GUNN SEED COMPANY
127 SOUTH 10TH ST. LINCOLN, NEBR.

WHAT ARE CHEAP SEEDS?

When you plant seed you do it to get a crop. You don't want the stand thin, nor do you want to spend years cutting out the noxious weed.

When you think of it you know the cheapest seed you can buy is the one that produces the most plants to the pound along with the least number of weed seed.

Don't kid yourself into thinking that because some groceryman or hardware man sells you seed at a low cost that you are buying a real snap. You're not. He buys it from some seed house and he is making a big profit. We can always make more profit on poor seed than we can on good high-grade quality.

Another Thing—There is no "Best grade." One man's best grade may be some one else's fourth grade.

What Can You Do?—First thing, buy of a square-dealing Seed House. Seed houses know seeds. They don't dare to sell the consumer poor seed. They might, however, work it off on some other dealer.

I am sure you know your business better than I do, but it's likely that I know the seed business better than you do; been at it twenty years.

Nebraska New Seed Law compels everybody who sells seed to attach a tag to each bag, showing purity, germination, per cent of weed and amount of noxious weed. Read these tags and don't buy any seed unless the tags are there. Only Nebraska dealers and farmers have to comply with this law. So buy your seed from Nebraska dealers.

1923 Prices—Practically all our prices are equal to or lower than pre-war prices. Grade for grade, we have always sold better seed for the same prices than others. In six years we have built up our large business by selling good seed at low prices.

Remember, "If you buy it from Gunn it's right."

Yours for better and purer seed,

Gunn Seed Company.

ED. S. GUNN.

Gunn's Colossal Tomato, shown on front cover, is described on page 10.

Standard Seed Tester

Many seed houses are willing to "take a chance" on their seed because "it looks like it would grow." We do not do that. We must know that it grows. We use the Standard Tester; it is like the one used by our own Nebraska Pure Seed Commission and by many of the State Experiment Stations. It tests all kinds of seeds, from the smallest (like cabbage) to the largest (like lima beans). Come in and see it work.

Instructions

OUR TERMS ARE CASH WITH ORDER

ONE GRADE ONLY—We quote only the best and highest grade. We do not believe in low grades. Better buy the best and sow less.

SAFE ARRIVAL GUARANTEED—We guarantee all goods to reach you safely. For any loss have agent make notation on express bill and send it to us.

SUBJECT TO INSPECTION—Any seeds purchased from us may be submitted to any experiment station for test. If not satisfactory, return to us and your money will be refunded in full.

ORDER EARLY—Everything is going up. For this reason, we reserve the right to cancel prices when stock on hand is sold.

ERRORS—Keep a copy of your order. We might make a mistake, and if we do, just write us and we will make it right.

We Ship Incubators and Brooders Prepaid to Any Place in the United States.

About Bags

We use heavy 2½-bu. grain bags on Corn, Alfalfa, Clovers, Timothy, Red Top, Grains, Millets, Kaffir Corn, Milo and other Sorghums. They weigh 1 pound each. We do not weigh them in. These cost you 35 cents each. We refund full price if you return them. Grasses are shipped in gunny bags, which are weighed in but are otherwise free.

OUR GUARANTEE

We are very careful in the handling of all our seed. We guarantee that our seed has been carefully tested and that we do not send out any but what shows a good growth. When you receive our seeds, test them any way you wish. If you are not satisfied, return them any time within two weeks and we guarantee to refund to you all the money you are out.

We do not guarantee the crop in any way, because we cannot plant your seed or control weather conditions. This guarantee means just what it says.

GUNN SEED CO., Ed S. Gunn.

We pay postage or express charges on garden and flower seeds when sold at catalog prices.

Prices on all grass and field seed and potatoes are subject to change. Price sheets give latest prices. Give us a nice tryout this year.

