden use and for pot culture. The saucer is very broad and clear yellow, while the broad short cup is at the base, of the same color, but at the tip is edged white, bright or in scarlet. It is very free in blooming, by that we mean that each bulb throws up more than one flower. Plant 3 inches deep.....	\$0.70	\$4.50
(P) Lady Godiva (Barbara Holmes). Very elegant form, perianth white, cup broad, yellow, edged bright orange scarlet. Plant 3 inches deep.....	.75	5.00
(P) Lucifer. This is one of the latest varieties and a forerunner of the class which has bright red cups. The saucer is elegantly formed and of the purest white; the short cup is of glowing, orange scarlet. The combination is exceedingly beautiful. Plant 4 inches deep.....	.75	5.00
(P) Sir Watkin. This variety makes a most bold appearance, both in the pot and in the garden, and is just as attractive as the large trumpet variety, for it has a distinct trumpet, rather broad instead of long. The saucer is sulphur yellow, while the trumpet is deep yellow. It has an excellent quality, the flower is held most rigid on the stem, and no wind or storm can injure it. Plant 4 inches deep. First size round bulbs.....	.90	6.50
(P) Mrs. Langtry. This sort is the most graceful little flower and absolutely pure white, both in cup and saucer. Several flowers are produced by the bulb. Plant 3 inches deep	.60	4.00

COMPLETE LIST

Barri Albatros , perianth white, pale lemon cup, frilled and edged glowing orange red, beautiful.....	\$0.75	\$5.00
— Firebrand , creamy white, fiery red cup, very distinct.....	1.00	7.00
— Glitter , may be called the yellow poeticus Ornatus, deep yellow with beautiful scarlet rimmed eye; very pretty when grown in pans	.85	6.00
— Seagull , large spreading pure white perianth, cup canary, edged apricot, extra, very charming flower.....	.80	5.50
— Sensation , white perianth, yellow cup, edged orange scarlet.....	1.50	10.00
— Southern Star , very fine, well shaped pointed perianth, expanded crown of bright yellow, banded with orange.....	3.50	25.00

MEDIUM TRUMPET DAFFODILS—Continued

	Doz. Per 100	
Incomparabilis , Simplex, yellow, deep yellow cup, large and free flowering.....	\$0.50	\$4.00
— Autocrate , deep yellow perianth and cup, very pretty.....	.90	6.50
— Frank Miles , soft clear yellow, twisted perianth, handsome flower.....	.80	5.50
— Gloria Mundi , clear yellow perianth, much expanded orange scarlet cup.....	.75	5.00
— Homespun , perianth, soft pale yellow, fine expanded cup of same color, extra.....	1.50	13.00
— Lady Margaret Boscawen , a magnificent bicolor, pure white perianth, broad segments, large, bold expanded, deep yellow cup.....	Each \$.75	
— Leonie , a beautiful deep yellow incomp, much recommended for late forcing; produces an abundance of flowers.....	.75	5.00
— Mabel Cowan , white orange cup.....	.70	4.00
— Stella , white perianth, yellow cup.....	.60	4.50
— Stella Superba , a fine bold flower, much larger than the preceding, clear white perianth, yellow cup.....	.90	6.50
— Torch , yellow perianth, deep orange crown.....	1.00	7.50
— Will Scarlet , creamy white perianth, large rimmed fiery orange red cup, distinct.....	3.00	21.00
Leedsii , type silvery white, lemon cup.....	.45	3.50
— Bridesmaid , pure white perianth, broad white cup, slightly margined pale primrose and crinkled at brim.....	.75	5.00
— Duchess of Westminster , large pure white perianth, long, soft canary cup, tinged orange, passing off almost white, very fine....	.90	6.00
— Evangeline , large pure white perianth, soft lemon cup, strong grower.....	.90	6.50
— Minnie Hume (Queen of England), white perianth, lemon cup.....	.45	3.50
— Waterwitch , perianth and cup snowwhite, large flower.....	2.00	17.00
— White Lady , broad round overlapping perianth, pale canary cup, very fine, eucharis shaped.....	.80	5.50

THE TRUE JONQUIL

This species is quite different from what the ordinary gardener calls "Jonquil." It is miniature in form, has leaves like grass, but tall, slender spikes, which bear two or more flowers of fairly small size, but of delightful fragrance. They are just ideal for pan-culture, to be grown in the house and excellent for garden, where they form a splendid cut-flower. If you once try them you will always grow them. There are a number of varieties, most all resembling each other.

