HAVE THE MAGGOTS BEEN GETTING FAT ON YOUR VEGETABLES

?

Every Gardener knows that it is practically impossible to grow Radishes, Kale, Cabbage, Onions, Turnips, or Cauliflower under ordinary conditions, and that the few remedies that have been tried in the past are either unreliable, or too troublesome and expensive to be used by the average Gardener. As a result in many sections of the country they have almost given up trying to grow these vegetables, knowing only too well that Maggots and other pests would eat half the crop and spoil the other half.

But "MAG-O-TITE" has changed all this. It is a remedy that has absolutely proven all we claim for it and so wonderful are the results obtained by its use that the Manufacturers are finding it a big problem to keep up with the demand. Read what other users say about it and then try it on your own crops. You'll get the best results ever.

HOW "MAG-O-TITE" ACTS

"Mag-O-Tite" acts as a preventive by repelling the Fly which lays the eggs from which the Maggots are hatched and it also destroys Maggots which are already in the soil. While intended primarily as a remedy for Root Maggots, it has proved very effective in combatting Earth Worms of all kinds, the Strawberry Crown Borer, Cabbage Worms, Asparagus Miner, Flea Beetles, Cut Worms and all kinds of Slugs.

It is also invaluable for the eradication of Earth Worms from Lawns. Putting Greens and other fine turfs.

HOW "MAG-O-TITE" IS APPLIED

The ease with which it is applied is just one more attractive point about "MAG-O-TITE." It is simply sprinkled in and over the Drills when seeding, and around the roots when planting, and after the plants are through it is sprinkled around and alongside of them.

For the eradication of EARTH WORMS of all kinds sprinkle freely on the ground and then sprinkle lightly with water.

It is not injurious to Plant Life in any way, but on the contrary is a valuable stimulant and Fertilizer.

"MAG-O-TITE" PRICE LIST

IN PACKAGES

2 lb.....	35c
4 lb.....	60c
8 lb.....	\$1.00

APPROXIMATE QUANTITY REQUIRED

For Field Culture the approximate quantity required is from 300 to 500 lbs. per acre.

IN STRONG DOUBLE SACKS

25 lbs.....	\$2.50
100 lbs.....	8.50

LISTEN TO THE MAN WHO HAS USED "MAG-O-TITE"

After using "Mag-O-Tite" I raised three acres of the finest Poultry Kale and Radishes you ever saw.

In a last attempt to raise Onions, Turnips and Radishes I bought a bag of Mag-O-Tite and it resulted in the best garden I have ever grown.

I have found Mag-O-Tite to be just what I wanted. It has put an end to every insect I have tried it on.

On the first trial of Mag-O-Tite we have had splendid results with Cabbage and Cauliflower and our Radishes are fine big red ones.

My Aster Plants were already kinking up with bugs when I took home a package of Mag-O-Tite in desperation. The results were simply marvelous, every plant was saved.

It is a sure remedy for Root Maggots and has eliminated the Strawberry Crown Borer wherever I have used it.
