INTRODUCTION

In presenting our twelfth annual catalogue, we wish to thank our friends and customers for their liberal support in the past and to say that we will do our best to deserve a still greater demand for our plants in the future.

We list one of the largest collections in the United States, thoroughly up-to-date, all of the Well's Pocket, Totty Sets, and also the best of other English, American and French growers. We take particular pride in having an immense stock of plants grown under conditions that we have found the best for "Mums" on the Pacific Coast. Growing our stock plants in the open air, we do not have to propagate from spindly, weedy cuttings, but can choose robust ones. Many of the prizes in the open classes at the Pasadena show and nearly all the prizes in the amateur classes were won with flowers grown on plants procured from us.

Last year we called attention to the care we take to have our plants true to name. Every plant when put out is labeled and when in flower if it does not show the correct characteristics it is pulled up and thrown away, so that it is almost impossible to make mistakes.

TERMS OF SALE

Shipments commence April fifteenth, continuing to July 1st. All plants are from two inch pots, unless otherwise agreed. Orders from unknown parties should be accompanied by cash or satisfactory reference.

I give no warranty on the plants. If for any reason the plants are received in poor shape, please notify me at once, so the trouble can be located.

ALL ORDERS WILL BE FILLED IN ROTATION—Six of a kind at the dozen rate unless otherwise quoted.

We list the largest collection on the Pacific Coast. All plants are sand rooted cuttings. Our field will be open for public inspection October 10.

Cultural Note

One of the important features of successful growing of Mums is taking the correct bud at the correct time. It is impractical to attempt an explanation of how to take the different buds in writing; we take, on some varieties, first crown or second crown and on other varieties the terminal bud. With every order we send a guide, with name, color and when to take bud for the best results on this coast. Should there be any difficulty in the manner of disbudding, we shall be glad to demonstrate the correct process in our field. All Thomas Mums carry the Thomas label; none are guaranteed without.

Announcement

By request we are specializing on Delphinums, placing on the market forty-one named varieties ranging in color from white, three shades of pink, five shades of yellow, eleven shades of blue and eight shades of royal purple. The varieties are from English, French and American seed, well rooted in three-inch pots. We can furnish plants that will supply a wealth of bloom throughout the year.

The varieties are Belladonna, Hybridum, Butterfly, Sulphureum, Nudicaule, Formosum, Formosum Coelestinum, Euremocarpus, Seaber, Echeveria, Secunda Glauca, Echings Ritio and Edelweiss.

An invitation is extended to visit our field and inspect the display.

Prices range from \$3.00 to \$25.00 per dozen. All stock is sold by number.