Stock Beets

CORN-SAVER BEETS—This beet is well known over most of the U. S. It takes its name from the fact that when properly fed, it will actually save corn, probably more than half, and thus produce pork at a large saving. These beets will frequently grow to weigh 28 pounds and yield as much as 80 tons (160,000 pounds) to the acre. They contain a large amount of sugar and are good for all kinds of stock—especially cows, hogs, sheep and chickens. Price—Genuine Corn Saver, ¼ lb., 25c; 1 lb., 40c; 5 lb., \$1.75c; 10 lbs. (for 1 acre), \$3.25.

MAMMOTH LONG RED

IMPROVED—This is the heaviest yielding of all the Mangel Wurzel, a thousand bushels to the acre being quite a common yield; single roots sometimes weigh as high as 40 pounds each. Our Improved Mammoth Long Red produces large uniformly straight, well formed roots and can always be relied upon to produce a bumper crop of clean, sweet, crisp roots; just the kind of feed that cattle delight in. Try 5 or 10 acres.

GIANT SLUDSTRUP

Long, reddish yellow, grows well above the ground, and easy to pull. Is doubtless the best mangel in the world. No other crop can match it.

SUGAR BEET (Klein's

Wanzleben)—This is considered the most desirable variety for sugar. It is also desirable for feeding to stock, and yields an immense crop on rich land. ¼ lb., 15c; ½ lb., 25c; 1 lb., 45c.

GIANT HALF SUGAR MANGEL

Introducing this beet to our customers, we believe that the grower has established a strain of beets, which while giving nearly as large a yield of easily grown and harvested roots as a crop of mangels, supplies a food of very much higher nutritive value. The roots are red skinned, grow half out of the ground.

Prices on all Mangels except Corn Saver, ¼ lb., 15c; ½ lb., 20c; 1 lb., 35c.

CULTURE—Sow as soon as the soil is warm, in rows 2 to 3 feet apart; cover about one inch. Thin the plants to about 10 to 12 inches apart in the rows. Sow 10 pounds of seed to an acre. If very dry, soak the seed 24 hours in lukewarm water. Harvest just before frost. Cut off the tops and store roots in cool cave or cellar. Cut up and feed 10 to 20 pounds per day. Mangels do not taint the milk.

As a succession crop or as a crop for winter use, beets cannot be too highly recommended. We urge every gardener to make several sowings.

Gunn's Select Beans

One pint to 40 feet. Sow every two weeks. Grown by one of the best and most careful Michigan growers.

Wax Beans

EXTRA EARLY WONDER WAX BEANS—Brings highest market prices, is a wonderfully heavy yielder, nearly rust proof, stringless and tender, in fact, fills every need. Frost-Proof Cabbage Plants

Will Mature Heads Two to Three Weeks Earlier Than Your Home Grown Plants and Double Your Profits.

Grown where the soil and climate conditions are just suited for producing tough, hardy cabbage plants during the Winter and early Spring, these plants make a slow but steady growth, until at eight to ten weeks of age they are very tough and hardy. When in this condition they can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants. These plants will stand a temperature of 20 degrees above zero without injury. The land freezing, or the plants being covered with ice, sleet or snow after they are planted will not injure them, providing temperature does not go below 20 degrees above zero. The top of the plant does not grow until your regular Spring weather opens up, but the roots grow from the time they are planted, and just as soon as spring weather starts, the established root growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed cabbage two to three weeks sooner than you can mature them from hot bed and cold frame plants.

Varieties: Early Jersey Wakefield, Charleston Large Type Wakefield, Succession and Early Flat Dutch.

Prices by Parcel Post, postage paid. In lots of 100, 200, 300, or 400 plants at 50c per 100 plants; 500 plants for \$1.60; 1000 or more at \$3.25 per 1000 plants.

Orders are filled by the 100, not 250 or 350. These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another variety you would pay at the 100 rate.

Prices by Express, buyer paying express charges. In lots of 1000 to 3000 plants at \$2.00 per 1000; 5000 or more at \$1.50 per 1000. Plants packed for express shipment, 1000 or 2000 plants of a variety to package, they weigh about 25 pounds per thousand plants, packed for shipment.

