W. F. Schmeiske's Hardy Phlox Book

NURSERY: ROBINSON AND LOUISA STREETS

Address: State Hospital

Binghamton, N. Y.

BUSINESS TERMS

We are selling as cheap as the cheapest and the stock is as good as the best, hence feel assured you will be pleased.

Our terms are net cash as the margin is so small that we can not carry a book account. Send remittance with order.

Please write your name and address plainly, look over your order after finishing in order to be sure that everything is on the list, also your name and address. It is surprising how many people forget to write the address on the letter.

We charge nothing for packing and delivering to station but if plants are shipped at wholesale prices extra charges for packing will be charged.

Should there be any error in the order, advise me at once and it will be corrected.

We will not substitute, unless requested. If we have not what you want, you will receive your money back.

Three plants of one variety will be sent at dozen rate but less amount must be paid for at single rate.

I guarantee to send out strong and healthy plants and that customers will receive fresh and live plants and true to name. Beyond that I can not guarantee. Should they not be true to name, I will replace them but can not hold myself responsible if the plants do not grow after planting as I have no control over them after they leave me.

Small orders will be sent by Parcel Post, but anything over 1 dozen should be sent by express.

If plants can reach their destination in 24 hours, an extra charge of 15c should be added per dozen; if longer on the way, the charge will be more according to distance if shipped by Parcel Post.

I do not grow any plants in pots, hence better plants will be shipped.

Tell me how you want your plants shipped. If, however, no statement is made, I will send to the best advantage.

I send out no catalogue except on request.

MODERN HARDY PHLOX

Are still the leaders for cemetery work, rock gardens, old fashioned gardens, up-to-date shrubbery and border. The demand keeps pace with the improvement of them in all landscape work—large and small. That it gave me a great deal of encouragement to gather together under one cover all the good things from home and abroad.

I have spared neither time nor patience thoroughly selecting and crossing to get only the best and in looking the list over you will readily perceive what the success has been, so that at the present there is no firm who can show a larger list of this flower.

What was said in my former list bears repeating, that all Phlox are on trial at least two years and if not entirely satisfactory, longer, then, if found wanting, thrown out and only the best retained.

Before going further I would like to call attention to this fact, that all my Phlox, as they stand in the garden, have been grown under my own supervision for at least two years on the spot itself. The soil is a sandy loam, the plants have never had any artificial watering, and they have been left outside in the ground throughout the winter without any cover but a very thin layer of horse manure. The garden itself is fully exposed to the inclemency of the weather, against which it has had no protection whatever. I have by this way of growing plants eliminated every plant not a complete hardy variety.

Before planting Phlox the soil should be well enriched with manure as they usually remain on the ground for several years and are strong growers.

When transplanting or when Phlox are received and the soil is prepared make the hole large enough so the roots can be spread out and the crown of the plant planted two inches below the surface of the soil. Pull the soil over the plant and press down hard using your hand or foot to press the soil down hard, for a great deal depends on this part of the operation for the life of the plant, then give them a light mulch of manure or leaves to cover them through the winter. In the spring the mulch may be left between the plants but should be removed from the crown of the plants.

The transplanting of this stock is an easy matter, and the Phlox are bound to grow and give satisfaction wherever planted almost without any care or labor at all. I guarantee good, strong stock from the field. Should a plant when received prove unsatisfactory for one reason or another, it can be returned at my expense if **care is taken that the plant is not spoiled by the drying of the roots or in any other way.**

I aim to only grow the absolute best stock and as I always will have the supervision of the filling of orders and shipping myself, the patrons can rest assured that they will get both good stock and the stock they ask for.

The planting of Phlox should be done from the latter end of September until a very

hard frost stops all plant-life. But the order for Phlox should be given as early as possible. Fall is the proper time to transplant Phlox, but the work can be done early in spring. The plants will be strong and all of such a size that they will give **absolute satisfaction the first year** as to growth and flowers. No roots will be sent out without first having been tested and flowered. It is the aim to avoid all disappointment on the part of the buyer.

As will be seen, it is my intention under the preparations to put my business on such a base of solidity and honesty as to the good quality of the stock that I trust everybody who makes a trial will find that they never have been served as good before and that they are fully and amply repaid for their expense.

When the soil gets dry in the summer water should be applied to the roots. Not sprinkled, but let the water run on the ground and if thoroughly wet left until dry again.

Mildew may attack the plants in the summer. Apply powdered sulphur dusted on the foliage in the morning when dew is on the foliage will arrest the disease.

Red Spider is another pest that sometimes makes its appearance but if the plants are watered regularly spider will not do any harm. Spiders are controlled by syringing the plants with water reaching well under the foliage.

