EARLY ROMAN HYACINTHS

Roman Hyacinths cannot be excelled for forcing, as they are very early, force easily and flower so freely. The bells are smaller than those of the ordinary Hyacinths, but each bulb sends up three or four spikes of bloom, which are of exquisite fragrance. Plant them as early as possible, and give the same treatment as Dutch Hyacinths in pots. Half a dozen or more bulbs in a pot make a glorious display, and they may easily be had in bloom for Christmas and New Year. Flowers are single.