Order Early to Get Plants Delivered In Time

When we receive your order for these plants, we have to forward it to our growing station which takes several days. Plants are shipped direct to you from growing station. Plants cannot be pulled or shipped when beds are wet. We sometimes have a week or ten days of continued wet weather which prevents shipment. If you do not receive your plants as soon as you expect them, you will know that weather prevents shipment. Send your order two to three weeks before you expect to set the plants and you will get them on time.

Grown from Plants.

Burrell's Gem

Christmas Melons

GOLDEN BEAUTY—This one we recommend as the best of the Autumn varieties. It begins to ripen in August and continues bearing and ripening all Summer and Fall or until frost comes. The latter fruits can be stored in a cool house or cellar, and will ripen slowly, so they can be marketed from time to time until late January or early February. Golden Beauty is bright yellow, about globular in shape, with wrinkled skin, slightly pointed at the stem end. The fruits are from 6 to 8 inches in diameter. Flesh thick and delicious. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; lb., \$1.75.

IMPROVED HYBRID—A variety which ripens late and is a good keeper; the flesh deep, and most delicious. Is not at its best until the thumb will make an impression in the rind, as in a mellow apple. Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$1.75.

Honey Dew Melon

This is a new type of melon. The color is dull white when ripe, size about 6 inches long, all melons being nearly the same size. The rind is very tough and so close that the excellent flesh is practically sealed up where it keeps in finest condition from 3 to 5 months after it is ripe. Color of flesh is rich green from close to the rind to the seed cavity and the flavor is delightful to all who enjoy a good melon. It has the sweetness of honey and the freshness of morning dew. Pkt., 10c; oz., 15c; ¼ lb., 50c; lb., \$1.50. All packets, 5c each; 6 for 25c.

TRY THIS: Plant Rape and Rutabagas near all Melons and Cucumbers. The insects that live on these plants feed on and destroy the melon lice.

Kohl-Rabi

EARLY WHITE VIENNA—Handsome and delicate; white ball. Oz., 35c; ¼ lb., \$1.15.

EARLY PURPLE VIENNA—Handsome and delicate; purple ball. Oz., 35c; ¼ lb., \$1.15.

Frost-Proof Onion Plants

In addition to our frost-proof cabbage plants, we are growing this year the White Bermuda and Prize Taker onion plants. These are just as hardy and cold resistant as our cabbage plants and should be planted at the same time. Experience of several years has shown that you can produce a much finer and larger onion from the plant than you can from the set. The retail prices on onion plants are the same as on Frost Proof cabbage plants. Page 3.

Gunn's Selected Peas

Our Peas are grown for us in Northern Michigan by an expert pea and bean grower. All fields are carefully rogued, and there is none better.

Extra Early

PETER PAN—Fifteen-inch vines, and foliage stout, heavy and dark green; pods 4 inches long, containing 6 to 8 very large, dark peas, of superb quality. Pt., 30c; qt., 50c; 2 qts., 95c.

RICE'S EARLY DWARF—Fourteen-inch; an excellent extra early dark green variety, and pods $3\frac{1}{2}$ inches long, containing 6 to 7 large sweet peas; very productive. Pt., 30c; qt., 50c; 2 qts., 95c.

BLACK EYE MARROWFAT—Five feet; a heavy yielding large pole pea. Pt., 30c; qt., 50c; 2 qts., 95c.

ALASKA—Height, $2\frac{1}{2}$ feet. Very early and exceedingly uniform in maturing its crop. The vines are very productive, bearing four to seven pods, which are filled with medium sized, bright, bluish-green peas of good flavor. Pt., 25c; qt., 50c.

FIRST AND BEST—Thirty inches. Very early; popular for market and shipping. Pt., 25c; qt., 50c; 2 qts., 90c; gal., \$1.75.

