Scabiosa or Pin Cushion Flower

AS A CUT FLOWER of excellent keeping quality, with a long wiry stem and pleasing fragrance, Scabiosas have few equals, being easily raised, and may be planted early in April, already being very resistant to weather conditions. It is well to stake them up when they are ready to bloom, and, if flowers are picked continuously, they will bloom without interruption until late fall. The following varieties are the finest:

SCABIOSA, AZURE FAIRY—To lovers of blue cut flowers this variety is invaluable. They are available all summer long and are far superior to the widely advertised Blue Lace flower. A trial will convince you of its superior merits.

Scabiosa, Black Beauty—A rich, velvety maroon red with white pollen that produces the pin cushion like appearance.

Scabiosa Fiery Scarlet—A wonderful, vivid cerise red of varied hues.

Scabiosa, Flesh Colors—Of all delicate tints in cut flowers, they are certainly the most pleasing and lend elegance to other flowers when used in mixed bouquets. Salmon tints of exquisite beauty are the feature of this selection.

Scabiosa, Fancy Mixed—To lovers of many colors this mixture will bring all the charms Scabiosas possess.
