KING OF THE AUTUMN, (Decorative)—The name indicates the beauty of this dahlia. The color is real autumn like—buff over laid terra-cotta and the flowers are borne very freely on long straight stems, in fact it is one of the most stately of the dahlias. Sometimes the flowers come semi-double or even single, but the singles are the most beautiful. Ours last year were all single and were admired by all who saw them.75

MRS. BRANT, (Cactus)—The flowers are exceptionally large, charmingly beautiful and perfect for exhibition purposes. The petals are exceptionally long and very evenly distributed, standing out like a circular array of spears, while the center is a picture of perfection. The plants make splendid specimens, with deep green foliage and carry their blossoms on stout stems well above the foliage. The coloring is most exquisite, a beautiful salmon-buff blending to golden in the center. One of the largest and most satisfactory.75

CULTURAL DIRECTIONS:

Plant in well prepared ground, about May 20th. Dig in shovel of cow manure, or two handfuls of commercial fertilizer. Drive stout stake three feet high, lay bulb almost flat with sprout next to stake, cover about four inches. Water thoroughly once a week, avoid sprinkling foliage, except to wash off dust. Cut off all mature flowers before seeding and you will have satisfactory bloom.

Send in your orders early. They will be booked and sent in order received.