THE AMEER OR MAMMOTH ALASKA—Thirty-six inches. This new variety resembles the Alaska, the vine being more vigorous, a little taller, and the pods and peas are fully one-third larger. It is a heavy producer, with handsome, dark-green pods, containing from 5 to 7 large, blue-green, round peas of excellent quality. The crop ripens uniformly, about 3 days later than Alaska. We can recommend this to gardeners as the most prolific pea for early planting. Postpaid, pt., 30c; qt., 50c; 2 qts., 95c.

Dwarf Early Peas

GUNN'S EXCELSIOR—Sixteen inches. This is an improvement over Nott's Excelsior. Just as sweet; a few days earlier; better bearer, larger pods. Pt., 30c; qt., 50c; 2 qts., 95c; gal., \$1.85.

NOTT'S EXCELSIOR—Twelve inches. An improvement on American Wonder. Pt., 25c; qt., 50c; 2 qts., 90c; gal., \$1.75.

Peanuts

THE JUMBO VIRGINIA is the large podded peanut sold in candy and grocery stores. It requires a rather rich soil; yields heavily under favorable conditions; does not do so well under dry farming conditions; for if the growth is checked for several weeks, there is not time enough after the fall rains for this variety to fill. 30c per lb. At purchaser's expense—10 lbs., or more, 25c per lb.

Red River Ohio Potatoes

Potatoes Certified

RED RIVER OHIOS—There is a lot of difference in the Red River Ohio potatoes. Some of the so-called Red River Ohios were never grown anywhere near the Red River Valley, and some that have been grown there were grown by growers who are careless, and the seed stock is very scabby and knotty. Our stock is certified and carries the blue label.

Big Yields from Minnesota Potato Seed

Minnesota-grown potato seed yielded nearly twice as many potatoes as seed produced in Iowa, according to experiments recently conducted at the Iowa State Experiment Station, Ames, Iowa.

Referring to this experiment, which was conducted in seven Iowa counties, Professor C. L. Fitch, who had charge of the work, says: "The northern seed produced 115 bushels of good table potatoes and the cornbelt seed 43 bushels, a difference of 73 bushels, worth at least \$100."

Hydrated Lime for Lawns

Help make a city of beautiful lawns. Use hydrated lime to restore worn out sour soils. It assures such velvety lawns and flourishing gardens. Loosens up hard, sticky and compact soils, making them more porous and crumbly, permitting the roots to spread and grow and take up nutriment from the air and water. Glencoe Hydrated Lime is the perfect soil Sweetener.

Prices: 10 lbs. (for 100 sq. ft.), 35c; 50 lbs. (for 500 sq. ft.), \$1.15; 100 lbs., (for 1,000 sq. ft.) \$2.15.

LAWN BONE FERTILIZER—Composed mainly of fine, ground bone. It is clean and dry and furnishes just the desired element for young plants, and gives to the grass a permanent, rich, green color. It can be sown easily by hand. On new lawns it should be sown same time as the seed, and on old lawns any time in the early spring. It furnishes the same nourishment as manure. One hundred pounds covers surface 30x30 feet. Price: By freight, 25 lbs., \$1.20; 50 lbs., \$2.75; 100-lb. bags for \$4.60.

NITRATE OF SODA—A quick-acting nitrogen fertilizer for rapid leaf growing. Price (subject to change), 5 lbs., 65c; 10 lbs., \$1.20.

Prices subject to change.

Gunn's Lawn Grass Seeds For Lawns

Gunn's Velvet Grass Mixture

GUNN'S VELVET GRASS MIXTURE—This is composed of a mixture of grasses recommended by State University Farm as the best mixture for this part of the United States, with the idea of producing not only a desirable lawn with the least possible delay, but a lasting lawn that will give a beautiful velvety appearance, and one that will stand our severe summers. The seeds we use in this mixture are of the highest purity and germination, which makes it a little more expensive, but a great deal more valuable than the common run of grass seed.