(P) Odorus Campernelii . Two or four fairly large blooms of delightful fragrance on a stem. Plant 2 inches deep.....	\$0.50	\$4.00
— Plenus , double yellow, the true and rare form of the double Campernelii; the flowers are seated on stems 2 feet high, quite double and number from 1 to 3 on a stem; very handsome.....	.45	3.50
Odorus Rugilosus , rich yellow, broad perianth and cup.....	.50	4.00
Jonquilla (Single sweet-scented), rich yellow.....	.50	4.00
— Flore-pleno (the double Jonquil), double rich yellow, very fragrant.....	.40	3.00
Tenuior (Silver Jonquil), sulphur yellow cup.....	.80	5.50

THE POET NARCISSI

(Also known as "Pheasant Eye")

This perhaps is the best known type in American gardens, and as a rule is the only sort called "Narcissus." It is absolutely hardy, flowers later than the Daffodil or Jonquil, and increases readily in our climate.

The color is white, star-shaped flower with a small cup of orange in centre; most attractive and sweet. Plant bulbs 3 inches deep.

The variety "Poeticus Ornatus" is the most suitable sort for pot culture.

Were you ever in the Alps and saw whole mountain sides covered with these Poet Narcissus? Why not duplicate this beautiful sight on your own place? Nothing will make you happier.

	Doz.	Per 100
Poeticus, Recurvus (the old Pheasant's Eye.) Pure white perianth, cup deep orange red.....	\$0.50	\$4.00
Poeticus, Glory of Lisse. The improved Poeticus ornatus. A splendid forcer.....	.85	5.50
(P) Poeticus, Ornatus. Pure white perianth, broad cup margined, scarlet, early. First size, round bulbs.....	.35	2.50
Double nose bulbs.....	.70	4.50
— King Edward (Almira), broad pure white perianth, orange scarlet crown.....	.90	6.50
— Laureate , one of the largest and best, flowers of good substance, pure white eye edged dark red.....	1.50	10.00

NARCISSUS POETAZ HYBRIDS

The above title means absolutely nothing to the amateur, and without the following explanation he would little realize what a beautiful flower this is. Some one in Holland had a splendid idea. We all love the paper white Narcissus, but we also dislike very much its too strong perfume. In crossing it, though, with the old Pheasant Eye Narcissus, we have here a variety which produces flowers exactly of the form of the Poeticus, but being borne by three to five flowers on a single stem, and possessing a fragrance resembling that of the Gardenia. Not only have we these in white but also in yellow, and they are in grace and beauty far ahead of any of the Daffodils or Narcissi. Furthermore, they are absolutely hardy, and, grown in pots, are, on account of the many flowers on a single stem, far more attractive than any other sort. The unfolding of the bud a most interesting feature. The bulb should be planted four inches deep.

(P) Elvira. Pure white petal with a yellow cup, large flower, 3 to 4 flowers on a stem.....	\$0.80	\$ 5.50
(P) Irene. Perianth pale yellow, orange eye, 8 to 9 flowers on a stem.....	1.50	11.00
Aspasia , perianth pure white, yellow eye large flowers (4 to 5)....	.85	6.00
Jaune a Merveille , four to six flowers on a stem, soft primrose perianth, bright yellow cup edged orange.....	2.00	14.00
Klondyke , perianth yellow, deep golden yellow eye, 6 to 7 flowers on a stem.....	1.35	9.00
Triumph , pure white perianth, deep yellow eye.....	1.15	8.00

NEW POETAZ NARCISSUS

The following are the latest acquisitions in this section:

Characteristics: They are nearer the type of Polyanthus Narcissi, the coloring is more distinct and the individual flowers are longer. They form an altogether superior race and are splendid pot plants.

