ANNUAL CATALOGUE 1923 OF CELEBRATED O.K. SEEDS

Remember
O.K. Seeds

Are Reliable

Special Attention
is called to the
low prices of
Seeds etc.
in this
Catalogue

Everitt's O.K. SEEDS Store

227 WEST WASHINGTON ST.

INDIANAPOLIS, IND.

PERSONAL TO ALL WHO BUY SEEDS

MR. AND MRS.
SEED BUYER AND PLANTER:

You want seeds that will grow, that will make a good garden when planted, that will supply your table with delicious vegetables and your home with beautiful flowers and make glad harvests in your fields. Then order the O. K. SEEDS from this catalogue. O. K. SEEDS are thorobred seeds. They are not cheap seeds, but the best seeds and sold at moderate prices.

O. K. SEEDS ON EVERY FARM AND IN EVERY GARDEN!

This is our ambition. The edition of this catalogue runs into the hundreds of thousands. We want to make it a couple of millions in a few years. We know this can only be done by selling the best seeds at moderate prices. High Quality and Moderate Prices are the inducements this catalogue offers you and on this policy we ought to realize our ambition. Nothing can stand against an article of equal quality at a lower price. Witness the tremendous success of the 5 and 10 cent stores; of Henry Ford as a manufacturer and seller of Automobiles at lower prices, and other examples of great business from small margins. Small profits and many sales. One of the largest seed growers of the country who does not retail seeds wrote us: "The time for getting high-prices for staple garden seeds, in my opinion, has gone by. The seedsman who reduces his prices will get the largest part of the trade." We have met the demands of the times in issuing a neat, inexpensive catalogue and reducing the prices. We believe seed buyers will appreciate this and send us their orders.

Order O. K. SEEDS. Plant O. K. SEEDS in 1923

Register your letter, or remit by post office or express money order, bank draft or check. 1c or 2c postage stamps accepted in small amounts.

Be sure to sign your name and give full address every time you write. Write plainly. When your address changes give old as well as new.

Don't order goods sent to a station where there is no agent unless you send enough to prepay the freight.

We deliver all seeds priced in packets to 4 lbs. unless stated to the contrary. Keep this in mind when comparing prices. We can send any larger quantity by parcels post if you send postage extra. See Parcel Post map and table on 3rd cover page.

Home of O. K. Seeds. On This Spot 36 Years

AS TO WARRANTY We exercise care to have all of our seeds pure, true and reliable, but in growing, buying, handling, shipping and cleaning seeds, also in growing the crops from them, so many things may occur over which we have no control, that we, in common with all other responsible seedsmen, do not give any warranty, express or implied, as to the description, quality or productiveness, or any other matter, of any seeds bulbs or plants we send out, and will not be responsible for the crops.

General List of

CELEBRATED O.K. SEEDS

In submitting this catalogue and asking you for an order, we cannot wish you anything better for 1923 than the satisfaction that will come from a garden planted with O. K. SEEDS.

Everitt's (OK)

Artichoke Seed

GREEN GLOBE—The unripe flower heads are used, and when properly prepared are delicious. Pkt. 5c.

Everitt's (OK)

Asparagus Seed

self-blanching celery is among celeries. Large and very tender. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 90c.

PALMETTO—One of the earliest and best. It resists rust and diseases better than some others. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 90c.

CONOVER'S COLOSSAL—The best known and a very satisfactory variety. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 90c.

ASPARAGUS ROOTS—Two year old, by mail, doz. 35c; 50 for 75c; 100 \$1.50; per 100 by express, not paid, \$1.25; 1000 \$9.00.

CULTURE—Sow early in hotbed, or outdoors in May. Transplant to rows 3 feet apart and 2 feet apart in row. Cultivate clean. It is hardy in the north. Three oz. of seed will sow 100 feet of row for plants.

We recommend starting with the plants. One hundred plants should, with care, supply an ordinary family.

COLUMBIA MAMMOTH WHITE—The sprouts stay white as long as fit to eat. It is among asparagus what

Columbia Mammoth White, Ready to Cut

Everitt's (OK) Seed Beans

CULTURE—Beans will grow on almost any kind of soil. Well rotted manure is best. Plant late enough in the season so the ground is warm and dry, although some plant earlier and risk a frost, for the sake of earliness. Plant in rows 15 inches to 2 feet apart, and thin to 3 to 6 inches apart. Cover 1½ to 2 inches deep. Lima Beans should not be planted until the latter part of May. A quart of Lima Beans plants 100 hills, of the smaller sorts 200 hills. A quart of Snap Beans plants 150 feet of drill.

Dwarf or Bush Beans—Green Pod

IMPROVED EARLY RED VALENTINE—A very hardy, early, productive standard sort. Pods 4½ inches long, round and crease backed, medium green, slightly stringy and good quality. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

REFUGEE, EXTRA EARLY—A very hardy, early and productive popular bean. Pods 4 to 5 inches long, uniform, round and slightly crease backed, slightly stringy, brittle and fine grained. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

LONG YELLOW SIX WEEKS—An old standard sort, very vigorous, hardy, productive and early. Pods 5 to 6 inches long, flat, with more or less string and of medium quality. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

HORTICULTURAL—An old standard snap and shell sort. Pods about 5 inches long, almost stringless, greenish-yellow splashed with carmine. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

BURPEE'S STRINGLESS GREEN POD—Early, hardy, vigorous and productive. Pods large, 5 inches long, stout, round and crease backed, dark green in color; strictly stringless, tender and brittle. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

Giant Stringless

Somewhat similar to Burpee's Stringless, but pod is a little longer, straighter and more slender, more depressed between beans and slightly lighter in color; early, hardy and of highest quality. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

FULL MEASURE—A fine stringless, early, medium green, high quality bean. Pods straight, 6 inches long, very fleshy, round, crease backed and showing depressions around the beans. Pkt. 8c; ½ lb. 25c; lb. 46c; 5 lbs. @ 44c.

BOUNTIFUL—A most desirable variety of sturdy upright growth, hardy and productive. Free from rust and mildew, it bears early and continues for several weeks. Pods are seven to eight inches long, straight and flat, light green in color, tender, brittle and stringless. This is a popular variety for the market gardener as well as the home garden. Ready to use in about 45 days. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

LONG WHITE MARROW—Large, oval-shaped white beans, grown as a field crop for baking. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

NAVY OR PEA BEAN—A small, round, white bean, extensively grown as a field crop. They are the Navy Bean of commerce. Pkt. 8c; ½ lb. 18c; lb. 30c; 5 lbs. @ 28c.

RED KIDNEY—The beans are deep red in color. Much raised as a field crop. Pkt. 7c; ½ lb. 18c; lb. 30c; 5 lbs. @ 28c.

Dwarf or Bush Beans—Wax Pod

GOLDEN WAX, RUSTLESS (Keeney's)—A fine variety, but has a tendency to make a runner, which in wet seasons, for a while, leads some to believe they have a pole bean. Pods 4 to 5 inches long of superior quality. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

Keeney's Rustless
Golden Wax

DAVIS' WHITE KIDNEY WAX—An early, productive and attractive wax variety. Pods large and flat, 6½ to 7 inches long, very uniform and extremely straight, stringy and fibrous and fair quality. Color clear bright yellow. Seed white and kidney shaped. A market gardener's sort. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

WARDWELLS KIDNEY WAX

A very popular, early, garden-er's variety. Pods large, 5½ to 6 inches long, moderately stout, straight and flat, fleshy, brittle, fine grained and nearly stringless. Of good quality and very attractive. Pkt. 8c; ½ lb. 22c; lb. 38c; 5 lbs. @ 36c.

GOLDEN WAX—Probably the most popular of the wax varieties and one of the best. Very early and quite productive; flesh brittle, stringless and of good quality; seed white, much mottled brown. Pkt. 8c; ½ lb. 20c; lb. 36c; 5 lbs. @ 34c.

Dwarf or Bush Beans—Wax Pod (Continued)

BLACK GERMAN WAX—Early; pods round, about five inches long, fleshy, brittle and stringless, deep yellow in color and attractive; a standard sort. Pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 36c; 5 lbs. @ 34c.

WONDER WAX BEANS—Brings highest market prices—is a wonderfully heavy yielder—stringless and tender—fills every need for home and market. WONDER WAX belongs to the flat podded class. Grows 18 inches high and 2 feet across loaded with pods, 5 to 7 inches long; slim, flat, plump, handsome and meaty. This is the earliest wax-podded bean, in bearing for a long season. Pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 45c; 5 lbs. @ 43c.

Bush Lima Beans

HENDERSON'S BUSH LIMA—A vigorous, hardy, very early and small type of Bush Lima; much in favor with canners. Pods small, about 3 inches long, containing three to four small, flat, white beans of good quality. Much raised as a field crop for dry beans. Pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 38c; 5 lbs. @ 36c.

BURPEE'S IMP. BUSH LIMA—Both beans and pods larger than the old type; average one more bean to the pod; beans larger and thicker than in the old form. Pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 42c; 5 lbs. @ 40c.

Pole and Corn Hill Beans

BURGER'S GREEN POD, or WHITE KENTUCKY WONDER—A very early, white seeded variety. Pods 6 to 7 inches long, round, slender and straight; very tender, fleshy and stringless; of high quality; color dark green. Pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 36c; 5 lbs. @ 34c.

WHITE DUTCH CASE KNIFE—Green snap, pods 7 to 8 inches in length, very straight and flat, stringy, brittle; mid-season; best as a shell bean. Beans ivory white. Pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 45c; 5 lbs. @ 43c.

KENTUCKY WONDER

or OLD HOMESTEAD—The most popular, green-podded climbing, or corn-hill bean; early and productive. Pods 8 to 9 inches long, very slender. Tender and good quality. Pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 36c; 5 lbs. @ 34c.

KENTUCKY WONDER WAX—One of the earliest of the pole wax sorts. Pods 8 to 9 inches long, thick, crease backed, very fleshy, brittle, some strings. Pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 42c; 5 lbs. @ 40c.

RED SPECKLED CUT-SHORT, or CORN HILL—A well known, hardy, late and productive sort. Green pods, $3\frac{1}{2}$ to 4 inches long, stout, straight and flat, stringy, fine grained. Pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 42c; 5 lbs. @ 40c.

HORTICULTURAL POLE, or CRANBERRY—An old, well known, standard sort. Mid-season in maturity, hardy and productive. Pods 5 to 6 inches long, stringless and of good quality; color dark green, splashed with bright red. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 36c; 5 lbs. @ 34c.

Pole Lima Beans

KING OF THE GARDEN—An improved strain of large, white Lima; pods about an inch longer, proportionately wider and uniformly four seeded. Pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 40c; 5 lbs. @ 38c.

DREER'S IMPROVED—Plants very vigorous, very hardy, late and productive. Pods about $3\frac{1}{2}$ inches long, containing 4 to 5 very thick medium sized beans of excellent quality. Pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 40c; 5 lbs. @ 38c.

Small Lima, or Sieva Beans small and white on the order of Henderson's Bush Lima. Plant of large growth, very early, vigorous and productive. Pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 42c; 5 lbs. @ 40c.

Yard Long Beans or Chinese 3 Feet

An attractive and curious and delicious Pole Bean. With this bean the pods grow to be nearly a yard long. The whole pod and beans are crisp, tender and delicious, rivaling almost any of the little podded beans when cooked. If you want something in your garden that will be the wonder and admiration of the whole neighborhood plant a package of this bean. Pkt. 10c; 3 for 25c; 7 for 50c.

A SUGGESTION—Buy by the dollar's worth and sell them.

Sieva or Butter Bean Showing a cluster of pods as they grow

Burger's Stringless—This Shows How Prolific the Vine Is

Everitt's (CK) Beet Seeds

CULTURE—For best results select a deep, rich loam and fertilize with well decomposed manure. Sow 14 to 16 inches apart, cover 1 inch. Thin to 4 to 5 inches apart. Or sow in beds and transplant to garden, plant as soon as ground is fit in Spring for early. For Autumn plant May and June, for Winter about July 1st, according to variety. One pkt. will make about 250 plants, one oz. about 800 plants; 7 lbs. per acre.

Extra Early Eclipse There are several excellent extra early beets, but I consider this in some respects just better than any of the others. It is round, very early, grows good size, and is very tender. Has small top, bright red flesh. It is excellent for home and market. The O. K. strain is unexcelled. Pkt. 4c; oz. 8c; ¼ lb. 25c; 1b. 90c; 5 lbs. @ 85c.

Edmand's Blood Turnip Second early. When we come to the turnip shaped beet, I give first place to this. The flesh is extra dark red, which causes it to be the most desired by market gardeners. For Winter it is very excellent, if planted late. Also splendid for forcing. Pkt. 4c; oz. 8c; ¼ lb. 25c; 1b. 85c; 5 lbs. @ 80c.

Crosby's Egyptian Extra early. If you want to raise any beets in a hot bed or greenhouse, pick this kind. Grows very quickly. The color is the rich vermillion so much admired by market gardeners and consumers. It can be grown in garden also; in fact, is one of the best. Pkt. 4c; oz. 8c; ¼ lb. 25c; 1b. 85c; 5 lbs. @ 80c.

DETROIT DARK RED

This variety is one of the best deep red turnip beets, not only for market gardeners, but also for home use and canning, making a strikingly handsome product, much superior to that obtained of most other varieties. Its early maturity, and the splendid shape and color of the root make it popular everywhere. On account of its small, upright growing tops the rows may be close together. Root globular or ovoid and very smooth; color of skin dark blood red; very crisp, tender and sweet, and remains so for a long time. Pkt. 4c; oz. 8c; ¼ lb. 25c; 1b. 85c; 5 lbs. @ 80c.

Long Blood Red If you want a large beet and at the same time an excellent one for table, especially in winter, select this. It requires longer to grow than the round ones, but you can get more of these from the same ground than of any other kind. It is so productive that it is profitable to grow for live stock. For Winter table use or for stock it can be planted as late as July or August. Pkt. 4c; oz. 8c; ¼ lb. 25c; 1b. 85c; 5 lbs. @ 80c.

CRIMSON

The most beautiful beet of all, if beets can be called beautiful. Especially on light soil this handsome beet will be appreciated by all who try it. Round as a ball. The skin and flesh are both very dark. Quality the finest. Has a small top. Season, late. A good keeper. Pkt. 4c; oz. 8c; ¼ lb. 25c; 1b. 85c; 5 lbs. @ 85c.

Early Wonder An Improvement, by Selection, of Crosby's Egyptian. The beet that beats them all. This improved beet is destined to be wonderfully popular with our thousands of customers as rapidly as they come to know how excellent it is. It is the earliest, most perfect shaped, finest appearing beet of all. As a variety to bunch for the market it has no equal. The color is a rich dark red, small top, single tap root and a fine keeper. It is truly the ideal beet. It is not only recommended for first early, but for late fall sowing because it comes two weeks quicker than any other beet worth while. It merits a place in every garden, private or for market. Pkt. 4c; oz. 10c; ¼ lb. 35c; 1b. \$1.20.

Nutting's Early Gem Beet

Unexcelled in Quality and Appearance

This new beet will be esteemed on account of its desirable shape, smooth, beautiful appearance and unexcelled quality for the table. The color of skin and flesh is bright red. It reaches market and table size in a short time and continues to grow to good medium size, retaining its good qualities. Solid, sound and crisp. Highly recommended for stewing, canning, pickling and, if planted late, it makes a good Winter beet. It is one of our best specialties. Pkt. 6c; oz. 15c; ¼ lb. 50c; 1b. \$1.50.

KLEIN WENZLEBEN SUGAR—This is the richest in sugar, but is not profitable to grow for stock, as it is small and roots deep in the soil. Only recommended for making sugar. It is stated that 13 tons of sugar have been made from 100 tons of this beet. Pkt. 4c; oz. 8c; ¼ lb. 20c; 1b. 75c; 5 lbs. @ 65c.

Money Saved Price your needs from any other catalogue and then from this and note how much you can save.

DANISH SLUDSTRUP

Crimson Globe

Everitt's (CK) Mangel Seed

favorite with dairymen and sheep raisers. Pkt. 4c; oz. 8c; ¼ lb. 20c; lb. 75c; 5 lbs. @ 65c.

GOLDEN TANKARD MANGEL—This variety grows almost entirely on top of the ground, it therefore is well adapted where the soil is not loose to much depth. Shape oval, color deep yellow, quality good, productive, early, easily harvested. Pkt. 4c; oz. 8c; ¼ lb. 20c; lb. 75c; 5 lbs. @ 65c.

CHAMPION YELLOW GLOBE MANGEL—The best yellow globe mangel. Heavy yielder and has high feeding value. Pkt. 4c; oz. 8c; ¼ lb. 20c; lb. 75c; 5 lbs. @ 65c.

Giant Danish Sludstrup Mangel

By Actual Test Excels Any Other Variety in Weight and Feeding Value

THIS variety was brought from Denmark. The Danish Government, to encourage the improvement of root crops, gives certificates of merit to growers who produce varieties of special merit. Sludstrup was awarded the highest certificate for the best mangel. In this country it is easily and far exceeding other mangels in weight of crop that can be produced per acre, besides, this mangel has higher feeding value than an equal weight of other kinds. In color it is distinct, being reddish-yellow. Root large. It is easy to harvest because it grows more than half above the ground and has small tap root. More roots should be raised and will be raised, particularly by our dairymen. Pkt. 6c; oz. 10c; ¼ lb. 30c; lb. \$1.00.

Everitt's (CK) Broccoli Seed

CULTURE—Sow the seed in May. Plant to garden late in June or early in July, in rich mellow soil. Set 13 inches by 2 feet. Similar to Cauliflower.

LARGE WHITE—Heads compact and very certain to head. Delicious. White color Pkt. 8c; oz. 40c.

PURPLE CAPE—Similar to the white except in color, which is brownish purple. Pkt. 8c; oz. 40c.

Money Saved

Here Are Some Letters That All Came in One Mail and They Come in Every Mail

Everitt's (O. K.) Seed Store:

Please send your catalogue. I got my seeds from you last year and had great success.—Mrs. Herman Himbach, Lafayette, Ind.

Everitt's (O. K.) Seed Store:

You probably missed me with your catalogue so please send it right out. I like your O. K. Seeds because they grow so well.—Mrs. T. D. Breedlove, Granby, Mo.

Everitt's (O. K.) Seed Store:

Kindly send by return mail one of your catalogues. I like your seeds better than any others I ever planted.—Mrs. K. Richey, Route 2, Gladewater, Texas.

Everitt's (O. K.) Seed Store:

I have used your O. K. Seeds for some years and will not plant any other when I can get them. I have missed your catalogue this winter so I want you to send it as soon as possible. I remain your pleased customer.—Orin C. Leffew, Forbes, Tenn.

Everitt's (O. K.) Seed Store:

Will you please send your catalogue of O. K. Seeds? I want to buy some more seeds from you. I used to buy

Brussels Sprouts

CULTURE—Related to the cabbage family and produces a great number of small heads on the main stem. Plant the seed in moderately rich soil, in hills 2 feet apart each way. Leave only one plant to a hill. They are considered a great delicacy. Prepare like cabbage. One pkt. will give about 500 plants; one oz. about 2500 plants.

IMP. DWARF MARKET—The favorite variety in most parts of the country. Delicate flavor. A sure cropper. Pkt. 4c; oz. 20c; ¼ lb. 75c.

PARIS MARKET—A half dwarf kind. Most excellent and a sure cropper. Pkt. 4c; oz. 20c; ¼ lb. 75c.

them and they were always O. K.—W. O. Richardson, Big Clifty, Ky.

P. S. The wheat obtained from you last fall looks the finest in the neighborhood.

Everitt's (O. K.) Seed Store:

Please send me your seed catalogue which I have missed. I want to buy my seeds from you because they grow better than any other seeds I have ever planted.—Nanie Craft, Chambers, Ky.

Everitt's (O. K.) Seed Store:

Please hurry one of your O. K. Seed catalogues for I need several kinds of your seed. Last year I raised them and they were the finest I ever had. I must have some more and I want the fresh seed from you.—L. S. Forbes, Canmer, Ky.

Everitt's (O. K.) Seed Store:

Please send your catalogue quickly. I want to order my seeds. I have used your seeds and I had the finest quality of vegetables I ever raised.—Clarence Smiley, Austin, Ind.

Everitt's (OK) Cabbage Seed

Extra Early and Early Varieties

EXTRA EARLY EXPRESS—About ten days earlier than Early Wakefield; heads small, heart-shaped and very solid; having but few outer leaves plants can be set very close. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

Everitt's Selected Jersey Wakefield The most widely known and popular early variety; heads pointed and very solid. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.75.

Glory of Enkhuisen

Danish Winter Ballhead

CULTURE—Cabbage will succeed on any land that will grow good corn. New land is particularly good. The richer the soil the bigger will be the crop. Sow seed in hot bed or house for early, in beds for late or main crop. Early kinds set 18 inches apart. The late and large kinds in rows 2 to 3 feet apart and 2 to 3 feet in rows. Some growers plant the seed where it is to grow, with good results. Cultivate clean and thorough. Do not follow cabbage or turnips with cabbage. For early get the plants out as early as ground will permit. For late set about middle of June in latitude of Indianapolis. O. K. Brand Cabbage Seed is unexcelled. One pkt. will make about 300 plants, one oz. about 2,000 plants, one-quarter lb. for one acre.

CHARLESTON LARGE WAKEFIELD—Only about one week later than Early Jersey Wakefield, but the pointed heads are fully one-half larger. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.75.

EARLY SUMMER—Heads medium in size, round, somewhat flattened, compact and solid; outer leaves spreading and light glaucous green. Ten days later than Jersey Wakefield and one of the best large, second early sorts. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.75.

COPENHAGEN MARKET—Very fine, nearly as early as Jersey Wakefield stem short, heads large, round and solid, with few outer leaves of an upright growth. Pkt. 4c; oz. 30c; ¼ lb. \$1.00; lb. \$3.00.

LOUISVILLE DRUMHEAD—Withstands summer heat splendidly; second early, heads large and solid. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

ALL SEASONS—Heads round and very deep; can be planted for second early or early or late crop; a splendid keeper; about as early as Early Summer, forming much larger heads; a favorite with kraut manufacturers. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

EARLY WINNIGSTADT, TRUE STOCK—Medium early, short stemmed; heads solid, fine grained, cone shaped and pointed; very productive and excellent quality. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

All Head Early Also called The Faultless. If you have limited space and want to make one variety of cabbage do for all purposes you can scarcely do better than to select this one. It is as early as early summer cabbages and makes such large, uniform, handsome, solid heads that it competes with the later fall varieties. Unsurpassed in eating qualities. Among kraut makers it is most popular because, having few leaves and nearly all head, such a large tonnage can be raised per acre. For Fall and Winter should be sown late. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

Glory of Enkhuisen Cabbage

An Early, Solid-Headed Cabbage from Holland, of Superior Qualities

This new cabbage from Holland is rapidly becoming popular in this country. In season it is very early, with heads about twice as large as native varieties of same season and so solid that it weighs three times as much. These things mean a whole lot for this cabbage, enough, in fact, to gain for it a place in every garden. It has a dwarf, stocky growth, head is round as a ball, leaves fine ribbed and exceptionally tender. Being dwarf and compact it can be planted close—about 18 inches apart each way will accommodate the plants and heads. When properly planted it will yield as much weight per acre as later and large kinds. Besides being so good for Spring and Summer, it can be profitably raised for Fall use, by setting late in July. We suggest setting after some other crops are off. This cabbage will please you in all respects. Pkt. 6c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.10; lb. \$3.25.

All Head Early. Desirable in every garden and a fine market variety. Always pleases.

Late and Winter Varieties of Cabbage

Everitt's Premium LATE FLAT DUTCH

A justly popular and esteemed variety; extensively cultivated for market and family use.

Heads large, round, flattened and very firm, has a medium stem and is very hardy. Excellent for slaw and famous for kraut. Practically 99 out of 100 plants will head, one of our Premium stocks. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

Surehead, Selected Stocks All Head and always sure to head. This is an exceptionally fine late cabbage of the Flat Dutch type, but with the outer leaves of more upright growth. Heads are large, round and flattened, very hard and fine-grained; splendid keeper. Pkt. 4c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

Danish Winter Ballhead As a cabbage for late Winter and Spring, this one from Denmark is distinctly the best variety. The heads are not as large as Late Flat Dutch, but are very solid and heavy. It is a rough and ready sort, thriving very well on thin soil and in adverse seasons. It is well and favorably known on nearly all markets

and is sought after in March and April, when it comes out of the pits as fresh as when put in. The "Hollander" and "Solid Emperor" so-called, varieties of some other catalogues are the same as this, or very similar to it. Pkt. 15c; oz. 40c; ¼ lb. \$1.00; lb. \$3.00.

Large Late Drumhead

A favorite winter cabbage; recommended for its fine, large, deep, heavy and solid, long-keeping heads on short stems. It has few outside leaves. They can be kept in good condition till late in the spring. We recommend it for the home garden. Pkt. 4c; oz. 20c; ¼ lb. 65c; lb. \$2.35 postpaid.

SAVOY CABBAGE PERFECTION DRUMHEAD—The best Winter keeper of the Savoy; heads late, round, compact and solid; leaves numerous, deep green and coarsely crimped. Pkt. 4c; oz. 25c; ¼ lb. 75c.

MAMMOTH RED ROCK—A few heads of red cabbage come in very nice for pickling and odd purposes. This is the best kind; largest, most solid and surest to head.

Good Cabbage Seed

Is one of our GREATEST SPECIALTIES

We realize the importance of good seed in raising a crop of this staple article; also that it is universally grown in every garden for home use and for market. Hence, a reputation gained on good cabbage seed will influence orders for many other articles. Gardeners can not do better than to plant **Everitt's Celebrated American Grown O. K. Cabbage Seed**.

O. K. SEEDS are live seeds. They are **SURE** to grow.

O. K. SEEDS are good seeds. They are the **BEST** seeds that grow, and represent the least cost.

O. K. SEEDS are National seeds. They are planted by farmers and gardeners in every county in the country.

O. K. SEEDS planted in the Spring is the surest way to have a satisfactory garden all through the season.

O. K. SEEDS planted is the surest way to beat old High Cost. If there is any surer way we want to know it.

Order **O. K. SEEDS** early. Don't wait, like some do, until the season is on you and then be obliged to rush to the grocery store. Plant **O. K. SEEDS** and the crop will be **O. K.**

Besides selling **O. K. SEEDS** at the lowest prices we give **FREE SEEDS** to every customer. In this way we give away many thousands of packets, and they are of the best kinds, such as will give you the most satisfaction.

Everitt's (OK) Carrot Seed

For Table Use

Extra Early Scarlet or **FRENCH FORCING**—An early forcing variety; small round root, not much larger than a radish. For stewing alone or when served with new peas, it is a rare delicacy hard to imagine unless you have eaten thereof. Sown outdoors as well as under glass. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 90c.

SELECTED DANVERS HALF LONG

If you grow for market this is the best kind for main crop, color rich dark orange, very smooth, cylindrical, very handsome; easily harvested. It is a very heavy yielder. We cannot recommend it too highly. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 90c.