You should use about one pound of seed to every 300 square feet, and see that the seed is raked in as early in the spring as possible. Price, per lb., 75c; 5 lbs., \$3.50.

Cannon Blue Grass

PURE MISSOURI GROWN KENTUCKY BLUE GRASS—Nebraska's Pure Seed Law requires us to sell Blue Grass of a purity of 80 per cent, with a germination of 40 per cent. This Blue Grass the past year tested 97 per cent pure, with a germination of 95 per cent. This year's stock will about equal last year's. It is the best produced; about four grades better than usually sold. Prices: Per lb., 70c; 5 lbs., \$3.25; 10 lbs., \$6.25.

FANCY KENTUCKY BLUE GRASS—This is the regular grade. It passes the state law. Price: Lb., 60c; 5 lbs., \$2.75.

White Clover Lawn Seed

CANNON BRAND WHITE CLOVER—This is a special White Clover Seed that is grown in Wisconsin. It is practically pure seed, testing better than 99 per cent and germinating right at 100 per cent. It is the best White Clover that can be had. All White Clover Seed very scarce. Price: Per lb., 95c; 5 lbs., \$4.15; 10 lbs., \$8.00.

Skinner Sprinkler

Here is a real Lawn or Garden Sprinkler. It sprays square, and is so arranged that all the lawn gets the same amount of water. It sprays a space about 16 feet square. It rolls over the lawn after each space is watered. Use it on the garden. Price \$16.50.

Tried and Proven To Be The Very Best

New Lincoln High School

GROUNDS SEEDED WITH GUNN'S VELVET LAWN GRASS

THESE beautiful grounds were seeded with Gunn's Velvet Lawn Grass Mixture in September, 1916. The Board of Education used about 1,000 pounds of this mixture, because of the high germination and with the idea of securing a better and more lasting lawn than if sod were used. (Part of this lawn had already been sodded, but dried out.) When the winter set in, the lawn was covered with a most beautiful velvet-like stand of rich green grass. The great trouble with sod is that it kills out easily because the heavy and more important roots are cut when the sod is taken up. When the sod is relaid, it does not come in close contact with the soil because the sod is very smooth while the soil is irregular; this causes small air spaces underneath the sod and the roots can not start up again. This leaves the grass without sufficient nourishment and in time, if weather conditions are not very favorable, it dies out. Seed your lawn with Gunn's Velvet Lawn Grass Mixture and it will make you a most beautiful lawn and one that will last you indefinitely.

Poppies are Fine for Borders.

Gunn's Fine Flower Seeds

WE SECURE our flower seed from one of the most reliable and most careful importers of flower seeds in the U. S. All of this flower seed is carefully tested, and will grow if you treat it right. See that soil is packed. Use a shade of burlap when starting small flower seed in the sunshine, and don't cover too deep. **DON'T PLANT TOO DEEP.** (Only twice the depth of the seed.)

Flowers are inexpensive, and if you select any of the ones listed below, you are sure to be pleased. **THEY ARE AS EASY TO GROW AS WEEDS.** For flowers all summer long and for all kinds of colors of flowers at all times be sure to plant **SWEET PEAS, HOLLYHOCKS, PINKS, NASTURTIUMS, ASTERS,** and more of the **OLD-FASHIONED FAVORITES.**

Grow Baby Chicks For Us

Farmers' wives, ministers, girls, boys: We need a lot of day-old baby chicks. Why not buy a Queen Incubator from us and sell us the chickens and make a nice lot of money. Write for our proposition.

Baby Chicks for Sale—If you want to buy baby chicks write us for price.

Queen Incubators

We recommend **QUEEN** incubators as the one sure machine to use, and after considerable looking around and experimenting, we have put in a full stock of these machines. The **QUEEN** has double redwood walls, lined with corrugated strawboard. **Pure Copper** heating system with all joints and seams locked, hammered and soldered, two-walled metal, asbestos-lined jacket, safety lamp hangers, and many other superior points that are worth investigating. **QUEENS** turn out **bigger hatches** of stronger, healthier chicks and will last almost a lifetime.

