1923 Catalog of Selected

Tulips, Hyacinths Narcissi, Crocusses

ESTABLISHED 1914

MICHIGAN BULB PROPAGATING CO.

"Largest Growers of Dutch Bulbs in America"

BYRON CENTER, MICH., U. S. A.

FROM GROWER TO CONSUMER

ALL BULBS offered in this list are the products of our own Nurseries, located at Byron Center, Mich. All flower lovers should make it a point to visit us any time during April or early May, when our acres of Tulips, Hyacinths, etc., are in full bloom.

Exact location of our farm is seven miles south of the city of Grand Rapids. To reach farm by auto, take Division Avenue, Division Road, and continue seven miles straight south.

"Carlisle Road" is a station on the Kalamazoo-Grand Rapids Division of the Michigan Electric Railway Company. All local trains stop at this station, which is a two-minute walk from our Nurseries.

GENERAL DIRECTIONS

WE PREPAY ALL CHARGES to destinations, when cash is sent with order, in the following states **only**, Michigan, Indiana, Ohio and Illinois.

OPEN ACCOUNTS. Financial references must be given to open an account, but no account will be opened for less than \$5.00.

EARLY ORDERING is of great advantage, as orders are filled in rotation, and we wish to be fair to all.

GROWING OF BULBS. All bulbs offered in this catalog have been grown and tested on our own nurseries here in Michigan. The fact that we have grown and sold Dutch bulbs for nine years, should be proof in itself that our bulbs give satisfactory results. By following the simple planting instructions on the next page, no one should have any trouble getting our flowers in bloom.

CORRESPONDENCE. We will be pleased to answer all correspondence but you can greatly assist us by making your inquiries as brief and to the point as possible. Those desiring further information as to the best time to see the tulips, narcissi or hyacinths in blossom should mail their inquiries during March only, enclosing two cent stamp for postage.

YOUR TRIAL order will be greatly appreciated.

Single Hyacinths

DIRECTIONS FOR INDOOR CULTURE, FOR DUTCH BULBS

The forcing of tulips, narcissi, hyacinths and etc., is very simple, yet many people fail with this work simply by **not** following the instructions.

TIME FOR POTTING. The best time is from early October up to the latter part of November.

SOIL. The best soil is a light, rich sandy loam, composed of about one-half each of sand and common garden mould.

TREATMENT. Fill the pot loosely with the earth and press the bulbs down as far that the top of the bulbs is level with the brim of the pot. Water thoroughly after potting and place in cool dark place such as cellar or dark closet. Keep them there for about 4 or 6 weeks (the longer they are kept in the dark however the better flowers will be had) and the bulbs will be well rooted for the greenhouse or sitting room. The first couple weeks the temperature should not be over fifty degrees Fahrenheit. After that increasing the heat until a temperature of not exceeding 70 degrees is reached. In order to furnish a continuous water supply, place the pots in a dish or saucer and fill this with water every day.

BULBS ON GLASSES. As will be seen on the photograph on this page Hyacinths may be brought in bloom on glasses. The treatment is about the same as that of potting. Fill the glasses with clear soft water, almost touching the base of the bulb. To keep the water pure a little pinch of salt should be added, and the water changed every two weeks or so. When the glass has become entirely filled with roots the bulbs may be brought in the greenhouse or sitting room, where they also should be brought in a higher temperature gradually.

OUTDOOR CULTURE FOR FALL PLANTING BULBS

Generally speaking these bulbs should be planted about four inches deep and four or five inches apart. Hyacinths are the only fall planting bulbs which require additional cover besides the four inches of earth on top of them. They require a light layer of straw, rotted leaves, or common stable manure, to a depth of at least six inches. This should be allowed to remain until all danger of frost is over.

Our hyacinths have been selected both for their color quality and for their hardiness. We offer them in two sizes, first and second size. The first size we recommend for indoor culture and the latter for bedding purposes.