Improved Long Orange This is a late variety and the largest of the table varieties. If it is a matter of keeping for late Spring, sow Long Orange. It is a very heavy producer, particularly in deep, light soil. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 85c.

Chantenay or **MODEL**—This carrot comes between the very early and later varieties. Of the same style as Danvers, not quite so large, but finer quality. Color rich, dark orange. In some markets is preferred to others for bunching. In shape and quality this leaves nothing to be desired in a medium season carrot. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 85c.

Half Long Nantes A beautiful half-long variety, almost perfectly cylindrical, blunt on end, with very small tap root. Grow 6 to 8 inches long. Skin rich orange color and smooth. For table very fine and free from woody fiber. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 85c.

Ox Heart also called **GUERANDE**—If it is the home table you wish to provide for I do not think you can do better than to plant this one. It is very early, short, thick and extra fine quality. It is also very popular as an early bunching kind for market. Deep orange color. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 85c.

Imp. Long Orange Carrot

CULTURE—This delicious and nutritious vegetable is not appreciated as it should be. Properly cooked, it is a great delicacy. Also, its feeding qualities for stock are excellent. A sandy soil is best, but any good rich soil will produce good crops. Sow in early Spring in rows 15 to 18 inches apart and thin to 3 to 4 inches, according to size of variety. Cover the seed half an inch and give careful cultivation throughout the season. They may be eaten either when a half inch or so in diameter, or when fully grown. One pkt. will sow about 40 feet; one oz. 150 feet.

Short White Vosges

Carrots for Stock Feeding

CULTURE—Sow any time before July 1st, and cover one-half inch deep. Two lbs. to the acre.

BELGIAN WHITE—This and the Belgian Yellow are the best stock carrots. Nothing equals them for keeping live stock, including horses and colts, in fine condition in Winter. They differ only in color of skin. Ten to 15 inches long, very large and productive. Can be pulled by hand. Pkt. 4c; oz. 8c; ¼ lb. 20c; lb. 75c.

BELGIAN YELLOW—Same except color. Same price.

Improved Short White (Vosges)

Shorter and thicker than the Belgian. Enormously productive. Easily harvested. Splendid stock carrot. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

CULTURE—Plant thickly in drills 6 to 8 inches apart. Prized for the piquancy of its leaves. It makes an appetizing salad and is used for garnishing. One oz. to 100 feet of row. That grown in the cool of the season is best. Sow often as it soon goes to seed.

CULTURE—Sow in August, September or October, and treat like lettuce, except that it may be planted closer, as it is smaller. It may be carried through the Winter in cold frames or by covering with leaves or litter. Used as Fall and Winter salad. Serve like lettuce. One oz. to 30 feet of row.

LARGE ROUND LEAVED—The well known variety. Ready to use in 4 to 5 weeks. Pkt. 5c; oz. 15c; ¼ lb. 50c.

FINE CURLED PEPPER GRASS—Can be grown in any garden. Pkt. 4c; oz. 10c; ¼ lb. 30c.

WATER CRESS—Must be grown by water—along the banks of ponds or streams. Seed should be sown in bed and transplanted to where wanted. Pkt. 8c.

Having used your O. K. Seeds for years, I can recommend them above all others I have ever used.—H. G. HARRIS, Ambrose, Ky.

Danvers
Half Long

Ox Heart

Rubicon The Best in Shape— Finest Quality Carrot

THIS fine carrot is earlier than the famous Danvers and about the same size. The flesh is deep red orange color of the finest quality. It grows to a uniform size, is extra solid, heavy and a grand producer. It yields heavily enough to make it a good one to grow for stock, while for forcing and garden cultivation it stands without a peer. We are pleased to offer and recommend the Rubicon Carrot to discriminating gardeners. Pkt. 6c; oz. 15c; ¼ lb. 30c; lb. \$1.00.

Pe-Tsai or Cabbage Celery

A New Vegetable that is Gaining Popularity by Leaps and Bounds

It is a species of Cabbage with a fine delicate flavor, as tender as head lettuce, and in great demand for numerous dishes, such as salads and cold slaw, or it may be cooked quickly. The culture, storing for winter, etc., are same as for late Cabbage. It cannot be grown successfully as a spring crop. For fall crop, seed should be sown early in August. We offer two varieties.

PE-TSAI—Produces a long, slender very solid head, often measuring 20 inches in length; outer leaves light green, inside is of a beautiful creamy yellow. Pkt. 8c; ½ oz. 15c; oz. 25c; ¼ lb. 75c.

Everitt's (OK)

CULTURE—The roots, dried and ground, are used as a substitute for coffee, also are very palatable when cooked. Sow early in the Spring in rows 18 inches apart and thin, to 6 inches between plants. The plants are perennial and spread from the roots.

Chickory Seed

LARGE ROOTED—The dried roots are roasted and used as a substitute for coffee. Pkt. 4c; oz. 20c; ¼ lb. 65c.

WITLOOF—(French Endive)—The plants form long, parsnip shaped roots; the roots are forced in frames or greenhouse and the new growth of lettuce-like leaves are cut and served as a salad. Pkt. 5c; oz. 20c; ¼ lb. 65c.

Everitt's (OK)

Collard Seed

CULTURE—A vegetable closely related to cabbage. Sow seed as for cabbage, in June, July and August for succession. When a month old transplant in rows a foot apart each way and cultivate thoroughly.

GEORGIA, called also **SOUTHERN**—Bears large bunches of leaves in the South throughout the Winter, which are used as greens. It also furnishes green forage for stock and poultry. As fast as the leaves are pulled off, new ones make their appearance. Pkt. 4c; oz. 15c. ¼ lb. 40c.

Everitt's (OK) Cauliflower Seed

Earliest Snowball

The best variety. For forcing or growing in open ground it is the acknowledged leader. It has short outer leaves and can be planted 2 feet apart. Is early, solid, pure white and, most important, is sure to head. You will not make a mistake if you plant Early Snowball for forcing or open ground. Pkt. 12c; ½ oz. \$1.00; oz. \$2.00.

Ext. Early Dwarf Erfurt

Our stock of this variety is almost as early as the Snowball, heads are larger and creamy white. Has many friends and by some is even preferred to the above variety for forcing and outdoor growth. Pkt. 12c; ½ oz. \$1.00; oz. \$2.00; ¼ lb. \$6.00.

DRY WEATHER CAULIFLOWER

Everitt's (OK)

Seed Pop Corn

WHITE RICE—The standard variety, salable on all markets at the top price. Very prolific. Pkt. 5c; ½ lb. 18c; 1 lb. 30c; 5 lbs. @ 28c.

CULTURE—The same as for sweet corn, except the same weight or bulk of seed will plant about twice the space. Three qts. will plant an acre.

QUEEN'S GOLDEN—The largest-eared and largest-grained variety. Very productive. Pkt. 5c; ½ lb. 18c; 1 lb. 30c; 5 lbs. @ 28c.

JAPANESE HULLESS—A splendid new variety much in demand by poppers. Used exclusively in many sections where known. Yield and commands 50% to 100% better price per pound than common sorts. Pkt. 8c; ½ lb. 25c; 1 lb. 40c; 5 lbs. @ 35c.

WE CALL PARTICULAR ATTENTION TO CERTIFIED SEED OF

GRIMM ALFALFA

More About Grimm Alfalfa

Our certified Northwestern grown hardy Grimms Alfalfa will stand severest winters.

The advantages of the Grimms Alfalfa are many. The greatest of which, however, is its hardness. Another advantage is, that it requires less seed to sow per acre and you can figure on one more crop of the Grimms Alfalfa than of the common varieties.

The growing of Grimms Alfalfa is increasing at a very rapid rate. That is one reason why the seed has always been high in price. This, however, should not stand in the way of any person who wants to have immediate and permanent success with the crop. In permanency the Grimms Alfalfa is much better than the common varieties as its growth is so luxuriant that it keeps down Blue Grass, weeds and other plants that operate to limit the usefulness of a field of common alfalfa.

Probably the reason for the greater hardness of this variety can be seen in the root development. Notice that it has the tap root like the common alfalfa. See the illustration. Also, it has numerous other roots that develop near the surface of the soil. The other out particular injury to the plant, and the plant perishes.

We recommend seedling at the rate of 5 to 8 pounds per acre. PRICE—Postpaid, 1 lb. 60c; 4 lbs. \$2.00; by freight or express per bushel \$35.00.

CULTURE—Treat very similar to cabbage. Ground should be rich. Cauliflowers make their best growth in the cool, moist days of Fall. One oz. will produce about 2,000 plants, one pkt. about 300 plants.

Snowball. Large, solid, white heads. Sure to succeed

This variety is of vigorous and dwarf growth, and produces stone-hard and snow-white heads, unsurpassed in quality. The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, it is a leading type for dry weather districts, being a sure header when other sorts frequently fail. Matures in about 110 days. Pkt. 20c; ½ oz. \$1.25; oz. \$2.50.

Grimm Alfalfa

Common Alfalfa

This illustration shows how the roots grow. Does it tell you why the Grimm is harder than the common alfalfa?

roots rise and fall with the ground in freezing and thawing weather, with- In the case of common Alfalfa the tap root is broken off as the ground freezes and rises,

Everitt's (CK)

Celery Seed

yellowish-green foliage; stalks perfectly solid, of a fine, nutty flavor, attains a good size, and when blanched is of a handsome golden yellow color. Pkt. 4c; oz. 25c; ¼ lb. 75c.

EASY BLANCHING CELERY

Notwithstanding the splendid varieties of celery that were before the gardening public, this new variety is already enjoying an enviable popularity, purely on account of its great merit.

Plants of Easy Blanching set out at the time of Golden Self Blanching will be ready for market two weeks later than that variety, but will produce about twice as much weight and will sell at higher prices, because of its magnificent appearance and high quality. On good soil the stalks will average 15 to 20 inches tall with a wealth of rich, crisp, nutty flavored hearts and stems, every bite of which will be relished. It blanches with the greatest ease, to an attractive golden color so desirable and necessary in a market celery, quite a time before it is possible to get other green celeries ready for market or the table. It is a celery for Summer, Fall, Winter and Spring. Pkt. 7c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00.

DWARF GOLDEN HEART—A long keeping Golden Dwarf celery of established merit. The heart is large, surrounded by a shapely solid stalk. The heart blanches a beautiful yellow after storing; it requires little trimming for market, as it is so shapely and solid. It has attained great popularity in many celery-growing sections. Pkt. 4c; oz. 25c; ¼ lb. 75c.

GIANT PASCAL, or WINTER KING—A compact, vigorous, productive variety and one of the best for Winter use; leaves upright, short and dark green; stalks short, thick and very broad; blanches a beautiful yellowish-white. Pkt. 4c; oz. 25c; ¼ lb. 75c.

Winter Queen Celery

Some growers consider this grand variety even better than the Winter King. It is certain that the Winter Queen keeps just as well through the Winter, up to April and even May, if desired. It grows stout, thick and heavy, with more heart than any other kind. This latter characteristic gives it truly exceptional value. It bunches up handsomely, presenting an attractive appearance when offered for sale, while it has that sweet, nutty quality so much desired in celery. The leaves are light green, which, with the stems, blanch easily to a creamy white. It will become a great favorite in home and market gardens as fast as its qualities are known. Pkt. 4c; oz. 25c; ¼ lb. 85c.

NEW ROSE—This is the best of the red or pink varieties. Early, hardy, solid, crisp and fine nutty flavor. Pkt. 4c; oz. 25c; ¼ lb. 75c.

CELERIAC (Turnip-Rooted Celery)—Large Smooth White. The best variety, extensively used for soups and salads. Pkt. 4c; oz. 25c.

Everitt's ^{TRADE}(OK)_{MARK} Seed Sweet Corn

Bantam Evergreen Sweet Corn Sweeter than Golden Bantam, Almost as Tender as Stowell's Evergreen

This is a cross between Golden Bantam and Stowell's Evergreen, the combination having produced a new variety of finest qualities. The ear is a third larger than the Golden Bantam but only 10 days later. Grain broad and deep. Color, rich, golden-yellow. A true sweet corn. When once you know how excellent Bantam Evergreen is you will not do without it. Think of this: A market gardener grew 8 acres and sold the entire crop at 22 to 25 cents a dozen when other kinds sold at 15 to 20 cents. **Large pkt. 8c; ½ lb. 20c; 1 lb. 40c; 5 lbs. @ 38c, prepaid.**

COUNTRY GENTLEMEN (SHOE PEG)—An especially fine quality corn. Ears 7 to 8 inches long, cob small, white and densely covered with long, slender, white grains. Season with Stowell's Evergreen. **Pkt. 5c; ½ lb. 18c; 1 lb. 35c; 5 lbs. @ 32c.**

BLACK MEXICAN—Where color is not an objection, but luscious sweetness the chief consideration, this black corn (or blue when in roasting ear stage) is unsurpassed. Recommended for home use. **Pkt. 5c; ½ lb. 18c; 1 lb. 30c; 5 lbs. @ 28c.**

ADAMS' EXTRA EARLY—Not a sugar corn, but largely grown for early use; hardy, standing early planting. Ears 7 to 8 inches long, 12-rowed. **Pkt. 5c; ½ lb. 18c; 1 lb. 35c; 5 lbs. @ 33c.**

BIG EARLY ADAMS—Similar to Extra Early Adams, but a little later; makes larger ears; harder than sugar corn; makes a small stalk; can be planted close. **By mail postpaid, pkt. 5c; ½ lb. 18c; 1 lb. 30c; 5 lbs. @ 28c.**

Everitt's Quantity and Quality Sweet Corn The Largest Eared Early Sweet Corn

IT is a very difficult matter to combine earliness and size with good flavor and sweetness in any one variety of corn, but in these very valuable characteristics, Everitt's Q. & Q. we believe excels all sweet corn to date. It is a vigorous and healthy growing sort, with stalks about 5½ feet high. When well grown, ears are 7 to 8 inches long, set about 18 inches from the ground, and are well filled up to the tip with large, deep grains almost as tender and sweet as Stowell's. Frequently bears three ears to the stalk and almost always two. Can be planted very early, as it germinates strongly. Will become a very popular sort both with home and market gardeners. **Large pkt. 8c; ½ lb. 25c; 1 lb. 40c; 5 lbs. @ 38c.**

CORY, MAMMOTH WHITE

The earliest and best of all extra early sweet corn. Ears 10 to 12-rowed, 7 to 8 inches long, fairly sweet, tender and white. Stalks about 4 feet high, usually producing two large ears on each stalk. Pkt. 6c; $\frac{1}{2}$ lb. 18c; lb. 35c; 5 lbs. @ 33c.

Golden Bantam

Has taken the country by storm. A little

later than Cory, but the size of the ear compensates for it. It is very early, very sweet, very hardy and very productive. It becomes a favorite with all who grow it or eat it. Dwarf, can be planted closely. The prime favorite for small gardens and early market. Cannot be too highly recommended. Pkt. 7c; $\frac{1}{2}$ lb. 20c; lb. 35c; 5 lbs. @ 32c.

**Everitt's SELECTED
STOWELL'S EVERGREEN****The Leading Main-
Crop Sweet Corn**

I know that nearly every person who raises any sweet corn plants some of this variety. Every person just dotes on the big juicy "roasting" ears when the Stowell's Evergreen comes. It is more largely grown for home, market and canning than any other kind. It remains tender a long time. Season late. Our O. K. Brand is unexcelled. Pkt. 6c; $\frac{1}{2}$ lb. 18c; lb. 30c; 5 lbs. @ 28c.

HOWLING MOB—A big-eared medium early corn with the sweet flavor of the late varieties; ears 7 to 9 inches long; usually two pearly white ears to the stalk; the shuck extends well over the tip and protects it from the green worm so destructive to early sweet corns. Pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 35c; 5 lbs. @ 32c.

HOOSIER ROASTING EAR CORN—Is grown by the field by many farmers and gardeners and marketed in wagon loads. This is not a true sweet corn, but is of the Early Adams type and fills the same place in the late class of table corns as the Adams does in the extra early and early kinds. This variety is of our own introduction and is now grown by the field by many gardeners and farmers and marketed in wagon loads. Pearly white, white cobs, large, 14 to 16 rows. Sure cropper. Pkt. 6c; $\frac{1}{2}$ lb. 15c; lb. 25c; 5 lbs. @ 23c.

Stowell's Evergreen. Bottom shows in green state for table; next, the size of cob and top, as the seed is dry for seed.

Everitt's (TRADE MARK) (OK)

Cucumber Seed

Jersey Pickling This is the variety that produces the long and very slender pickles. A wonderfully productive variety. One that is sure to please. Pkt. 4c; oz. 10c; ¼ lb. 40c; lb. \$1.00.

EARLY FRAME, or SHORT GREEN—This is a famous pickle cucumber, producing cukes of medium size and of fine quality when sliced. Medium early. Pkt. 4c; oz. 10c; ¼ lb. 40c; lb. \$1.00.

Arlington White Spine A strain that has been bred up for greenhouse growing. When well grown the fruit will measure 6 to 7 inches long. Early; vines very productive. Quality splendid. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.00.

Green Cluster A valuable variety, being very early, very productive and of splendid quality. The fruit grows in clusters near the base of the vine. A favorite for pickling. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.00.

Green Prolific (Or Boston Pickling)—One of the most prolific varieties and is largely grown for pickles, being of right size. Also a splendid kind for slicing. Gather the cukes when medium size for pickles, and they will bear through a long season. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.00.

Davis Perfect Pickling Splendid for outdoor cultivation and forcing under glass. The fruits grow long and slim, sometimes measuring 12 inches. Color a rich, dark, glossy green. Very tender and fine flavor. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.00.

GHERKIN—The fruit is 2 to 3 inches long, oval and closely covered with spines. Used exclusively for pick-

CULTURE—Cucumbers must have rich soil. No ground is the best. Plant when ground is warm, in hills 3 4 feet apart. Thin to 3 or 4 plants to the hill. As vines grow cover occasional joints to induce new roots. Do not let ripen on vines, or they will stop bearing. One pkt. will plant about a dozen hills, two lbs. per acre.

Green Cluster

Imp. Early White Spine

ling, for which purpose it is very fine. Pkt. 6c; oz. 15c.

Early Fortune The finest type of White Spine yet produced. Early, very productive and disease-resistant; fruits nine inches long, slightly tapering; flesh white; very firm and crisp, with very few seeds; color rich, dark green, which does not fade when shipped a long distance. 9 x 2½ in. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

White Wonder Fruit, produced in clusters, is symmetrical, short, blocky and rounded at both ends; color ivory white from time of forming until maturity, moderately productive. 6 x 2½ in. Pkt. 6c; oz. 15c; ¼ lb. 50c.

Everitt's Selected (Extra Select)—If you want a good sized, plump cucumber, such as is used for slicing, get the White Spine. They also are good for pickling when small. It is early, a splendid bearer, and of fine crisp quality. Very productive. Color dark green. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.00.

Giant Pera One of the longest of the Long Green (or Black Spine) family. The fruit often 15 inches long, slender and very smooth, crisp and solid, with few seeds; color dark green; distinct and desirable. Pkt. 8c; oz. 40c.

Everbearing For a continuity of crop this variety is hardly equaled. It produces pickling and slicing cucumbers of medium size until frost. Fruits of all ages and blossoms may be seen on the same vine. Pkt. 5c; oz. 10c; ¼ lb. 35c; lb. \$1.00.

King of Picklers

This new cucumber is one of the grandest of all for pickling. It is fine in form, solid and thick in texture, excellent in flavor and combines all the qualities necessary to make a good pickle. It is very productive, yielding over 250 bushels per acre. It is also adapted for slicing, as it grows from 9 to 12 inches long, retaining its rich, green color throughout its entire length, which is straight and smooth and symmetrical. Is desirable both for slicing and pickling for home and market. All gardens will be better by having the KING OF PICKLERS Cucumbers. Pkt. 8c; oz. 20c; $\frac{1}{4}$ lb. 60c; lb. \$1.50.

IMPROVED LONG GREEN

This is the old, long cucumber that has always been the stand-by in tens of thousands of gardens. Our strain gets better each year from selection. On good ground it will grow a foot long, slender, almost seedless, brittle. Grand for pickles, when small, and for sweet pickles when full grown. Very productive. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 30c; lb. \$1.00.

Imp. Long Green

CHINA CUCUMBER Climbing

A MOST remarkable new, long green Cucumber from China. Don't confuse this with the Japanese Climbing Cucumber. It is a much finer variety. The Cucumbers grow about twice as long, about 20 inches, and are slimmer, 2 to 3 inches, and handsomer.

Color deep green. The flesh is solid, crisp and fine flavor, free from any bitter taste. Vines grow strong and are very productive. They will vine on the ground or may be trained on a trellis or any support. The cucumbers are early, bearing for use almost as early as shorter kinds. We recommend this cucumber as a variety of much merit for the table as well as one of the most novel vegetables of the year. Pkt. 12c; 5 for 50c; 12 for \$1.00.

A SUGGESTION—Buy by the dollar's worth and sell them.

WE ARE LOOKING FOR YOUR ORDER

Farmers and Gardners, when preparing to order their seeds, do not confine their investigations to one seed catalogue, but they examine several. We know this. So we have made a catalogue that for MODERATE PRICES we believe will merit your order. If you do send it to us we will spare no effort to execute it to your satisfaction.

EVERITT'S (O. K.) SEED STORE

A Page of Odds and Ends

Everitt's (CK)

CULTURE—Plant seed early in house or hotbed. Set in open ground when warm. Set 2 feet apart each way. They must have rich soil and as warm as possible, although do very well on any good soil. One pkt. will make about 200 plants; one oz. about 1,000 plants.

Black Beauty This is the earliest variety that attains any worthwhile size. The color is jet black and very attractive. A dwarf kind. All gardeners for home and market who want an early egg plant are coming to grow it. Pkt. 6c; oz. 35c.

Egg Plant Seed New York Imp. Purple. Most popular variety. Grows to great size and fine quality. Bear until frost. Pkt. 6c; oz. 35c.

Everitt's (CK)
Endive Seed

CULTURE—Sow as soon as ground can be worked in the Spring for early crop. For the main crop sow in August, in drill 15 inches apart, 6 to 8 inches in rows. To blanch, tie the leaves, when dry, in matting or any soft open material, or invert something over the plants, or even tie them together at top. Leaves are used as salads and are of the best in Fall and Winter. One pkt. to 20 feet of drill, one oz. to 100 feet.

MOSS CURLED—Very ornamental as well as good. Pkt. 4c; oz. 14c; ¼ lb. 40c.

GREEN CURLED WINTER—A standard variety. Pkt. 4c; oz. 14c; ¼ lb. 40c.

Everitt's (CK)
Gourd Seed

CULTURE—Start the seed early and transplant. The following varieties will be found very useful about every house. All are ornamental climbers.

NEST EGG—They closely resemble the eggs of hens and are very useful as nest eggs, never breaking or freezing, and are never injured by wet. The plant grows very rapidly, and is useful in covering unsightly places, being quite ornamental. Pkt. 6c; oz. 25c.

DIPPER—This variety makes a splendid tool for dipping hot liquids. The handles do not heat through. Vines attractive. Pkt. 6c; oz. 20c.

DISHCLOTH—Makes an admirable vegetable dishcloth. The peculiar lining is the part used, which is sponge-like, porous, very tough and elastic. The vines are very ornamental. Pkt. 6c; oz. 30c.

SUGAR TROUGH—Grows to great size. Cut off the top and you will have a receptacle that will hold from 1 to 10 gallons, and will be useful for many purposes. Pkt. 6c; oz. 20c.

MIXED—All varieties mixed. Pkt. 6c; oz. 20c.

Everitt's (CK)
Kale Seed

CULTURE—These plants are extensively used, especially in the South, for garnishing and for greens. They are of the cabbage family, do not form heads, but furnish an abundance of attractive green leaves.

Seed may be sown from April to October, being handled the same as cabbage, except that some of the varieties will stand a good deal of frost and they are hardy on well drained soil. The young shoots which come up from the old stalks in the Spring make excellent greens. One pkt. will plant about 40 feet of row; one oz. about 200 feet.

DWARF, or CURLED SCOTCH—This is the variety usually sown in the fall for Spring use. The young leaves are very tender and delicate in flavor. Pkt. 4c; oz. 15c; ¼ lb. 40c.

DWARF CURLED SIBERIAN—A vigorous grower of spreading habit. The leaves are large, rather plain in the center, but cut and frilled at the edges. Very hardy. Pkt. 4c; oz. 15c; ¼ lb. 40c.

Everitt's (CK)
Kohl Rabi Seed

EARLY WHITE VIENNA—Very early, small, handsome skin and flesh white. Splendid quality. Pkt. 4c; oz. 25c.

Everitt's (CK)
Leek Seed

CULTURE—Sow early in April in drills one foot apart, one inch deep. When plants are 6 inches high transplant 12x6 inches. Set deep in the ground. The seed may be sown in August or September and transplanted in the Spring. Leeks are generally considered superior to onions for flavoring soups, etc. One pkt. will make about 200 plants; one oz. about 800 plants.

AMERICAN FLAG—The standard variety. The gardener's favorite. Pkt. 4c; oz. 15c; ¼ lb. 45c.

LAGENARIA

Called by Some "New Guinea Butter Bean"

"SON, go into the garden and bring me one bean."
"Yes, mother, but where is the wheelbarrow?"

Above we copied from our Indianapolis News and it referred to the New Guinea Butter Bean, as grown by Mrs. E. G. Lewis of this city. The News continued: "Indianapolis gardeners who have raised this bean can testify that it can better be handled in a wheelbarrow. The bean in question weighed 10 pounds, was 28 inches long and 13 inches round. Five families in the neighborhood shared in eating it. . . . The people say the bean has a pleasant taste."

Directions for Cooking on Pkt.

This is really not a bean, but is an edible product when cooked as French butter beans, or fried as egg plant, or boiled like squash. It also has much merit in the size and attractiveness of the vine. The leaves and blooms are larger and handsomer than Moon Vines which, in connection with the curious fruits, make it the talk of a whole neighborhood. See the illustration from a photograph. Succeeds everywhere. Will grow about 50 feet in one season. Pkt. 15c; 4 for 50c; 10 for \$1.00.

A SUGGESTION—Buy by the dollar's worth and sell them.

"The Herb Garden"

Everitt's (CK)

Seed of Herbs

No garden is complete without a corner devoted to herbs. Remember the charm of the old-time herb gardens—how fascinating they were. And what magic there was in a bit of savory or a pinch of sage, to "dress up" an ordinary dish and make it a delight. And it was almost a treat to be a sick-a-bed child, if grandmother brought you a cup of steaming catnip tea; or perhaps it was balm or horehound, or pennyroyal or thyme, according to your ailment. Every woman on the farm knows what it means when the children are a bit feverish, or have "bad colds"—with no doctor just around the corner—to have an herb garden, or dried herbs in the attic to rely upon, in such a case.

The varieties marked with an asterisk (*) are perennial, and when once started in the garden will continue for years with but little care.

ANISE—Used for cordials, garnishing and flavoring. Pkt. 5c; oz. 20c.

