SPRING OF 1923

BERRY PLANT PRICE LIST

The above is from an actual photograph, showing part of our field of Superb and Progressive Everbearing Strawberries, taken on Oct. 15th, 1915. This field was set in the spring of the same year and that fall we picked 170 bushels of berries, the day this photo was taken we picked nearly 11 bushel and then did not get them all picked.

This picture has been used by several different Nurserymen in their catalogs, who have represented it to be a picking of various varieties other than Superb and Progressive. Any one so using it is not giving true facts.

BERT BAKER,

HOOSICK FALLS, N. Y.

INTRODUCTION

Our Business—We have for several years been growing berry plants in a large way, shipping many of them in full carload lots, and supplying some of the largest and most reputable Nurserymen with plants, they again selling them at greatly advanced prices.

Location—We are located on the Boston & Maine Railroad, in the extreme eastern part of the state, among the foothills of the Adirondack Mountains, and only a few miles from either Vermont or Massachusetts. In this locality wild berries, both Raspberries and Strawberries grow to a perfection that is seldom attained in any other place. Our Winters are very severe, thus making our plants much more hardy than those grown in warmer localities. Our soil varies from a gravel loam to muck, producing large plants with a great abundance of fibrous roots. I believe there is no place in the Country that will grow better Red Raspberry plants than here.

Terms—Cash should accompany the order, or one-fourth when order is sent and balance before plants are shipped. Money may be sent any way that is most convenient to the sender. 50 will be given at 100 rates, 500 at 1000 rates. If plants are to be sent by Parcel Post add 20 cts. per 100 for strawberries and 40 cts. per 100 for Raspberries.

Guarantee—We guarantee our plants to be true to name, yet through mistake, should any be sent that did not prove so, we will gladly return purchase price.

Substitution—In case we should be out of a variety ordered, we will not substitute unless so requested.

Free of Disease—State Certificate of Inspection with each order.

References—Peoples' National Bank, Hoosick Falls, N. Y., Bradstreet's Commercial Agency.

RASPBERRIES

During the past two years most farm crops have been selling below the cost of production, while berries have been bringing very high prices, in our own surrounding markets the reds wholesaled at a price that would bring the net returns from an acre, to a figure almost unbelievable.

We are the largest growers in the United States of Red Raspberry bushes.

Cuthbert—The most popular red on the market, very productive of the best quality of fruit. This variety is so well known that it needs no introduction. \$1.00 per 25; \$2.25 per 100; \$18.00 per 1000.

Herbert—Enormously productive of extra large fine flavored berries, fruit is larger but not quite firm as Cuthbert. \$1.00 per 25; \$2.50 per 100; \$20.00 per 1000.

Victory—This new red was introduced by O. A. D. Baldwin, of Bridgman, Mich., the most promising of any of the newer varieties. In growth of bush, firmness and quality of fruit, very similar to Cuthbert, yet bush is more hardy and productive and fruit is larger. What more could be said of any variety? Every grower should give it a trial. \$2.00 per 25; \$5.00 per 100; \$40.00 per 1000.

St. Regis Everbearing—Does well with many producing abundant crops until frost, canes are the hardiest of the reds should be given a trial. We are growing several hundred thousand plants of this variety, and our stock is pure. \$1.00 per 25; \$2.25 per 100; \$18.00 per 1000.

Ontario—A new red originating at our State Experimental Station at Geneva, plant is a strong grower, hardy, free from briars, and very productive of large excellent flavored berries. Well worthy of a trial. \$2.00 per 25; \$5.00 per 100.

LaFrance—A new Everbearing red of great promise. 40 cts. each; \$4.00 per 12.

Erskine Park Everbearing Red—The best of the Everbearers in some localities. \$1.25 per 25; \$3.00 per 100.

Columbian Purple—With us the most productive of all Raspberries and the best flavored for canning or pies. \$1.25 per 25; \$3.00 per 100; \$25.00 per 1000.

Royal Purple—\$1.50 per 25; \$3.50 per 100.

Plum Farmer—The best Black Cap. \$1.00 per 25; \$2.50 per 100; \$20.00 per 1000.

Snyder Blackberry—Hardest and most productive Blackberry. \$1.25 per 25; \$3.00 per 100; \$25.00 per 1000.

GRAPES

Concord—20 cts. each; \$2.00 per 12; \$11.00 per 100.
Worden—25 cts. each; \$2.50 per 12; \$14.00 per 100.
Niagara and Moores Early—Same price as Worden.

CURRENTS

1 Yr.. No. 1

Perfection—25 cts. each; \$2.40 per 12.
Diploma and Red Cross—20 cts. each; \$2.00 per 12.

ASPARAGUS

1 Yr., No. 1

Giant Argentueil—\$1.00 per 100; \$6.00 per 1000.

BARBERRY THUNBERGH

25 cts. each; \$2.50 per 12.

EVERBEARING STRAWBERRIES

We have made a specialty of growing Everbearing strawberries, we have one of the best fruiting strains to be found in the Country. Our plants are genuine.

Superb—The leading everbearing strawberry in the North, an ideal plant grower, berries are large as the largest summer fruiting varieties and almost perfect in shape. Beside its fall fruiting qualities, it is as a summer cropper, one of the most productive varieties ever introduced, and is well worth the price charged for the plants for its summer fruiting qualities alone. 75 cts. per 25; \$1.75 per 100; \$12.50 per 1000.

Progressive—With us this has proven to be the most productive as a fall cropper, of all the everbearers, excepting Champion, they are so persistent in producing berries that many of the runner plants send out fruiting stems before they do roots; this variety will yield a heavy crop the same year the plants are set. Berries are medium in size and of excellent flavor, being in this respect better than most June fruiting varieties. There have been a great many plants sold as Progressive which proved to be Senator Dunlap. Price same as Superb.

Peerless—Quite similar to Superb, claimed by some to be larger and more productive. Price same as Superb.

Neverfail—This variety has not done as well with us as Superb, with some it yields better. \$1.00 per 25; \$2.00 per 100; \$15.00 per 1000.

Champion—A new variety of the Progressive type that we fruited for the first this past summer; we think it more productive than Progressive and fully as good quality. Be sure to try this one as it is going to be a winner. \$1.00 per 25; \$2.25 per 100; \$16.00 per 1000.

999 Giant—Introduced by Gardner Nursery Co., Osage, Iowa. A promising variety, productive of medium sized, excellent flavored berries. Well worthy of a trial. \$1.00 per 25; \$2.50 per 100.

Lucky Boy—\$1.00 per 25; \$2.00 per 100.

Lucky Strike—\$1.00 per 25; \$2.00 per 100.

SUMMER FRUITING STRAWBERRIES

Howard No. 17—This is at present the most popular variety in the New England States, fruit ripens very early, is large, handsome and productive. 40 cts. per 25; \$1.00 per 100; \$6.00 per 1000.

	Per 25	Per 100	Per 1000
Sample	\$.40	\$1.00	\$ 6.00
Premier	.40	1.00	6.00
Senator Dunlap	.40	.90	5.50
Glen Mary	.50	1.25	7.50
Warfield	.40	.90	5.50
Bushel Basket	.50	1.25	7.00
St. Martin	.60	1.50	10.00

Quart of our Superb photographed October 15, 1915.

Our Everbearing plants are strong, healthy and sure to give satisfaction.