The Brooder That Broods Right

The **QUEEN STOVE BROODER** is new and improved and is the only stove on the market that has the draft to increase the fire above the hover and operated automatically by the regulator, same as the check draft, and is the only one having a corrugated asbestos-lined base for protection of the floor and litter from over-heating. The hover of this stove is collapsible and on the No. 1 is forty-two inches in diameter and on the No. 2 fifty-two inches in diameter. Stove holds enough coal to last from 24 to 48 hours and costs less than 5c a day to operate.

International Sanitary Hover

"The one perfect brooding device." Simplicity its middle name. To get at the lamp, just lift it out. To move the hover, just pick it up. To set up the hover, just set it down.

Its greatest feature is that it raises more chicks with less trouble than any other hover or brooder on earth, and that is what counts. The chicks that are raised, full of vitality and strength, are the ones that become the profit-makers.

Nature's own way—the broody hen—cannot equal the Sanitary Hover. Nature's way and Man's way are used in constructing the hover and that is why the Sanitary Hover is better than a mother to your chicks. Takes care of about 200 chicks. Price, \$13.50.

Egg-O-Hatch

Weakens the shell, strengthens the chick, and makes larger hatches. Try it on half the eggs and you can tell.

Price, postpaid: Enough for 600 eggs, 55c.

Hubam Sweet Clover

New Giant Annual Sweet Clover. Originated in 1916 at the Iowa State Experimental Station where 500 samples from all parts of the world were tested. Among these a few plants were discovered which grew to a height of four feet and matured seed much earlier than the rest. These seeds were carefully saved and planted the following season, yielding enormous returns. In 1918 small samples were sent to other Experimental Stations and to the leading seed growers. Tests from all parts of the country and

foreign countries reported growth of from seven to ten feet.

Beekeepers should plant a few rows of Hubam, as it yields enormous quantities of honey of superior quality all summer and fall. Sow 12 lbs. per acre broadcast or 4 lbs. in drills. Sold last year as high as \$10.00 per lb.

Our stock is pure new crop, scarified seed which we are offering while it lasts at \$1.60 per lb., postpaid. Order early.

Nebraska Alfalfa Seed

Our Dry Land Nebraska Seed tests 99½% pure and will grow as near 100% as it is possible to get seed to grow. It can safely be depended upon to make an ideal stand and produce an abundant crop of good, rich alfalfa when conditions are at all favorable. Alfalfa seed will, without question, go higher as the season advances. Place your order now. No seed can be imported and the demand is heavier this year than ever before. Price, 50c lb. See enclosed price list.

Grimm's Alfalfa

Grimm's is the hardiest strain of Alfalfa known in this country. It stools very heavily and the value of this characteristic can hardly be over-estimated as it not only does not winter kill, but the protected underground buds are less liable to injure from over-pasturing. The spreading crown seems to be associated with a very much branched surface root system, in addition to the deep tap-root. This makes surface moisture easily available. Sow 10 lbs. per acre. See enclosed price list.

Sweet Clover

Turns Sand into Loam—Fills the Soil With Nitrogen—Will Redeem Western Sandhills

Sweet Clover is practically as rich as alfalfa. It grows where alfalfa does not. It will not bloat any stock. It fills the soil with nitrogen. The roots decay every two years, filling the soil with humus. It grows on dry sandy soil. It grows on hard clay soils. Every piece of land that has been sown to Sweet Clover is made richer for it. It will not grow in cultivated land, nor will it become a nuisance. Fine for honey.

Hulled white sweet clover, 60 lbs. to bushel.

See price sheet or ask for price.

Millet

Golden Millet or German

Our seed stock originated in Tennessee, and produces the large headed, high growing kind. This grows very rank and is one of the best varieties for hay on account of being so sweet, palatable and milk producing.

Other Clovers

Red, White, Alsike—See price sheet.