***BALM**—Leaves have a fragrant odor. Make a tea beneficial in fever. Pkt. 5c; oz. 50c.

BASIL (Sweet)—Leaves used for flavoring soups, stews and highly seasoned dishes. Pkt. 15c; oz. 40c.

***CATNIP**—Leaves and young shoots are used for seasoning. Cats delight to roll in it. Is a good bee pasture. Pkt. 5c; oz. 60c.

***CARAWAY**—Grown for the seeds, which are extensively used for the flavoring of bread, pastry, candy, etc. Pkt. 5c; oz. 25c.

CORIANDER—The seeds are used in the manufacture of confections and for culinary preparations. Pkt. 5c; oz. 15c.

DILL—Leaves used for pickling cucumbers. Pkt. 5c; oz. 25c.

FENNEL (Sweet)—The leaves boiled are used in fish sauces. A beautiful garnish. Pkt. 5c; oz. 15c.

***HOREHOUND**—Used for seasoning, also in cough remedy. Horehound tea is a remedy for colds. Pkt. 5c; oz. 40c.

LAVENDER—Valuable for its perfume. The flowers are used. Pkt. 5c; oz. 40c.

***MARJORAM (Sweet)**—Leaves and ends of shoots highly esteemed for seasoning. Dry for Winter use. Pkt. 5c; oz. 40c.

***PENNYROYAL**—A tea made from it is valuable for colic. The fresh plant placed close to people chases mosquitoes. Pkt. 10c; 3 for 35c.

ROSEMARY—The leaves are used for seasoning. Pkt. 5c; oz. 35c.

SAGE—Extensively used for seasoning and dressing. Pkt. 5c; oz. 30c.

SAVORY (Summer)—The leaves and flowers are used for flavoring soups and dressings and string beans. Pkt. 5c; oz. 30c.

***THYME**—For seasoning; a tea from the leaves is a remedy for headache. Pkt. 5c; oz. 50c.

HYBRIDIZED POTATO SEED New varieties of potatoes are originated by planting the seeds taken from the seed ball that grows on the tops. Hybridized seed has far the best chance to produce valuable varieties. This seed contains the blood from two or more of our best kinds mingled. A pkt. of this seed may produce such a valuable kind as may make a fortune. At any rate nothing is more interesting to grow. Full directions on pkt. **PRICE**—Pkt. 10c; 3 for 25c; 7 for 50c.

Plant the Best

O. K. Seeds are O. K. with me. The Six-Weeks Potato has proved to be just as you represented. Farmer's Interest and Yellow Dent Corn are all of the best. The Monte Cristo Melon is the best that ever grew East, West, North or South, and all my neighbors so affirm. The grass seed was clear of filth and weeds and the finest I ever bought.

JOHN W. DANNER, Argillite, Ky.

I find your O. K. Seeds the best I ever used, and will continue to be a customer for them. The Man-Weight Cultivator and Drill did good work, saved me much work and is easy to handle.

L. C. BRITTON, Columbus, Ohio.

For the past three years I have bought seeds from three different firms and tested them side by side. O. K. Seeds have proved the best. I haven't had a poor package of seeds from you and I will continue to use them.

THOS. W. ASH, So. West Harbor, Me.

Our use of O. K. Seeds has been entirely satisfactory. Early Six-Weeks Market Potatoes are just splendid, and the earliest variety I ever saw. You may expect my orders in the future.

H. BURK, Salmon, Idaho.

Everitt's (CK)

Lettuce Seed

PERFECTION BLACK SEEDED SIMPSON

Black seed, loose head, crumpled leaves. I recommend this very highly for an early, delicious lettuce. It does not form a head but a bunch of delicate green, almost white, crisp, tender and sweet leaves. It does not run to seed quickly. It is also a favorite for forcing. Largely grown for market. It is a kind that can be cut and it will come again. Pkt. 4c; oz. 15c; lb. 40c; ¼ lb. \$1.25.

Grand Rapids Black seed, loose head. This variety looks much like Simpson, but it is much better for forcing. It is, in fact, the chief forcing variety of loose leaf lettuce. Its upright habit permits of close planting. Does very well in the garden, too. Crisp, delicious flavor. Handsome. A favorite market kind. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

All Seasons Black seed. Head. A very large, medium late heading sort. The heads are a light golden tint, well folded, with inner leaves blanched to a rich, buttery yellow, which is so

CULTURE—Lettuce likes a moderately moist, fertile soil. Seed may be sown as early as the ground is fit, sowing every 2 weeks for succession. The heading varieties should be thinned to 8 inches apart, but if heads are not wanted leave the plants 2 inches apart to grow in a mass. For Winter use, sow under glass from November to February. Keep in a moderate temperature, giving as much light and air as possible. From time of seeding to maturity is 40 or 50 days. One pkt. will produce about 600 plants, one oz. about 3,000 plants.

much desired in serving various salads with mayonnaise dressing. Quality splendid. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Iceberg An extremely hard heading variety. Has fine appearance in leaf. There is hardly another lettuce that gives better satisfaction both for home and market. Pkt. 5c; oz. 12c; ¼ lb. 30c; lb. \$1.00.

Salamander or **EVERLASTING**—Black seed. Head. If you want a variety of lettuce that will last the very longest time from one sowing select this one. You will find it sweet and tender long after other kinds become tough and bitter and go to seed. It forms mammoth heads of light green color, with golden hearts. One of the most satisfactory varieties. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Brown Dutch (B. S.) A late heading, medium-sized variety; leaves broad, very thick and smooth, with plain edges color dark-green, overlaid bronze red; head firm and buttery-yellow inside; quality good. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

Wonderful or New York

Heads Sometimes Measure
15 Inches Across

THIS new variety grows immense heads. It is distinguished from others by the rich, golden-yellowish color on the inside of the heart. The outside of the leaves is a dark green. The head grows somewhat conical in shape. It is crisp, tender and delicious. It is one of the best to resist heat and dry weather and grows very vigorously. The whole head is free from any trace of bitterness. We recommend it highly for mid-summer. It is one of the things that every garden should have. Pkt. 6c; oz. 20c; ¼ lb. 75c; lb. \$2.00.

New Wonderful, or New York

Imp. Hanson

White seed. Head. We have had the Hanson lettuce as long as the writer remembers and there is no likelihood of its popularity waning for some years. It is a strong grower, resists heat and is one of the best mid-summer head sorts. It does not form as solid a head as some others, but its head is as large as an early cabbage. Light green outside, white within. Deliciously sweet. Free from any bitter taste. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

MAY KING THE EARLIEST HEAD LETTUCE

—Extra fine for cold-frames. Makes large solid heads, 6 to 7 inches in diameter, with broad, light green outer leaves; grown outdoors, it is extremely early; for forcing it is in every way desirable. The center blanches rich yellow. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

ALL the good seeds are not owned by us, but all the seeds we have are good seeds—O. K. Seeds.

COS OR CELERY LETTUCE

CULTURE—It is grown in the Northern States for use in late Spring and early Summer; in the South in the late Winter months. It is prized for its mild flavor and fresh crispness. Sow same as lettuce. All varieties have an upright growth.

Trianon Self-Closing An extremely large, strictly self-blanching Cos Lettuce. Leaves oval in form; flat and smooth, forming into a loaf-shaped head. Color dark green, quality excellent. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

PARIS WHITE—White seed. Produces long, pointed leaves, which form in a compact bunch. It blanches nicely when the tops are drawn together and tied with a soft string. Fine flavor. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25.

WAYAHEAD LETTUCE

A HEAD LETTUCE WITH GOLDEN HEART

Wayahead Lettuce

The Earliest Hard-Heading Variety

THE name of this lettuce was suggested by the fact that it comes way ahead of any other hard-heading variety, as well as it excels them in quality. Every gardener will appreciate the combination of earliness, firm head, handsome appearance, and splendid, crisp, table quality. For growth in cold frames, for early Spring and in the open ground for Spring, Summer or Fall crops it has honored its name by giving a lettuce of the finest quality throughout the season. The outer leaves are light green, while the tightly folded leaves blanch the head to a rich, buttery yellow. It stands long before running to seed. Get it for every garden. Pkt. 8c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.50.

California Cream Butter

Black seed. Head. I consider this the best of all in the class of cabbage heading lettuce for Fall and Winter. It forms large, nearly round, solid heads, which are green, speckled with brown on outside, while inside they are a rich, cream color. Most beautiful. It is slow to run to seed. Medium early. Fine for the home gardens and market. Pkt. 8c; oz. 15c; $\frac{1}{4}$ lb. 40c.

BIG BOSTON THE
BEST HEAD LETTUCE

 The Best, Smooth-Leaved Market
Garden and Shipping Lettuce

THIS grand lettuce, since its introduction a few years ago, has rapidly gained in popularity until now it is more extensively grown than any other kind in many sections. This covers both for commercial sale and the home table. It is suited to grow in the open ground for early Summer and Fall use, in greenhouses for Winter or cold frames for early Spring. It produces, under ordinary conditions, fine large, creamy-white heads, of completely blanched leaves, crisp, tender and sweet, and it has few outer leaves. Stands a long time, retaining its good quality. Is peculiarly suited for Fall culture. A slight covering of waste hay will protect the heads in the field, from frost when they can be marketed in November, bright, fresh and unharmed. Big Boston is the leading variety for Winter growth in the South to ship to northern markets. Pkt. 8c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.25.

*Big, tender,
crisp, heavy
creamy-white
heads*

BIG BOSTON LETTUCE

Everitt's (O.K.) Muskmelon Seed

CULTURE—Select a light, warm soil; a poor light soil is better than a rich, cold, heavy one. Fertilize well. Lay off hills six feet apart. Plant a dozen seeds to the hill, but thin to two plants. Pinch the ends off of vines if they encroach on their neighbors, and this will also induce bearing. One pkt. will plant about 15 hills; an oz. 50 hills; 2 lbs. an acre.

Rocky Ford Our O. K. Strain of Rocky Ford is Unexcelled

GREENFLESH. It is the best known and most extensively grown and marketed variety of muskmelons. There are several strains of this fine melon, the result of different growers breeding to different types. Our O. K. strain of the Rocky Ford gives all that can be desired. The melons are small, slightly elongated, solidly netted. Flesh is rich, green, thick, luscious and melting. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

Early Sugar Nutmeg Greenflesh. Small globe shape. Skin dark green, covered with a shallow netting. Flesh thick, sweet, light green color. Extremely early. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

Hackensack (Extra early.) Greenflesh. A selection from the well-known old Hackensack. Ready for use ten days earlier than its parent. Fruit good sized, round, flattened on the ends, netted, thick meat, delicious flavor. Extremely productive. A favorite with market gardeners and the home grower. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

Grant Montreal Market Greenflesh. If you want to raise the very largest muskmelon that grows, and at the same time one that is a delight to eat, pick this one. On good ground they will average around 10 pounds each, but have often reached 20 pounds and one was reported as weighing 44 pounds. They are nearly round, heavily netted, deeply ribbed, thick flesh, season

late. When they come to market they command high prices because of their magnificent size and delicious quality. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

Burrell Gem This is the yellow-flesh Rocky Ford. It has the same shape and about the same appearance, but the flesh is salmon colored. It is not quite as early as its green-fleshed relative. It is a great yielder and where its good qualities are known it out-sells others. One of the very best shippers, carrying well without ice. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. \$1.25.

Osage or MILLER'S CREAM—Orange salmon. First gained its popularity in Chicago, where they were served in high-class hotels and restaurants. Its fame has spread well over the country. Skin is dark green, slightly netted, but nearly smooth. Medium size, egg shaped. The luscious salmon flesh is what made it famous. The flesh is heavy, juicy sweet, luscious and so thick that there is scarcely any cavity for the seeds. Pkt. 4c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.50.

Extremely Thick, Sweet Orange Flesh

HEART OF GOLD THE BEST ORANGE FLESH MUSK MELON

(Orange flesh.) An ideal basket and crate melon of medium size, round, heavily netted, flesh very thick, of rich orange color, handsome appearance and of the sweetest flavor. Average size of melon 6 to 8 inches in diameter. Matures in 75 days. The seed cavity is small and the rind is very tough, making it a good shipper; its vine is a vigorous grower and a heavy cropper. A very convenient sized melon for the table and for packing in shipment. Pkt. 8c; oz. 15c; $\frac{1}{4}$ lb. 50c; lb. \$1.50.

Knight, or Maryland

GREENFLESH. This fine, new melon is extremely early, but grows to fine size and has superb qualities. When we tell you that it is ten days earlier than Rocky Ford, about twice as productive and nearly double the size you will surely be interested in it. The vine is a vigorous grower, branches freely and sets and matures a generous number of fruits. The melons are nearly round, skin netted; of light, golden hue when ripe. The flesh is light green, blending to light pink at the center. The best early muskmelon for the North. A good shipper and is just splendid for home use. Pkt. 7c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.50.

Ten Days Earlier than Rocky Ford. Twice as Productive.

KNIGHT OR MARYLAND OR SWEET AIR

Tip Top

Greatest Late Market
Melon—O. K. Strain
is Unexcelled

SALMON flesh. This, I may say, is the melon for the millions to grow and eat. It is a sure cropper and practically every melon is a good one—sweet, juicy, melting. Grows large, round, ribbed. Appearance is attractive. So popular is it on some markets that other kinds will not sell when it comes. The season is fairly late, but when it comes its size, appearance and good quality command the market for it. Pkt. 4c; oz. 15c; ¼ lb. 50c; lb. \$1.50.

Emerald Gem

Salmon color. About the size of Rocky Ford, but with smooth skin. Shape, flat, round. The flesh is very thick, good almost to the rind with a very small seed cavity. A poor melon of this kind is a rarity. It is delicious. Pkt. 4c; oz. 10c; ¼ lb. 40c; lb. \$1.25.

Long Yellow Cantaloupe

Large, long, oval and deeply ribbed; flesh light salmon, very thick and sweet. Pkt. 4c; oz. 10c; ¼ lb. 35c; 1 lb. \$1.25.

Tip Top. Claims the Market When It Comes

Honey Dew Melon

Has Come Into Popular Favor Faster Than Any Other
Melon—Greenflesh

WHEN you first taste this melon you will understand why it was named Honey Dew. It originated by crossing a melon that came from Africa with the Rocky Ford. It commands a high price in markets and when served in hotels and restaurants, because of its novel, fine appearance and juicy, delicious flavor, and also because it can be kept and marketed many weeks after other melons are off of the market.

The average size of the melon is 8 to 10 inches in diameter, and being solid and juicy, they weigh very heavy for their size. It has a delicious flavor all its own. One person describing it, said: "It looks like a large grape fruit, tastes like sweet nectar, and has the mingling of the flavors of pineapple, banana and vanilla."

A splendid shipper. That garden must have some Honey Dew melons and the time is here when every market grower must have them to supply his customer's demands. Pkt. 6c; oz. 15c; ¼ lb. 40c; lb. \$1.50.

Try This In Your Melon Patch

News comes from Kansas that the melon raisers out there are planting nasturtium seeds in the hills with the melons for growers have heard that the aphids will not attack melon vines if nasturtiums are grown along-side.

HONEY DEW

Everitt's (O.K.)

Watermelon Seed

Indiana Sweetheart

For Market and Home Use.
The Superior Round Melon

THERE are two general classes of watermelons—round and long. Some prefer a round melon, others the long, but this preference is not so positive, except quality goes with the choice. Of round melons the Sweetheart is the choice of many. It grows large, is early, heavy, a long keeper, fine quality and a good shipper. Skin mottled green. It is very productive. Sweethearts usually bring a good price when others will be neglected. This is because of their handsome appearance and fine qualities. This melon remains in good condition longer than most others, even improving in its quality for a time. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

Peerless Or ICE CREAM (Long)—Very early. One of the very best for growing in the North for home use, or the home market. It grows oblong shape; of good size; color mottled green. The rind is thin, the flesh is scarlet and exquisitely sweet. Also very productive. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

Cole's Early Another splendid round melon. It is not only very early, but it continues to bear all season. It is strictly a home melon, though, as the rind is so thin that it will not bear shipping. The flesh is brilliant red and melting sweet. The melons are about 12 inches long by 9 inches in diameter, but they make up in number what they lack in size. I recommend the Cole's Early very highly for home use and home market. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

Everitt's Orange WATER MELON

A novelty yet of superior quality. The peculiarity of this fine melon is that when well ripened the inner core separates from the rind. Frequently one can lift the entire heart of the melon out of the shell or rind by carefully cutting the melon rind only. The inner portion of the melon quite resembles an orange after peeling, hence the name. The flesh of this melon is of a beautiful pink shade and fine quality. It grows to a medium size, is productive. If you want something to please the taste and eye raise some Orange Melons. Pkt. 7c; oz. 15c; ¼ lb. 50c.

Everitt's Earliest AND SWEETEST

The Best Home Watermelon. Very Early and Deliciously Sweet. It Fairly Melts in Your Mouth.

THIS melon is the earliest and sweetest of all. It has been selected for many years for these qualities. The size averages from 10 to 15 pounds. The flesh is scarlet, of extra sweetness and fairly melts in your mouth. It is also one of the most prolific known, as the plant is of hardy and vigorous growth, is adapted to grow on ground that will not produce other melons and in northern latitudes where larger and later kinds will not succeed. Wherever you live plant some of them. Pkt. 7c; oz. 15c; ¼ lb. 50c; lb. \$1.50.

Your O. K. Seeds all seem to make us friends. You are surely a friend in need to us farm folk and I sincerely hope you will be successful in your undertakings for the benefit of the farmers.—MRS. JOHN L. COOK, Cook's Station, Mo.

I have used O. K. Seeds and they are all right. I know when I plant your seeds that they will come up and I can say "this will be a stand," and then go on with some other work. I wish you success with your seeds.—O. H. TATE, Springfield, La.

TOM WATSON WATERMELON

The Most Popular Market Melon—Sweet, Crisp, Coreless

TOM WATSON MOST POPULAR WATER MELON

This is of the Keckley Sweet class and the same description applies quite well to it. However, it grows larger, frequently reaching 2 feet long. It is the giant among melons. It is also a little lighter in color. Also it has a tough rind and ships splendidly to distant markets. The quality is equal to Keckley, which is a high recommendation. It is an ideal melon for all purposes. Wonderfully productive. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c; 5 lbs. or more @ 70c.

New Excel The Melon That Met the Ideas of a Critical Grower —Size, Shape, Rind and Quality Just Right

AN extensive grower of watermelons found that, of the varieties in cultivation, none of them combined all of the necessary qualities to his desired degree. If the eating quality was good enough, the size or shape was not just right, or the rind was not strong enough. So he set about to produce a variety that would meet all of the requirements—a perfect watermelon. The result was this new melon, the "Excel." "The Excel," he says, "will produce more large, marketable melons under the same conditions than any other watermelon, while its carrying and shipping qualities are unsurpassed." The melons grow 18 to 22 inches long and 12 to 16 inches in diameter and weigh from 40 to 100 lbs. The rind is dark green, indistinctly striped with a lighter shade. The deep-red flesh is crisp and with finest flavor. Have no hard centers. Pkt. 7c; oz. 15c; $\frac{1}{4}$ lb. 50c; lb. \$1.50.

Keckley Sweet Or MONTE CRISTO (Long) —I may sum the good qualities of this melon up in these words—**unsurpassed in productiveness for nearby market selling and for eating quality.** Its popularity is increasing each season. It is early, but grows very large. Skin is rich, dark green shaded with faint lines of lighter green. Very handsome. I consider that no melon has a sweeter or more pleasant flavor, or is a better table melon. It should be universally grown. It is not a shipping melon. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c; 5 lbs. @ 70c.

MUSTARD

CULTURE—Sow in drills 1 foot apart. Cover lightly. For a succession sow each two weeks. Water copiously if weather is dry. Cut when not over 3 inches high. Used for salads.

SOUTHERN GIANT CURLED—The best kind. Leaves about twice the size of the old kind. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 80c.

COLORADO PRESERVING CITRON—Grown for making preserves. This is the best variety. It is very productive. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 85c.

Halbert Honey Shape oblong, well filled to the ends, skin very dark green showing a faint longitudinal tracing, or indentation in the rind; medium early and fairly large; flesh crimson and very sweet. Keckley's Sweet is quite similar though more pear-shaped; seeds white. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c; 5 lbs. at 70c.

Everitt's (OK)

Okra Seed

CULTURE—Grown for its green pods, which are used in soups, stews, etc. Sow thickly when ground is warm in drills 3 feet apart, 1 inch deep. Thin to 10 inches, cultivate like sweet corn.

IMP. LONG POD—Pods long, white and smooth. Prolific.

WHITE VELVET—Grows tall with long round pods, smooth and of a velvety white color. Pkt. 4c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c.

CELEBRATED "O.K." ONION SEED.

CULTURE OF ONIONS—The ground for onions must be rich and it should have been in cultivation for a year or two. Pulverize not more than 5 inches deep. The seed bed must be fine. For large onions in Fall, drill about 4 lbs. per acre in rows 14 to 15 inches apart. Weeds must be kept out. Pull when tops begin to dry down. For sets, sow 40 to 60 lbs. per acre in drills 12 inches apart. Some growers sow the seed under glass or in hot beds and transplant. The advantages of this plan are so many that it will become more general. In this way earlier and larger onions can be grown. Six to 10 bus. of sets will plant an acre.

GROWING OUR ONIONS FOR SEED.

Prizetaker Magnificent Onions can be grown from Black Seed Planted in Spring

THE most interesting to grow from seed, the handsomest and the most reliable onion for the amateur and professional to grow from seed is the Prizetaker. It grows quickly, attaining a large size. It is beautiful and the table quality, delicate and mild. Also any that can be spared for sale always bring an extra price. It is the main reliance of many commercial growers, as the beautiful yellow onions in fancy groceries and fruit stands, which are of this kind, prove. No sets are required of Prizetakers, as they grow large from the seed. This is one of the best to raise plants and transplant to garden or field, when they may be made to weigh 4 to 5 lbs. under favorable conditions. Season for Fall and early Winter, as they will not keep until Spring. The O. K. Strain of seed is unexcelled. Pkt. 4c; oz. 20c; 1/4 lb. 65c; lb. \$2.00.

Yellow Strasburg or DUTCH—A little darker color than the Danvers, more flattened and a little later. This is sown largely to raise yellow sets because of its splendid keeping qualities. Pkt. 4c; oz. 20c; 1/4 lb. 50c; lb. \$1.50.

Ohio Yellow Globe This is a strain of the Globe Onion that has come to be generally used by growers in Ohio and Indiana, while the Globe Danvers has the call in most other places. It is earlier, also is better suited to heavy muck soil. Pkt. 4c; oz. 20c; 1/4 lb. 65c; lb. \$2.00.

White Portugal or SILVER SKIN—Very early, grows to large size, flat, mild flavor. Largely grown for white sets, also is extensively used for bunching and pickles. Pkt. 4c; oz. 20c; 1/4 lb. 65c; lb. \$2.00; 5 lbs. @ \$1.85.

Southport Yellow Globe This is more globe shaped than the Danvers and oftentimes excels in its yields. All that can be asked for in table and market and keeping qualities it possesses. Extensively grown for best market demand. Pkt. 4c; oz. 20c; 1/4 lb. 65c; lb. \$2.00; 5 lbs. @ \$1.85.

Southport White Globe Identical in appearance with the Southport Yellow Globe, except it is as white as a clean snowball. Sells at the highest price in all markets. A late variety and a heavy cropper. Quality for table all that can be asked. Pkt. 4c; oz. 20c; 1/4 lb. 65c; lb. \$2.00; 5 lbs. @ \$1.85.

Southport Red Globe And this also is identical in appearance to the Yellow and White, except its color, which is Red. A very heavy yielder. Even a better keeper than the Yellow and White. It is the leading market variety in the Central and Western States. The three colors of Southport Globe Onions are reliable to grow and to market, making heavy yields and getting the top prices. Pkt. 4c; oz. 20c; 1/4 lb. 65c; lb. \$2.00; 5 lbs. @ \$1.85.

Types of Southport Globe Onions

Yellow Globe Danvers

Yellow Globe Danvers

Our O. K. Strain is Always a Heavy Yielder

AND now we come to the standard yellow onion. It is the Yellow Globe Danvers. Fine symmetrical shape, large size. Average well grown specimens weigh from 1 to 2 lbs. Quality just what an onion should be. They grow rapidly and attain full size from the seed the first year, and early in the season. They keep well all winter. A favorite for home, garden and field cultivation. Pkt. 4c; oz. 15c; 1/4 lb. 50c; lb. \$1.75; 5 lbs. @ \$1.50.

Large Red Wethersfield

Noted for Its Productiveness and Keeping Qualities

THIS is the largest of the Red Onions.

This fact can decide a person who wants a red onion, who may be in doubt what variety to plant, although there may be a preference for others on account of season or shape. The Large Red Wethersfield, like the Prize-taker, grows to full size from seed the first year. The bulbs are large, flat in shape, purplish, red skin. Flesh a purplish white color, not so mild as Prize-taker, but not too strong flavored to meet the popular taste. One of the best keepers. It succeeds almost everywhere and is sought for in all markets. Very productive. The O. K. Strain of seed is unexcelled. Pkt. 4c; oz. 15c; 1/4 lb. 50c; lb. \$1.75; 5 lbs. @ \$1.50.

Large Red Wethersfield

Everitt's (OK)

Onion Sets

Why plant Sets?

By planting sets you can have onions to eat, or market in one-fourth the time required from seed. Set onions come off so early that a second crop can be grown on the ground.

BOTTOM ONION SETS

White, lb. 35c; 5 lbs. @ 30c, postpaid.

Yellow, lb. 35c; 5 lbs. @ 30c, postpaid.

Red, lb. 35c; 5 lbs. @ 30c, postpaid.

Ask for prices on larger quantities.

Everitt's (OK)

Parsnip Seed

IMP. HOLLOW CROWN or **LARGE SUGAR**—This is the best table variety. Also is a great producer and profitable to grow for stock. Pkt. 4c; oz. 15c; 1/4 lb. 50c; lb. \$1.50.

GUERNSEY, or STUDENT—Not so long, but thick, suited to shallow ground. Heavy yielder. Pkt. 4c; oz. 15c; 1/4 lb. 50c; lb. \$1.50.

Everitt's (OK)

Parsley Seed

PLAIN or SINGLE—This has plain leaves instead of curled. It is extensively grown for soup bunches. Pkt. 4c; oz. 15c; 1/4 lb. 25c; lb. 85c.

MOSS CURLED—An elegant, decorative variety. Also has high flavoring properties. Pkt. 4c; oz. 15c; 1/4 lb. 25c; lb. 85c.

HAMBURG TURNIP ROOTED—This forms a root resembling a small parsnip. It is this root that is used for flavoring and is highly esteemed for soups, stews, etc. Pkt. 5c; oz. 15c; 1/4 lb. 25c; lb. 85c.

CULTURE—Give rich soil, and to the long kinds deep soil. Plant very early in rows 18 inches apart, cover seed one-half inch. Thin to 3 to 5 inches. Will keep in the ground over winter and improves in quality. One pkt. for 50 feet of drill; oz. 200 feet; 5 lbs. per acre.