	Doz.	Per 100
Admiration , pale yellow, cup scarlet edged.....	\$1.50	\$12.00
Grace Forfes , pure white perianth, orange yellow cup, large flower...	1.25	9.00
Hamon , yellow, deep yellow cup, extra fine in pots.....	1.85	14.00
Joconde , pale yellow perianth, deep golden cup (4 to 5 flowers).....	2.25	16.00
Lucrece , pure white perianth, large flower, orange yellow cup with orange margin, extra.....	1.50	10.00
Mignon , white perianth, cup creamy white with deep orange scarlet edge, very distinct (3 to 4 flowers).....	1.75	12.00
Profusion , white perianth, small yellow cup.....	1.00	7.00
Sovereign , yellow, deep yellow cup, very fine (5 to 6 flowers).....	1.75	13.00

MIXTURES OF DAFFODILS

Extra mixture of trumpets.....	.65	4.00
Extra mixture of Incomparabilis, Barri, Burbidgei and Leedsii varieties	.60	3.50
Fine mixture of all kinds of naturalization.....	.40	2.50

DOUBLE DAFFODILS

We believe it is superfluous for us to describe this particular type, for every one knows them.

- (P) **Alba, Plena Odorata.** This particular sort is very little known, which is surprising, for it has a special virtue. The pure white double flowers remind one exactly of a double gardenia; it even has that waxy texture in the petals, and as to fragrance it is unexcelled. It can be naturalized in grass and is perfectly hardy in the border. For pot culture it is much desired. Plant 4 inches deep..... \$0.65 \$4.00
- (P) **Double Von Sion.** This is the real old-fashioned Daffodil, with its open flowers completely filled with petals. Splendid for garden work and even for naturalizing in woods, lawns, or rockeries, while for pot purpose it is splendid. The flower is golden yellow, and the true sort should be absolutely pure in color and not have certain petals green. This green petal spoils the look of the flower, and so you see it pays to buy the best bulb. Plant 6 inches deep.
Extra large, double nosed bulb.....	1.00	7.00
First size, round bulbs.....	.75	5.00
- Campernel** (Odorus), plenus, double yellow, true form of the double Campernel..... .50 3.50
- Incomparabilis**, double (Butter and Eggs), double light yellow..... .80 5.50
- **Golden Phoenix**, light yellow with deep golden center..... .85 6.00
- **Orange Phoenix** (Egg and Bacon), large double white with orange base..... .85 6.00
- **Sulphur Phoenix**, large double white with sulphur center..... .80 5.50

PAPER WHITE NARCISSUS

This variety is strictly for house culture, as it is not hardy in the garden. It sends up long stems which bear a great many white starlike blossoms, which have an extremely sweet fragrance; to some people the fragrance is even too strong. It is most interesting because it cannot only be grown in soil but does splendidly when planted in shallow dishes filled with pebbles and water. In growing it in this fashion, flowers can be had inside of eight to ten weeks, but the best success is achieved when, after the bulbs have been planted in the pebbles, the dish is placed in a dark, cool spot for about three weeks, and then brought to the direct light, but kept absolutely cool at all times. It is much better to grow it where the temperature is only fifty degrees than in an overheated living room. In fact, when it is grown in a warm room it grows too fast, with the result that the buds dry up before they open, and you wonder why you have failed. We offer Jumbo bulbs only. Plant a dish every two weeks, but purchase all at once and store them in a cool, dry place. **Doz. Per 100**
\$1.00 \$7.50

NARCISSUS GOLDEN SHOWER

(Soleil d'Or)

Of similar character than Paper White and grown in the same fashion; one of the finest subjects to be grown in pebbles and water. The bulbs we offer come from France and are grown as easily as the White variety.

Doz. Per 100
\$1.25 \$9.00

FULD'S GIANT CROCUSES

As we cannot obtain the usual small bulbs such as Snowdrops, Scillas, Chionodoxias, etc., Crocus form the only early harbinger of spring, and so it behooves that we adopt them in a more liberal measure.

When we speak of Crocuses, we picture them at once in the lawn, but the one fault here is usually that we do not plant one-fourth enough. We would much rather that you plant one hundred Crocuses in ten square feet than the same quantity in a thousand feet, which you usually do. The proper thing to do is to plant never less than a thousand in a well-defined area. In the hardy border we should plant them in clusters of twenty-five, setting them two inches deep and not more than two inches apart.

