EARLY ORDERS of HOLLAND BULBS

QUALITY STOCK AT SPECIAL TERMS

ON ALL BULB ORDERS RECEIVED BEFORE JULY 1st

We have made arrangements with our bulb growers in Holland, whereby we can supply our customers with the pick of quality in Holland bulbs, if ordered before the digging season—which starts in early August. This special list is designed to cover the field of dependable varieties in Tulips, Hyacinths, Narcissus, Jonquils, and Crocus from Holland; Lilies from Japan; Freesias and Callas from California. We want to know before the big boats leave Rotterdam in August, whether our contract is sufficient; it is embarrassing to us and disappointing to our clients, to over-sell. We are willing to pay for this information by discounting the regular fall rates; and submit varieties and prices following for your cooperation and benefit.

Orders Must Reach Us Prior to July 1st 1922

You are not required to send payment until notified that your bulbs have arrived in Painesville. Simply make out your order as soon as possible after reviewing this catalog, and send it in. We will import your bulbs; promptly advise you of their receipt and inform the amount you are to send. Upon receipt of your remittance, your order will be promptly shipped. To all who prefer making remittance with their order, we will allow a special cash discount of 5%.

Sincerely yours,
The Storrs & Harrison Co.,
Painesville, Ohio.

N. B.—You may rest assured these special prices are lower than we can offer in our regular fall catalog, which issues in September. It is therefore to your advantage to make up your mind promptly and embrace this quality-getting, money-saving opportunity, at once. Designations (A), (B), (C), and (D) refer to relative blooming period, i. e., A, earliest; B, second earliest; C and D, in order. All goods priced to go forward from Painesville by express or freight. Six furnished at dozen rates; 25 or more at 100 rate; 250 at 1000 rate if listed.

TULIPS

Tulips are, without question, the most brilliant and showy flowers grown. Their reds and crimsons are so vivid, their shades of yellow are so rich, and their rose and pinks are so decided; their colors alone would dominate the floral display of any season. But coming as they do before Summer has brought forth its long array of floral distractions, the Tulip has no real competitor. The softer tones of Hyacinth and Daffodil serve to accentuate the glory of their King.

Potted specimens of three or more to a pot make very striking house decorations, and as such are largely used.

We have used the letters A, B, and C to designate early, medium and late blooming period within the season of each class, and figures to represent in inches the normal height of each variety.

Six sold at dozen rates; 25 at 100 rates; 250 at 1000 rate.

Late; "Cottage" or May-Flowering Tulips

An interesting group of single Tulips, distinct in many ways from the preceding early flowering list, their blooming period commencing a week or two after the others cease. Bold, strong and hardy—they are naturally adapted to permanent outdoor plantings, and besides making their brilliant field show from year to year, yield as fine cut flowers as any class. It is advisable to plant a trifle deeper than the earlier sorts.

Bouton d'Or (Ida). (A17.) Golden yellow with black anthers; showy bedder and excellent for cutting.....	Doz.	100	1000

Union Jack ("Distinction"). (A20.) Light violet feathered purple, with a few white stripes.....	.50	4.00	35.00

Darwin Tulips

This section of the May-flowering group makes very strong growth, attaining a height of 24 to 30 inches; with large globular flowers of perfect shape, heavy texture and rich coloring. The Darwin class commences blooming about the middle of May, and continues an unusually long time; covering with a wealth of rich bloom that period which is intermediate between the passing of the spring flowers and the coming of the Rose. Small groups of these tall, stately, vivid flowers, gleaming here and there among the garden borders, are most striking and the nucleus of some magnificent color effects. As forcers, the well developed Darwin blooms are among the most eagerly sought.

DARWIN TULIPS BEST FOR FORCING

A Propagating Field of Sir Watkin.

Narcissus or Daffodils

The Narcissus family, which embraces the Daffodils and Jonquils, is one of the oldest and most generally planted of all spring flowering bulbs. Chief among its manifold attractions is the ruggedness of its habit, which resists all vicissitudes of adverse soil and climatic condition. They will live almost anywhere and adapt themselves to environment, being equally at home in the formal garden, terrace, shrubbery or perennial border; "naturalized" in the open fields, on the moist banks of streams, or among the shadows of the woodlands. An exception as to hardiness is the lovely Polyanthus type which, although forced in vast numbers for cut-flowers and potted plants, is not generally planted out doors.

As pot plants, all varieties are easily forced; and furnish much of the floral display and fragrance of the late winter. The dainty and sweetly fragrant Paper White Grandiflora; and the big, gorgeously yellow Double Von Sion are the two best known and most generously used forcing varieties.

Double Von Sion.

Chinese Narcissus, or Sacred Lily

A variety of Polyanthus Narcissus, the flowers of which are beautiful waxy white, very fragrant, appearing in profusion in four to six weeks from time of starting. They do well if potted in soil, but make best ornaments when placed in shallow dishes of water. Put an inch or two of sand or fine gravel in the bottom, on which place the bulb, place enough pebbles around the bulb to keep it in an upright position, then fill with water so that one inch of bottom of bulb is covered. Set in a dark room for a few days until the roots start freely, then bring to the light and keep in any ordinary living room. A dozen bulbs handled in this way, started at intervals, will give a succession of bloom throughout the winter.

Per dozen, \$1.75. Original baskets containing 30 bulbs, \$3.50 by express.

Callas

White "Calla Lily" (Richardia Ethiopica). These make wonderfully impressive house plants when in bloom.

LILY OF THE VALLEY.

Just the thing to put into that cold, shaded strip along the walk on the east or north side of your house. The loose panicles of tiny bellflowers set low in their emerald foliage, and are not conspicuous; but they do cover the waste ground, furnish a vast amount of cut sprays, and sweetly perfume the entire yard.....
