SPRING PRICE LIST, 1923

Effective February 5th, 1923.

PRICES: These prices are net f. o. b. Neosho, and are subject to stock being unsold when order is received. Transportation charges are paid by the purchaser upon receipt of the goods. If such charges were pre-paid the prices would have to be higher. In any case, the purchaser pays for transportation.

HOW TO FIGURE PRICES: The quantity rates apply only on varieties of the same kind or class. Any 10 apple and crabapple trees secures the 10 rate, but 4 apple and 4 peach and 2 cherry are charged at the each rate. 25 trees of a kind are charged at the 25 rate; for instance, 25 one-year XXX apple (9-16 up) cost \$11.25, but 10 apple, 10 peach and 5 cherry in one-year XXX would cost \$13.25. Prices on large quantities will be quoted on a specific list of varieties, number of each and size and age required.

TERMS: Cash with order. On credit sales, prices have to be higher to take care of losses which a credit business always has to meet.

OUR OBLIGATION: Every customer is entitled to receive, in good condition, sound, healthy trees or plants of the size, age and variety for which he pays. We will replace without charge any stock that does not reach the purchaser in good condition or that is not free from injurious insects or disease, provided we are notified within ten days of arrival of the goods and such stock is heeled in and held subject to our disposal.

REPLACEMENTS: The life of a tree or plant after it reaches the planter depends upon conditions over which we have no control. The chief causes of failure after nursery stock is received are: Drying out in the sun or wind or freezing in the cold; failure to properly prune the roots and tops; crowding the roots into small holes cut out of the sod; failure to tramp the soil firmly about the roots; lack of proper care and attention. No fair-minded customer would ask for replacement when failure to grow is unquestionably due to such causes, but when the cause of failure is unknown and the customer reports such loss by August 1st following planting the previous spring or fall, we will replace such stock at one-half price, full payment to accompany the order.

TRUE-TO-NAME: Our methods of propagation and handling stock insure to the greatest extent the true labeling of our trees and plants. It is mutually agreed between the purchaser and ourselves that we are to be held liable for not more than the purchase price if any stock should by chance prove untrue to name.

PARCEL POST: For the convenience of our customers living far from the railroad, we will ship any tree less than 4 feet in height, small fruits and ornamentals, except shade trees, by Prepaid Parcel Post if you will add twenty per cent to these prices. We will refund the difference if the postage is less.

NOTE: All shipments to Canada must go by express or freight.

EXPRESS is usually the quickest and most satisfactory method of shipment. Express charges are made on actual weights and delivery is made in the larger towns.

EXPRESS Charges from Neosho:

On 35 lbs. On 100 lbs.

To Kansas City, Mo.	\$1.12	\$2.48
To Chicago, Ill.	1.66	4.08
To Cleveland, O.	1.84	4.58
To New York City	2.30	5.90
To Denver, Colo.	2.00	5.02
To St. Paul, Minn.	2.00	5.02
To New Orleans, La.	1.93	4.80
To San Francisco, Calif.	4.82	13.10

The approximate weight of express packages of 100 one-year "XX size" trees of various kinds is as follows:

100 Peach Trees, 7-16—9-16 in., XX size.....	85 lbs.
100 Apple Trees, 7-16—9-16 in., XX size.....	91 lbs.
100 Cherry Trees, 7-16—9-16 in., XX size....	76 lbs.

FREIGHT charges are made on actual weight except on less than 100 lbs., in which case you pay for 100 lbs. Large shipments go by fast freight and when necessary in refrigerator cars.

SIZE OF FRUIT TREES: We grade or sort our fruit trees by caliper or diameter about two inches above the point where the grafted or budded top puts forth. The heights given are averages of all varieties from actual measurement. These heights vary from year to year according to the growing season. Moreover, varieties of the same class or kind differ in growing habit, some naturally grow taller, some insist on branching the first year, some grow more shapely tops. A short, stocky tree is much better than a tall, spindly specimen. You must cut off part of the top anyway when you plant your trees except with sour cherries.

YOURS FOR GROWING SATISFACTION. That is our motto. The inexperienced find our catalog a big help in starting right, and even experienced growers and horticulturists endorse our "Inside Facts of Profitable Fruit Growing" and our "How to Beautify Your Home Grounds." Our customers like our stock. Many of them say so and come back to us for their additional wants.

CHANGES in ORDERS: Tell us on your order if we shall make any changes in sizes or even varieties, adjusting prices according to this price list.