Crocuses are a most interesting subject for house culture, for they can be grown in pans of soil, or in fibre or in shallow dishes of pebbles and water. In order to grow Crocuses successfully in a room, the pots or flats in which they have been planted should be kept in bulb-pit outdoors, or in a cold cellar until the middle of January, because even a moderately mild temperature before that date will spoil them. A few degrees of frost will do no harm. After January 15th a steady temperature of 50 or 60 degrees will bring them into bloom in a few weeks.

All the named varieties we offer herewith are of giant blooms and you will find them a revelation when you compare them with your usual sorts.

Our grower says:

"As the list of Named Crocus which is generally offered to the trade only contains a few really good sorts like *Purpurea Grandiflora* and *King of the Whites*, and almost all of the others are very inferior flowers, we have tried, by crossing some of the best, to obtain a better strain. The results of our endeavors exceeded all expectations, and especially in white and striped varieties we have something far better to offer to the trade than the older sorts. The flowers of our new strain are large cup-shaped, of good substance, and almost all of them have very conspicuous protruding orange anthers.

FULD'S GIANT CROCUSES—Continued

NEW VARIETIES

	Per 100
Apollo, very deep purple, extra fine.....	\$2.50
Aspasia, white with pale lilac stripes.....	2.50

Yellow Hammer , pure yellow, beautiful neat truss.....	20c	2.00	14.00

Shades of Purple and Violet

L'Esperance , dark claret, very showy.....	20c	2.00	14.00
Lord Balfour , lilac, tinged violet, very large bells.....	20c	2.00	14.00
Sir William Mansfield , purplish mauve.....	20c	2.00	14.00

SELECTED GARDEN HYACINTHS

This grade is considered the best value offered in Hyacinths; the bulbs being of the same age as first size, but falling just below the required measurements of the latter, hence the important reduction in price.

For outdoor planting in beds and borders they are preferable to their large brothers; the flower spikes, not being quite so heavy, endure much better the occasional rough winds during springtime. Of course, they will do for pot purposes as well when the best spike is of secondary importance.

Although this size of bulbs can be supplied of all the varieties listed in this catalogue, we recommend the following for size of flower, good resistance against weather and for forcing quality.

All of the varieties offered below are:

\$1.25 per Dozen; \$8.00 per 100.

Not less than six bulbs of any one kind should be ordered.

Please mention "Selected Garden Size" when ordering.

Cardinal Wiseman, bright rose, dense spike, late.

De Wet, fine light rose, a sport of Grand Maitre.

Gertrude, rosy pink, compact truss, equally good for bedding and forcing.

Gigantea, blush pink.

Lady Derby, bright rose, fine, forces early.

La Victoire, extra scarlet red.

Moreno, deep pink, very fine large bells, forces early.

Queen of the Pinks, beautiful rosy pink, extra large truss.

Pink Perfection, delicate pink, shaded lavender, very fine.

Robert Steiger, deep carmine.

Roi de Belges, deep scarlet, extra.

Rose a Merveille, rosy pink, fine for growing in pans.

Rosy Gem, deep rose, large bells, very good bedder.

Angenis Christine, pure white.

Arentine Arendsen, very fine, pure white.

Baroness van Tuyll, pure white, good spike.

General Vetter, blush white.

Grande Blanche, blush white, good spike.

Grandeur a Merveille, rosy white.

La Franchise, waxy white.

La Grandesse, large bells, very fine, pure white, excellent for forcing.

L'Innocence, pure white, extra, forces well.

Mme. van der Hoop, pure white, large bells, fine for pots.

Mr. Plimsoll, ivory white.

Captain Boyton, light blue shaded darker blue, early forcer.

Grand Lilac, light blue, shaded lilac.

Grand Maitre, deep porcelain blue, beautiful spike, equally good for bedding and forcing.

Grand Monarque, fine light blue.

Johan, pale porcelain, extra fine bedder.

King of the Blues, fine deep purplish blue, the best deep blue for all purposes.

Marie, deep blue.

Queen of the Blues, pale blue, large spike, very fine for pot growing.

Potgieter, pale blue.

Pieneman, dark porcelain, large bells.

Pearl Brilliant, very pale blue.

Regulus, light blue.

Schotel, pale blue, forces well.

City of Haarlem, extra deep yellow.

King of the Yellows, bright yellow, compact spike, late.