CULTURE—Have the soil rich. Drill one foot apart, cover one-eighth inch. Seed germinates very slowly so have patience. To soak the seed a few hours in warm water will hasten its germination. Thin to four inches when two inches high. A small plot sown broadcast, thinly, will do very well for a family supply. Prized for garnishing and for flavoring soups. One pkt. will produce many plants.

PLAIN or SINGLE—This has plain leaves instead of curled. It is extensively grown for soup bunches. Pkt. 4c; oz. 15c; 1/4 lb. 25c; lb. 85c.

MOSS CURLED—An elegant, decorative variety. Also has high flavoring properties. Pkt. 4c; oz. 15c; 1/4 lb. 25c; lb. 85c.

HAMBURG TURNIP ROOTED—This forms a root resembling a small parsnip. It is this root that is used for flavoring and is highly esteemed for soups, stews, etc. Pkt. 5c; oz. 15c; 1/4 lb. 25c; lb. 85c.

Imp. Hollow Crown Parsnip

Guernsey or Student Parsnips

Everitt's (OK) Pepper Seed

ROYAL KING

THIS new, sweet mango pepper sprang from a plant found growing with a crop of Ruby Kings. The old Ruby King does not compare favorably with this new pepper in any particular. The Royal King averages nearly twice as much meat as the old Ruby King. It is also a heavy bearer, is most beautiful in color and its shape is all that can be asked for, while it also has all good qualities for shipping to distant markets. So fine is this pepper that it can usually be sold at good prices even when markets are "glutted" for others. Pkt. 7c; oz. 30c.

Ruby King A good old variety. Very productive, very handsome and very good. Bright ruby red color when ripe. Pkt. 4c; oz. 25c; ¼ lb. 75c.

Golden Dawn, or Golden Queen If you want a yellow mango instead of the red select this one. It is the same shape as Ruby King and is as good in every respect; the only difference is in its color. It is not too much to say that the red and yellow mangoes ought to be served together as they are then very ornamental. Pkt. 7c; oz. 25c; ¼ lb. 75c.

RED CHILI—Sharply conical, about 2 inches long, brilliant scarlet, very hot; used for chili and pepper sauce. Pkt. 5c; oz. 40c; ¼ lb. \$1.50.

CORAL GEM BOUQUET—If you want a beautiful garden ornament as well as a very useful plant, these will please you. The plant grows 10 inches high and will be literally covered with small scarlet fruits 1 inch in length, slender and round, that are hot and pungent. It begins to bear early in the season. Pkt. 4c; oz. 50c.

Banana Muskmelon

Novel Appearance; a Prize Winner; Good Quality; Succeeds on Ground Where Others Will Not. A Curiosity, and Prized by Many.

SHAPE and appearance somewhat like an overgrown banana. It attains a length of from 18 inches to 3 feet, and a diameter of about 2 inches at the stem end to 4 to 6 inches at the largest part. The flesh is salmon, firm, juicy and sweet. The flavor is liked by many people better than the regular muskmelons. It is not merely a curiosity, but many growers find they bring higher prices on the market than the regular muskmelons. Also it is a melon that succeeds where others fail. If you have failed with other kinds plant the Banana, and enjoy many treats. **PRICE**—Pkt. 6c; oz. 15c; ¼ lb. 45c; lb. \$1.50.

CULTURE—Start in cold frame, hot bed or house. Transplant to garden when warm weather has come to stay. The rows may be 18 inches apart and plants 12 inches apart in row. One pkt. will produce about 250 plants; one oz. about 1000 plants.

Royal King

Golden Dawn

Large Bell

Cayenne

LARGE BELL, or BULL NOSE—An old standard sort. Mild flavor. Red color when ripe. Excellent for mangoes. Pkt. 4c; oz. 40c.

CAYENNE—This is the hot pepper used for seasoning. Long and tapering. Very yieldy. Pkt. 4c; oz. 40c.

Plant the Best

I have used O. K. Seeds several years and also have used others, but yours are the best. Your Late Flat Dutch Cabbage is my favorite. I wish you success.—P. H. SHEELY, Peaks, S. C.

I have been planting your O. K. Seeds about 16 years and always found them "O. K." in all respects. I obtained Green Mountain Potatoes of you four years ago and they are the best I ever grew.—WILLIS M. GUICE, Hendersonville, N. C.

My Farmers' Interest Corn is yielding 90 bushels per acre, after being through a great cyclone.—REV. J. LEWIS WAMPLER, Wilkinson, Ind.

I have been a customer of your house 12 years and I have not got one article that was not satisfactory in all respects. We bought all of our garden seeds of you last spring and they were all O. K. Hoping you will have success.—J. E. THOMPSON, Clark Centre, Ill.

Am in receipt of your valuable catalogue of O. K. Seeds. Your catalogue always rates seeds of all kinds so much cheaper than other catalogues. I don't see how you can sell the way you do and furnish such good seed. I have handled a good deal of your seed and I never got any poor ones.—JNO. M. JAMES, Winterset, Ia.

You may have a 25c pkt. or any pkt. of Seeds FREE

This Certificate

entitles you to your choice of one packet of seeds, anyone, your selection, from the catalogue FREE. We make only one condition, viz: that you accompany this certificate with an order to the amount of \$1.00 or more.

We make this offer to get you to look through the catalogue carefully. We believe if you will do that you will see good reasons why you should send us your seed order. Also we know, if you look in this way, that you will find some packets of seeds priced at 25 cents, one of which you may have FREE if you want it. But select the one packet that you most desire.

• This offer is good for the year 1923.

Return this certificate with your order.

February 17, 1923.

WORLD BEATER

PIMENTO

World Beater Pepper

THE introducer of this pepper said: "It is the finest introduction of a pepper in ages." It is a cross of Chinese Giant and the Ruby King, retaining the shape of the Ruby King, except it is broader at the point end but growing almost to the size of Chinese Giant. Its chief improvement is in the fact that it is much more prolific than the C. Giant, some plants having yielded two dozen marketable peppers. The flavor is so mild that it can be sliced and eaten raw. The fruit is green until it ripens, when it takes the scarlet color. The flesh is so thick that it holds up a long time, making it one of the best shippers. Order this and have something you will be proud of. Pkt. 7c; 3 pkts. for 15c; oz. 50c.

Anaheim Chili Pepper

THE plants of this new pepper grow vigorously and the fruits grow 6 to 8 inches long, tapering from $1\frac{1}{2}$ to 2 inches in diameter at top to almost a point at the other end. Pkt. 4c; oz. 30c; $\frac{1}{4}$ lb. \$1.75.

Chinese Giant One of the very largest of the mild varieties. Plant of short, stocky growth, with light green foliage; fruits pendent, thick, blocky and square ended, 4 to 5 inches in diameter and of equal length; color, brilliant glossy scarlet. Pkt. 7c; 3 for 15c; oz. 50c; $\frac{1}{4}$ lb. \$1.75.

PERFECTION PIMENTO

THIS new pepper is becoming very popular because of its valuable qualities. Its productiveness, bearing until killed by frost, makes it very profitable to the market gardener, while its desirable size and shape, thick flesh and agreeable flavor make it a favorite in every kitchen. The form is distinct as shown in illustration. Color crimson-scarlet. The fruits grow from 2 to $2\frac{1}{4}$ inches across and about 3 inches long. Very fleshy. Their meat is never hot but of a very agreeable, sweet flavor. If you want the finest pepper and one that makes the best mangoes, just the right size for individual serving, send to us for the Pimento. Pkt. 7c; oz. 35c; $\frac{1}{4}$ lb. \$1.75.

PEANUTS

Peanuts are chiefly grown in the Southern States, commercially and for stock food. Hogs will harvest them and will fatten on them. The following varieties will also succeed in the North.

SPANISH PEANUT—This is the earliest kind and is particularly recommended for the Northern States. It grows upright and can be cultivated with machinery. Small but plump nut. Pkt. 8c; lb. 40c; 5 lbs. @ 35c.

LONG PODDED—This is later and larger. It is one of the kinds in general commerce and is not early enough to mature in the North. Pkt. 8c; lb. 40c; 5 lbs. @ 35c.

Everitt's (OK) Seed Peas

CULTURE—Plant peas early in the Spring so the crop will be off before hot, mid-summer. Peas never do well in mid-summer, but may be planted late to grow in the cool Fall. The smooth varieties plant earlier than the wrinkled, as they endure more cold and wet. See that the ground is rich, particularly for the short ones. Plant the dwarfs in rows $2\frac{1}{2}$ feet apart; the tall ones 3 feet apart, plant 3 to 4 inches deep. Plant same variety in succession. One pkt. will plant about 20 feet; a pound about 60 feet; 100 to 120 lbs. for an acre. The wrinkled peas are the sweetest.

EXTRA EARLY AND EARLY SORTS

Alaska ($2\frac{1}{2}$ ft. smooth)—A pea of fine quality. Largely grown for market, commercial canning and in the home garden. It ripens evenly and one picking practically gets the crop. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

First and Best ($2\frac{1}{2}$ ft. smooth)—This is of the Alaska type, but is a little later with larger pods and much more productive. Very largely planted for home and canning. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

American Wonder (1-ft. wrinkled)—The well-known dwarf pea. Extra early and exquisite quality. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

Nott's Excelsior ($1\frac{1}{2}$ ft. wrinkled)—I consider this the best extra early wrinkled pea. It is nearly as early as American Wonder, while the pods are larger, with 6 to 7 peas, and many more of them. The quality is very fine. Every garden should have this pea for the first on the table. Of high quality. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

Little Marvel (14 in. wrinkled)—This is a new variety that may prove to be even a better pea than Nott's Excelsior. A peculiarity is in it bearing many twin pods. The pods contain 5 to 7 peas and are of excellent flavor. Prolific. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

Gradus, or Prosperity ($2\frac{1}{2}$ ft. wrinkled)—Extreme earliness, only 3 to 5 days later than the early smooth peas. Finest quality and great productiveness are combined in this pea. These things recommend it to the home and market gardener. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

Premium Gem ($1\frac{1}{2}$ ft. wrinkled)—This is an improved strain of the well-known Little Gem. Of dwarf growth, and matures very early, also is productive of large pods— $2\frac{1}{2}$ to 3 inches long—filled with 6 to 8 light green peas. The quality is splendid. Pkt. 8c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

Quantity and Quality

THIS pea was so named because of its large productiveness and splendid table qualities. It is medium early and grows uniformly about 24 inches high. Pods are large and of blocky shape. The peas are wrinkled, green and for eating are near perfection, being rich, buttery and marrow-like. With a large canner it holds the record for producing the largest number of bushels of shelled peas per acre. The home and market gardener will find this a most profitable variety. The pea is properly named. Every grower should get it. Large pkt. 8c; $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 5 lbs. @ 37c. postpaid.

You Will Find This an Unsurpassed
Main-Crop Pea

LATE VARIETIES

Horsfords Market Garden (3 ft. wrinkled)

—Perhaps the most worthy of the mid-season peas from the points of productiveness and quality is this H. M. Garden. It is a very heavy cropper. In a test of 28 kinds it doubled all others in yield. A single plant bore more than 150 pods. It is extensively grown for canners. Grows 2 to 3 feet, but is stiff and does well without support. Pkt. 8c; 1/2 lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

Alderman, or Imp. Telephone

(4 ft. wrinkled)—A fine mid-season variety, maturing just after the extra early ones and before the late kinds come in. It grows 4 to 5 feet tall, hence should have support. The pods are 4 to 6 inches long, borne in pairs, and contain 7 to 9 large, green peas in each. Extraordinarily productive. Of exquisite flavor. I recommend Alderman highly for the home and market garden. Pkt. 8c; 1/2 lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

CHAMPION OF ENGLAND—Universally admitted to be one of the best late peas grown. Highly prized by those who are fond of a large, tender and luscious pea. Hardy and vigorous in growth; pods 3 inches long, broad, nearly straight; medium dark green color. Of delicious flavor; a very profuse bearer. Especially recommended for the home garden. Height 4 to 5 feet. Pkt. 8c; 1/2 lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

LARGE WHITE MARROWFAT—An old variety. A heavy and sure cropper. It is a smooth pea and while the quality is not as good as the wrinkled peas, its heavy yields, long bearing and productiveness are qualities to recommend it. 5 to 6 feet. Requires supports. Pkt. 8c; 1/2 lb. 20c; 1 lb. 35c; 5 lbs. @ 32c.

SUGAR PEA (Edible Pods)—(3 ft. smooth)—This distinct pea is used like stringless beans. The pods are tender and are broken and cooked with the peas. Very sweet and delicious. Try them and you'll like them better than shelled peas alone. Pkt. 8c; 1/2 lb. 25c; 1 lb. 40c; 5 lbs. @ 37c.

Write for Prices of Peas by 1/4 bu. and larger quantities

Gradus, or Prosperity

I have planted your O. K. Seeds and like them. Send me a Catalogue and I will send another order. — W. S. THOMPSON, Riley, Okla.

We are well pleased with the O. K. Seeds. Don't think we could have done better anywhere. — W. B. HELM, Greensburg, Ky.

Your seeds are O. K. as represented. I am especially pleased with Everitt's Earliest of All Cabbage and the Sweet Corn was extra nice. — A. K. DAVIS, Riceville, Miss.

Alderman, or Improved Telephone

A PAGE OF GOOD PUMPKINS.

CULTURE—Plant when the ground is warm in hills 6 to 10 feet apart depending on the variety. Some varieties, like large Cheese Tennessee Sweet Potato, Sugar Pie and Big Tom may be planted in the corn field. A pkt. will plant about 10 hills; one oz. about 5 hills; two to three lbs. to acre.

(The numbers identify the illustrations.)

KING OF MAMMOTHS (1)—If you want to grow pumpkins of mammoth size, from curiosity or to exhibit, or even to make pie pick this one, or the Mammoth Tours. This K. of M. grows to enormous size, often 2 feet or more in diameter. The flesh is salmon color and finer grained than you would think, considering its size. To get the largest specimens, allow only one vine to the hill and only one or two pumpkins on the vine. Pkt. 4c; oz. 15c; ¼ lb. 50c lb. \$1.50.

MAMMOTH TOURS (2)—A French variety which also grows to immense size. The pumpkins may be either long or round. Are very heavy if well grown, frequently exceeding 100 lbs. Quality very good Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.30.

MAMMOTH ETAMPES (3)—Another French kind that is quite an attraction. The skin is bright, glossy red and excites favorable comment on exhibition or on sale. Flesh very thick. Heavy. Quality is excellent. Attains very large size. Pkt. 4c; oz. 15c; ¼ lb. 40c lb. \$1.25.

LARGE CHEESE, or KENTUCKY FIELD (4)—This is the large flat solid, heavy, cream-colored "sweet" pumpkin, extensively grown in corn fields for stock, but is only second to the Sugar Pumpkin for pies. Sell well on market. It is the variety used by most canners. Keeps well in winter. Pkt. 5c; oz. 10c; ¼ lb. 20c; lb. 50c; 5 lbs. @ 45c.

TENNESSEE SWEET POTATO (5)—A pear-shaped variety of splendid qualities. The flesh is white, fine-grained, solid and thick. When cooked has the appearance of sweet potatoes and some people say it tastes better. Excellent for pies and custards. Prolific. Keeps well until late Spring Pkt. 4c; oz. 10c; ¼ lb. 40c; lb. \$1.25; 5 lbs. @ \$1.00.

SUGAR PIE (6)—The chief end of pumpkins is to make pies, and I consider this is the best pie pumpkin. It is small. Perhaps it was made small so enough good quality could be supplied. Very solid, orange skin fine grained and exceedingly productive. Even very small garden should have a hill of Sugar Pie pumpkins. A good keeper. Pkt. 4c oz. 15c; ¼ lb. 40c; lb. \$1.00.

BIG TOM (7)—An improved strain, of the Connecticut Field, or Yankee. Grows to large size and extremely productive. Their chief value is for feeding stock. Pkt. 4c; oz. 10c; ¼ lb. 20c; lb. 60c; 5 lbs @ 45c.

GOLDEN OBLONG (8)—A medium size, solid, productive, long-keeping variety. Keeps as well as the hard-shell squashes. Excellent variety for cooking, Summer and Winter. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 85c

JAPANESE PIE (9)—The best crook-necked pumpkin. Called "Japanese" because the seeds are curiously marked with characters like Japanese writing. The flesh is salmon color, fine grained and more dry than some sweet potatoes when baked. First class for pies, etc. This is a good kind to cut in strips, or pieces and dry like apples, for future use. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.00.

CUSHAW, or GOLDEN CROOKNECK—A popular variety with a hard shell. The pumpkin often grows two feet in length with small seed cavity in the ball, while the long neck is solid meat.

Flesh golden yellow. Fine for pies and, because of great productiveness, profitable to grow for stock feed Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.25; 5 lbs. @ \$1.00

40 CENTS WORTH 35c

Here are the best ten varieties of pumpkins. One pkt. of each is worth 40 cents, but will send the collection for only 35c—10 pkts. for 35 cents.

Everitt's (CK) TRADE MARK

Radish Seed

EARLIEST AND FORCING

Crimson Giant

Better Not Neglect
Getting This One

A NEW, extra early radish that grows very large, often 5 to 6 inches in circumference. It is good for garden and forcing. Nearly round, crisp and juicy. Stands a long time before getting pithy. Every garden should have it. A bonanza for market gardeners. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

VICKS SCARLET GLOBE

THE BEST GLOBE RADISH

This is one of the earliest of the forcing varieties and does equally well in the garden. Of quick growth, fine size, has small top. It is always crisp and tender. Very popular with market gardeners who know it. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10 5 lbs. @ \$1.00.

SCARLET TURNIP—Extra early. A famous variety for forcing and gardens. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

SCARLET TURNIP (WHITE TIPPED)—The name describes it. A beautiful extra early radish of fine quality. For forcing and garden. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

WHITE TURNIP—Both skin and flesh are pure white. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

FRENCH BREAKFAST—Extremely early, olive-shaped, scarlet with white tip. This is a popular radish for first on the table. Crisp when young, but soon becomes pithy. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

WHITE OLIVE-SHAPED—Handsome, small white radish with a small top. Of very rapid growth. For forcing and garden. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

SCARLET OLIVE-SHAPED—Like above except the skin is scarlet. Very popular for forcing and outdoor growth, North and South, as a bunching radish. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

Sparkler Ready for Table in 25 Days

I CONSIDER it a little better and a little prettier than any of the other little radishes that come extra early. It is globe-shaped, brilliant cardinal with more white tip than the old S. T. White Tipped. Ready to use in about 25 days. See the illustration to right. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

Sparkler, New Scarlet Globe

LATER VARIETIES

LONG SCARLET (Short top)—This is the old, popular, long, slender, dark-red, quick-growing radish. It comes very early, 25 to 30 days, and is of the choicest quality. Popular on market and on the table. The O. K. Strain seed is unsurpassed. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

CINCINNATI MARKET (Also called GLASS RADISH)—Very similar to L. S. S. Top, but preferred by many growers. It is a darker color, a little larger and a little smaller top. Preferred by Southern and Western growers. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

CHARTIER—While the long early radishes are all similar in some respects, yet our list would be complete without this handsome one which is so distinct in color. The top part is crimson, about half way down it blends off to pink and the bottom runs to waxy white. It is very quick growth, stands a long time and quality is splendid. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

SELECTED ICICLE THE BEST LONG WHITE RADISH

Extremely quick growth. Very profitable kind. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

WHITE VIENNA (or LADY FINGER)—A new long white variety. Compared with icicle it is a little later and larger. The radishes remain in prime condition a long time. I can not recommend it too highly. Coming to be a great favorite with market gardeners. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

WHITE STRASBURG—This is also a white radish. It is semi-oblong, thick at top and tapers regularly. Very late, but can begin to use it when young and small. In this respect it is truly an all-season variety. It never gets pithy. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

GOLDEN SUMMER TURNIP—A large, round, solid radish that always makes fine roots and is always solid and crisp. Perhaps the best for slicing. Yellow skin, white flesh, matures late. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.10.

GIANT WHITE STUTTGART—A turnip-shaped, large white Summer radish. Of fine quality, remaining in edible condition a long time. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

Icicle

If you want the earliest long white radish, select this one, which, in all respects, except color, is like the scarlet ones. It is very handsome, attractive and good. The flesh is about as brittle as an icicle, which its name suggests.

Conditions of Sale:—We exercise care to have all our seeds pure, true and reliable. But in handling and planting seeds, so many things may occur over which we have no control that we, in common with other responsible seedsmen, do not give any warranty, express or implied, as to the description, purity, productivity, or any other matter of any seeds, bulbs or plants sold by us and we will not in any way be responsible for the crop. This is the agreement between the Everitt's (OK) Seed Store and the purchaser of our seeds and if they are not accepted on these terms, no sale is made thereof, and if delivered they must be returned at once and any money paid will be refunded.

MERIT WINS AND PRICES TALK

We have built up our great business on the foundation of good seeds at the lowest cost of production, with a fair margin added for profit after they are economically handled. Because of the immensity of our business, we can afford to deal liberally with our customers. Cut our trade in two and we would lose money. We believe the people will again rally to the support of

and double our trade for
1923.

CREAM,

Not skimmed milk is what we deal in, and our catalogue list will be found to contain the cream of the varieties. Hence, if we don't catalogue as many varieties as some other seedsmen, you can still get the cream or the best, from us, and the best is not too good for our customers. O. K. Seeds give BETTER AVERAGE RESULTS than those obtained from any other source, at a less cost. WE COUNT ON YOUR ORDER SURE.

INDIANA

WINTER RADISHES

CULTURE—This class of radishes has an important place in the garden, and should be grown more extensively. They are of as good flavor as the early varieties and will grow at a time when the earlier sorts will not thrive. A great many gardeners make the mistake of planting them too early. They should be seeded about the last of June to middle of July and not after other ROOT crops.

CALIFORNIA MAMMOTH—The largest long Winter variety. Roots grow 10 to 12 inches long and 3 to 4 inches through. Color white. Quality good. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.00; 5 lbs. @ 85c.

WHITE CHINESE—Grows large, oblong. Color white. Fine texture and flavor. One of the best Winter radishes. Roots grow 6 to 8 inches long and 3 inches thick. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.00; 5 lbs. @ 85c.

ROSE CHINESE—Same as the former except in color. Roots 4 to 5 inches long. Pkt. 4c; oz. 15c; ¼ lb. 50c; lb. \$1.50; 5 lbs. @ \$1.25.

ROUND BLACK SPANISH—A round variety. Splendid keeper and splendid quality. Roots 3 to 4 inches in diameter. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

LONG BLACK SPANISH—Like the former, except the shape. Keeps crisp until Spring. Pkt. 4c; oz. 10c; ¼ lb. 30c; lb. \$1.10; 5 lbs. @ \$1.00.

Everitt's (OK)

Rhubarb Seed

soil must be deep and rich. A good way is to buy the roots and set as above.

VICTORIA—The old, satisfactory variety. There is no better under any name. Pkt. 4c; oz. 15c; ¼ lb. 35c; lb. \$1.25.

RHUBARB ROOTS—Each 20c; ½ doz. 75c; doz. \$1.25. Postpaid.

Everitt's (OK)

Salsify Seed

early in the Spring on rather light, fertile ground, in drills 18 inches apart; thin the plants to 1 or 1½ inches in the row. Light freezing greatly benefits the flavor. One pkt. for about 25 feet of row; one oz. to 75 feet.

MAMMOTH SANDWICH ISLAND—The best variety. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Everitt's (OK)

Spinach Seed

August and September and protect with straw during severe weather. The ground for spinach cannot be too rich. One pkt. sows about 20 feet of drill; one oz. 100 feet; eight to ten lbs. per acre.

CULTURE— Sow the seed in drills 18 inches apart and cover ½ inch. Thin to 4 or 5 inches, leaving the strongest. In Fall or Spring following set in permanent beds, 4 feet each way. The

CULTURE—This plant is used as a substitute for oysters, and many like it fully as well as the oysters themselves. It is either used in soup or scalloped with best results. Sow

CULTURE—For Summer, sow as soon as you can in the Spring, in drills 1 foot apart, 1 inch deep, and every two weeks for a succession. For Winter and early Spring, sow in late

LONG STANDING—One of the best for Summer, as it is slow to run to seed. Also sown in the Fall, but should have protection in Winter. Leaves are large, thick and crimped. Pkt. 4c; oz. 10c; ¼ lb. 20c; lb. 60c.

NEW ZEALAND—Another variety especially recommended for Summer. A wonderful large plant and should be planted 2 by 3 feet apart. Both leaves and stalks are tender and eatable. Do not plant this until ground is warm. It may be used the entire summer until cold weather. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

PRICKLEY WINTER—For sowing in the Fall. Thick leaved. A hardy winter variety. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

BLOOMSDALE, or SAVOY—Another hardy Winter variety. Leaves, numerous, curled, blistered and succulent. Glossy, dark green color. Sow in early Spring and use before hot weather, or in Fall for Winter use. Pkt. 4c; oz. 10c; ¼ lb. 20c; lb. 60c.

TOBACCO

CULTURE—Sow the seed in early Spring on a clean bed. A favorite way is to burn brush or trash on the bed to kill weed seeds, also wood ash is the best fertilizer. When plants are 4 to 5 inches high, set in hills 4 to 5 feet apart. Give clean, thorough cultivation. An oz. of seed will produce plants for 1 acre.

HAVANA—One of the earliest. Fine texture and super-fine flavor. Pkt. 8c; oz. 25c; ¼ lb. 85c.

WHITE BURLEY—A favorite in parts of Kentucky, Ohio and Indiana. Fine quality and commands high prices. Pkt. 8c; oz. 25c; ¼ lb. 85c.

Indianapolis is situated in the center of the richest and most extensive agricultural region on the face of the globe; and besides it has shipping facilities unsurpassed by any other city in the country. We can save you time and money if you give us your order for farm seed.

Everitt's (OK) MARK

Squash Seed

Golden Summer Crookneck Bush

and yellow. Most popular of all the Summer kinds. Often grows 2 feet long. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Summer Varieties Mammoth White Bush Scalloped

This is about twice the size of the old variety and not much later. Quality fine. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Much larger than the old Crookneck, but just as early. Has all its good qualities and far more productive. The flesh is thick.

Winter Varieties

Delicata Just the Right Size for a Family Squash

This is a small squash of particularly fine, rich, dry delicious qualities. It is desirable because it is small and early and solid and for its good quality, for Summer or Winter. It comes about as early as the Summer squashes, and, because of its better quality should largely supplant that class, while its solidity makes it as good a keeper as the Winter varieties. The rind is orange-yellow, splashed and striped with dark green. Very prolific. Pkt. 4c; oz. 15c; ¼ lb. 40c; lb. \$1.50.

Boston Marrow

This is standard Fall variety and is without a peer for canning and pies. A rich orange color. Very productive. Has been grown ever since 1834. Pkt. 4c; oz. 10c; ¼ lb. 30c; 1 lb. \$1.00.