Dwarf Essex Rape

Produces feed in from 6 to 10 weeks from sowing. Grows 2 to 4 feet high. Produces from 25 to 30 tons of green fodder to the acre. Sow 5 to 6 lbs. to acre. Good for chickens, calves, cattle, hogs, sheep. Makes milk "taste." Sow with oats. Sow with corn or alone at any time from March to July.

Legume Inoculation HUMOGERM

The Humogerm way puts nitrogen in your soil at a cost of practically nothing. Easy to use. Inoculate all legumes with Humogerm and produce stronger and healthy crops. Root nodules from inoculated crops rot after crop is harvested and greatly enrich the soil for future crops.

Prices: ¼ bu. size, 35c.; ½ bu., 60c.; 1 bu., \$1.00; 2½ bu., \$2.25. Special garden size for peas, beans and sweet peas, 25c.

Alfalfa to make a permanent success must find in the soil a nitrogen-forming bacteria that will induce it to extract the nitrogen from the air and deposit it in the soil, thus making the soil richer all the time the alfalfa is growing. "NITROGEN" is the pure culture of this bacteria. When used, alfalfa will grow continuously and produce abundant crops. Use Nitragin on all clovers. If used in soils already inoculated, the crop will be much heavier. Prices: Nitragin, ¼ bu. size, 55c.; 1 bu. size, \$1.00; 5 bu. \$4.75. Specify what you want to use it on.

Nox-Em-All Gopher Tablets

Gunn's Grass Mixture

Read This We use only our best grades of seed in making our great mixtures. The proportions are right, regardless of the value of the seed placed in the mixture. In other words—WE TREAT YOU RIGHT!

Upland Mixture

Good for all stock for pasture or hay. Brome Grass, Meadow Fescue, Orchard Grass, Timothy, Alfalfa and Red Clover mixed in proper proportions.

Use 20 lbs. per acre.

See sheet for price, or ask.

For Hog Pasture

This will be considered very heavy seeding and expensive, but if you have a hog pasture for keeps, you can not afford to skimp on seed or limit the varieties. Alfalfa, Mammoth Clover, Red Clover, Alsike Clover, White Clover, Timothy, Blue Grass, Orchard Grass and Meadow Fescue. Use 20 lbs. per acre.

Ask for prices, or see sheet inclosed.

Bottom Lands

Can be used even when the soil is very moist. Can be cut for hay, but better for pasture. Kentucky Blue Grass, Red Top, Meadow Fescue, Alsike Clover, English Rye Grass and Timothy. We mix it in right proportions, which is very important. Use 20 lbs. per acre.

For prices, see sheet, or ask.

Timothy and Alsike

This is a good mixture, when you get good stuff. We are particular on this and only sell good, heavy seed. Don't buy the cheap screening sold as this mixture.

For price, see sheet, or ask.

Grasses

There is a lot of difference in the quality of Grass Seed. We furnish only the high grade, high germinating, free-from-weeds quality. It does not pay you to spend your money for cheap seed of any kind. Your time is worth too much to take the risk. Just leave it to us, and we will furnish you good, suitable seed, and we will tell you the truth.

Brome Grass

It starts very early in the spring, and continues growth until late in the fall. Brome Grass spreads by means of underground rootstalks. As a hay crop, the grass usually furnishes good cuttings for two or three years, sometimes cutting three tons of cured hay per acre, after which the sod becomes so root-bound that the grass does not grow tall enough for hay (this can be overcome by disking), but will furnish the best pasture for several years. Sow $1\frac{1}{2}$ bushel to acre. 14 lbs. to bushel.

See price sheet inclosed, or ask.

Kentucky Blue Grass

We sell only the high quality, heavy testing grades. 14 lbs. to bushel.

See price sheet inclosed, or ask.