Yellow Hammer, pure yellow, very fine, excellent for forcing.

Lord Balfour, purplish violet, large bells.

Sir Wm. Mansfield, purplish mauve, forces well.

THIRD SIZE HYACINTHS

Recommended for massing in pans and in the garden. The bulbs are of the same size as the mixtures, but we supply named varieties, which may be well used for forcing and when planted in borders are all of one single shade of pink, red, etc.

All of the varieties offered below are:

\$1.00 per Dozen; \$6.50 per 100.

Not less than six bulbs of any one kind should be ordered.

Please mention "Third size Hyacinths" when ordering.

Single red and rose	named	Double red and rose	named
Single blush and pure white	"	Double white and blush white	"
Single dark and light blue	"	Double dark and light blue	"
Single yellow	"	Double yellow	"

MIXED HYACINTHS

For large plantings, where the price of second size bulbs makes their use prohibitive, this size is used with much success. As these bulbs may be planted more closely together, the solid color effects of the beds will also be greater, the ground being better covered with blooms.

Please mention "Mixed Hyacinths" when ordering from this offer.

Please note that the shades mentioned are mixed and not separate.

All of the varieties offered below are:

85c per Dozen; \$6.00 per 100.

Not less than six bulbs of any one kind should be ordered.

Single red, all shades	Double red, all shades
Single rose and pink	Double rose and pink
Single dark red	Double dark red
Single white, all shades	Double white, all shades
Single pure white	Double pure white
Single blush white	Double blush white
Single blue, all shades	Double blue, all shades
Single light blue	Double light blue
Single dark blue	Double dark blue
Single yellow	Double yellow
Single, all colors	Double, all colors

It was not the beauty the dreamer drew,
But a finer, fuller, fairer plan;
For Love and Light were working through
A garden of God, for the soul of Man.

—From "Outdoors and In."

POT-GROWN STRAWBERRIES

Plant in July and August to enjoy a full crop by next spring.

How to Plant: Thoroughly spade the soil and enrich it. Stable manure and sheep manure are the best foods.

Distance Between Rows and Plants: The rows should be two feet apart and the plants in the row one foot.

Care: For the home garden it is best not to allow any runners to form, but to cut them off as they appear. In this way a planting should last at least five years.

Our Selection: Here again we give a "delightfully different service" by offering only those which are best for the home garden; best because they are abundant croppers, perfect in shape and, above all, sweet, with the right aromatic flavor.

No less than 25 plants of any one sort will be supplied, and these at 100 rates.

One hundred plants are sufficient for a family of four.

POT-GROWN STRAWBERRIES—Continued

Fall-Bearing Strawberries

This class of berries is no longer an experiment, but has proven a real success. Even from a June planting you can crop in the same fall. In order to have sufficient berries at one time, not less than 100 plants should be set out.

The fall bearing, or so-styled "Everbearing," Strawberries are interesting and have merit, but as yet there has been none offered that anywhere near equals in size and beauty of berry the choice "June only" varieties. Fortunately nearly all of them are excellent in quality and give a heavy yield of fruit in June. The subsequent or autumn crop is much less profuse. If, however, the blossoms are faithfully removed from the plants until the middle to the last of June, the autumn crop will be very greatly improved, both in size of yield and the berries themselves. Aside from removing the blossoms by hand picking, the culture of these autumn-bearing varieties is the same as other Strawberries.

Upon moist, fertile land these fall-bearing Strawberries give sweet, ripe berries in a few weeks from the time they are planted. We advise "Hill Culture" for best results with these varieties.

Advance

Taking into account all its properties, this is the best and most valuable of the Fall or Everbearing varieties as yet fully tested. In a general way, it is a good deal like the popular Superb, with larger berries. The plants, however, are better growers and more prolific. The berries are nearly round, of good size, quite uniform in size and shape, deep crimson, firm, of meaty texture and of good quality.

Per 100, \$10.00

Progressive

The finest of the Rockhill varieties and one that has attained wide popularity. The plants are of vigorous habit, with large, clean leaves, and they multiply better than many of the fall-bearing varieties do, and yield profusely, particularly in June. The berries are so smooth and uniform in size and shape they have the appearance of having been made in a mold, are deep crimson, glossy and of fairly good quality, but rather small.....

