PEPPER SPECIALISTS

The Largest Exclusive Growers of Pepper Seed in the United States
Experiment, Ga.

To the Seed Trade:

In presenting this, our Annual Circular, we want to thank the trade for their liberal patronage and confidence in our Pepper Seed business.

We are devoting all our time to the production of **QUALITY** Pepper Seed, with the result that our trade grows from year to year. This attests to the uniformity and value of our strains.

We spare neither time or money to produce the best in Pepper Seed that can be produced. Please bear in mind that we are not canners, packers, or shippers, but strictly seed growers. We do not save seed from culls or undeveloped fruits at the end or late in the season, as is frequently done in other sections.

If there is any doubt in your mind as to how we handle our seed business and the superiority of our strains, all we ask is to come and see, or inquire of any of our many customers.

We have the most extensive trial grounds of Peppers each season to be found in the country for the benefit of ourselves and our customers, who are always welcome.

You will note from our list that we are growing eight varieties this season. Our strains of these varieties are the best and not mixed up either in the seed house or fields, as this is given the personal attention of a member of our firm.

Our varieties are constantly selected and rogued from year to year, assuring our customers the best that can be produced.

ROYAL KING

Our own introduction, developed to supply a critical tracking trade. A great Pepper for packing and shipping. A heavy bearer of large, square blocking, uniform Peppers, that are held well up off the ground on sturdy, healthy plants. Fruits are thick-fleshed, of dark, glossy green, changing to brilliant red when ripe. Developed from the Ruby King, but not quite so long, and is larger, broader and heavier. Large per cent four-lobed. Holds its size well to the end of the season. A great Pepper, both for the home garden and the trucker.

RUBY KING

An old stand-by. Holds a leading place among the sweet Peppers. A vigorous grower and very productive. Fruits run from 4 to 5 inches in length and usually three-lobed. Flesh good thickness, mild and sweet. Good for salads and slicing. A popular variety with the trucker and shipper. Holds up well to the end of the season. There is not a better strain on the market than we are offering. Our strain is very early and a wonderful bearer. Frequently 20 to 30 large Peppers on the plant at one time. See plate.

RUBY GIANT

A popular variety in many trucking sections. A Chinese Giant-Ruby King cross, with the good qualities of both. A very attractive Pepper of large size, very mild and sweet. A better bearer than Chinese Giant and larger than Ruby King. It matures early and is a popular home and market variety and gaining in favor yearly. Our stock of this Pepper is noted for its large size, vigorous growth, uniformity and earliness.

NEAPOLITAN

An upright variety of recent introduction. Of Ruby King shape, but smaller. One of the earliest Peppers in cultivation. A wonderful bearer of uniform fruits; about 3 inches in length, of light green color, changing to brilliant red when ripe.

For those who desire an extra early Pepper of medium size this variety will fill the bill.

Our stock of this variety runs very true to type.

Valuable for the grower in the far North and for the trucker who wants to be first on the market.

BELL OR BULL NOSE

Favorably known for nearly a century. Plants medium growers. Fruits heavily with fruits about as broad as long, or 2 1-2 x 2 1-2 inches. Early and productive bearing to the end of the season. Well known everywhere. Our strain will give satisfaction.

PERFECTION PIMENTO

A sport plant among an importation of the Pimento Peppers from Spain nine years ago by ourselves. In a class by itself. Listed by practically all of the seedmen. A late Pepper, but productive of heart or top-shaped Peppers of medium size. Smooth as a glove, without ridge or wrinkle. Dark green, changing to brilliant red. The great canning Pepper. Five thousand acres will be planted in this section in 1922 for canning, all of our Perfection strain.

There are a number of types of the Pimento Pepper on the market that are not desirable. So buy from originators and be sure of the best.

GOLDEN QUEEN

Of all the yellow-fruited Peppers our Golden Queen is the largest, most productive and finest. The plants are upright and set heavy loads of most beautiful Golden Yellow Peppers.

The fruits are quite large, meaty and perfectly mild and sweet.

Fine for slicing and makes a fine contrast when served with the red or scarlet varieties.

Our stock of this variety is unsurpassed.

CHINESE GIANT

The largest pepper in cultivation but rather late.

Plants are strong and stocky, of bushy, erect growth, 18 inches to two feet high, producing Peppers that are mammoth in size—frequently as large as quart cups. Flesh thick, mild and sweet. Good for slicing and salads.

A popular variety for the home garden. A poor seed maker, therefore the demand usually exceeds the supply. Our stock is pure and as good as can be obtained.

1922 Contract Prices

Due to long and favorable seasons, fertile soils and very cheap labor, we are enabled to make the following low prices:

25 Pounds and Up:	Per Pound	Less Than 25 Pounds:	Per Pound
