The Lord God Planted a Garden

The Lord God planted a garden
In the first white days of the World,
And set there an angel warden,
In a garment of light unfurled.

So near to the peace of Heaven,
The hawk might nest with the wren;
For there, in the cool of the even,
God walked with the first of men.

And I dream that this garden closes,
With its shade and its sun-flecked sod,
And its Lilies and bowers of Roses
Were laid by the hand of God.

The kiss of the sun for pardon,
The song of the birds for mirth—
One is nearer God's heart in a garden
Than anywhere else on earth.

Your House and Your Garden

You do not have to speak of the outside of your home, it speaks for itself. It tells more facts about you than you realize—your love of beauty and of your home—your real civic pride.

This is the time of year to look critically at your garden, the outdoor room of your house. Have you made it charming, restful, inviting? Have you developed to its fullest possibility the piece of ground around your house?

If you have not, then let us help you. A few dollars invested in ornamental trees and shrubs, some climbing roses and vines will transform your home grounds and will return many dollars in increased value, should you desire to sell.

The stock offered in this catalog is acclimated to Sacramento, and will grow and thrive here. Our prices are very moderate and by planting now, you will gain a year's growth over planting in the fall.

Evergreen Trees

Evergreens planted singly or in groups as specimens are pleasing in appearance at all seasons of the year and on account of the variety of coloring and form from which we may choose, there is always some species adaptable to any particular situation where such trees would be appropriate. These trees are also desirable for boundary plantings. Many of those listed will grow into splendid specimens.

Acacia

Beautiful, fast growing evergreen trees, well suited to California, many of them covered with bloom in early spring. All are fine shade trees. \$1.00 and \$1.50 each.

A. mollissima. Yellow flowers.

A. melanoxylon (Black). No flowers.

A. baileyana. Lemon yellow flowers, very early bloomer.

Camphor Tree

C. officinalis. Very handsome tree. Leaves glossy green and scented with camphor. Turns crimson in the fall. In cans, \$1.50 to \$2.50 each.

Casuarina

C. stricta (Australian Beefwood). Grows well on alkaline soil. Fine rapid growing tree. Makes good hedge. Stands trimming well. \$1.00 to \$2.00 each.

Cedrus

C. deodara (Indian Cedar). An especially handsome tree. Branches have a graceful droop; foliage silvery green. One of the most rapid growing and picturesque of all cedars. \$2.00 to \$10.00 each.

Cypress

C. macrocarpa (Monterey Cypress). A picturesque tree with dark green foliage. Extensively planted for hedges and windbreaks. Close and dense growing. 75c to \$2.00 each.

C. sempervirens (Italian Cypress). Also called Pyramidal or Roman Cypress. Slender, with dark green foliage. Suitable for cemeteries, gate posts and arches. \$3.00 to \$10.00 each.

Cryptomeria

C. japonica elegans (Japanese Cedar). A low growing dense tree of robust habit with horizontal branches and pendulous branchlets, clothed with bright green foliage, changing to bronzy green in autumn. Rare. \$3.50 to \$5.00 each.

Eucalyptus

E. globulus (Blue Gum). So well known that no description is needed. 75c to \$1.25 each.

E. rostrata (Red Gum). 75c to \$1.25 each.

Fir

Nordmann's. The rich, dark, glossy green effect of this compact, slow growing, conical tree is especially attractive. 2 to 3 feet high, \$6.00 each.

Cedrus Deodara.

Eucalyptus

EVERGREEN TREES—Continued.

Grevillea

G. robusta (Silk Oak). Rapid growing, medium sized tree. Sweet scented orange-yellow flowers. Stands drought well. Keep well cut back. 75c each.

Magnolia

The tree usually reaches a medium height but it does not do well on limestone soil. They seem to thrive best in moist porous soils, demanding an abundance of fertility. Where it does succeed planters are well repaid, the flowers being especially large and attractive, very fragrant, followed by scarlet seed.

M. grandiflora. A slow growing tree. Very hardy and long lived. Large green leaves. Flowers, very large and pure white. In cans, \$3.00 to \$7.50 each.

Schinus

S. molle (California Pepper Tree). So well known here that no description is necessary. Native of Mexico. 75c to \$1.25 each.

Sequoia

S. gigantea (California Big Tree). \$2.00 to \$3.00 each.

S. sempervirens (Redwood). \$2.00 to \$3.00 each.

Deciduous Trees

Beautiful surroundings need not appeal to our taste for the beautiful only, but from a commercial standpoint the beautifying of the home greatly adds to its value. Who, in seeking for a home would pass a house surrounded by a lawn judiciously planted to shrubs and trees which had been tenderly cared for for years, and choose one barren of tree, shrub or vine, some of which would take years to mature?

