THE WORLD IS NOT SO BAD

This world is not so bad a world
As some would like to make it,
Tho' whether good, or whether bad,
Depends on how we take it.
For if we scold and fret all day
From dewy morn till even,
This world will ne'er afford to man
A foretaste here of heaven.

This world in truth's as good a world
As e'er was known to any
Who have not seen another yet,
And these are very many;
And if the men, and women, too,
Have plenty of employment,
They surely must be hard to please
Who cannot find enjoyment.

This world is quite a pleasant world,
In rain or pleasant weather,
If people would but learn to live
In harmony together;
And cease to burst the kindly bond
by love and peace cemented,
And learn that best of lessons yet,
To always be contented.

Then were this world a pleasant world,
And pleasant folks were in it,
The day would pass most pleasantly
To those who thus begin it;
And all the nameless grievances,
Brought on by borrowed troubles,
Would prove, as certainly they are,
A mass of empty bubbles.

To my Friends and Patrons

Greeting:

Since sending out my price list one year ago, my business has been all that I hoped, and more than I expected and I thank you each and all for your help in contributing to that result. Owing to an exceptionally good growing season, and plenty of help, my stock for this year's sales is especially strong and healthy; in fact I think it is the best I ever sent out.

To those who have not yet tried my stock

"The Glad Philosopher" of the The Flower Grower says "as a usual thing I get the least value from the advertiser who glibly promises the most."

With that in mind, rather than use space making extravagant promises, telling you what a "good fellow" I am, and what remarkable bargains I will give you, I will let my customers tell what I have done for them. If, after reading what follows you feel inclined to favor me with a trial order, you may feel assured that you will receive as careful service as was given to the writers.

Yours very truly,

GEORGE N. SMITH.

Wellesley Hills, Mass.,

July, 1922.

Hillsboro, N. H., April 26, 1922.

The order of plants just received from you were such good strong plants that I am sending another order.

Richmond, Va., May 14, 1922.

I bought Iris of you last year and the year before, and was very much pleased with the generous way in which you filled my orders. * * *

I have many flowers, but specialize in Iris. It has been recently adopted as the City Flower of Richmond.

Waynesboro, Va., Sept. 5, 1921.

I bought your collection of Irises last fall and was very much pleased with them. All but two

bloomed this spring and were certainly beautiful.

I want another collection this fall.

Canton, Ill., Nov. 17, 1921.

You couldn't have pleased me more in filling my order. Such extra size and such choice varieties. I prize every one. Please send the following order:

Sheridan, Oregon, Feb. 7, 1922.

Due to the generous way in which you filled my order for German Iris last Spring, I am herewith sending you another order.

Angola, Indiana, April 1, 1922.

The Iris roots which I bought of you last spring were so nice that I am sending for more.

Chicago, Ill., April 6, 1922.

Iris purchased from you on two other occasions were more than satisfactory. Please send me * * *

Wagener, Oklahoma, May 19, 1922.

Last Fall I received from you a collection of Iris and was more than pleased with their size. I am sending another order.

New London, Conn., June 3, 1922.

Kindly send me your latest catalogue. The plants I bought of you last year were very fine and as I want to extend my collection a little each year I shall certainly send my orders to you.

Philadelphia, Pa., June 16, 1922.

You have been very much in my thoughts the past month. My Peonies have been wonderful, better than ever, and have given me a great deal of joy.

Solange produced a dozen or more of the most beautiful blooms that I have ever seen, and I sat for hours at a time just looking at its gorgeous blossoms. I really think Solange is the most beautiful peony in existence, barring none. LeCygne, although only in its second blooming season, gave me five good blooms. The others were all that could be hoped for and lots of them far surpassed any description that could be written of them.

My Iris were also very fine. Lord of June has been one of the favorites, sharing honors with Lady Foster. People even stopped me on the street sometimes and inquired the name of it. In two years it has grown to quite a large clump and gave at least a dozen blooms. * * * I have given your name to lots of people.

PEONIES

Words cannot describe the beauty of the modern peony. Only those who have seen the recent introductions have any conception of its charms with flowers four to eight inches in diameter, on long stiff stems, in the greatest possible variety of color and form, many of them equal to the rose or carnation in delicious fragrance.

Hardy as an oak, and once planted in good soil they require very little attention. No roots to take up each fall and plant in the spring, when once planted all is done, each year adding to the size and beauty. "Massive, without being coarse; fragrant without being pungent; grand, without being gaudy; various in form and color, beyond the possibility of being successfully superseded, it stands in the front rank of hardy flowers."

Planting and Cultivation

While the peony will grow and flower under conditions which would be fatal to most plants, it will freely respond to liberal treatment, and if the best flowers are wanted, it will pay to plant in well prepared ground and keep them well cultivated and enriched. If it can be obtained, use a liberal quantity of well rotted stable manure, thoroughly mixing it with the soil. Never allow fresh manure to come in contact with the roots, although it may be put on top of the ground as a mulch. Ground bone and wood ashes are excellent. A commercial fertilizer strong in potash is good.

Plant three feet apart, with the eyes about three inches under ground. Too deep planting may cause shy flowering.

Time to Plant

Peonies may be planted in the fall any time after the first of September until the ground freezes, or early in the spring, although the best time is during September and October, since they then have time to form new roots and get a good hold of the soil before winter.