Fourteen inches is a good distance to plant Phlox, and if the clumps get too large they should be devited and transplanted, the soil being prepared the same as newly set plants.

There is a lot of choice varieties added to my former list. I made an effort to describe as near as the color appeared to my eye, but as the list is such a proportionate one I did not attempt to name them all but added them by number, leaving them to be named by you if you so desire.

W. F. SCHMEISKE,

Proprietor.

PHLOXES

Paniculata (Decussata)

		In Flower
15	ALHAMBRA. Pink; white halo; very effective. 1½ feet.....	July 30
28	ATHIS. Deep pink, overlaid salmon. Crimson eye.....	July 29
37	ALBATRA. Pure white. Good color. 1½ feet.....	Aug. 5
55	ARGON. Light lavender. Shaded white. 1½ feet.....	July 28
72	ATALA. Clear dark pink. Lighter center. 1½-2 feet.....	Aug. 10
95	ASTIR REHU. Violet purple, half of each. Petal lighter. 3 feet.....	July 26
112	AMPHITRYON. Deep lilac, suffused with white. Deep eye. 2½ feet....	July 26
113	ANTHON MERCE. Grayish lavender, pale pink eye. A gorgeous flower. Early. 1½ to 2 feet.....	Aug. 7
128	ASPASIE. Lilac, shaded white; white center. 3 feet.....	Aug. 10
110	ALBION. White, a faint pink center. Dwarf. 2½ feet.....	July 7
09	AQUILON. Beautiful carmine rose. crimson eye.....	July 20
102	ARNOLD TURNER. Fiery crimson scarlet. 2½ feet.....	July 15
151	AGLAE ADAMSON. The same as 152 (Michael Cervantea).....	Aug. 5
158	ANDREAS HOFFER. An early flowering pure white.....	July 20
164	A. MICHAUX. Flowers large, very fine; deep, tender rose with carmine eye. 1½ feet	Aug. 7
97	AURORA BOREALIS. Salmon pink, white halo, dark center, petals striped, lively colored. 1½ feet.....	July 28
162	BROGNIART. Very light lavender pink, white edges, deep eye. 1½ feet..	Aug. 5
122	BERANGER. White suffused pink, bright crimson eye.....	Aug. 7
319	BICOLOR. Pink. Carmine eye. 2½ feet.....	Aug. 1
2	BOULE DE FEU. Salmon scarlet. Dark crimson eye. 2 feet.....	July 15
132	BOUQUET FLEURI. White overlaid pink. Analine red eye.....	July 30
43	BOUQUET DE FLEURS. White, overlaid pink, lilac center, small flower. 3 feet	July 23
68	BOUNTAIN. Deep rose. Deeper center, 2½ feet.....	July 26
26	BRIDESMAID. Pale rose pink, light crimson center. Beautiful. 3 feet...	July 20
9	BRILLIANCE. Brilliant scarlet. Slightly penciled lighter. 3 feet.....	July 28
23	BRUNETT. Fiery crimson. Very effective color. Brilliant and showy. 2½ feet.....	Aug. 3
153	CONSUL H. TROST. Brilliant crimson. Brilliant color. 1½ feet.....	Aug. 10

LATEST INTRODUCTIONS

W. C. EGAN. One of the finest Phloxes yet introduced, and while the individual flowers, according to color chart, are of a delicate lilac, illuminated by a large bright solferino eye, the color effect as a whole is a pleasing shade of soft pink. In habit of growth it is strong and vigorous, producing immense panicles of flowers nine inches high by seven across and the individual flowers frequently measure 1¾ inches in diameter.

MRS. W. E. FRYER. White, a faint pink center, strong growth, good truss.

MANZELBRUNNER. One of the white center sorts.