Chestnut

European. (*Castanea sativa*). Spanish Chestnut. A very handsome ornamental tree. Large edible nuts, borne in picturesque burrs. 4 to 6 ft., \$1.25 each.

Elm - Ulmus

A well known species of ornamental tree especially suitable for street or avenue planting. Tall, spreading vase-shaped heads. Rapid growers. We stock three varieties, English, American and Cork. 6 to 8 ft., \$1.50 each.

Laburnum - Golden Chain

A small tree of quick growth. Flowers fragrant and hang in long racemes, resembling Wisteria. 4 ft., \$1.25 each.

Leptospermum - Australian Tea Tree

Thrives well in this state. 75c each.

Linden

European (*Tilia europa*). Lime tree. The famous street tree of Europe. 6 ft., \$1.50 each.

As a group they contain the most popular trees that are being planted today, and justly so. For quick effect, shade, brilliancy of color, adaptability to all conditions there is nothing to compare with the Maple family.

Norway (*A. platanoides*). A large and very handsome tree, well adapted to the superior California conditions. \$1.00 and \$1.50 each.

Silver (*A. dasycarpum*). Rapid growing tree, foliage bright green on top leaf and silvery below. Does well here. \$1.00 and \$1.50 each.

Mulberry

Tea's Weeping (*Morus tatarica pendula*). A most uncommon but very graceful weeping tree, forming an umbrella-shaped head, slender, willowy branches drooping to the ground. Foliage is beautiful, leaves distinctly lobed. Tree perfectly hardy, enduring the severe cold of the North, and extreme heat of the South. It is one of the most desirable of all weeping trees. 6 to 8 ft., \$4.00 each.

Plane

Oriental (*Platanus orientalis*). European Sycamore. Most highly recommended by all authorities for street planting in California. Fast and vigorous grower, stands pruning well and cannot be excelled as shade trees. Free from disease and insect pests. We can thoroughly endorse it as a good street tree. Largely planted in Sacramento's newer sections and around the postoffice. We have a fine lot of straight trees. \$1.25 to \$2.00 each. This tree is a specialty with us.

Poplar

Poplars can be planted with slower growing, more permanent trees among them, and when the latter are large enough the poplars may be cut away.

Lombardy (*Populus fastigiata*). A very tall, slender, quick growing tree. Very distinct. 6 to 8 ft., \$1.25 each.

Willow

Weeping (*Salix babylonica*). The well known common weeping willow. Very fine for planting along the banks of streams and lakes. Very handsome and distinctive. \$1.25 each.

P. tobira (Japanese). Winter flowering, with very fragrant, pure white blossoms. \$2.50 each.

Crape Myrtle.

Wisteria Sinensis.

Ornamental Vines

Vines are useful in many ways. They give quick results when planted on a new place, before trees and shrubs become established. For covering fences, rocks, walls, banks and trellises, they are peculiarly adapted. A porch without a vine is desolate and incomplete.

Wisteria

One of the best hardy climbers, producing great clusters of flowers. The Wisteria is the queen of the climbing vines, and for porch decoration without too much shade it has no superior.

W. sinensis. The favorite variety; violet blue, perfumed.

W. alba. Similar to Sinensis, but white. \$1.00 to \$1.50 each.

Many other varieties that space does not permit to list.

Ampelopsis Veitchi—Boston Ivy.

SPIREA VAN HOUTTEI

Hedge Plants

A living fence—one made of plants, attractive with their green leaves, formally trained or arched branches, colored foliage or bright berries is surely more pleasing than the still, rigid, mechanical effect obtained by the similar use of wood or metal.

Privet - Ligustrum

L. California. Of all the hedge plants, this is the most popular and more of it is planted than all others combined. It is of free growth and succeeds almost anywhere. Cut back severely before planting. Plant twelve inches apart. Strong, bushy plants, two and three years old, at \$6.00 and \$10.00 per 100, depending on height and age.

Dwarf Boxwood

Makes a beautiful, low, evergreen border plant. 10c, 15c and 20c each. Larger, 35c and 50c each.

JAPANESE BARBERRY FOR HEDGES

Artists talk about throwing in "a bit of color." An artist would surely appreciate "a bit of color" which the Editor's five hundred feet of Barberry hedge has given to the landscape during October of this year. Not merely "a bit of color," it is a "blaze of glory." Not only is it beautiful in the fall for its foliage, but it bears numerous red berries which also give a bit of color during the winter when color is so sorely needed.