Do Not Expect Too Much at First

Péonies when transplanted do not fully recover and produce typical flowers until the second or third year.

If large flowers are wanted, pick off all but the central bud on each stem; before and during the flowering season be sure that they have an abundance of water. If the flowers are cut before they are opened and put in water in the house, they will be larger and brighter colored and keep longer than if allowed to open in the sun. Make a new cut on the stem and give fresh water every day.

When cutting flowers, especially from young plants, do not cut too near the ground, but leave as much foliage as possible, because the leaves are necessary for root growth. The leaves gather certain gases from the air, while the roots take up plant food from the soil in the form of salts, and the assimilating is done by leaves. Leaves are as necessary to plant life as lungs are to animal life.

Varieties—True to Name

Instead of a long list of varieties, regardless of quality it is our aim to offer the best of different colors and types covering the flowering season from the earliest to the latest.

We spare no effort to keep our stock healthy and true to name.

Service and Prices

A pleased customer is our greatest asset and we try to give service that will increase our assets yearly. We are not satisfied until our patrons are more than satisfied, as we realize that our success depends more on the service we give than on the profit we make.

We have put our prices as low as is consistent with good stock true to name. Not so much depends on what you pay as on what you get.

Please do not send an order for less than one dollar. Due to the expense of digging and packing they can be filled only at a loss.

HOW TO REACH US

We are located on Cedar Street just off Worcester Street (old Worcester turnpike) about one mile east of Wellesely Hills Square. Boston and Worcester Electric cars pass within two minutes walk of our grounds.

Automobiles coming from the Newtons via Washington Street should bear to the left on Wales Street at the foot of the hill approaching Lower Falls—cross the river—up hill a few hundred feet—left under stone bridge, then keep along Cedar Street to the nurseries. From Needham, keep along Hunnewell Street to Cedar Street, or Webster Street to Hurd's Corner, then Cedar Street.

EVERYBODY WELCOME

Lowville, N. Y. June 30th, 1922.

First, I want to tell you how well pleased I was with the Peony stock I received from you last September. In the first place you shipped them the very day I asked you to, and out of the twelve received ten bloomed, now that is going some.

Pittsfield, Mass., June 30, 1922.

Please send me * * * *. Again, I have been more than pleased with the Peonia roots I purchased from you last September. Therese gave four large blossoms and Solange two, and I did not expect that much the first year.

BEARDED IRIS (German Iris)

THE ORCHID OF THE GARDEN

(Fleur de Lis)

"There's crimson buds and white and blue—

The very rainbow showers

Have turned to blossoms where they fell

And strewn the earth with flowers."

I believe that I am perfectly safe in saying that there is no flower presenting such a wonderful variety of coloring as the iris. We often hear the expression, "it rivals the orchid!" I claim that it excels the orchid. They are as easy as weeds to grow, in fact will submit to more abuse than most weeds. I have seen them thrown on top of a hill in September and remain there until the following June without any protection and then flower. (The above is merely to show its hardiness). They seem to succeed over a greater range of territory than any other plant, withstanding the cold of Canada and the heat of Mexico.

Irises will adapt themselves to almost any soil or situation, but they prefer a well-drained soil and a sunny exposure. Their ability to withstand drouth and heat is truly astonishing, but should not be taken advantage of if good results are expected. For a fertilizer, ground bone seems as good as anything. If the soil is sour add lime.

Irises may be successfully planted any time when the ground is in workable condition, but the sooner they are planted after they are through flowering the better will be the results the following year. If planted late in the fall they should be given a light mulch to prevent their being lifted out of the ground by the alternate freezing and thawing.

In the following descriptions S. signifies standards of upright petals, and F. the falls or drooping petals.

HARDY PHLOX

Perennial Phlox are very desirable summer and fall blooming plants, flowering from the first of July until after severe frosts. By planting Iris, Peonies and Phlox a display of flowers may be had from May until cold weather.

Owing to our large demand for Phlox last season I can offer only the varieties named below at this time.

Hope to have a good stock next year.

CANDEUR. Dwarf; pure white flowers in a large truss; very fine.25

COQUELICOT. Brilliant orange scarlet. . .25

ETNA. Brilliant orange-red; large flowers and branching spikes; extra25

INDEPENDENCE. Tall, pure white.25

IRIS. Light purple.

LOTHAIR. Clear even carmine, deep crimson eye.25

RICHARD WALLACE. Tall; white with violet red center; a good old sort, always clean and fresh.25

ROSENBERG. Rich carmine violet with blood red eye. Fine trusses with individual flowers of immense size, sometimes as large as a silver dollar25

WELLESLEY. A seedling of Elizabeth Campbell. When first shown before the Mass. Horticultural Society "Horticulture" said of it: "One of the best of the novelties was Geo. N. Smith's New Phlox Wellesley, a pink of exceptionally pure color; he had other good seedlings, too."

Nearly everybody who sees it wants it although one nurseryman says "it don't amount to much." .50

NO. 15. Another of our seedlings. A stocky little plant growing about 18 inches high. Good truss of white flowers with light red eye.25

“Men seldom mount, at a single bound,
To the ladder’s very top;
They have to climb it, round by round,
With many a start and stop.

And the winner is certain to be the man
Who labors day by day,
For the World has learned that the surest plan
Is to just keep pegging away.”