Delicious

A very early maturing variety that is also one of the best Winter squashes. The shell is very thin. Moderately hard. I consider it unapproached for fine grain, dryness, sweetness and richness of flavor. Is medium size, 5 to 10 lbs. It is in its prime from mid-fall to mid-winter. Plant some Delicious for some treats. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Mammoth Chili

The Jumbo of the squash family. Sure to get the prize for the largest squash at the fair. Sometimes grow to weigh 200 lbs. The flesh is rather coarse. Pkt. 5c; oz. 15c; ¼ lb. 50c; lb. \$1.50.

Fordhook

Small, oblong, excellent for Summer and Winter. Fruits grow 8 to 10 inches long, slightly ridged; skin smooth thin, yellow. Flesh straw color, very thick, exceptionally dry and sweet. The skin is so thin it need not be peeled for cooking. Deserves a place in every garden. Pkt. 4c; oz. 10c; ¼ lb. 40c; lb. \$1.50.

Hubbard

There have been many varieties of squashes introduced since this one and most of them have disappeared. The genuine Hubbard has more than held its own against all comers as a Winter squash. Whatever other varieties may appeal to your fancy, you should also plant some of the Hubbard. Vines grow strong and set fruit numerously. Frequently specimens weigh 25 to 30 lbs. Shape, oblong; color, bright orange. The standard for quality and Winter keeping. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Golden Hubbard

Now, while I am dealing with Hubbard Squashes, let me present also the yellow member of the family. This Golden Hubbard is the same as the original, with the exception of color, which is rich, orange yellow, instead of dark olive green. The flesh is a little deeper orange and equally fine-grained and sweet. All of the Hubbards are long keepers. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Type of the Bush Scalloped

Hubbard The Standard Winter Squash

Warted Hubbard

This is a new and enlarged edition of the Hubbard and is coming to be a great favorite. The warty knobs on it draw general attention. It grows larger than the older variety and produces more. The keeping and table qualities are just as good. Pkt. 4c; oz. 10c; ¼ lb. 35c; lb. \$1.25.

Warted Hubbard Squash. Larger Than the Old one.

Protect Your Trees

EVERITT'S SEED STORE
Indianapolis, Ind.

Facts Don't think that because one seedsman asks a higher price than another that his seeds must necessarily be better. It is often the case that one seedsman charges 50 per cent more than another for seeds that come out of the same bulk. Yet don't buy low-priced seeds unless you have good reason to think the quality is high. The quality of EVERITT'S O. K. SEEDS is always high, regardless of the price. Please remember this.

THE SECRET

If you want the best garden for the least cost, buy O. K. SEEDS

Cinnamon Vine

The Cinnamon Vine is one of the most popular vines in cultivation. No other vine more completely fills the want of a rapidly growing, beautiful, fragrant vine as the Cinnamon. It succeeds well anywhere.

This climber has dark green foliage, and late in the season bears a profusion of small white flowers of a delicious cinnamon fragrance. Although the vines die down to the ground each autumn, they grow up very rapidly in early spring, soon covering any trellis or arbor. Where you wish to hide unsightly places we suggest planting the Cinnamon Vine. Plant any time in spring. **Strong Tubers, each, 15c; 3 for 40c. Large Tubers, 20c each; 7 for \$1.00, postpaid.**

Everitt's (OK) Tomato Seed

BRIGHT RED VARIETIES

JOHN BAER
BEAUTIFUL TOMATOES
IN 30 DAYS FROM
SETTING THE PLANTS

Best Extra Early and a Strong
Competitor for Late Honors

NOTICE—This variety has produced perfect, solid, beautiful brilliant deep red tomatoes in 30 days, from well developed, strong plants that were set from the hot bed in veneer boxes, and with the roots undisturbed.

THE earliest tomato that is worth while. If you have not grown it you have missed very much of having the greatest satisfaction from your tomatoes. It is wonderfully productive, yielding 50 to 100 fruit to a plant. Every tomato ripens evenly right up to the stem with no "cripples." The flavor is mild and deliciously sweet. We recommend it unreservedly for the home garden and also for shipping. The tomatoes grow remarkably uniform and on good garden soil their uniform weight is 6½ ounces. It is also a superior tomato for packers, being such a heavy yielder. A bushel of these tomatoes can be gathered quicker than almost any other. Plant a package of this tomato and it will help you a lot to have the best garden you ever raised. Pkt. 8c; oz. 25c; ¼ lb. 75c; lb. \$2.50.

WAYAHEAD—This is a new variety of tomato with the peculiar potato leaf foliage. In season it is very early. Color red, surface smooth, solid and heavy. The fruit is medium size and borne in abundance. We recommend it highly for home and market gardens. Pkt. 8c; oz. 50c.

Earliana One of the best early tomatoes, taking into account season of ripening, size, productiveness and quality. Earliana grows in clusters, is bright red, as round as a ball, solid and splendid quality. Pkt. 4c; oz. 20c; ¼ lb. 75c; lb. \$2.50.

Chalk's Jewel An exceptionally fine early variety, about ten days later than Earliana; fruit uniformly smooth, round and solid; color crimson; a good canning sort for the north. Pkt. 4c; oz. 20c; ¼ lb. 75c; lb. \$2.50.

Bonny Best This tomato is very beautiful scarlet color. Perfectly good flavor. Plants very productive, as they set in clusters of 4 or more at frequent intervals. One of the best for forcing. Excellent for all purposes. Pkt. 4c; oz. 20c; ¼ lb. 75c; lb. \$2.50.

The Stone This is the standard late or main crop tomato. The fruit is bright scarlet, very large. Smooth, solid, heavy, of the finest quality. The plant is a strong grower and very productive. This variety is in great favor for home, market and canning, North and South. Bears shipment to distant markets. Pkt. 4c; oz. 20c; ¼ lb. 60c; lb. \$2.00.

Dwarf Stone The best stiff-stalked, upright dwarf tomatoes in size of fruit and productiveness. The fruit is produced in clusters of 3 to 5 and each plant produces quite a number. The color is deep scarlet. Quality the best. Pkt. 4c; oz. 20c; ¼ lb. 60c; lb. \$2.25.

PINK OR PURPLE AND YELLOW VARIETIES

BEAUTY—Color, a glowing crimson with a tinge of purple. Shape, perfectly round, large size, solid. Quality splendid. Medium early, productive. This is the best-liked purple tomato in many sections. Pkt. 4c; oz. 20c; ¼ lb. 65c; lb. \$2.50.

GOLDEN QUEEN—This is a large, beautiful, yellow tomato of superior qualities. Very showy and very good. It is the best yellow tomato. Pkt. 4c; oz. 20c; ¼ lb. 65c; lb. \$2.50.

SMALL FRUITED SORTS—These are used for preserves.

YELLOW PLUM—Plum shaped. Pkt. 4c; oz. 25c.

RED CHERRY—Look like large cherries. Pkt. 4c; oz. 25c.

CULTURE—For the first sowing select the earliest types. Sow the seed in the house or hot bed in February or early March. When two inches high transplant. If time will permit transplant again in two weeks. This will induce root growth. Each time giving more room, of course. When ground is warm set in garden 3 to 4 feet apart. For main crop start later and transplant once or twice. Set in garden about 4 to 5 feet apart. As they grow you can let them trail on the ground or build frames about a foot high to carry them, or trellises. One pkt. will produce about 300 plants, an oz. about 2,000 plants.

Chalk's Early Jewel

Golden Queen

Stone

Beauty

Bonny Best

Two Clusters of "John Baer"

Ponderosa Wonderfully Popular. Has Been the Most Popular of the Mammoth Tomatoes

NOTWITHSTANDING its large size, it bears early and then continues all through the Summer. It seems that each vegetable has its "Giant" and Ponderosa has been the giant of the tomato family. This is true as regards the extraordinary growth of vine and the size of fruit. A popular way to raise the Ponderosa is to plant it by a fence or trellis, when it will grow higher than a man and bear fruit all along, many weighing a pound or more. The quality is splendid. On account of its solidity and few seeds, is especially good for slicing. They are very productive. The varieties called Beefsteak, Tenderloin, Majestic and some others are so similar that we think it not necessary to list them. Pkt. 10c; oz. 45c; ¼ lb. \$1.50; lb. \$5.00.

BELLS COLOSSAL
THE NEWEST-BIGGEST-BEST TOMATO

See Inside Back Cover Page
Include This Grand Tomato in Your Order

Greater Baltimore May Just Double the Yield of Your Former Best Cropper

A Cluster of Greater Baltimore Tomatoes

THE CANNERS' AND MARKET GARDENERS' FAVORITE—This has come to be the great canning tomato. Since its introduction many canners make it obligatory on their growers that this variety be raised for them. The color is brilliant red. The vines have great vigor, are healthy, grow compact and bear a cluster of tomatoes at every other joint. It is an immense yielder of shapely, smooth, heavy tomatoes, deep from pole to pole, free from ridges and cracks. Second early in season. Of course they are as fine for the home and market garden, where they are sure to surpass your expectations by yielding about double what you expected to get. The illustration shows their shape, but cannot begin to express their brilliant beauty.

Pkt. 4c; oz. 15c; ¼ lb. 55c;
lb. \$2.00.

If you want more than a pound up to 50 pounds get our price.

Plant the Best

I have used your O. K. Seeds 5 or 6 years and they have always given me satisfaction. They are always fresh and up-to-date.—GEO. W. WADE, Freemansville, N. C.
I have used your O. K. Seeds for several years and have always found them fresh and of superior quality.—REASIN HARD, Canton, Kan.
All your O. K. Seeds have been satisfactory.—W. E. SANTS, Catlin, Ill.
I have planted your O. K. Seeds for 3 years, and to say that I am delighted with them but feebly expresses my feelings. On the seed question I have been humbugged much, but I never had any trouble with O. K. Seeds. May

you have abundant crops of O. K. Seeds and the success you so richly deserve.—HALL LAURIL, Vienna, La.
I have handled your O. K. Seeds for several years and no fault has been found with any of them. I think they are the best seeds in the market.—B. F. KESSLER, Greensburg, Ky.
I believe you are the fairest man I ever bought seeds from. Your O. K. Seeds are always good. Prize-Taker Onion and C. W. T. Cabbage beat all I ever saw. I will always want O. K. Seeds when planting time comes.—W. D. BRUMLEY, Bono, Ark.

Buy your Clover and Grass Seeds of us and you will get **QUALITY** Seeds worth every cent of your money paid. Also you will get them near the centre of the country with a saving of time and money in transportation. Let us have an opportunity to quote you whenever in need.

Everitt's (OK) Turnip Seed

CULTURE—For early, sow as soon as ground will permit in Spring, in drills 14 inches apart. The Ruta-Baga, 24 inches apart, or sow broadcast. Thin the plants to 6 inches and Ruta-Baga to 12 inches. For Fall and Winter sow July and August for turnips, one month earlier for Ruta-Baga. Use one to three lbs. per acre.

We will sell Turnips at 65c a pound in 5 lb. lots, made up of one or more kinds. Postpaid.

EARLY SNOWBALL—A pure white, very early variety. It makes sizable turnips in 6 to 7 weeks. Nearly round, very tender and sweet. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

PURPLE TOP STRAP LEAF—This is the most popular variety. Good for early Spring and Fall and Winter. Top is purple, bottom white. Very beautiful and perfectly good quality. So productive that it is also largely grown for stock. We cannot recommend it too highly. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

PURPLE TOP WHITE GLOBE—A large purple top globe-shaped turnip that is scarcely second to the P. T. S. L. in popularity. It grows to large size, of choice quality and is very productive. A long keeper. For home, market and stock feeding. We recommend it highly. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

LARGE WHITE GLOBE—(Strap leaved)—A perfect globe in shape; skin and flesh pure white, firm and sweet. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

EARLY WHITE FLAT DUTCH—Differs from the Purple Top Strap Leaf only in color. Same season in same good qualities. For those who prefer a white garden turnip we recommend this. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

AMBER, or YELLOW GLOBE—Grows to a large size. Very productive. Good quality. Keeps until Spring. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

SEVEN TOP—Grown for the tops, which are used for greens. Very extensively grown in the South. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

COWHORN—If you want a large, coarse, heavy-yielding turnip for stock, pasture, or Winter feed, also to improve your ground, sow this one. It grows about one-

half above ground and 12 to 15 inches long and is not difficult to harvest. Also will be eaten by cattle, sheep and hogs in the field. Sown with rape the pasture and manurial value of the crop is considerable. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

GOLDEN BALL, or ORANGE JELLY—If you want a yellow-fleshed turnip, select this one. Tops are small, roots round, smooth, deep yellow color, medium size. Flesh is firm, crisp and fine quality for table. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

EXTRA EARLY MILAN—This is the earliest turnip and the best variety for early. Tender and sweet. Purple top and white root. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 85c.

Everitt's (OK)

RUTA-BAGAS, or SWEDISH TURNIPS

These are a different class of turnips. The leaves are smooth. They grow slower and must be planted earlier than turnips. Also they grow larger and usually

Ruta Baga Seed

yield more. Adapted to Northern States only. Good for table, but used chiefly for stock feed.

IMPROVED AMERICAN PURPLE TOP—A hardy, productive variety with a small neck. The roots are large, oblong or globular, with very little tap root. Color bright yellow with a purple top. Very solid and heavy. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

LARGE WHITE FRENCH—Bulbs grow to large size, very solid, and are excellent for table as well as make a cheap feed for stock. The skin and flesh are white. Pkt. 4c; oz. 10c; ¼ lb. 25c; lb. 75c.

JUST THINK Every postoffice or rural route box is a branch store for O. K. Seeds. Drop a letter in and in a few days take out the best seeds under the sun—O. K. Seeds.

A Select List of Flower Seeds

EVERY person, whether in country or city, can raise flowers. The expense for seed need be but a trifle, while the labor will be so interesting that it will really be recreation and a real pleasure. I believe the most interesting flower garden I ever saw was in Indianapolis, and it was cultivated on a narrow strip of ground between the sidewalk and the street. This would seem to suggest that there is hardly any person so situated that he or she cannot indulge in this highly educational, refining, pleasant and frequently profitable pastime or business. In our list we have aimed to present the popular, easy growing kinds that are sure to respond to the care that the amateur can give them, rather than the varieties that demand the skill of the expert to insure satisfactory results.

In the following list "a" stands for annual, "b" for biennial and "p" for perennial; "c" with any of these means climber.

ANNUALS—These are plants that flower and mature the first year and then die.

BIENNIALS—These are plants that flower the second and sometimes the third year after the seed is sown and then perish.

PERENNIALS—These generally do not bloom until the second year and then live outdoor and bloom yearly.

Seeds for Special Purposes

If you want **PLANTS OF TALL GROWTH**, suited for backgrounds and centers, select Asters, Balsams, Larkspur, Marigold, Hollyhock, Scabiosa, Stocks, Sweet Williams, Zinnias, etc.

If you want **CLIMBING PLANTS**, select Canary Bird Flower, Cypress Vine, Gourds, Ipomeas, Nasturtiums (Tall), Sweet Peas, etc.

If you want **SPREADING AND TRAILING PLANTS** for vases, hanging baskets, etc., select Alyssum, Lobelia, Verbenas, etc.

If you want **LOW GROWING PLANTS OF SPREADING HABITS, ADAPTED TO SMALL BEDS, RIBBONS, MASSING OR BORDERS**, select Ageratum, Alyssum, Calliopsis, Campanula, Candytuft, Lobelia, Mignonette, Nasturtiums (Dwarf), Pansy, Verbena, Petunia, Phlox, Poppy, Portulaca, etc.

If desired to have **BEDS OF SINGLE KINDS AND BLOOM A LONG TIME**, select Phlox, Pansy, Petunia, Stock, Balsam, Verbenas, Zinnias, etc.

If you want **FRAGRANT FLOWERS**, the Mignonette, Sweet Pea, Alyssum, Carnation and Heliotrope should be selected.

ABRONIA UMBELLATA—A trailing plant with charming fragrant flowers. a. Mixed. Pkt. 4c.

ACROCLINUM—One of the best everlasting. a. Pkt. 4c.

AGERATUM—Flowers all season. One of the best bedding plants. h. h. a. Mixed. 4c.

ALYSSUM—Little Gem. Grows only a few inches high and covers ground like a carpet. a. 4c. $\frac{1}{2}$ oz. 20c.

AMARANTHUS—Beautiful foliage plant. Mixed. 4c.
AQUILEGIA (Columbine)—Early to bloom. Mixed. h. p. 4c.

ANTIRRHINUM (Snap Dragon)—Giant flowered. a. White, rose, yellow, scarlet, separate colors. Each 6c. Dwarf, all colors mixed. 4c. Tall, mixed. 4c.

Asters

All of our aster seeds are grown by professional growers and should not be compared with seed picked up from amateurs. a.

Dwarf Chrysanthemum Flowered—All colors mixed. 8c; $\frac{1}{2}$ oz. 40c.

Dwarf Bouquet Flowered—All colors mixed. 8c; $\frac{1}{2}$ oz. 40c.

Giant Branching or Simple Asters—White, pink, rose, blue, violet, crimson, lavender, purple. All mixed. 8c; $\frac{1}{2}$ oz. 40c.

This girl's parents buy
O. K. Flower Seeds and
she has loads of flowers
all summer.

Giant Comet—All colors mixed. 8c; $\frac{1}{2}$ oz. 40c.

Ostrich Plume Asters—All colors mixed. 8c; $\frac{1}{2}$ oz. 40c.

Peony Flowered Asters—All colors mixed. 8c; $\frac{1}{2}$ oz. 40c.

Balsams (Lady Slipper)

An old favorite garden flower producing masses of brilliant blooms. a.

Double Camelia Flowered—Mixed. 4c.

Mixed—All kinds and colors. 4c.

MAURANDIA—Climber. Slender growth, profuse bloomer. Colors range white, rose, blue, and purple. a. c.

MIXED—All colors. 6c.

MARIGOLD—Blooms in late summer when many other plants are past their best and then afford a wealth of color. a. c.

African Varieties—Tall mixed. 4c; ½ oz. 20c.

African Varieties—Dwarf mixed. 4c; ½ oz. 20c.

French Varieties—Tall mixed. 4c; ½ oz. 20c.

French Varieties—Dwarf. 4c; ½ oz. 20c.

MIGNONETTE—One of the principal uses of this fragrant flower is for cutting and combining in bouquets with other flowers. a.

Giant Machet—The best variety. Flowers reddish green. Golden and white mixed 6c.

Giant Red—6c.

MOSS ROSE (See *Portulaca*)

Moon Flowers and Morning Glories

Beautiful, rapid annual climbers dense foliage. Flowers of wide range in colors. Some open when the sun rises, others when it sets. Some are fragrant. Soak seeds in warm water 24 hours before planting. Better yet notch the hard seeds with a file before soaking. a. c.

Bona Nox (*Evening Glory*)—Violet Flowers. 4c; ½ oz. 10c; oz. 20c.

Japanese Morning Glories—Give warm place on sunny side of building.

Fine Mixed—4c; ½ oz. 10c; oz. 20c.

Moon Flowers—Large White flowers appear every evening and on cloudy days. Start plants in house. 4c; ½ oz. 10c; oz. 20c.

Old Fashioned Morning Glories—Mixed. 4c; oz. 15c.

MYOSOTIS—(See *Forget-Me-Not*.)

Nasturtiums

Everybody knows these lovely, and universally popular flowers. They are probably more universally planted than any other kind. If you have not had liberal beds of them heretofore start this season and there will be many pleasant times coming to you and your friends. Succeed everywhere, even on poor soil. a. c.

Tall Nasturtiums.

Giant Yellow—4c; oz. 15c.

Giant Pink—4c; oz. 15c.

Giant Rose—4c; oz. 15c.

Giant Crimson—4c; oz. 15c.

Giant Scarlet—4c; oz. 15c.

Everitt's Finest Mixture of Giant Flowered. 6c; oz. 15c.

Dwarf Nasturtiums.

Golden King—Rich golden. 4c; oz. 15c.

King of Tom Thumbs—Deep Scarlet. 4c; oz. 15c.

King Theodore—Rich Red. 4c; oz. 15c.

Empress of India—Deep crimson. 4c; oz. 15c.

Everitt's Finest Mixture of Dwarfs. 4c; oz. 15c.

ORNAMENTAL GRASS—Extensively used in the arrangement of Winter bouquets and other home decorations. They can be used most effectively on lawns and in flower gardens.

Job's Tears—The seeds are ornamental when strung and used the same as beads. 6c.

Pampas Grass—p. Very ornamental. 6c.

Zebra Grass—Striped. 4c.

Mixed Ornamental Grasses—Annual. 4c.

Mixed Ornamental Grasses—Perennial. 6c.

Pansies

These lovely flowers are everybody's favorite and are so well known as to not need lengthy description. Our varieties are among the best. The following superior colors! Large flowered.

Light Blue—6c; ½ oz. 35c.

Bronze and Shades—6c; ½ oz. 35c.

Pure White—6c; ½ oz. 30c.

Violet—6c; ½ oz. 35c.

Black—6c; ½ oz. 30c.

Brilliant Red—6c; ½ oz. 35c.

Blotched—6c; ½ oz. 30c.

Yellow—6c; ½ oz. 40c.

Velvety Bronze, Edged Yellow—6c; ½ oz. 40c.

Everitt's Superior Mixture—Contains the very best sorts and a wide range of colors. Guaranteed to please. 8c. ½ oz. 40c.

PETUNIAS—Succeed well everywhere. Commence flowering early and continue a sheet of bloom throughout the Summer. Particularly showy in beds or masses. Very fragrant. a.

Hybrida—Finest mixed. 8c.

Large Flowering—Single mixed. 8c.

Large Flowering—Double mixed. 20c.

Large Flowering—Fringed. 20c.

Phlox Drumondi Grandiflora (Annual Phlox)

Comes into flower in early summer and is not excelled for brilliancy and continuity of blooms. They make beautiful borders. When sown in beds the colors are beyond description. a.

Bright Rose—4c; $\frac{1}{4}$ oz. 35c.
 Scarlet—4c; $\frac{1}{4}$ oz. 35c.
 Crimson—4c; $\frac{1}{4}$ oz. 30c.
 White—4c; $\frac{1}{4}$ oz. 30c.
 Yellow—4c; $\frac{1}{4}$ oz. 40c.
 Everitt's Superior Mixture—6c; $\frac{1}{4}$ oz. 40c.
 For Hardy Phlox see list of perennial plants.

Scarlet Sage

Poppy

Poppies should be sown very thinly, early, where they are to remain and then sow frequently for succession. They are in almost numberless shades of colors. By mixing the fine seed with sand will insure a better distribution.

Double Annuals—

Pure White—4c; $\frac{1}{2}$ oz. 15c.
 Rose Tipped—4c; $\frac{1}{2}$ oz. 15c.
 Peony Flowered Mixed—4c; $\frac{1}{2}$ oz. 15c.
 Single Annuals—4c; $\frac{1}{2}$ oz. 15c.
 Perennials Mixed—6c; $\frac{1}{2}$ oz. 25c.
 Oriental Poppies—Also see plants—8c; $\frac{1}{4}$ oz. 50c.

Portulaca (Moss Rose)

Will grow and bloom profusely in dry hot situations where almost any other plant would perish. Brilliant in colors. Large flowering.

Double White—4c; $\frac{1}{2}$ oz. 20c.
 Double Yellow—4c; $\frac{1}{2}$ oz. 20c.
 Double Scarlet—4c; $\frac{1}{2}$ oz. 20c.
 Double Mixed—4c; oz. 20c.
 Single White—4c; oz. 20c.
 Single Yellow—4c; oz. 20c.
 Single Scarlet—4c; oz. 20c.
 Single Mixed—4c; oz. 20c.

RICINUS—See Castor Bean.

SALVIA (Scarlet Sage)—This is a universally grown bedding plant that keeps the garden bright with color until late in autumn. a. 8c; $\frac{1}{4}$ oz. 40c.

SNAPDRAGON—See Antirrhinum.

SHASTA DAISIES—See Daisies.

Eckfords Grandiflora Sweet Peas—This type is not waved and crimped as the Spencer but is very fine. Many blossoms are as large as the finest Spencers. a.

Grandiflora Mixed—Comprises all shades and colors. 4c; oz. 15c.

Verbenas

Stocks

(Ten Weeks.) Adapted for massing, bedding, borders and of special value for pot culture. Profusion of blooms, brilliant and varied colors. Giant Perfection Strain. a.

Red, 6c; Rose, 6c; White, 6c; Yellow, 6c; Dark Blue, 6c; Light Blue, 6c; Pink, 6c.

Everitt's Superior Mixture—All colors. 8c; $\frac{1}{4}$ oz. 40c.

SUNFLOWER (Helianthus)—Few people understand the great variations and beauties of the ornamental sunflowers, their observations having been limited to the large mammoth Russian, raised for chicken feed. The tall ones, and there are many varieties, are suitable for backgrounds. The dwarf kinds are charming when grown in beds or in mixed flower borders. a.

Tall Varieties—Mixed—4c; oz. 20c.

Dwarf Varieties—Mixed—4c; oz. 20c.

Miniature Varieties—These bear beautiful small flowers, fine for cut flowers. Mixed. 4c.

Sweet Peas

Universally admired. Everybody should plant them lavishly and revel in their beauty and sweet fragrance. Spencer Sweet Pea. a.

White, Red, Crimson, Pink, Rose Carmine, Salmon, Violet, Yellow, Blue, Striped. Each color, 8c; oz. 25c.

Everitt's Superior Mixture of Spencer Types—comprises all colors and forms. Nowhere can greater satisfaction be gotten for the price. 6c; oz. 20c.

Early Flowering Spencer Sweet Peas—Practically as large and beautiful blooms as the other but comes 2 to 3 weeks earlier and continues all summer. 4c; oz. 20c.

Verbenas

They thrive on any good garden soil. For beds and borders they have few equals. Fine for pot culture and window boxes. Bloom from June until frost. a.

Mammoth Flowered Sorts—8c.

White—8c.

Purple and Shades—8c.

Blue and Shades—8c.

Everitt's Superior Mixture—8c.

Zinnias

People have been content to grow the old fashioned Zinnias would hardly recognize the improved varieties of the present day, if suddenly brought in their presence. They grow and bloom well even under adverse circumstances and may be counted upon from July to frost. a.

Mammoth Flowered Strains:

Crimson, Dark Purple, Flesh Pink, Pure White, Yellow, Scarlet. Each color separate, 4c; oz. 20c.

Everitt's Superior Mixture—All colors. 6c; $\frac{1}{4}$ oz. 25c.

Dahlia Zinnia—Remarkable for their great size, measuring 5 to 6 inches in diameter. We guarantee great satisfaction in this strange flower. A great range of colors. 8c; $\frac{1}{4}$ oz. 50c.

GARDEN TREASURE—A wild flower Garden. A mixture of many beautiful free-growing annual and perennial flowers. This seed will give a constant bloom all season—each day new surprises appearing and the perennials will continue for years. Pkt. 6c; $\frac{1}{2}$ oz. 15c; per oz. 25c.

SATISFACTION

If for any reason your garden was not satisfactory plant O. K. SEEDS this year.