If anyone knows of a better hedge for extreme northern situations than *Berberis Thunbergi* or Japanese Barberry it is hoped that he will tell us about it.

Berberis

B. thunbergi. Nothing equals this beautiful deciduous hedge, where a dwarf hedge is wanted. Leaves small, rich green, turning to rich brilliant colors in fall. Scarlet berries. Perfectly hardy. Plant 15 to 18 inches apart. 75c to \$1.50 each.

Laurustinus

Makes a very beautiful hedge or screen. Covered with white blossoms or buds almost continuously. 50c to \$1.50 each.

Spiraea

S. van houttei (Bridal Wreath). Makes a beautiful, informal flowering hedge. In late spring it is literally covered with a profusion of white bloom. \$1.00 to \$1.50 each.

Ferns and Palms

We have a large stock of all the leading varieties of these always on hand at attractive prices. One of our greenhouses is almost entirely devoted to them.

Palm, Phoenix Canariensis. Some extra fine specimens of this useful ornamental, well established in five gallon cans. 3 to 4 ft., \$5.50 each. 4 to 5 ft., \$7.00 each.

"Mary Wallace" Roses.

A Few Choice New Bush Roses

Two-Year-Old. Price, 50 cents each, \$4.50 per ten, unless otherwise noted.

Mrs. Chas. Lamplough. Beyond question one of the grandest, most striking and distinct of all the large flowered Hybrid Tea Roses. The color is a most pleasing, soft lemon chrome, sweetly scented. Awarded the Gold Medal by the National Rose Society. **Price, \$2.00 each.**

The "Mary Wallace." One of the late Dr. Van Fleet's finest productions. Disseminated only by the American Rose Society (of which we are members), and upon terms prescribed by the Bureau of Plant Industry of the U. S. A. It makes a fine, strong, self-supporting rose, 6 to 8 feet high, with large glossy foliage. Resistant to all diseases. Blooms with great freedom in spring, and bears a considerable number of fine buds in summer and fall. Flowers well formed, semi-double, bright clear rose-pink, with salmon base to petals. Blooms average 4 inches in diameter. Hardy. Limited stock of Mary Wallace. **Price, \$2.00 each.**

"Hugonis." This rose is a spectacular show in itself. Every branch of the previous year's growth becomes lined on both sides, to the very tip, with closely set, wide open, single flowers like dainty yellow Hollyhocks, and the branches bend over with the weight of bloom. The long arching sprays make rare and exquisite indoor decorations in early spring when other flowers are scarce. Even when through blooming, you will still have a beautiful bush. For the Acacia-like foliage makes a most decorative shrub which, as far as we are aware, is never touched by disease of any kind. **Price, \$2.00 each.**

Burgemeester Sandberg. (H. T.) Coral rose. Flower very large, cupped, very double, fragrant and keeps well. Vigorous and continuous bloomer. Obtained a First Class Certificate D. S. H. **\$2.00 each.**

Flowers medium size, semi-double, freely produced in clusters of from 3 to 20 flowers each, on much branched canes, being literally covered with blooms from top to bottom. Awarded Gold Medal by the National Rose Society. 75c each.

Climbing Banksia (White). A thornless, climbing rose, glossy foliage, flowers small, but bloom in great profusion in early summer.

Climbing Banksia (Yellow). Same as white. Deep yellow.

"If I Knew You and You Knew Me"

If I knew you and you knew me,
'Tis seldom we would disagree;
But, never having yet clasped hands,
Both often fail to understand
That each intends to do what's right
And treat each other "honor bright."
How little to complain there'd be
If I knew you and you knew me.

When'er we ship you by mistake,
Or in your bill some error make,
From irritation you'd be free
If I knew you and you knew me.
Or when the checks don't come on time,
And customers send nary a line,
We'd wait without anxiety
If I knew you and you knew me.

Or when some goods you "fire back,"
Or make a "kick" on this or that,
We'd take it in good part, you see,
If I knew you and you knew me.
With customers a thousand strong
Occasionally things go wrong—
Sometimes our fault, sometimes its theirs—
Forbearance would decrease all cares;
Kind friend, how pleasant things would be
If I knew you and you knew me.

Then let no doubting thoughts abide
Of firm good faith on either side;
Confidence to each other give,
Living ourselves, let others live;
But any time you come this way,
That you will call we hope and pray;
Then face to face we each shall see
And I'll know you and you'll know me.