SELECTED, MICHIGAN GROWN HYACINTHS

		Each	Doz.	100
No. 1.	GERTRUDE. deep rose, placing it among the finest of pink shaded hyacinths.....	FIRST SIZE .15	\$1.50	\$10.00

No. 9.		SECOND SIZE	1.00	7.00

MICHIGAN GROWN TULIPS

Tulips are our specialty, we grow acres and acres of them. Treatment for indoor culture is the same as of Hyacinths. For forcing use only varieties indicated G. F. I. (good for indoors). The outdoor treatment is alike that of Hyacinths also, except that they do not require additional cover; they are quite hardy. Plant them about 4 inches deep and 4 to 5 inches apart.

SINGLE EARLY TULIPS

MUST BE PLANTED BEFORE THE MIDDLE OF NOVEMBER

SIX LEADING VARIETIES FOR INDOOR OR OUTDOOR CULTURE.

NOTE. The letters E, M, and L, following each variety indicate their relative earliness of blooming. E indicates Early; M, Medium; L, Late, although, with few exceptions,

Field of Early Tulips

most varieties bloom about the same time when planted outdoors, the late ones coming into bloom when the early ones are fully out. The figures indicates the height in inches.

BREEDER TULIPS (MAY FLOWERING)

This class of tulips has become very popular in recent years. The most unusual colors in Tulipdom are to be found in this class. They compete in height with the Giant Darwins. They may be planted during October or November. Every connoisseur should include some of these in the garden.

No. 136.	ASPACIA. Dull wine red. Very large flower. 24 inch.....	\$0.75	\$5.25
No. 137.	BRONZE QUEEN. Soft buff, inside golden bronze, with yellow base. 28 inch.....	.85	6.25
No. 138.	CHESTNUT. Outside chestnut-brown, inside deep mahogany, stained yellow. 24 inch.....	.80	6.00
No. 139.	JAUNNE 'D OUEFF (Sun Rise). This is one of the most popular breeders for bedding or borders. Lively apricot color, with broad stripe of lilac, inside golden bronze, with beautiful green base. Large flower. 26 inch. Send in your order early for this fellow.....	.75	5.25
No. 140.	LA SINGULAIR (Lord Curzon). Large flower, opening silvery white, flushed with deep purple, suffusing the whole flower with age. 24 inch.....	.80	6.00
No. 141.	CARDINAL MANNING. Dull wine red, flushed rosy orange, turning into bright violet. Shaded bronze when in full bloom. Very large flower. 28 inch.....	.80	6.00
No. 142.	YELLOW PERFECTION. Light bronze yellow, with golden edge. 22 inch.....	.70	5.00
No. 143.	MEDEA. Enormous large flower, strawberry colored, becoming more bright with age. 16 inch.....	.80	6.00
No. 144.	MONTRESOR. Bright carmine red. Large flower of striking colors. 24 inch.....	.85	6.25
No. 145.	PRINCE OF ORANGE (Orange Beauty). Beautiful orange lighter to the edge. 20 inch.....	.70	5.00
No. 146.	PLUT ARCHUS. Dull bronze, with beautiful green base. 26 inch.	.85	6.25
No. 147.	SABRINIA. Rich golden bronze on strong stem. 20 inch.....	.75	5.25
No. 148.	MIXED of all colors.....	.75	5.25

REMBRANDT TULIPS

These are cousins of the Darwins; they rival with the Darwins in height and are especially recommended for borders. To be planted during October or November.

No. 149.	APPOLLO. Rosy lilac and white, striped dull crimson. A very stately grower.....	\$0.75	\$5.25
No. 150.	EROS. Large flower, white suffused lilac and beautifully striped with rose.....	.70	5.00

No. 154.	BIZARRE TULIP, FANCY. This is a giant. Color, beautiful golden brown. Not more than one dozen to one customer. Will not accept order for this alone.....	\$0.25	\$2.00

SINGLE NARCISSI OR DAFFODILS

Should be planted not later than October. They are quite hardy and will bloom just before the early tulips come out, or slightly later than the hyacinths. Narcissi should not be planted in regular beds or borders. A much better effect will be had by scattering them in the lawn or planting in clumps of irregular shape. Most of the varieties are good for forcing, though only varieties marked G. F. I. should be chosen for this work. Only the leaders are offered here; all big and plump mother bulbs.