Per 100, \$10.00

June-Bearing Strawberries

Please make your selection to contain some of the early, mid-season and late sorts and thus you have a longer bearing season, extending often to four weeks.

Early Varieties

Early Jersey Giant—Pre-eminently the finest of the early varieties. As a matter of fact, there is no known variety that ripens earlier and no variety yielding large berries that comes anywhere near it in earliness. It is also brilliant scarlet-crimson in color and exceptionally firm—by far the firmest of all early varieties.

Berries very large, conical with pointed tip, colors all over at once, has delightful aroma and rich, mild, wild strawberry flavor. Large, light green calyx or "burr," hence exceedingly showy and attractive. Blossoms large, open rather late and staminate. Plant a strong grower, with large leaves on long plant stems, and a heavy yielder. The largest and best very early variety.....

Per 100, \$9.00

Success—All things considered, this is one of the best early varieties, both for the home garden and nearby market. Berries slightly oblong, with blunt end, bright scarlet or flame color, quite large and uniform in size, color and shape. Plants are vigorous, healthy and very prolific. Desirable for the home garden and very reliable. We have never known it to fail to give heavy pickings of attractive berries of high quality.....

Per 100, \$7.00

Campbell's Early—The berries, which are exceptionally uniform in size and shape throughout the season, are bluntly conical, firm for an early variety and bright flame crimson in color. Plant a strong, robust grower and very prolific.

Per 100, \$7.00

POT-GROWN STRAWBERRIES—Continued

Midseason Varieties

Hundred Dollar—The claim of the introducer that “There is not another variety of strawberry that will outyield this giant or surpass it in quality” has been fulfilled to a large degree. The plant is a strong, vigorous grower and among the most prolific. It ripens in mid-season; the berries average very large indeed; the color is bright scarlet and the quality mild, sweet and luscious. . . . **Per 100, \$7.00**

Marshall—An old variety, highly esteemed by many, especially in the New England States and New York. It is a large, beautiful berry of rich quality and meaty texture, but one which requires fertile soil and high culture. Plant of vigorous growth, with clean, healthy foliage. . . . **Per 100, \$7.00**

Edmund Wilson (new)—A striking, unique strawberry and strictly an amateur, not a commercial variety. The plants resemble potato vines in size and vigor; the berries are as large as small apples or oranges. Form globular or bluntly heart-shaped, of deep maroon color with smooth surface and quite firm. Upon a good soil the plants attain a height of twelve to fifteen inches, with a spread of fully a foot, and are enormously prolific. . . . **Per 100, \$9.00**

Barrymore—A superb variety. The bluntly conical berries are of great size, beautiful to look upon, firm and meaty, and are of surpassing quality, rich and sugary. The color is rich dark crimson (which it holds unchanged after picked), with glossy surface. The flesh is deep red. . . . **Per 100, \$7.00**

Late Varieties

Lupton—This is the best late ripening strawberry. Berries large, bluntly conical, bright flame color, glossy, and retain their color after picked; has a large double dark green calyx or “burr”; very showy and very firm. It is well nigh ideal in growth of plant and vigor. . . . **Per 100, \$9.00**

William Belt—Of all the many varieties of the Strawberry grown today, William Belt is undoubtedly the most popular. The plant is vigorous, though not a rampant grower; succeeds upon almost all soils; invariably yields very heavily, and the berries are always of large size and high quality. Its flesh is solid and deep crimson in color, while the blossoms are large with abundance of pollen. It begins to ripen quite early and continues until almost the close of the season, the last berries being large, handsome and full-flavored. Indeed, it is a king among Strawberries, as it is firm and among the largest, many of the berries being of great size, and gives large pickings for a longer period than almost any other variety. . . . **Per 100, \$7.00**

Chesapeake—A large, firm berry of delightful flavor, very much like that of the wild strawberries. The plant is a vigorous grower, producing unusually large clusters on strong stems. . . . **Per 100, \$9.00**

THE OLD-FASHIONED HARDY FLOWERS FROM SEEDS

(Hardy Perennials)

In presenting this offer at this time we are rendering the gardening public another "Just Delightfully Different" service. It spells:

Timely Sowing: The seeds offered herein should be sown from May 1 till August 1. This means "efficiency" in the garden. (1) You can use the frames which are now being emptied, and (2) you will have the right kind of plants to withstand the first winter.