PARAGON SPRAYERS

Paragon Sprayer No. 0

Net Price, \$12.50

Capacity, 3½ Gallons

EQUIPMENT: 4 feet Special Spray Hose, 3 feet Spray Pipe, 1 Mist Spray Nozzle, 1 Steel Cap for Mist Nozzle, 1 Straight Spray.

Paragon Sprayer No. 1

Net Price, \$17.50

Capacity, 6 Gallons

EQUIPMENT: 5 feet Spec'l Spray Hose, 5 feet Pipe, 1 Mist Nozzle, 1 Steel Cap for Mist Nozzle, 1 Straight Spray Nozzle. Any additional length of hose can be furnished at a reasonable extra charge.

Paragon Sprayers are good investments. They pay large dividends. Better light, better sanitation, more cheerfulness, decreased light bills, decreased insurance, better and more fruit, are a few things that are easily and economically obtained by using the Paragon Sprayer.

Paragon Sprayer No 3

Net Price, \$30.00

Without Truck, \$26.00

Capacity, 12 Gallons

EQUIPMENT: 10 feet Spec'l Spray Hose, 7½ feet Extension Pipe, 1 Mist Nozzle, 1 Steel Cap, 1 Straight Spray. Any additional length of hose can be furnished at a reasonable extra charge.

This represents our most popular outfit, and thousands are in use, giving best of satisfaction. It is mounted on strong steel truck and easily wheeled to any desired place.

This cut shows the simplicity of pump, also the strainer and agitator. No other pump can show this feature. This pump is strong, simple and durable. Can easily be handled by one man.

The Paragon Sprayer will develop a pressure of 150 to 250 lbs.

Paragon Sprayer No. 4

Net Price, \$44.00

Capacity, 28 Gallons

This machine not mounted on wheels, \$34.00.

EQUIPMENT: 20 feet Spec'l Spray Hose, 10 feet Extension Pipe, 1 Mist Spray Nozzle, 1 Extra Steel Cap, 1 Straight Spray. Any additional length of hose can be furnished at a reasonable extra charge.

Paragon Sprayer No. 5

Net Price, \$50.00

Capacity, 50 Gallons

EQUIPMENT: 25 feet Spec'l Spray Hose, 10 feet Extension Pipe, 1 Three-Way Spraying Nozzle, 1 Single Spraying Nozzle. Any additional length of hose can be furnished at a reasonable extra charge.

This sprayer is designed especially for large orchards. It has solid cast brass pump and large air chamber. A fine pump for nurserymen and fruit growers.

The Paragon Sprayer will develop a pressure of 150 to 250 lbs.

Paragon Sprayer shown above is especially designed for large factories, but it is also suitable for tree spraying. It is mounted on strong 30-inch wheels. This is a very handy outfit.

Everitt's Hardy Perennials

"THE FLOWERS GRANDMOTHER LOVED TO GROW"

The perennials we sell you are strong field-grown. Planted in the spring they will flower the same year, and will continue for years, ever increasing in number of plants and blooms. In three years the bed should be thinned—the plants divided and the surplus transplanted.

With a start of a dozen plants, your home and your friends' homes may be supplied with beautiful flowers from early spring until freezing winter.

Price of all varieties in the list: Each 25c; dozen \$2.50; per 100 \$12.00. All delivered to your post or express office to and including the fourth zone. Beyond that add 10c per doz.

ACHILLEA—The Pearl—Pure white double flowers all during summer; fine for cutting. 2½ feet high.

AQUILEGIA (Columbine)—All colors, fine for border and rock garden. Excellent cut flower. Two feet high. Blooms June-Oct. Mixed.

ALYSSUM—A dwarf plant suitable for rock garden or front of border. Plant in sunny place. Bears abundance of yellow flowers.

ASTERS (Michaelmas Daisy)—Very desirable for various forms of gardening. Five feet high. Blooms Sept.-Oct.

Dark Red	Deep Purple
Pale Blue	Mixed
Pure White	

ANTHEMIS (Hardy Marguerite)—Beautiful daisy-like flowers of clear yellow. Useful for cutting. Two feet. June-Oct.

CAMPANULA (Canterbury Bell)—Largest and most beautiful family of border-plants. Very free flowering and easy growing. Two feet high. Blooms in June. Mixed.

CHRYSANTHEMUM (Hardy October Rose)—The development of the Hardy Chrysanthemum has made it possible to have color, life and beauty in the garden when the other hardy plants have passed. Fine for cut flowers. Large Flowering Varieties.

Autumn Beauty—Golden Brown.

Autumn Glow—Red.

Quinola—Large Golden Yellow.

Old Homestead—Soft Pink.

India—Fine Indian Red. Very effective in mass.

L'Argentuilaise—Deep Chestnut. Early.

Sylvia—Scarlet Bronze.

COREOPSIS (Tickseed)—The flowers are a rich, golden yellow of slender graceful form, making them an excellent cut flower. Two feet high. Blooms all summer.

CANDYTUFF (Iberis)—A dwarf plant with evergreen foliage. Adapted to the rock-garden and border. Sempervirens—Pure White Flowers.

DELPHINIUM (Larkspur)—It is almost impossible to convey anything like an adequate description of the improved Delphiniums. Their greatest charm lies in the wonderful stateliness of growth, and the rich colors and tints of their striking flowers. Nothing in blue can compare with Delphiniums, and for their value in hardy borders they are unsurpassed.

Belladonna—Sky-blue Flowers.

English Hybrids—Colors range from light blue to dark purple.

Chinese Album—White.

DIANTHUS BARBATIS (Sweet Williams)—Certainly one of the most popular old-fashioned garden plants. Their freedom of blooming, striking color and pleasing fragrance make them a favorite of all flowers. Fine for cutting.

Newport Pink—Soft Salmon.

Scarlet Beauty—Vivid Scarlet.

Mixed—An array of the most beautiful colored flowers.

DIANTHUS PLUMARIUS (Hardy Pink)—Dainty fringed flowers of mixed colors. Double mixed. Single mixed.

DIGITALIS (Foxglove)—One of the most popular perennials. Throws a flower spike, tall and stately, to a height of 4 to 6 feet. July-Aug. Mixed.

GAILLARDIA—The most glorious of our true "Old Fashioned Flowers." Flowering constantly from June till October in many rich and brilliant colors of orange, crimson and red. Unexcelled as a cut flower.

GYPSOPHILLA (Baby's Breath)—Masses of minute flowers produced throughout the summer, very fine for cutting and drying.

Paniculata Grandiflora—Pure White.

HELIANTHUS (Perennial Sunflower)—The usefulness of this beautiful hardy plant can neither by word nor illustration be expressed. Their rich golden color and full formed growth make them wonderfully effective in the hardy border or shrubbery planting. Six feet high. Blooms Aug.-Sept.

HEMEROCALLIS—Lily-like flowers with very ornamental foliage, color pure yellow. Three feet high. Blooms June-July.

Flava—Lemon Lily. Lemon Yellow flowers blooming profusely during June and July.

Thunbergia—Funnelshaped flowers of rich buttercup yellow. July.

HIBISCUS (Mallow)—Very robust growing plant, having large flowers of rich shades of red, pink and white. Height, six feet.

Crimson Eye—Pure white flowers with rich, dark centre.

Marvel Mallow—Produces flowers of immense size of colors far surpassing the old types. Red, Pink and White, separate.

HOLLYHOCKS—Our Hollyhocks are produced by a method that insures them free from rust. If you buy them elsewhere you may have that trouble.

Double Mixed.

Single Mixed.

LILY OF THE VALLEY—This flower is well known and appreciated by all. We sell field-grown clumps that will give immediate effect. Some of the roots can be taken up and bloomed in pots in the house.

LATHYRUS (Hardy Sweet Pea).

Red, Pink, White, Separate Colors, each.

MYOSOTIS (Forget-Me-Not)—Beautiful small blue flowers. Through planting in a moist, shady place the flowering period may be much prolonged.

ORIENTAL POPPY—Nothing in the hardy plant line can compare with this for beauty and brilliance of their large fiery scarlet flowers. Three to four feet. May-June.

PHLOX—Beauty and usefulness bring these hardy border plants among those of greatest importance. For massing they are very effective and their greatest varieties of color add a brilliancy to the landscape. Their flowering season begins in July and if the past bloom spikes are removed, the blooming period may be prolonged until fall.

Separate colors—White, Pink, Lavender, Red, each.

PHYSOTEGIA (False Dragonhead or American Heather)—One of the prettiest hardy perennials, gaining in popularity as it becomes better known. It forms dense bushes, 3 to 4 feet high, bearing freely during the summer months, spikes of delicate pink tubular flowers not unlike a gigantic heather.

Virginica—White and lavender.

PHYSALIS FRANCHETTI (Chinese Lantern Plant)—It is not unusual at Xmas time, and many other occasions to be short of proper decorating material. We are, therefore, adding to our list this wonderful hardy plant, which is a very strong grower and throws up numerous stems of two feet high on which is borne a large fruit

Everitt's Hardy Perennials—(Continued)

enclosed in a brilliant scarlet colored bladder-like calyx, which makes an excellent subject for any kind of decorating, especially at Xmas. The plant is of easy culture. Gather and keep in a dry place until you are ready to use them. Do not delay in getting some of these set out.

PYRETHRUM HYBRIDUM—A group of graceful, free-flowering plants that are unequalled for cutting. Colors range from pure white to most brilliant scarlet. Bloom practically all summer.

Single mixed.
Double mixed.

RUBBECKIA (Golden Glow)—An old favorite in the "Old Fashioned Garden." Fine for cutting. Five feet high. Blooms July-Sept.

Lanciniata—Clear yellow flowers.

Pupurea—Extra large flowers of a reddish purple with a large brown cone-shaped center.

Price of all Hardy Perennials: Each 25c; dozen \$2.50; per 100 \$12.00. An order may include one or more varieties. Delivered by express or parcels post paid at these prices up to and including the 4th zone. Beyond that add 10c per dozen.

(Elephant's Ears)

Caladium (Elephant's Ear)

This is one of the most effective plants for the lawn or flower garden and may be used singly or in groups, rows or beds. To obtain the best results they should be planted on rich ground and where they will have an abundance of water. Under such conditions they will grow 5 to 6 feet high and bear immense leaves 3 to 4 feet long by one-half the width. They must be removed to the cellar in the Fall and replanted the next Spring. Each year they will get larger. **Price**—Medium sized bulbs, postpaid: Each, 20c; 3 for 50c; dozen \$1.50. If not prepaid, deduct 25c per dozen. Select size: Each 25c; 3 for 60c; dozen \$1.75. If not prepaid, deduct 35c per dozen. Extra large: Each 40c; 3 for \$1.00; dozen \$3.00. If not postpaid, deduct 40c per dozen.

Double Pearl Tuberoses

Nearly everyone knows and prizes this beautiful, fragrant flower, that is so easily raised from the bulb, planted in the Spring. By planting some of these bulbs in the house and setting them out about May 1st, and then setting bulbs in open ground at intervals from May 1st to June 25th, a succession of the prized blooms can be had all Summer. **Price**—Each 5c; dozen 50c; 100 for \$2.75; 50 at the 100 rate.

If by parcels post, add 10c per dozen.

Iris

These have appropriately been called the "Orchids of the Hardy Flower Garden." They are of the simplest culture, succeeding in almost any soil or position. The bulbs should

be planted two or three inches deep and six inches apart in the autumn when they will bloom in the spring. We offer Iris so cheaply that this is the time to plant a large bed or long border.

If by parcels post, add 15c per dozen.

German Iris Named Varieties

PARINEUSIS—Purple, penciled white.

OTHELLO—Purple and light blue.

INNOCENCE—White and purple.

JOHN DE WITT—Blush white and purple.

FLORENTINA—White, free flowering.

MADAM CHEROU—White and blue.

HONORABILIS—Yellow, rich mahogany brown.

EDITH—Light blue and purple.

PRICE—Any of the above: Dozen 50c; 100 for \$4.00; one of each for 50c.

City Customers

We are proud of our city or "local trade." This more nearly serves as a barometer of a business than the foreign trade. This country is so large that a business may run a number of years before the principles of the house are understood by the great public. Not so with the home trade. You cannot deceive them long. We count the best home gardeners and market gardeners about Indianapolis as our customers.

The Best Collection of Hardy Flowering Shrubs

LILAC

SNOWBALL

ROSE OF SHARON

GOLDEN ELDER

HYDRANGEAS

A few dollars invested in shrubs now will soon make your home a beauty spot and a greater joy to live in, and if you should later desire to sell it you will find it worth a few hundred dollars more. So plant hardy flowering and ornamental shrubs without further delay.

Postage and packing will approximate 15c for one, 25c for three, 50c a dozen.

ALTHEA (Rose of Sharon)—2 to 3 feet, each 45c; 3 for \$1.25; 12 for \$4.50.

BARBERRY THUNBERGII—12 to 15 inches, each 45c; 3 for \$1.00. 15 to 18 inches, heavy, each 50c; 3 for \$1.25.

CALYCANTHUS (Sweet Shrub)—Flowers purple, double, deliciously fragrant. Foliage rich, dark green. Very desirable. Each 60c; 3 for \$1.50.

DEUTZIA LEMOINIA—Grows dwarf flowers freely, pure white. Each 60c; 3 for \$1.50.

DEUTZIA, PRIDE OF ROCHESTER—Each 45c; 3 for \$1.00.

DOGWOOD (Connus)—Grows 6 to 10 feet tall. Bears clusters of small white flowers in early summer, followed by whitish blue berries. Each 50c; 3 for \$1.25.

GOLDEN BELL OR FORSYTHIA—Each 75c; 3 for \$2.00.

GOLDEN ELDER—2 to 3 feet, each 50c; 3 for \$1.25; dozen \$4.00.

HYDRANGEA, ARBORESCENS—15 to 24 inches, each 75c; 3 for \$2.00.

HYDRANGEA, GRANDIFLORA—18 to 24 inches, each 65c; 3 for \$1.50.

LILAC—18 to 24 inches, each color 60c; 3 for \$1.50; dozen \$6.00.

PHILADELPHIUS (Mock Orange)—8 to 10 feet high. Creamy-white flowers in May. Each 50c; 3 for \$1.25.

PRIVET AMOOR RIVER—This is the hardiest of all. Just as pretty as the California, but never winter kills. 12 to 18 inches, dozen \$1.25; 50 for \$4.50; 100 for \$8.00. 18 to 24 inches, dozen \$2.00; 50 for \$6.50; 100 for \$12.00.

PRIVET CALIFORNIA (Ligustrum)—12 to 18 inches, dozen 75c; 50 for \$3.50; 100 for \$6.50; 18 to 24 inches, dozen \$1.00; 50 for \$4.00; 100 for \$7.50.

SNOWBALL—18 to 24 inches, each 45c; 3 for \$1.10.

SNOWBERRY (Red)—2 to 3 feet, each 50c; 3 for \$1.25.

SNOWBERRY (White)—2 to 3 feet, each 50c; 3 for \$1.25.

SPIREA, ANTHONY WATERER—Each 75c; 3 for \$1.75; dozen, \$5.50.

SPIREA, VAN HOUTTEI—18 to 24 inches, heavy, 30c. 2 to 3 feet, heavy, 50c; dozen \$4.50. 3 to 4 feet, heavy, 65c; dozen, \$5.50.

WEIGELIA, TALL GROWING—Each 60c; 3 for \$1.50.

Charming Climbers

For Every Situation. Once Planted Last Forever.

HONEYSUCKLE

AMPELOPSIS VEITCHII (BOSTON IVY)

CLEMATIS

WISTARIA

MATRIMONY VINE

Without climbing vines many homes would lack much of their beauty. Then it follows that many homes that are still dull and unattractive can be made beautiful from early Spring, when the tendrils of hardy climbers take on new life till Winter comes again.

If by mail add 10c for one; 20c for three.

AMPELOPSIS, VEITCHII (Boston Ivy)—Clings to any wall, no matter how hard or smooth. The leaves change in fall to a vivid autumnal tint. Each 50c; 3 for \$1.00.

CLEMATIS, PANICULATA (White Flower)—2 years, each 40c; 3 for \$1.00.

CLEMATIS, JACKMANII (Blue Flower)—2 years, each 75c; 3 for \$2.00.

HONEYSUCKLE, HALLS JAPAN—Pure white and creamy yellow. Very fragrant. Each 50c; 3 for \$1.00.

MATRIMONY VINE—Flowers from June to Septem-

ber. Pink to purple; very fine for trellises and fences. Each 35c; 4 for \$1.00.

CHINESE WISTARIA—Purple flowers are borne in large drooping clusters. Grows to great length and dense foliage. Each 75c; 3 for \$2.00.

CANNAS

A bed of Cannas is a veritable bit of tropic foliage and bloom transferred to the temperate zone. Stalks stiff. Foliage beautiful, with flaming flowers. They bloom early and increasingly until frost, each week adding to their beauty.

SHENANDOAH—Foliage rich ruby red, varied and tinted bronze. Large trusses of beautiful waxy rose-pink flowers. Each 20c; dozen \$1.25; 25 for \$2.00.

RICHARD WALLACE—Color canary red. Flowers large, $4\frac{1}{2}$ feet. Each 20c; dozen \$1.25; 25 for \$2.00.

CHAS. HENDERSON—4 feet. Crimson flowers. A fine bedder. Each 20c; dozen \$1.25; 25 for \$2.00.

SPECIAL OFFER! One of each above five varieties, 85c; doz. of each, \$5.50; twenty-five of each for \$8.50.

ALLEMANIA—Outer petals scarlet with broad yellow border. Inside scarlet and dark red. Each 20c; dozen \$1.25; 25 for \$2.00.

KING HUMBERT—Bronze leaves. Scarlet flowers. Probably the greatest favorite today. 4 feet. Each 25c; dozen \$1.50; 25 for \$2.50.

CHOICE VARIETIES IN A MIXTURE—Each 15c; dozen \$1.00; 25 for \$1.50.

We deliver at prices up to and including 4th zone. Beyond that add 10c per dozen.

GLORIOUS GLADIOLUS

Any person who does not plant liberally of Gladioli misses many a Summer treat from a few dimes invested. I think the Gladioli is the peer of all Summer flowers, and there is absolutely no danger of failure. Buy liberally, even by the hundred or one-half thousand and plant at intervals from early Spring till June 15th for a constant succession of blooms. Being of the simplest possible culture, and the bulbs inexpensive, the Gladiolus deserves a place in every garden, small and large.

Choice Named Gladioli

The prices below include delivery charges including 4th zone. Beyond that add 10c per dozen.

AMERICA—Beautiful, soft flesh pink. Magnificent in its clothing. One of the best. Each 5c; dozen 50c; 25 for 75c.

BUTTERCUP—The best yellow. Each 5c; dozen 50c; 25 for 85c.

CRACKERJACK—Odd color, dark red throat, spotted with red and maroon. Each 7c; dozen 65c; 25 for \$1.25.

EMPRESS OF INDIA—Rich dark maroon. Each 8c; dozen 75c; 25 for \$1.35.

HALLEY—Delicate salmon pink, very early and very large. Each 7c; dozen 65c; 25 for \$1.25.

MASTER WIETZE—Each 8c; dozen 75c; 25 for \$1.25.

MRS. FRANCES KING—By some considered the best of all. Flowers often 5 inches across. Each 7c; dozen 65c; 25 for \$1.25.

PEACE—A grand white flower, with pale violet feathering on lower petals. Very large flowers on a tall graceful spike. Late bloom. Each 8c; dozen 75c; 25 for \$1.35.

PANANIA—Largest spike among pinks. Each 7c; dozen 65c; 25 for \$1.25.

PRINCEPS—Immense trusses of wide-open flowers of rich, dazzling scarlet marked with white. Each 8c; dozen 75c; 25 for \$1.35.

PRIMULINUS HYBRIDS—These all come yellow flowers, but they will not all be alike. Very striking in form and color. Very novel. Each 5c; dozen 50c; 25 for 75c.

WAR—Deep beloved red. A leader. Each 8c; dozen 75c; 25 for \$1.35.

WILLY WIGMAN—Creamy white. Scarlet blotch. Each 10c; dozen \$1.00; 25 for \$1.75.

Gladioli

Prices above include delivery charges, including the 4th zone. Beyond that add 10c per dozen.

A SPECIAL OFFER!

We will send one dozen of each of the first twelve (12) varieties—144 bulbs for \$6.00, prepay the charges and give 6 Willy Wigman bulbs free.

HARDY R O S E S

While our list of roses is not large it is made up of those kinds that are the most certain to succeed, will give the most satisfaction and will be the most highly prized by the average grower. You can make your selection from the following list and be assured that you will get only the truly meritorious varieties; or you may leave the selection to our EXPERT nurseryman. We send out no small, trashy, hothouse plants that are slow to bloom and usually prove a disappointment, but we do send out strong field-grown bushes that are sure to give satisfaction. When planting be sure to firm the ground around the roots.

Hardy Everblooming Roses

Field grown, 2 years old. Price of all delivered—Each, 60c; 3 for \$1.60.

Paul Neyron. The flowers are beautiful; probably one of the largest Rose, color, clear bright, shining pink. Blooms the first season and all summer.

Frau Karl Druschki. The Ideal Hardy White Rose. Its flowers, which are very large, are perfect in form and snow-white in color with shell-shaped petals, forming a beautiful flower. The plant is a strong, vigorous, healthy grower and remarkably free blooming.

Magna Charta. Bright deep pink, very large and fragrant. A grand, hardy, popular garden Rose.

Gen. Jacqueminot. One of the most popular of all Roses of the Hybrid Perpetual class. Color, rich crimson; of fine shape and exquisite fragrance. Words are inadequate to describe its charms.

Black Prince. One of the darkest colored Roses; of velvety crimson, changing to intense maroon. A very prolific bloomer, flowers are of excellent form and size.

Everblooming Tea Roses

Field grown, 2 years old. Price of all, delivered. Each 60c; 3 for \$1.60.

White Killarney. A pure white sport from Killarney. Awarded Silver Cup at National Flower Show. Identical with the ever-popular and well-known pink Killarney. A strong, robust grower, flowering very freely throughout the season. The flowers are very large, buds long and pointed; erect stems; a great acquisition.

Pink Killarney. Like the white in form and size, only pink. **Hermosa.** A favorite of the old time gardens. Just as popular today, very double and fragrant. Color a beautiful clear rose, a constant bloomer, hardy.

Sunburst. This magnificent, grand, yellow rose is a fine forer. Its color ranks in value and grandeur with the American Beauty and Killarney. Long pointed buds, color orange copper or golden orange and golden yellow; extremely brilliant in effect and a desirable rose for all purposes.

La France. Exceedingly sweet and handsome, flowers and buds large size, color a lovely shade of silvery pink, tinged with crimson. One of the sweetest scented roses and a wonderful bloomer.

Yellow Cochet. One of the very best everblooming yellow roses. It is ideal for open ground culture; a typical Cochet rose with gracefully molded buds. A clear sulphur yellow, large, full and perfectly formed.

Maman Cochet. The famous Pink Cochet.

Light pink, shaded with salmon yellow; outer petals splashed with bright rose. Extremely large and full.

Ophelia. One of the most beautiful and popular sorts for cut flower favorites, with perfect flowers of distinct form; lavishly produced. Exquisitely perfumed. Types, salmon flesh, shaded with rose.

Hardy Climbing Roses

Field grown, 2 years old. Price of each 60c; 3 for \$1.60 delivered.

These are the roses that will add so much to the beauty of your home; especially for porch or trellis or for making an arbor or archway. Perfectly hardy and need little protection.

Climbing American Beauty. The popular American Beauty Rose in climbing form. Has all the characteristics of its relative including form and fragrance. Often attains a height of 10 to 15 feet in a single season.

Crimson Rambler. Will attain a height of 10 to 20 feet in a season; produce a marvelous profusion of rich and glowing crimson flowers in large clusters during June and July.

White Rambler. Flowers pure white, sometimes with blush.

Yellow Rambler. Flowers deep, golden yellow. Very fragrant.

Pink Dorothy Perkins. A most beautiful deep pink. The flowers are borne in large clusters of small, double bloom and are very sweet scented.

White Dorothy Perkins. Same type as its sister, the pink. Is a strong growing white climber. Planted with Excelsa, Thousand Beauties and Crimson Rambler makes a great showing and is of decided value.

Flower of Fairfield (Everblooming Crimson Rambler). Similar to Crimson Rambler, except that it flowers from early spring until frost falls.

Tausendschon (Thousand Beauties). Hardy and strong variety, good climber, colors of all shades, from white to deep pink. Foliage very beautiful.

Baby Rambler Roses

Field grown, 2-year old. Price, delivered 55c; each, 4 for \$1.75.

Pink Baby Rambler. Original Baby Rambler, dwarf; grows 18 inches tall; blooms all the time in large clusters of crimson. For edging and borders it has no equal.

White Baby Rambler. Its pure white flowers are perfectly double and bloom with the increasing freedom of the Reds and Pinks of this class. All roses 50c each.

DAHLIAS

The Most Wonderful Flower Creations...

GET THE NEWEST AND BEST FROM US AT LITTLE COST

If Fruit Plants are to go by mail add 10 cents per dozen; 50 cents per 100 for postage and packing.

You Can Own a Grape Arbor Like This

Grapes Are Easy to Grow

There is scarcely a country or city yard or garden so small that space cannot be found to plant from 1 to 12 or more grape vines. When once planted they will last a lifetime with very little care and bear freely of the healthiest, most delicious, most profitable and most satisfactory fruit.

Agawam—Red; large bunch; large berry. One of the best.
Concord—Black, large; very yieldy. Most popular of all grapes.
Catawba—Red, late; a great wine grape.
Moore's Early—Black, early. Like the Concord, as large and good but earlier.

Niagara—White. The standard white grape. As large as Concord.
Worden—Resembles Concord, but larger. Ripens earlier.
PRICE—2-year-old vines, each 35c; 3 for \$1.00; 12 for \$3.00. If by parcel post, add 5c each or 30c a dozen for postage and packing.

It is not possible to quote prices on farm seeds that will be good during the season. Therefore, when you are ready to buy tell us what you want and get our offers. The prices quoted below were current when the copy for this catalog was prepared.

☛ We ask our customers to inoculate our seeds which will mean bigger crops and better satisfaction. Bags Cost Extra—40c for Cotton; 20c for Jute

CLOVER SEED

We want the orders of large buyers of CLOVER SEED. Let us know your wants, get our prices and save money. The Red Clovers have justly been called the "Corner Stone of Agriculture" in the Northern and Eastern States.

Medium Red This has long been considered the most valuable member of the clover family. It is beneficial to the soil and valuable for hay and pasture. Ground that has raised a crop of clover is always better for other crops that follow. Per bushel, O. K. Brand, \$14.50; Prime, \$14.00.

Mammoth Red This is similar to the former, except it grows larger. It is not so valuable for hay, but makes more growth for pasture and for enriching the soil. It makes its seed on the first crop. Per bushel, O. K. Brand, \$14.50; Prime, \$14.00.

