Westbury Rose Co., Inc.

FOUNDATION - PLANTING

This is for most suburban homes the main planting and it deserves the greatest care and study.

A well arranged foundation - planting will make your home look cozy and it will give you pleasure for a number of years.

You know the saying: "A Thing of Beauty is a Joy for ever".

We use in our plantings a very good assortment of evergreens and broad-leaf evergreens. Their combination makes a planting very attractive. Too many plantings suffer of not enough variation in outline and habit of the individual plants.

Shrubs are also splendid material, but they should be planted in groups and not scattered among evergreens. Some varieties need plenty of room as they grow quite large in a few years.

They are fine for borders, where they can develop to their full beauty.

HARDY FLOWERS

Are you interested in Hardy Flowers ? A sunny location is the ideal place for them.

Let us make you one of those well known Old English borders.

Field clumps of 24 var. \$ 30.00 per 100

ROSES

Is there any other plant more popular than the Rose ? And how thankful a bloomer it is when it receives the right care.

Of course those offered at half the usual price do not stand our winters, nor the hot spells in summer. It generally has been forced greenhouse stock, its vitality used up while producing flowers for the florist's store.

Therefore buy field-grown Roses. They will give you satisfaction. Their constitution is very strong, consequently they will flower abundantly.