No. 155. AJAX PRINCEPS. One of the earliest for forcing or outdoors. Broad primrose perianth with orange yellow trumpet. Tall stem. G. F. I. Per doz. .75; per 100 \$5.25.

No. 156. BARRI CONSPICIUS. Primrose perianth, with orange yellow cup, edged red. Very early and stately grower. G. F. I. Per doz., \$.65; per 100, \$4.50.

No. 157. BICOLOR EMPRESS. Rich yellow trumpet; pure white perianth. G. F. I. Per doz., \$1.00; per 100, \$7.00

No. 158. BICOLOR EMPEROR. Deep primrose perianth, with yellow trumpet. One of the largest and most free blooming single daffodils. G. F. I. Per doz., \$1.00; per 100 \$7.00.

	Doz.	100
No. 159. BICOLOR VICTORIA. Bold erect flower, with creamy white perianth and rich yellow trumpet. G. F. I.....	\$1.00	\$7.00
No. 160. GOLDEN SPUR. The entire flower is of a pleasing yellow color. One of the earliest trumpet narcissi. G. F. I.....	.85	6.25
No. 161. POETICUS ORNATUS. White perianth and scarlet eye. One of the most popular for forcing as well as for naturalizing. G. F. I.....	.65	4.25
No. 162. INCOMPARABLE SIR WATKIN. Perianth rich sulphur yellow, with bright orange cup. Fine for outdoors and G. F. I.....	.85	6.25
No. 163. MICHIGAN. (Our own creation.) An improvement on the Poeticus Ornatus. Large white perianth, with orange scarlet cup. Splendid for naturalizing and G. F. I.....	1.00	7.00

DOUBLE NARCISSI

No. 165. ALBO PLENO ODORATO. Very late, large, well filled flower. Cannot be forced, but is one of the best pure white Narcissi	\$0.65	\$4.25
No. 166. INCOMPARABLE. (Butter and Eggs.) Large flower of a sulphur-yellow color. Splendid for borders and cut flowers....	.75	5.25
No. 167. VON SION. Rich golden yellow. One of the best for forcing and for the border. G. F. I.....	.85	6.25
No. 168. MIXED in many shades and colors.....	.60	4.25

CROCUS

Crocuses

These little fellows are the first to blossom in the spring; long before the daffodils or hyacinths are awake to the fact that Winter has gone and Spring is here these hardy little flowers thrust their lovely heads through the snow and fairly shout at us that Spring is once more in the land.

They will grow anywhere. They make lovely beds or borders and may be planted under shrubbery. Plant them anywhere you please, but be sure you plant lots of them.

The following list are the leaders of their kind. Plant in October about 3 inches deep and just as close as you please.

No. 169. BARON VON BRUNOW. Purplish mauve. Per doz., \$0.35; per 100, \$2.00.

No. 170. LOTHAIR. White, with blue stripes. Per doz., \$0.35; per 100, \$2.00.

No. 171. MAMMOTH YELLOW. One of the largest and finest of the yellow varieties. Per doz., \$0.40; per 100, \$2.50.

	Doz.	100
No. 172. MONT BLANC. Almost pure white.....	\$0.35	\$2.00
No. 173. PURPUREA GRANDIFLORA. One of the best purple.....	.45	2.50
No. 174. SILVER CLOTH. Large white.....	.35	2.00
No. 175. SIR WALTER SCOTT. White, with a pale yellow stripe....	.35	2.00
No. 176. MIXED in the above shades and colors.....	.35	2.00

No. 177. COMPLETE SPRING-GARDEN COLLECTION. Consisting of 25 Early tulips, 25 Mayflowers, 25 Darwins, 25 Breeders, 25 Narcissi, 25 Crocuses and 10 Hyacinths. 160 bulbs in all for \$8.00. Purchased separately these would cost about \$12.00. Exactly 35 different colors in this collection.