Alsyke This variety is peculiarly well adapted for growing on wet or low land. For this purpose sow 4 lbs. of this clover with 10 lbs. of red top per acre and it will last for years, making good crops of hay and excellent pasture. It withstands drought very well, rarely Winter kills, and is practically perpetual. For dryer ground sow timothy seed with it. Per bushel, O. K. Brand, \$11.75; Prime, \$11.50.

Crimson This is an annual clover. It grows rapidly, where it succeeds, and can be cut several times in the season. Per bu. \$9.50.

Sweet Clover A few years ago this clover was considered a weed pest, but since then its merits have been recognized and it has sprung into great favor. It is particularly valuable because it will grow and flourish on poor and comparatively barren ground, wet or dry. If you do not succeed with other clover as well as you should, sow the Sweet Clover.

White Blossom—A biennial. The most desirable variety. Per bu. \$8.75.

Hubam Sweet Clover A promising new forage crop. It is an annual. Planted in the spring it has, in many instances, produced in 90 days thick stands of nutritious plants measuring 2 to 5 ft. in height which are relished by all live stock. A rich pasture clover, an emergency hay crop, one of the greatest soil improvers and for some years may be one of the most profitable crops to grow for the seed, to sell. Price by mail—Lb. 75c; 4 lbs. \$2.50. Postpaid, Bu. \$24.00.

White Clover This should always be included in pastures and lawn grass. It is very hardy and will continue always from one sowing. It also makes valuable bee pasture. It should always be used in lawn mixtures. Lb. 80c; 4 lbs. \$3.00; bu. \$36.00.

ALFALFA CLOVER

NOTE—More failures with Alfalfa come from too thick seeding than from all other causes combined.

First let us say that Alfalfa is not the weakling that many people imagine, or have been taught by teachers who did not know what they talked about. Alfalfa seed has been sown in every month of the year with success. Of course there will be failures, but Red Clover fails

sometimes too. Second, let us say that more Alfalfa failures come from over seeding than from all other causes. Look at a developed stalk of Alfalfa. How much room should it have to stand on the field? Then multiply that space by the number of seeds in 20 pounds, the quantity often sown, and what have you? Four Alfalfa plants where there should be one, has the same effect as an Alfalfa plant and three strong weeds. Then what must happen? Price, per bu. \$13.50.

Inoculating legumes is like putting the stamp on a letter. It furnishes the "go."

NITRAGIN causes the root nodules to form in large quantities. This is the sure evidence that plants treated with Nitragin draw a great amount of nitrogen plant food from the air. The result of this is that the plants develop rapidly and grow large and sturdy with a large root system. Understand, inoculating with Nitragin is a sure benefit to the crop it is used on and other crops that follow. You can build up your land with legumes aided by Nitragin.

NITRAGIN price reduced. Instead of selling at \$1.00 per acre, the price is \$1.00 per bushel size. Thus if you sow 10 lbs. of alfalfa on an acre the cost of inoculant will be only about 17c per acre. Full directions with each package.

Use Nitragin on all clovers, field and garden peas, cow peas, soy beans and garden beans, vetch and peanuts. Say what crops wanted for when ordering.

PRICE—Bushel size, \$1.00; ½ bushel size, 60c; Garden size, 15c.

Type of Medium Red and Mammoth Clover

Alsike Clover

GRASS SEEDS

We want the orders of large buyers of GRASS SEEDS. Let us know your wants, get our prices and save money in cost of seed and transportation. See our central location by the map on third cover page.

Red Top

Canadian Blue

Closely resembles the Kentucky Blue grass, but it is not of as good quality, except while young and tender. As it grows up it becomes more hard and harsh. It thrives on some hard, clay soils, where Kentucky Blue Grass will not succeed. Sow 20 to 25 lbs. to acre. Lb. 40c; 4 lbs. \$1.50; per 100 lbs. \$21.00.

English Blue

Kentucky Blue

Kentucky Blue

This is also known in some sections as "June" grass. It is the best pasture grass for the middle climate and for a great variety of soil. It succeeds finely on hill land as well as low lands and produces the most nourishing pasture for cattle and other stock. For best results, sow early in the Spring or early in the Fall. 25 lbs. per acre. Fancy Seed per lb. 50c; 4 lbs. \$1.75; per 100 lbs. \$26.00.

Red Top

The most valuable grass for moist soils and low lands on which it produces luxuriant growth. It is a perennial and when once established lasts for many years. It is highly esteemed as a pasture grass, but is not so desirable for hay. In pasturing it should be fed close, as when it grows up stock will refuse it. Sow about 10 lbs. of O. K. seed, in Fall or Spring. O. K. Brand per lb. 45c; 4 lbs. \$1.75; per 100 lbs. \$22.50.

Orchard Grass

This is one of the most valuable and widely grown varieties of grass for pasture and hay. It adapts itself to widely different soils and climates, but is not advised for sandy land, nor ground that is very wet. It starts growth very early in the Spring and stays green well in the Winter. It also grows well in woods, pastures and in orchards where the shade would prevent other varieties of grass from succeeding. It can be sown in Spring or Fall. Sow 25 to 30 lbs. per acre. O. K. brand, lb. 35c; 4 lbs. \$1.25; per 100 lbs. \$17.50.

Sudan Grass

A Great Forage Plant. This grass is closely related to the Sorghum family. It was brought to this country from Sudan, Egypt, by the Department of Agriculture. It has succeeded well in almost every section where tried.

It is an annual. Plant same time as corn and up to July 1. The first crop can be cut in 50 to 60 days and it will make two or three crops a year. Prepare ground as for corn. Sow in drills, 8 lbs. to acre, if broadcast, twice as much; depth 1 inch. Yield two to eight tons per acre. 1 lb. 35c; 4 lbs. \$1.25; 100 lbs. \$17.50

"Quick Growing" Lawn Grass

This mixture of grass seed will quickly produce a green lawn, followed by a permanent, tough sod. It is composed of the grasses best adapted to making a velvety lawn and for entire permanency. We make two brands of it, one for ordinary position and the other where the lawn is much shaded. Please, in ordering, say which is wanted. Should be sown thickly in Spring or Fall.

Sunny Lawn Mixture—Lb. 55c; 4 lbs. \$2.00; 100 lbs. \$32.00.

Shady Lawn Mixture—Lb. 65c; 4 lbs. \$2.50; 100 lbs. \$50.00.

RAPE

Dwarf Essex

There are other kinds of Rape, but none of them nearly as valuable as this. The crop will be ready to pasture in 6 to 8 weeks after seeding, from April to August in the Northern States, and in the South, if it is sown in September and October it continues to grow and produce new crops all Summer from one sowing. There is an advantage in having two patches or two fields, so that one may be recuperating while the other is pastured. Hogs may be allowed to eat all of the Rape that they want, but cattle and sheep must be watched so they do not overfeed. It is important to let animals have access to plenty of salt when pasturing on Rape. Sow 4 to 5 lbs. of seed per acre, if broadcast. 2 to 3 lbs sown in drills. Lb. 30c; 4 lbs. \$1.00; per 100 lbs. \$10.50.

Sudan Grass

MILLET

Golden Millet This variety of Millet grows 4 to 5 feet high and is one of the best varieties for hay, making a food rich in milk-producing qualities. On rich soil it yields very heavily. Sow about 50 lbs. per acre. This will make the stand thick on the ground and the stalks fine for feed. For seed sow 15 lbs. to acre. Per bushel \$3.00.

Hungarian Millet This variety does not grow as large as the Golden millet, is of finer quality in leaf and stalk and is relished by all farm stock. It is about the earliest Millet that can be grown. Sow one bushel per acre if for pasture or hay. Per bu. \$3.00.

Japanese Millet This variety of Millet has been sold by some seed men under the name of "Million Dollar Grass." It is a distinct variety of Millet, growing 6 to 8 feet high and produces an enormous crop of green feed, also of cured hay. It is used more for feeding green than making silos. It is also excellent as a green crop for filling silos. It is improved for the silo if one part of soy beans is mixed with two parts of the millet when filling the silo. Understand, they should not grow together in the same field, but mixed at the same time of putting in the silo. Sow 12 to 15 lbs. per acre. Bu. \$3.50.

Japanese Millet

CANE OR SORGHUM

Amber This is grown as a forage crop, also for making sugar, sorghum and molasses. The Early Amber variety is good for any of these purposes. For forage it should be sown 50 to 100 lbs. of seed to the acre, or it may be sown 25 to 50 lbs. to the acre, with an equal quantity of millet seed. Either way it makes a profitable feed for cattle and horses, as it is rich in sugar. It is a great drouth resister. Per bu. \$3.50.

Orange This is a later variety, better suited for the South or lower Middle and Western States, if wanted to mature. Requires a longer season to ripen and is a ranker grower than Early Amber. Enormous yielder of silage. Per bu. \$3.50.

Honey Drip This variety of cane is especially recommended for molasses. It makes a product light in color and pleasant to the taste. Per bu. \$3.50.

SOY BEANS

The cultivation of this crop is increasing rapidly. Wherever it has been introduced it is proving to be one of the most valuable grain and forage for stock. Also a crop of Soy Beans equals a crop of clover for enriching the soil. Soy Beans as a feed take the place of oil or gluten. Fed to milch cows and for fattening hogs, they give wonderful results. Soy Beans do well on light and heavy soil, and from the Gulf coast to the northernmost line of corn growing. They are a great crop for dry weather. A successful farmer sows Soy Beans on all his corn ground before last working. In September he turns hogs in and they eat plants and beans. Then if not taken off they will eat the corn and be ready for the market. If sown alone, sow 1 to 1½ bushels to the acre. If sown for the grain they should be planted in hills 6 inches apart in rows 3 feet apart, ¾ bushel to the acre.

Mammoth Yellow This is the largest grown and most popular of Soy Beans for forage purposes. It matures later than some other varieties. Valuable both in the North and in the South. Per bu. \$2.50.

Manchu This variety was obtained from northern Manchuria and has given excellent results in the northern states, both for grain and forage. The plants are stout, erect, and mature in about 110 days. This variety is very popular and is grown extensively. Per bu. \$2.50.

Ito San One of the best early varieties. It is probably the best for Michigan and like latitudes and also popular in the Middle States. Medium size yellow seed. Stands erect and a good brancher. Per bushel \$3.00.

Midwest (Formerly called Hollybrook or Mongol). Another early variety. Small yellow seed. Erect grower. One of the best for general cultivation. Very prolific of vines and beans. Per bu. \$2.50.

HAVE A GARDEN THIS YEAR

Food products are still high, and it seems that, no matter how abundant the crops, vegetables and canned goods are extremely high by the time the consumer can get hold of them. Home gardens are the only solution of the high cost of living that is within the reach of the people. Properly cared for the small garden will supply enough vegetables for an average family. Good seed, proper cultivation, plant food, either in the form of manure or fertilizers and a few garden tools are all that are needed to make a start in the gardening industry. Where the garden is already laid out and the tools at hand there is an added reason for continuing it this year.

Golden Millet

COW PEAS

THE GREAT SOIL IMPROVER, THE GREAT ECONOMY CROP FOR FARMERS

Cow Peas, like Clover, Vetch, Soy Beans, etc., have the property of taking nitrogen from the air and storing it in the soil. Whether the whole vine and root are used for fertilizer, or the vine is used for feed, any land that produced a crop of Cow Peas has improved in its contents of fertility. They are all splendid for pasture, or can be cut and fed green and make splendid hay. When grown with corn, they can be cut with the mower and make rich silage. They will grow on almost any soil and are particularly valuable for planting on thin land, where they will make a fair crop and rapidly improve the soil.

To enrich the soil, for pasture or for hay, sow about 50 lbs. of seed to the acre. If raised for seed, they should be planted in rows, 2½ feet by about 6 inches apart, and cultivated until the vines prevent it.

Early Black Matures quickly, best variety for the extreme northern sections of the country. Heavy yielder of vines and seed. Per bu. \$3.50.

New Era This is an early variety of Cow Peas and is particularly valuable in the Northern States where the season is short or for planting late in the season or after harvest. It grows much like the Whippoorwill. Seed is smaller and requires less seed to plant. A very satisfactory kind. Per bu. \$3.25.

Whippoorwill An early variety that matures in about 70 days. It is used more extensively in the North than any other kind. It is very productive. Per bu. \$3.50.

Mixed Cow Peas Some prefer to plant the different varieties together. It is an excellent plan when raised for pasture or hay, as the growing season is prolonged through having the early and late kinds. Prices subject to change. Bags free if two bushels or more are taken. Per bu. \$3.25.

Canada Field Peas As a fertilizer crop, to plow under when coming into bloom, these stand next to Red Clover. They also gather nitrogen from the air and store it in the soil. As a forage crop for dairy cows and hogs they stand well up in the front ranks. They succeed on any soil adapted to oats or corn. A popular way is to sow them with oats, rye or barley, when they make the finest kind of pasture. Two bushels of peas to the acre. Should be sown very early as they do not do well in hot weather. Per bu. \$4.25.

Spring Vetch This belongs to the same family as Alfalfa and Sweet Clover, and is another of those crops that has the ability to gather nitrogen from the air and store it in the soil by its root system. It is a vining plant and should be sown with oats for a support, when they can be harvested with the mower, making a heavy yield of exceedingly rich feed, either green or dry. Sow about 15 lbs. per acre with 1 bushel of oats per acre. Lb. 30c; 4 lbs. \$1.00; 100 lbs. \$18.00.

Kaffir Corn—White Has a stiff stalk and stands up straight. Very leafy, with a large seed head that is very prolific in yielding grain. Kaffir Corn may be said to be proof against drouth, as when drought comes it will wait until growing weather comes again. Drill 5 to 10 lbs. per acre like corn, cultivate like corn, or sow 50 lbs. per acre broadcast. Lb. 30c; 4 lbs. \$1.00; per bu. \$1.75.

Sunflower—Mammoth Russian This is usually grown for its seed, which are valuable food for stock, particularly poultry. It is considered about the best egg producing food known. Plant it any time up to the middle of July. The Mammoth Russian sunflower seed is also planted by some gardeners as supports for pole and lima beans. Lb. 30c; 4 lbs. \$1.00; per cwt. \$12.00.

Broom Corn The growth of broom corn, in a large way, is confined to a few sections of the country, although it will succeed almost anywhere on good corn ground. Plant 5 to 6 lbs. per acre.

IMPROVED EVERGREEN—This is a strong growing variety, stands up well and is free from crooked brush. The fibre is long and fine. It does not get red in the field before it is cut, but is strictly an evergreen variety and commands the highest prices. Lb. 30c; 4 lbs. \$1.00; per bu. \$3.00.

BUCKWHEAT

Japanese An early variety and very productive with grain twice the size of ordinary buckwheat. It is very floury and produces an excellent quality of flour. Sow it 30 lbs. per acre, about mid-summer. Lb. 25c; 4 lbs. 90c; per bu. \$2.50.

Silver Hull An excellent variety with medium sized grain, very solid, producing a good yield of excellent flour. It is a good yielder. Color of grain, light gray. Some millers claim that this makes better quality of flour than any other. Sow 30 lbs. of seed to the acre. Same price as Japanese.

Vetch Growing with Rye

We request you to inoculate all our Cow Peas and Soy Beans with "Nitragin" for the best results and greatest satisfaction. Bu. size \$1.00; ½ bu. size 60c.

Marquis Spring Wheat

From observation and inquiry it appears that this is the best variety to sow in districts away from the regular spring wheat sections. It is also one of the most productive varieties. Price—Per bushel, \$2.50, bags, each, 20c.

The harvest of corn depends more upon the seed you plant than on all other things combined. Prepare now for the best crop that you can possibly raise by getting your seed from the Nation's breeding center. CENTRAL INDIANA SEED CORN is the best grown in the country and suited to growers over a wide territory.

Ear of Farmers' Interest Corn and Silver Cup Awarded at Purdue University (Ind.)

PARTICULARS OF FARMER'S INTEREST CORN

This world-famous white corn originated in Central Indiana and was named and introduced by us 25 years ago. It is the variety, more than all others, that made this section famous as a corn growing and corn breeding district, and for "Corn Kings." This is because this variety has almost invariably been awarded the GRAND PRIZE at corn shows and expositions, over all competition by all varieties and against entries from all over the world.

Farmers cannot all be breeders of corn. They have not the time. But all of them can buy the famous FARMER'S INTEREST Seed Corn and plant it and get the benefit of the careful breeder's work over many years. Good crops never grew from poor seed. A scrub crop of corn will produce a scrub crop, if seed is selected from it and planted. The wise thing to do is to sell enough of your common corn to buy one bushel of well bred corn. This is the cheapest way to improve

your crop and the benefits will be immediate and lasting.

Farmer's Interest is a white corn on a white cob. It is a very strong, vigorous grower and stands droughts remarkably well. The root development is very strong. The stalks grow medium to large and more leafy than ordinary corn. The ear grows large and it often bears two good ears on a stalk. The cob is medium size with very deep grains. In the important matter of productiveness it yields GREAT CROPS. The FARMER'S INTEREST Corn is quite certain to make you a bigger yield than any other corn you can plant. Adapted to the latitude of Indianapolis, about 50 miles North, in an average season, and all South. We want to emphasize that this is the variety par excellence, for raising in the Southern States like Virginia, Tennessee, Missouri and South, but get your seed from Indiana each 3 or 4 years for the greatest vigor.

A Few Representative Testimonials Follow

If space permitted we could publish hundreds of testimonials just as strong. Originals are on file in our office, where they can be seen.

ARKANSAS (N. Western)—Beats everything we ever saw. S. C. WATSON (19)

ILLINOIS (Southern)—It outyields our native corn from 25 to 33 per cent. I have raised it about 20 years. J. M. SHOEMAKER (8)

INDIANA (Southern)—I got it 15 years ago and have raised it ever since. I estimate that it yielded 30 to 40 bushels more than other corn. I urge every farmer to

plant this variety. Farmer's Interest outyields all others. EPH. COLBERT (11)

KENTUCKY (Northern)—I first planted it in 1913 and have grown it ever since. It is the best corn that was ever in our neighborhood. J. D. MOORE (27)

WEST VIRGINIA (N. Western)—1914, I started with it and have grown it each year since. It has yielded nearly twice as much as other white corn. One year 100 bushels per acre; another, 125 bushels and another, 100 bushels. R. D. WANZER (21)

PRICE—By mail postpaid: Select ear 30c; 1 lb. 30c; 4 lbs. \$1.00. By freight or express, 1/4 bu. \$1.00; 1/2 bu. \$1.75; 1 bu. \$3.00; 5 bu. or more @ \$2.75. Bags included. Select ears not tipped or butted at same price whenever we can furnish them.

FIGURES AND ACTS

Prove that the expense of planting our improved varieties of Corn is about 35 cents per acre and your own seed is saved. The value per acre will be many times as much. If you want to grow the most bushels and the most dollars per acre, plant our seed corn. If you don't want to, then plant some other kind.

Mortgage Lifter Corn

MAKES MONEY GROW

Do you take pride in your corn crop?

Do you want to grow the biggest yellow corn in the country?

Do you want to grow the largest crop that your land is capable of producing?

In short, do you want to make more money, through growing more corn?

MORTGAGE LIFTER CORN

is the corn that will do these things for you. It is a thoroughbred corn that you will take pride in growing. We know **Mortgage Lifter Corn** will do all that seed can do for you and give you the maximum crop your land is capable of producing. It is a strong grower and on rich soil makes yields 80 to over 100 bu. to the acre. We have introduced several varieties of corn, chief among which is the great white corn, **Farmer's Interest**. **Mortgage Lifter** is destined to take a place amongst yellow corn that the **Farmer's Interest** occupies amongst whites—the most productive, hence the most profitable variety to grow.

Mortgage Lifter is a strong grower and delights in a rich soil where it can feed to its heart's content. Under such conditions it may stand three stalks to a hill and each stalk will bear one or two good ears. On ground of moderate fertility it should stand two stalks to a hill, when the stalks will not be so large but the ears will be nearly as large. Ears grow from 8 to 10 inches long 16 to 18 rows to the ear. Medium size cob. Very deep grains and season about 110 days.

A FIELD OF MORTGAGE LIFTER ON EACH FARM

We want to sell enough of this corn to each corn grower who receives this catalogue to plant at least one field, where our claims will be proved and favorable comparisons made with the varieties you are now growing.

PRICE—By parcel post, sample ear, 30c; 1 lb. 30c; 4 lbs. \$1.00. By freight or express, 1/4 bu. \$1.00; 1/2 bu. \$1.75; 1 bu. \$3.00; 5 bu. or more @ \$2.75 a bu.

Ten-to-One (10-2-1) White Dent

THE NAME MEANS 10 LBS. OF CORN TO 1 LB. OF COB

This variety was originated by a careful farmer, and one of the CORN BREEDERS in central Indiana who have made this district famous.

The one purpose of the originator of this corn was to produce an EXTRA EARLY WHITE DENT CORN THAT WOULD YIELD AS MUCH, OR APPROXIMATELY AS MUCH, AS THE LATER VARIETIES.

We Enumerate the Strong Points for this Corn as Follows:

The largest-eared, extra early, White Dent corn.

The heaviest yielding early field corn.

A variety that matures in 90 to 100 days and produces more actual corn than many larger and later kinds.

It will produce more corn on thin soil than other white corns.

It is very fine for feeding cattle. This is partly because of the small cob.

It is probably the best kind to plant early for early maturity and feed.

It is the best kind to plant late, because of short time to mature.

It is splendid as a milling corn for meal and flour.

It is adapted to grow in Southern Michigan and all latitudes South.

There is a place on nearly every farm for this valuable corn. Some farmers now plant no other kind. While it is early maturing, it is not exactly a small-eared variety. Ears frequently grow 10 inches long and weigh 12 to 14 ounces. The illustration above, from a photograph, but reduced in size, shows very well the appearance of an ear, the shelled corn and the cob.

Following are a few examples of the satisfaction TEN-TO-ONE Corn gives to growers:

"Finest I Ever Saw"

(1) I planted **Ten-to-One** Seed Corn. My son entered some of it in the contest in Wood County and was awarded first prize two years and two prizes three years. I think it is the finest corn I have ever grown. I can sell all the seed of it that I can grow.—W. F. Hopkins, Northwestern W. Va.

Ten to Thirty Bushels More

(2) I began growing **Ten-to-One** Seed Corn in 1914 or 1915. As far as I have been able to determine it is much purer and better than corn raised about here. It has yielded from 10 to 30 bushels more per acre than our native corn. I like it better than any other corn I ever raised. The reason I like it is because it matures so early, also because it is so well suited to my bottom land, where I can plant it after the flood.—C. C. Patterson, Southwestern Ky.

Most Wonderful Varieties

(3) I first got **Ten-to-One** Corn in 1913 and have grown it every year since. It has made the best crops that I ever raised. I have three varieties of corn, they are **Ten-to-One**, Reid's Early Yellow Dent and Farmer's Interest. These varieties are the most wonderful varieties of corn that I have ever grown. I am 74

years old and never as yet grew such corn in my life. This year was my first year for the Farmer's Interest and I have fallen in love with it.—Frank Marcum, Southwestern W. Va.

Better Than Others

(4) I got **Ten-to-One** Corn in 1915 and have grown it since. I found it better than other corn grown in this section. It did well for me the first year and is well suited to this place and climate.—Arthur Sayers, Southwestern Va.

Early and Does Well

(6) The **Ten-to-One** Corn is early and does well here. All of my plantings on the upland this year was of this variety. I did not plant until after the middle of June and it got hard before frost.—Jacob E. Hale, Northern Mo.

Best in the Neighborhood

(14) In 1914 I purchased one quart of **Ten-to-One** Seed Corn. From that I raised 15 bushels of corn. The next year I planted a field of six acres and raised 360 bushels of corn. This year I planted 3 acres and raised 210 bushels. I raised the best corn in this neighborhood both years that I planted **Ten-to-One**.—H. M. Ford, Central Ohio.

PRICE—By mail postpaid: Sample ear, 30c; 1 lb. 30c; 4 lbs. \$1.00. By freight or express 1/4 bu. \$1.00; 1/2 bu. \$1.75; 1 bu. \$3.00; 5 bu. or more @ \$2.75. Bags and packages free.

OTHER VARIETIES OF SEED CORN

Improved Reid's Yellow Dent This fine yellow corn was originated by a Mr. Robert Reid, of Illinois, about the year 1850. In recent years it has been, deservedly, the most popular and most largely grown yellow corn in the country. To all FRIENDS of the variety we offer the **IMPROVED REID'S EARLY YELLOW DENT**. This strain possesses practically every merit that a general-purpose, yellow corn should possess.

DESCRIPTION—In growth, our strain is vigorous, producing a medium-sized stalk that is only moderately leafy. It is more intent on making good ears than in the development of a heavy stalk. Therefore, this variety is not recommended for ensilage. In season it is medium

PRICE—By mail postpaid: Select ear 30c; 1 lb. 30c; 4 lbs. \$1.00. By freight or express: $\frac{1}{4}$ bu. 75c; $\frac{1}{2}$ bu. \$1.50; 1 bu. \$2.50; 5 bu. or more @ \$2.25.

Boone County White This valuable white corn took its name from a county in Indiana, where it originated, about the year 1886. Since then it has been the subject of continuous, systematic breeding to maintain or improve its type. The county referred to is one of four counties in Central Indiana that are famous for **CORN BREEDING** and fine corn crops. Previous to 1918, which witnessed the seed corn famine, this fine corn was one of the most widely grown white varieties, many farmers placing their main dependence on it. To all such, and others, who lost their seed and who want to begin to grow this variety again, we offer our high grade seed.

PRICE—By mail postpaid: Select ear 30c; 1 lb. 30c; 4 lbs. \$1.00. By freight or express: $\frac{1}{4}$ bu. 75c; $\frac{1}{2}$ bu. \$1.50; 1 bu. \$2.50; 5 bu. or more @ \$2.25.

Improved Leaming EARLY YELLOW DENT. This variety was produced in Ohio many years ago. The original corn was peculiar in the shape of the ears, having a rather large butt and an acute taper towards tip with grains diminishing in size. This quality is not so pronounced in the Leaming Corn of the present day, but a good strain of the corn still possesses that sturdiness which also characterized the original and which made it the surest yellow corn to grow. It produces very

PRICE—By mail postpaid: 1 lb. 30c; 4 lbs. \$1.00. By freight or express: $\frac{1}{4}$ bu. 75c; $\frac{1}{2}$ bu. \$1.50; 1 bu. \$2.50; 5 bu. @ \$2.25.

Pride of the North EXTRA EARLY YELLOW DENT. This is frequently called "90 Day" Corn because of its rapid growth and early maturity. It is a variety that is suited right up to the Northern border of the corn belt and to

PRICE—By mail postpaid: 1 lb. 30c; 4 lbs. \$1.00. By freight or express: $\frac{1}{4}$ bu. 75c; $\frac{1}{2}$ bu. \$1.50; 1 bu. \$2.50; 5 bu. @ \$2.25.