How to Sow: Sow in flats and place in a frame, with either the glass white-washed or lath cover in place of sash. In other words, shade must be over the seedling flats. Always sprinkle with an "Ideal" watering pot; cost \$5.50.

Where to Transplant: Two transplantings must take place. The first, when the seedlings are large enough to be given larger space in another flat, about four weeks after sowing. At least 3 inches space should be given each plant and the flat set back in the frame. The second, about Sept. 15, when they should go in their permanent quarters, and this final transplanting should not be done after Oct. 1, as these young plants must grip the soil with a set of new roots before winter sets in or otherwise they are lifted to the surface by frosts and perish.

We recommend to sow and plant in flats first, for two reasons: First, because it is so much more handy to transplant; and second, because if any seedlings are not large enough by fall they can be kept so much better in the frame until spring.

How to Protect These Seedlings for the Winter

The only protection these plants require is a layer of six inches of straw after hard frost has appeared.

Please **do not** cover them with manure. It is harmful.

Fuld's Unique Garden Stakes

It matters not how little there is in your garden, if the grass is cut and the edges neatly trimmed, your hedges pruned and every plant which needs it is **staked**—then your garden is beautiful and **orderly**.

The usual stake offered by seedsmen, as a rule, is entirely too clumsy and conspicuous to look well; a garden is not an exhibition hall for stakes, but rather a home for flowers.

A stake is needed to support a plant against winds and storm, but not to be more showy than the plant.

We are offering herewith a Japanese Bamboo cane of extreme sturdiness, not thicker than a pencil, perfectly straight and dyed green.

Sizes and Prices

	Per doz.	Per 100
18 in. tall.....	\$0.30	\$2.00
24 in. tall.....	.35	2.50
30 in. tall.....	.40	3.00
36 in. tall.....	.50	3.50
42 in. tall.....	.60	4.00

These stakes are ideal for Snapdragon, Annual Larkspur, Salpiglossis, Nicotiana, Scabiosa, Delphinium, Digitalis, Monkshood, Hardy Aster, Gladioli, Anchusa, etc.

Stakes should not extend above the plant but rather below the flower. Some plants require several stakes to make them look natural. Do not tie plants so they look stiff, but retain their natural grace as much as possible. Use raffia or soft twine for tying.

*"Just Delightfully
Different"*

FULD'S NEW SEEDLING POT

Made of Cardboard
For Vegetables and Flowers

Especially Sweet Peas, Tomatoes, Cabbages, Cauliflowers, Egg Plants, Peppers, even for Early Corn, Early Cucumbers, etc.

Makes gardening a pleasure and assures us all greater success. Why? Because you sow the seeds directly into these pots—no transplanting—and when it is time to set the plants out of doors, you simply open the bottom of the pot by pulling slightly at the fold, and set plant and pot into the garden. Thus the roots are not disturbed and the plant will have no setback.

The pot is made of porous heavy paper-board, which will not decay before the plant is ready for the garden, but when planted with the plant will decay quickly and act as additional food, and so help two-fold.

Comes in two sizes: No. 1, 2x2 and 4 inches deep, and No. 2, 3x3x4. The extra depth is another merit, for the roots have more playroom and the plant does not become pot-bound.

It comes to you flat, so that 100 of these pots take up little space.

Directions for Use

Secure a flat $4\frac{1}{2}$ ins. deep and large enough to hold the desired quantity snugly. One side of the flat should be fastened only lightly, so at any time it can easily be removed. Cover the bottom of the flat with $\frac{1}{2}$ in. of good loam. Place your empty pots upon it and fill them with the same material, press it down so that finally the soil comes to within $\frac{1}{4}$ in. of the rim of the pots.

Now sow your seeds. Of the large seeds sow 3 in a pot; of the fine, sow carefully that only few will appear growing afterward, and cover these with the finest of sifted soil, so that the seeds are barely covered. Then water carefully with "Fuld's Ideal Watering Pot"—a new pot with a new rose. This should be in possession of every gardener, for no longer will you disturb your seedling. Price, \$5.50.