Canada Blue Grass

This is the Blue Grass of Canada, New York and the New England states. It does better on poor, clayey, thin soil than on rich land. It is smaller, grows closer to the ground and stands cold and drouth better than Kentucky Blue Grass. Has a very blue color and flattish stems. Very attractive, and really a valuable grass. 14 lbs. to bu.

See price sheet inclosed, or ask.

Timothy

Practically all the Timothy that we sell is grown right in this section. We put it through our powerful cleaner, which takes out not only all foul weeds, but the light, immature seeds, as well. Don't plant timothy unless it has been thoroughly recleaned. Sow $\frac{1}{2}$ bu. to the acre, if alone. 45 lbs. to bu.

See price sheet inclosed, or ask.

Orchard Grass—Sure Crop

This is a very early grass and is particularly adapted to shady places. It is a valuable grass for both pasture and hay land, because of its most favorable growing qualities. Generally more than one crop can be obtained for hay purposes in a single season, after which there is a heavy growth of aftermath which gives an abundance of rich pasture until late in the fall. It grows in tufts—this is overcome when sown with other grasses. It stands drouth well and is very hardy. Sow $1\frac{1}{2}$ to 2 bushels to acre. 14 lbs. to bu.

See price sheet inclosed, or ask.

Red Top Grass

Fancy Recleaned Solid Seed (14 lbs. to bu.). We do not stock the unhulled or chaff grade, which is always so unsatisfactory. Our high grade seed will produce a dense growth of velvety turf. Very valuable as a permanent pasture grass. It withstands the cold of the northern states, and can be depended upon to flourish almost anywhere. Especially suitable for growing on damp lands. Only 10 pounds needed to sow an acre.

See price sheet enclosed, or ask.

Rye Grass

English or Perennial Rye Grass—This is a regular perennial variety, which is so valuable as a pasture grass, producing, as it does, an abundance of foliage, which will remain bright and green throughout the season. The hay is much relished by all kinds of stock, especially when grown on moist soil. This is the real Perennial Rye Grass, which is such a favorite (when the right one is secured) for lawn purposes, furnishing a green lawn which continues to come on until finally the blue grass takes possession. Sow 2 bushel to acre. 22 lbs. to bushel.

See price sheet inclosed, or ask.

Meadow Fescue or English Blue Grass

Especially suited for permanent pasture and is also fine for hay. Grows 2 to 3 feet high. The hay is very nutritious and cattle thrive on it, whether dry or green. Succeeds even in poor soil, and as the roots penetrate deep, from 12 to 15 inches, it takes extremely dry weather to affect it. About 21 pounds of seed are sown to the acre. 22 lbs. to bushel.

For prices, see sheet inclosed, or ask, stating amount you wish. All prices on this page are subject to change.

FEED PURINA CHOWS

and make yourself More Profits

AMONG livestock and poultry feeds, Purina Chows are outstanding because they are made and sold on a straightforward policy of making more profits or the feeder.

That's why we are handling the famous checker-board line in Lincoln. We want to help feeders in this territory make more profits from their cows, hogs, horses, steers and poultry. All we ask is a chance to figure with you—to show you how Purina Chows, backed by the largest milling organization in America, will lower your cost of production per pound of flesh, per gallon of milk, per dozen of eggs.

THE NEW Purina Chick Startina WITH BUTTERMILK

The guaranteed analysis of this food gives you the very highest grade Buttermilk Starter. Feed alone for 10 days then with Purina Baby Chick Chow.

Purina Baby Chick Chow

Makes the chicks develop rapidly, because it supplies the same egg elements that make chicks grow in shells. Feed with Startina or Chicken Chowder.

Purina Chicken Chowder

The only guaranteed egg producer. It is also an ideal starting mash. Contains ingredients that strengthen and build up the delicate little body. Feed with Baby Chick Chow.

Purina Hen Chow

Make your hens produce more this spring. Purina Poultry Chows are backed by an absolute guarantee.

Purina Calf Chow

Supplement mother's milk; calves thrive equally as well and are vigorous as milk fed animals.

Purina Cow Chow