- 172 White overlaid with pink, lilac center, 1 foot, flower 1½ inches.
- 176 White, faint pink marking in center of flower, 14 inches.
- 179 Deep reddish purple with light halo, 20 inches.
- 180 Grayish white, light pink tube, 2½ feet.
- 181 White, faint pink tube, large flower, good truss, 20 inches.
- 182 Pink, running toward purple, crimson eye, 14 inches, flower 1½ inches.
- 183 Deep rose, light crimson eye.
- 186 Crimson scarlet, crimson eye, 2½ feet.
- 187 Crimson purple.
- 188 Bright, pink, light crimson eye, 16 inches.
- 189 Clear white, faint trace of pink in center in early stage, 1½ feet.
- 190 White, faint pink center, flower 1 inch.
- 191 Lavender pink, crimson scarlet eye. 1½ feet, flower 1½ inches.
- 193 Lilac, deeper center, 2 feet.
- 194 Brilliant crimson, 1½ feet.
- 195 White mixed with gray, giving gray appearance, light crimson eye.
- 196 Light purple throughout, large flower, 14 inches.
- 197 Bluish lavender, lilac center, 2 feet, flower 1½ inches.
- 198 Pink lavender, crimson eye, 1½ feet, flower 1½ inches.
- 199 Lavender, changing to deep lavender toward center, flower 1½ inches, plant 1½ feet.
- 200 Lively light purple, light halo with deep eye, 1½ feet.
- 201 Lavender. Open star-like flower.
- 203 Grayish lavender, deeper toward center, crimson eye, 1½ feet, flower 2 inches.
- 204 Improved La Reve, striped and penciled, pink on white, 1 foot, flower 1½ inches.
- 205 Deep crimson center, light pink petals, white edge, 1½ feet, flower 1½ inches.
- 206 Lively pink with traces of lilac, light halo, deeper eye, flower 1½ inches.
- 207 Lively crimson pink, light halo, deep crimson eye, heavy flower.
- 208 Pink lavender, light halo.
- 209 Crimson scarlet, crimson eye.
- 210 Crimson, running lighter toward adge, white edge, 1½ feet, flower 1½ inches.
- 215 Very pale, lavender, deeper eye, 1 foot, flower, 1 inch.
- 217 Salmon pink, crimson center, light halo.
- 221 Deep lavender lilac.

- 223 Deep magenta, light halo, deeper eye.
- 225 Tyrion rose, light halo, deep eye, grand cluster, 2 feet.
- 226 Deep lavender, lilac center, 2 feet, flower $1\frac{1}{2}$ inches.
- 227 Lavender, light halo, lilac center, $1\frac{1}{2}$ feet, flower $1\frac{1}{2}$ inches.
- 228 Light lavender, light halo, lilac center.
- 229 Deep lavender, crimson eye.
- 230 **Light pink, rose eye.**
- 231 Deep lavender, crimson eye, 2 feet, flower $1\frac{1}{2}$ inches.
- 232 Grayish white, crimson center, 2 feet, flower $1\frac{1}{2}$ inches.
- 233 Light purple, 8 inches.
- 234 Lively lilac, light halo, 2 feet, flower $1\frac{1}{2}$ inches.
- 235 Rose with white center, flower $1\frac{1}{2}$ inches.

It is impossible in some instances to find the correct description for the colors and in some instances the description is alike; however, the varieties are different.

EARLY PHLOXES

		In Flower
100	BEAUTY OF MINDEN. White, ground flushed rose, deep center. Beautiful foliage overlapping one another in rows. Continuous bloomer. 2½ feet	June 24
98	DR. HORNBY. White overlaid with pink. Crimson center. Good. 1½ to 2 feet	June 20
137	MISS LINGARD. White, delicate pink center. Beautiful flower. Good truss. 3 feet	June 20
75	RINGLEADER. White, pink stripes. Deep center. 2½ feet.....	June 20
309	INDIAN CHIEF. Deep magneta.....	
311	DIVARICATA CANADENSIS. An early flowering native. Species with lavender flowers. Blooming from early May until the Summer.....	

These early phloxes ought to have a place in every collection. While they do not show the large clusters they more than make up the difference in quantity. The clusters are good, large heads, and flower the season through without letup. The foliage is shiny green, very showy and beautiful.

We can supply seeds of Phlox in the Fall which should be sowed as soon as received; it will come up the following Spring; from general collection at \$1.00 per ounce; from choice seedings, \$2.00 per ounce.

A NEW RACE OF HARDY PHLOXES

(Phlox Arendsi.)

At the great International Exhibition held in London, May, 1912. where this new type of Phlox received an Award of Merit no other new plant in the Hardy Perennial class attracted such great attention. It originated through the successful crossing of the early-flowering popular Phlox Divaricata Canadensis with the showy hardy varieties of Phlox Decussata. The plants are of vigorous, branching habit, growing, according to the variety, from 12 to 24 inches high. Coming into flower during the latter part of May, they continue in good condition for nearly two months, producing a mass of flowers unknown in other types of Phlox.

AMANDA. The dwarfest of the collection, growing but 12 inches high, very bushy, flowers delicate lilac with deep centre.

CHARLOTTE. Grows 18 to 24 inches high, flower very large, pale lilac shaded pink with a prominent dark eye; one of the best.

KATHE. Stems loosely branched, about 20 inches high; flowers purplish-rose with a dark eye surrounded by a lighter halo.

LOUISE. A strong-growing variety about 2 feet high; light lilac flowers with a carmine eye.

Price, 25 cts. each; \$2.50 per doz. One each of the 6 varieties for \$1.25.