Now place your flat in good light and heat, and water carefully every day until the seeds germinate. Then put in a cooler spot—50 degrees at night and 60 at day—and when the plants are progressing and have 4 or more leaves each, pull up all except one in a pot. Of course, you retain the strongest one and put flat as it is into the cold frame. Here you water again carefully until you are ready to plant out of doors.

If you have no cold frame, just keep the flat in the house until you are ready to plant out of doors. Then take your whole flat to the garden, remove the side which is loose, and now you will find it easy to remove each pot without injury to the plant.

So do we progress, with less work for us and better conditions for our little garden infants.

The most remarkable and popular feature of this pot is its popular cost, namely:

Size No. 1 — 2x2x4 \$1.50 per 100; \$12.00 per 1,000;

Size No. 2 — 3x3x4 \$2.00 per 100; \$17.00 per 1,000;

500 at 1,000 rate; 25 at 100 rate

At these prices purchaser pays expressage. If wanted by Parcel Post, please note that 100 pots, size 1, weighs 3 lbs. and 100 pots, size 2, weighs 6 lbs. Add 7c per lb. if east of Mississippi and 12c per lb. if west.

Now you ask, "What seeds can I use with these pots?" Foremost are the following:

Flowers: Sweet Peas, Snapdragons, Asters, Calendula, Cosmos, Annual Larkspur, Marigold, Nicotiana, Pentstemon, Pansy, Petunia, Phlox Drummondii, Salpiglossis, Salvia, Scabiosa, Stocks, Verbena, Zinnias.

Vegetables: Tomato, Egg Plant, Pepper, Parsley, Cabbage, Cauliflower and Brussel Sprouts.

MELROSINE

"IT KILLS ROSE BUGS"

Melrosine, the new insecticide that quickly kills the dreaded rose bug, is a triumph of chemical research and persistent experimenting.

Melrosine is safe and sure—absolutely non-poisonous and harmless to human beings or animals and will not injure in the slightest degree either plants or flowers.

Unlike most other insecticides, **Melrosine** is most effective when used on a bright sunny day at 11 a.m. or 2 p.m. rather than at noon.

Experienced rosarians who have used **Melrosine** are unanimous in recommending it as a positive annihilator of the pest.

Melrosine should be diluted with 20 or 25 parts of water. The proper method of applying **Melrosine** is to spray the plants lightly at first. This will bring the rose bugs out from the flowers and they should receive a second and copious spraying.

Melrosine will leave no mark on the flowers or injure them in the least. It has an agreeable odor that makes it pleasant, but is not imparted to the flowers.

The Auto Sprayer, a brass container holding three gallons of liquid, is the very best sprayer for **Melrosine**, \$14.00.

Melrosine is sold as follows: Per pint, \$1.00; per quart, \$1.75; one-half gallon, \$3.25; per gallon, \$6.00.

Standard Flower and Garden Fertilizer

Standard Flower and Garden Fertilizer is a superior plant food, in concentrated form, that may be used with equal success on house plants, in greenhouses or in the garden.

The analysis given below shows that Standard Flower and Garden Fertilizer contains all the essential elements in just the right proportion to produce a properly balanced and unusually highly concentrated fertilizer to meet all gardening requirements.

Standard Flower and Garden Fertilizer is odorless.

It is so strong that a mere pinch will intensely fertilize a house plant and a one pound package will serve two hundred square feet effectively. You can use it either dry or dissolved in water.

We offer Standard Flower and Garden Fertilizer with renewed assurance of its merit because of the universal commendations we have received from our customers who have had experience with it. Not only have we had no complaints, but they all agree that it would be difficult to find a substitute that would prove so successful in enriching the soil, promoting luxurious growth, increasing the yield and imparting a deep green color to the foliage and brilliancy to the flowers.

Prices: ½ lb. pkg., 50c; 1 lb. pkg., 75c; 5 lb. pkg., \$2.00; 25 lb. bag, \$5.00.

Out of the earth a plant,
To struggle with its foes;
To them it gives its thorns,
To me a perfect rose !

Out of the rose, for joy,
Fragrance, beauty and youth,
The essence, for those who feel,
Of life's eternal truth !

Out of the best we sense,
Is born a brighter dream;
Thus, beyond all our knowing
Shines some gift supreme !