Bloody Butcher OR CALICO. This is a very early mixed-colored corn that is not so good to market as the straight yellow and white varieties, but for feeding it is scarcely approached by any other. The grains are variegated and blotched in colors, white and red stripes and shades. It matures

PRICE—By mail postpaid: 1 lb. 30c; 5 lbs. \$1.00. By freight or express: $\frac{1}{4}$ bu. 75c; $\frac{1}{2}$ bu. \$1.50; 1 bu. \$2.50; 5 bu. @ \$2.25.

Bags Included in Prices of Seed Corn.

ENSILAGE AND FODDER CORN

The ever increasing demand for more live stock for meat, milk and butter calls for more and more silos and then the crops to fill them. Corn is the staple ensilage crop. As the number of silos increases, they make the need for the silage to fill them. Corn for that purpose should be a strong-growing, although not coarse, leafy, nutritious variety. Also, a variety should be selected that will, at least, closely approach full maturity in the latitude where grown. The nearer the corn is to maturity, but not dry and hard, the greater will be its food value. We offer varieties, that will meet the season's requirements over practically the entire corn belt.

St. Charles White THE FAMOUS RED COB ENSILAGE CORN. This is a double standard or double purpose corn. While it is probably planted more extensively for ensilage than any other corn, its value as a grain-cropping corn should be kept in mind. It is a white corn on a red cob. The grains are clear white—so white that it is much used for meal, notwithstanding it grows on a red cob. It is early

PRICE—By mail postpaid: 1 lb. 30c; 4 lbs. \$1.00. By freight or express: $\frac{1}{4}$ bu. 75c; $\frac{1}{2}$ bu. \$1.25; 1 bu. \$2.00; 5 bu. @ \$1.50.

early. It is suited to grow in all that section south of a latitude about 75 miles north of Springfield (Ill.), Indianapolis, Columbus and Harrisburg. The ear is good size to large, growing 8 to 11 inches long. No other variety of yellow corn equals the **IMP. R. E. Y. DENT** for filling out at the butts and tips. The color is lemon-yellow, grains very deep and cob medium diameter, red, with a slender shank, which makes it easy to harvest.

The **IMPROVED REID'S EARLY YELLOW DENT** Corn has been winning nearly all the high awards for yellow corn at shows and expositions for years, and such awards quite uniformly have been to breeders and farmers of this—Central—part of Indiana. Our Reid's Dent occupies as high a place among yellow corns as our Farmer's Interest does among white varieties.

DESCRIPTION—It is a strong grower, and a drought resister. It grows large ears with deep grains, on a medium to large white cob. On good ground, which this variety delights in, the ears grow 7 to 11 inches long and 7 to 8 inches in circumference, holding their size well to the tip. The ears run from 16 to 18 rows and frequently weigh a pound, when dry. The ears from our seed will round out finely at butts and tips, as a result of its breeding. Its adapted territory is from latitude about 50 miles north of a line passing through Harrisburg (Pa.), Columbus (O.), Indianapolis (Ind.), and Springfield (Ill.), and all places south of it.

well on thin soils where it would not pay to plant other kinds. The stalk is only medium size and grain always sound. In season it is a 100 day corn and succeeds in Southern Michigan and Wisconsin and Southern Canada. It is highly recommended for late planting farther South. Extensively grown for fodder and ensilage, particularly in the North. This variety can be planted earlier than others as the grains will endure more cold and wet weather.

very late planting in Southern latitudes. The stalks grow small and the ears are small, 6 to 8 inches long but grains have good depth. It is a sure grower as the grain is firm in texture with a strong germ. Cob red.

early, is a vigorous grower of medium size, leafy stalks. Ears are medium size, 8 to 10 inches long. Grains good depth on a small cob. We do not urge its planting for shipping trade but for home and neighborhood feeding where color is not a consideration, we cannot recommend it too highly.

enough to mature 75 to 100 miles north of Indianapolis and yields splendid crops of grain. But its chief value lies in its leafiness and the broad succulent leaves which makes it peculiarly valuable for fodder and ensilage. We recommend it everywhere, North, South, East and West for this purpose. Even Canadian farmers have found it meets their needs. Its yield of green ensilage is 50 to 75 tons per acre.

POTATOES

Why send to far North or East for seed potatoes? Our seed is grown in the North and some in the East, when better seed of a variety is produced there. We pay the freight to Indianapolis the center of American farming, and can deliver to you CHEAPLY from this center. We have always specialized in seed potatoes, and some of the best kinds now in cultivation are of our introduction.

MODEL MARKET

A Valuable
Second Early
and Main
Crop Potato

If every potato grower who receives this catalogue could only know the merits of this potato in advance our moderate supply would not last any time. You should not let this year go by without getting acquainted with it.

Two years ago we distributed this potato free and offered \$10.00 to the person who grew it and suggested the best name. The prize was paid to Mr. F. M. Dean of Parker's Landing, Pa. In reporting Mr. Dean wrote this:

"I made ten pieces from the pound of the new, unnamed potatoes and planted them on May 14th in a seven foot row in my garden, with five pounds of potato phosphate. I also planted equal seed and space with three other varieties fertilized the same. The new potato was the strongest grower and remained healthy through a severe dry spell, while the others blighted severely. In about sixty-five days I examined your new potato and found tubers large enough to put on the market. On Sept. 5th I dug all the potatoes. The new potato made a heaped bushel, the next best three pecks and the other two less than one-half bushel. The

new potatoes were all about the same size and averaged almost a pound each. There were no small ones. A neighbor who saw them offered me fifty cents a pound for all I have. I will plant them all. I consider it the best main crop potato I ever saw."

MODEL MARKET is a white potato, round to oblong, snowy-white flesh, grows large and yields very heavy. Its cooking qualities are as fine as you can ask. This is a potato that will surprise growers in its yield, appearance and tab and market qualities. Notwithstanding it is a new variety the price we ask is very moderate. We wish that what Mr. and Mrs. Dean have said would persuade each potato grower who reads this to not put off a year starting with MODEL MARKET.

PRICE—By mail postpaid, 1 lb. 30c; 4 lbs. \$1.00. By freight or express, 1/4 bu. 75c; 1/2 bu. \$1.25; 1 bu. \$2.25; per bag 2 1/2 bu. \$5.00.

EVERITT'S EARLY 6-WEEKS MARKET

P O T A T O

Under favorable soil and weather conditions has been ready for market or table in six weeks from planting. Others may equal it in size, productiveness and quality, but in earliness the 6-Weeks Market is unapproached.

Market gardeners and others who want the best extra early potato should not fail to plant this variety. Besides being so early it is a great yielder, having yielded for one grower 420 bu. per acre, the next year 380 bu. and two years later over 600 bu. It is also a better Winter keeper than any other early potato. For Winter it should be planted late.

The product of 40 hills of 6-Weeks Market Potatoes raised by John L. Samm, in Paulding Co., Ohio

R E A D H O W 6-WEEKS MARKET Is Liked by All Who Grow It

6 Weeks, 5 Days, Fine Tubers
'Tis now six weeks and five days since I planted the Six-Weeks Market Potatoes. They did not sprout very quickly but they have nice, large tubers on them. Are the earliest potato for this climate I ever saw.—C. L. RICEL, Armstrong Co., Pa.

Fine in Six Weeks
The Early Six-Weeks are grand. We had fine potatoes in six weeks from planting; dry and mealy as old potatoes. Early Ohio came three weeks later.—L. S. JOHNSON, Clearfield Co., Pa.

Twenty Hills a Bushel
I would give hundreds of dollars to control the growing of the Early Six-Weeks Market Potato for this market, as they can be put on the market two weeks ahead of any other sort, which means hundreds of dollars profit to a large grower. W. H. MORRIS, Cuyahoga Co., Ohio.

Two Weeks Ahead
I would give hundreds of dollars to control the growing of the Early Six-Weeks Market Potato for this market, as they can be put on the market two weeks ahead of any other sort, which means hundreds of dollars profit to a large grower. W. H. MORRIS, Cuyahoga Co., Ohio.

PRICE—Everybody knows the very early potatoes bring the high prices. You can afford to pay the moderate prices we ask for the 6-WEEKS MARKET. By mail, postpaid, 1 lb. 30c; 4 lbs. \$1.00. By freight or express, 1/4 bu. 75c; 1/2 bu. \$1.25; 1 bu. \$2.25; 2 1/2 bu. \$5.00. Packages Free.

EARLY EVERITT POTATO

The Most Productive Medium Early Potato in America—Every Potato Grower Needs a Medium, or Second Early Potato to Fill Out the Succession—This is the One to Plant.

WE have always made a great specialty of seed potatoes and we sell an immense quantity of seed every year. We are well acquainted with nearly all the varieties now in cultivation and for the guidance of our customers we do not hesitate to say that our Early Everitt Potato is the most productive medium early potato. It is so productive that it can well be planted for both medium and late crop. Its shape and smoothness is shown by the illustration. Color of skin is light pink. It is a beautiful potato in shape and color. Flesh is very white and of superior dryness and flavor. Growth is strong, sets tubers very early and they develop rapidly. The yields are astonishing old potato growers, who admit they have not had so productive an early potato since the first years of the Early Rose.

Following are some reports from growers. They should convince even the most skeptical:

From 1 lb. of Early Everitt Potatoes I raised 63 lbs. of fine tubers, some weighing over 1 lb. each. I am much pleased with them.—HIRAM PRESLEY, St. Clair Co., Mich.

The peck of Early Everitt Potatoes yielded 15 bu. My Green Mountains took first premium at our fair over ten kinds.—R. E. CHAMBERS, Owen Co., Ind.

I raised seven kinds of potatoes and the Early Everitt was the best of all. Twenty hills made a bushel. Some weighed more than a pound each.—N. NYDAM, Marion Co., Ind.

The E. Everitt has proved to be a very fine potato, yielding for me as high as a bu. from 15 eyes of seed, a bu. to the rod of row or 800 bu. per acre. I dug specimens weighing 2 lbs.—S. R. MUTH, Juneau Co., Wis.

E. Everitt is a good potato. It yielded at the rate of 352 bu. per acre.—L. H. REED, Washington Co., Vt.

From ¼ lb. E. Everitt Potatoes I raised 35 lbs. of such nice smooth potatoes as are seldom seen. My common kinds were almost a failure on account of dry weather. Yours yielded four times as much and of better quality.—G. A. PHILLIPPI, Outagamie Co., Wis.

PRICE—By mail postpaid, 1 lb. 30c; 4 lbs. \$1.00; By freight or express, ¼ bu. 75c; ½ bu. \$1.25; 1 bu. \$2.25; 2½ bu. \$5.00.

GREEN MOUNTAIN

THE KING OF MAIN CROP POTATOES

the greatest yield ever known, at the rate of 1,391½ bu. per acre, was grown of this variety. Also we paid probably the highest price for the original seed that was ever paid for any potato—\$300 for one SUGAR barrel full.

Green Mountain Potato—Introduced by us in 1885

NOTWITHSTANDING that this great potato has been grown for 38 years there are still tens of thousands of growers who do not now, and never did, realize its extreme beauty, goodness and productiveness. We sell large quantities each year both to customers of former years, who want to get a change of seed, and new ones. It is a medium late potato. A very strong grower and is extraordinary in productiveness. The skin is inclined to a yellow color, making it very beautiful. Covered with a netting which usually denotes good table qualities. In the Green Mountain it certainly does, because there is no main crop variety that equals it. As a variety for Fall, Winter and Spring it is without a peer.

We know that if one one-hundredth of the people who receive this catalogue and who have not already grown this potato could talk with some of our customers who have, the demand would immediately be so great that we could not supply it.

PRICE By mail postpaid, 1 lb. 30c; 4 lbs. \$1.00. By freight or express, ¼ bu. 75c; ½ bu. \$1.25; 1 bu. \$2.00; 2½ bu. \$4.50.

RISH COBBLER—(Medium Early)

This is also an excellent variety that follows the Six Weeks in about a week or two. One of its good qualities is that it is not apt to set on more tubers than it needs to marketable size. Vines grow short and upright, permitting of close planting. Skin is white and flesh is white. Superior quality. In many sections is preferred to all other early kinds. Price the same as Green Mountain.

EARLY OHIO—(Early)

The best known early potato. Skin light pink, with all white blotches. It is a good yielder of shapely potatoes of splendid quality. Makes a good Fall and early Winter potato if planted late.
RED RIVER GROWN—Early Ohio.
HOME GROWN—Early Ohio.
Prices the same as Green Mountain.

BLISS TRIUMPH—(Extra Early)

This is the standard variety in most of the Southern States producing sections to ship to Northern markets and has

numerous warm friends in the North. The plant grows rapidly and the tubers are medium size, light red color, with whitest flesh. Its extra earliness, productiveness and handsome appearance and fine table qualities make it a favorite with growers and buyers.—Price the same as Green Mountain.

EARLY ROSE—(Early)

This is the good old favorite, known by everybody. Our seed is Northern grown and is superior to seed as frequently sold.—Price the same as Green Mountain.

RURAL NEW YORKER, No. 2—(Late)

A main crop potato remarkable for its heavy yields, good keeping and eating qualities and the esteem in which it is held on all markets. The tubers are white, large, oval, many of them flattened, with few eyes even with the surface. Flesh white and of excellent quality. A very heavy yielder on good ground.—Price the same as Green Mountain.

SPRAYERS AND ATOMIZERS

A high authority estimates that \$300,000,000 worth of crops are destroyed in the United States each year by bugs, worms and fungi.

Fleas. There are similar machines on the market, but none other that will do your work so well. All the hard work of spraying is removed, as the machine weighs only a pound and about a pound more when filled ready for use. Any liquid poison can be used in the New Wrinkle Sprayer. The operation is so exceedingly simple as to recommend itself to every person. Simply put the powder in little packages of $\frac{1}{2}$ teaspoonful each, and dump one in the can; fill with water and shake and you are ready. No extra vessels are required. There is no danger if the machine is left lying around. Stock cannot get at the poison and it will not spill out if left in any position. Plants are never burned or damaged if sprayed with this machine. The spray is so fine and it covers so evenly that no damage can result.

PRICE—One 50c; $\frac{1}{2}$ dozen \$2.50; per dozen \$4.50

For 25c each extra we will deliver by parcel post to and including 4th zone; 35c to 6th zone 40c to 8th zone.

THE DR. ROBERTSON COMPRESSED AIR SPRAYERS

**PRICE
\$1.00**

This is different and superior in some respects to all other compressed air sprayers. It sprays faster and is more economical of spraying material than some others made. Also it has a range of work not approached by others. The superiority of the Dr. Robertson sprayer is also assured for the future because the vital parts, that give it

its superiority, are covered by patents. Others have tried to imitate it but without success, and those who may have been lured, perhaps by lower prices, soon came back to this always satisfactory type.

CONSTRUCTION—A pump, a galvanized iron tank for the liquid and also has an air chamber, two nozzles, for spraying straight ahead, or at right angles. The air chamber makes it a continuous spray. This is the best sprayer if you ever want to spray the under side of the leaves.

PRICE—One \$1.00; $\frac{1}{2}$ dozen \$5.00; per dozen \$9.00

Delivery terms same as for "The New Wrinkle" Sprayer.

WE ARE LOOKING FOR YOUR ORDER

**BRINGS OUR SEED STORE
RIGHT TO YOUR DOOR.**

Farmers and Gardeners, when preparing to order their seeds, do not confine their investigations to one seed catalogue, but they examine several. We know this. So we have made a catalogue that for MODERATE PRICES we believe will appeal to the reader. We feel, in sending this catalogue, that we stand a good chance of receiving your order. If you do send it to us we will

spare no effort to execute it to your satisfaction. Remember, the U. S. mail brings our seed store right to your door.

EVERITT'S (O. K.) SEED STORE

Department of Insecticides and Fungicides

We solicit the orders of large users of INSECTICIDES and FUNGICIDES. Let us know your needs, get our prices and we'll try to save you money.

The cost of spraying material and the time to apply it represents the smallest part of the whole expense of growing a crop. Labor, seeds, fertilizer and everything that enters into the production of fruits, vegetables and potatoes are high; therefore, after the heavy investments are made, no wise person will abandon his crops to the numerous insects and fungi and blight to destroy. But he

will send his order for what he needs of the following insecticides and fungicides and exterminate them off the earth. The preparations and the spraying machine we offer are unexcelled.

All powders and dust should be applied when the foliage is wet.

Poisons are not admissible to the mails, so they must be sent by freight or express.

PARIS GREEN

For Leaf Eating Insects

Paris Green is the old standard and reliable poison that has been used for years by potato, tobacco, cotton and fruit growers and others. PRICE— $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 65c; 14, 28 or 56 lbs. @ 55c a lb.

ARSENATE OF LEAD (Powder)

For Leaf Eating Insects

This is one of the most efficient forms of lead in powder form that has ever been offered for the control of plant, vine and tree insects. This lead has high poison value and is absolutely safe for use in the orchard or on vegetables, flowers, etc., as far as injury to the plant is concerned. It can be applied in the form of a spray or mixed with lime or plaster or other bases or can even be applied in its original form without fear of injury. The fact that it never "burns" the foliage and has extraordinary adhesive qualities accounts for its being preferred by many to Paris Green. It adheres a long time to the foliage. PRICE—1 lb. 5c; 5 lbs. 20c; 10, 25 or 50 lbs. @ 35c.

BORDO MIXTURE (Powder)

For Blight and is a Plant Stimulant

The use of this preparation will stimulate plant life and prevent blight or rust on any kind of plants during the growing season and the rot of potatoes in the field after storing. It is also valuable in repelling the flea-beetles which give leaves the appearance of having been shot full of holes with fine bird shot. Merely by the addition of water it is made ready. It is coming in demand all over the country. If you need one pound or 1,000 pounds of concentrated Bordo Mixture, we supply it. PRICE—1 lb. 35c; 5 lbs. \$1.50; 10, 25 or 50 lbs. @ 30c.

LIME-SULPHUR (POWDER)

For Scale Insects and Fungicide

One lb. to 12 to 15 gal. hot or cold water as a Winter spray, 30 to 50 gallons as a Summer Spray. PRICE—1 lb. 35c; 5 lbs. \$1.30; 25 lbs. @ 18c; 100 lbs. or more @ 16c.

PYROX (Liquid)

Kills Leaf Eating Insects, Prevents Blight, Keeps Plants Healthy

This is an insecticide, also a fungicide. Pyrox kills all leaf-chewing insects and at the same time protects the crop against fungus diseases, such as potato blights, apple scabs, etc. By preventing and curing fungus diseases, it keeps the foliage of the plants healthy and green throughout the growing season. Some growers use more from plant diseases than they do from the destruction wrought by bugs and worms. Wetting seed corn with Pyrox before planting will prevent crows and blackbirds from pulling it up and will prevent moles and field mice from eating it. Full directions for use 4th each package. PRICE—1 lb. 45c; 5 lbs. \$1.65; 10, 25 or 50 lbs. @ 25c; 100 lbs. @ 20c.

BLACK LEAF 40. (Nicotine-Sulphate)

For Sucking Insects

This is the most generally used remedy for all sucking insects, such as Aphids, on apples, pears, peaches, currants, strawberries, melons, cucumbers, peas, beans, peppers, potatoes, cabbage, egg plant, cauliflower, russell sprouts, tomatoes, flowers and shrubs. To kill these insects their body must be wetted by the spray made from Black Leaf 40. It is also widely used for dipping sheep, cattle, hogs, etc., to rid them of vermin. 1 oz. makes 6 gallons of spray, 35c; 8 ozs. makes 50 gallons of spray, \$1.25.

SLUG SHOT (Powder)

For Leaf Eating Insects

This is the old, standard preparation for the eradication of insects injurious to house, and garden plants, trees, vines, potatoes, melons, cabbage, currants, fruits and vegetables generally. It is a combination of the most potent insecticides and soluble plant foods. The preparation does not injure the foliage. PRICE—5 lbs. 5c; 10 lbs. \$1.00; 25 lbs. \$2.00.

LIME

Fine lime for gardens, whitewashing, etc. 10 lbs.

25c; 25 lbs. 50c; 50 lbs. 75c; 100 lbs. \$1.25.

INSECTO-FUNGO (Powder)

For Leaf-Eating Insects

This is an inexpensive powder, as fine as flour. Dusted on plants; it kills leaf-eating insects such as potato, melon, squash and pumpkin bugs; currant worms, etc. While death to insects, it is not poisonous to humans and domestic animals, unless taken in such quantities as is altogether unlikely. It will not injure the plants. It can be applied in any of the usual ways that powder is dusted. A good way is to take a muslin bag, or even a closely woven gunny bag, and dust through it. The lightest cover is sufficient so no need to waste it. PRICE—5 lbs. 35c; 10 lbs. 60c; 50 lbs. \$2.75; 100 lbs. @ $\frac{5}{12}$ c.

TOBACCO DUST (Dust)

For Leaf-Eating Insects

This dust destroys some kind of leaf-eating insects. It is particularly valuable against rose slug, lice, cut worms, vine bugs, tomato worms, currant worms and cabbage worms. Tobacco dust will not burn or injure the plants. PRICE—Lb. 15c; 5 lbs. 40c; 10, 25 or 50 lbs. @ 8c.

HELLEBORE

For the destruction of slugs, worms, caterpillars, etc. Loses its strength when exposed to the air a few days, making it safe for use when vegetables or fruit are about ripe. $\frac{1}{2}$ lb. 35c; 1 lb. 65c.

CARBOLA

A disinfecting whitewash paint. Kills lice, mites and prevents spread of contagious diseases. It dries a clean snow white and is used wherever whitewash can be used. Just the thing for Poultry Houses, Barns, Hog Pens. 1 lb. makes 1 gal. paint. 10 lbs. \$1.00, 20 lbs. \$2.00, 50 lbs. \$4.00.

TREE TANGLEFOOT

A paste preparation for painting around the trunks of trees, in the form of a band. Caterpillars and other crawling pests cannot get over it. Lb. 50c; 5 lb. can \$2.25; 10 lb. can \$4.25.

WHALE OR FISH OIL SOAP

For Sucking Insects

For mild forms of scale, and is an excellent summer spray, when something stronger cannot be used, where the San Jose Scale exists. Good for washing off ferns, plants, lemon trees, oleanders and almost anything that would be infected with a soft-shelled or in fact almost any kind of insect. Dissolve in water according to directions. $\frac{1}{2}$ lb. 20c; 1 lb. 30c; 5 lbs. \$1.10.

FERTILIZERS (Not Postpaid)

NITRATE OF SODA

If you want to see your garden and lawn at their very best, top dress with this fertilizer. It makes grass and crops hump themselves, or can be applied in liquid. 17oz. to 1 gal. of water. 1 lb. 15c; 5 lbs. 50c; 10 lbs. 75c.

SHEEP MANURE

The most popular garden and lawn fertilizer. 10 lbs. 50c; 25 lbs. \$1.00; 50 lbs. \$1.75; 100 lbs. \$3.00; 500 lbs. \$12.00.

PHOSPHATE

A safe, effective fertilizer. Apply liberally. It is very lasting. 10 lbs. 30c; 25 lbs. 60c; 50 lbs. \$1.00; 100 lbs. \$1.75; 500 lbs. \$8.00.

BONE MEAL (Fine Ground)

Is pure animal bone finely ground. Unusually rich in nitrogen and phosphoric acid. Unexcelled for permanent results on lawns and in gardens. 10 lbs. 45c; 25 lbs. \$1.00; 50 lbs. \$1.75; 100 lbs. \$3.25; 500 lbs. \$15.00.

NOTHING ON THIS PAGE CAN BE SENT BY MAIL. EVERYTHING MUST GO BY FREIGHT OR EXPRESS.

HOW TO CALCULATE PARCEL POST POSTAGE—

order known, you can easily calculate the cost by the table to the right. Remember, a fraction of one pound counts as one pound. Also that 70 pounds can be mailed in Local, 1st and 2nd Zones. Beyond the 3rd Circle the limit is 50 pounds. Example: 20 pounds in Zone 4— $20 \times 4 = 80c - 13c = 85c$. Larger quantities can be put in 50-pound packages.

We pay postage on shipments of 4 pounds and less. On larger packages customer pays charges. When over 4 pounds send postage extra, plus 10c for packing. We also ship by Express and Freight when desired.

O. K. Seeds Are NATIONAL SEEDS

They are grown for us in many different parts of the country and some in foreign countries, where they mature with the strongest vitality. They are then brought to Indianapolis, the centre of the greatest and richest agricultural region on the face of the globe. From here we send them to farmers and gardeners in every county in the United States.

O. K. Seeds Are Truly NATIONAL SEEDS

If you have not been planting them in the past for the sake of economy in your seed bill, and profit from your crops, begin NOW. THIS YEAR 1923!

Section of Vine of Bell's Colossal Tomato

WHEN we say that BELL'S COLOSSAL TOMATO is the very best tomato for the home garden we are only emphasizing what our customers have found to be true, and stating the consensus of reports sent in for this tomato. It is not a freak, but an improved tomato of the greatest USEFULNESS and combining the best QUALITIES—great SIZE, great PRODUCTIVENESS, great SOLIDITY OF FLESH and DELICIOUS FLAVOR when eaten raw or cooked or canned. It is a tomato that wins on exhibition or in the kitchen. So if you want a tomato to exhibit in your garden, or at a fair, or just for use, by all means have some plants of BELL'S COLOSSAL. Read what growers say:

J. H. NICHOLAS, Indianapolis, Ind., said: Bell's Colossal is better than you claimed. When I bought the seed I did not expect it to come near up to your representations. But I was surprised and for once found the tomato even better than represented. You do not recommend it high enough.

W. A. SOLOMON, Modesta, Ill., wrote: We have just picked our first ripe Colossal Tomato and it weighed 3 lbs. and measured 16½ inches in circumference. There are several more larger ones on the vine.

R. T. SMITH, Murfreesboro, Tenn., wrote: I pulled 4 Colossal Tomatoes that weighed 10¼ lbs. The largest one weighed 3 lbs.

D. J. HUMBERT, Gans, Pa., wrote: Colossal is all claimed for it, large, smooth and excellent flavor. I raised one that weighed 3 lbs. Plenty of them that weighed 2 to 2½ lbs. I have grown nice tomatoes, but Colossal is the finest I ever raised. I gave a few to our postmaster and he said they were the finest he had ever seen. If the Colossal does as well for others as it does for me, I don't think the people would want to raise any other.

A. T. GROAT, Gowanda, N. Y., wrote: The COLOSSAL TOMATO grew fruit of enormous size. There were no small ones. The majority of them ran 1½ to 3 lbs. each. They were almost seedless and as solid as old cheese.

J. M. ACKER, Aberdeen, Miss., wrote: From one packet of COLOSSAL I raised more large tomatoes than I ever saw before from an equal amount of seed. I pulled four off of one stem that weighed 9 lbs. I did not prune or tie up the vine as I should have done, but with bad treatment it is a wonder.

W. M. FRAZIER, Graham, Va., wrote: I thought perhaps you would be interested to know that I exhibited 10 of my COLOSSAL TOMATOES at our fair and took first prize. They weighed from 1 to 2 lbs. and were perfect in shape. From my sixty plants I have sold \$10.00 worth and we have used bushels and still have plenty to last until frost. It is the best I ever raised.
