SEED POTATOES

Many Trials beside Seed from many places, clearly show Seed Potatoes grown here to be Thriftiest, making Heaviest Crops.

FISHERS, Ontario County, New York,

Has long been noted for Vigorous Seed Potatoes. Many farmers came long distances for them. Thirty years

ago one came fifty miles with wagon for a load. Orders for new seed came to us from farmers in England and Mexico; we have sent carloads to Canada, Maine, Florida, and many thousand bushels to Middle State farmers. **WISE PLANTERS OBTAIN SEED POTATOES FROM PLACES WHERE THEIR VIGOR IS KNOWN TO INCREASE INSTEAD OF RUNNING OUT.**

HUSTLER

In a patch of Early Rose, one plant ripened big, **WHITE SKINNED** Potatoes, full two WEEKS before the Rose and so good that some were saved and carefully grown, proving to be such rapid growers, they deserve the name, **HUSTLER**. Although extra early, it keeps **SOUND AND FIRM UNTIL SPRING**. It sprouts are large, strong and vigorous, leaves very broad, vines up-right, rugged, rapid growers, unknown to blight. **HUSTLER GROWS LARGER, YIELDS MORE LARGE POTATOES**, and ripens more uniformly very early, than most other extra early kinds. Its large, plump, chunky, smooth, handsome tubers, will be among the very first to market at highest price—well worth it, too. Such **EXCELLENT COOKERS** will surely be wanted. Heaviest yielder of all extra early sorts; good keeper, sound and firm until summer. Finest quality all the year round.

SEE WHAT THIS FARMER SAYS OF IT

THE HUSTLER ripened extremely early, and such splendid cookers, they were in great demand for table use before several other early sorts were large enough. With ordinary field culture they yielded about one-fourth more than Carman, right along side.—Robert T. Evans, Burlington Co., N. J.

EARLY SIX WEEKS

This **Extra Early** is in great demand for seed by experts who harvest before vines die, and sell the plump, smooth, handsome potatoes at very high prices. One reported, "**SIX WEEKS** are **EXTRA EARLY**, cook mealy, are good yielders of nice size averaging one-half pound each. Eight pounds of seed yielded over **FIVE HEAPING BUSHELS**." Another reported that "June 15th he dug over

SIXTEEN BUSHELS from a peck of seed, and that they were ready sale at very highest price." Introducers claim to grow **SIX WEEKS EXTRA EARLY** large enough for use in only six to seven weeks from planting. This seems to us impossible except on some very favorable spot. We are told that **FARM JOURNAL** people had **NICE LARGE SIX WEEKS** potatoes in fifty-seven days from planting. Skin light pink, flesh very white and floury.

EARLY QUEEN

Very early, sprouts quickly, grows rapidly, making large thrifty vines very soon. A gardener near Philadelphia got EARLY QUEEN from us and sold a good crop from them in early July, he spread out little ones in shade where in two weeks they sprouted, so he planted them August 1st and harvested a good crop in October, very fast growing, two crops in one season. Chunky, roundish to oblong BEAUTIES, smooth white, some of them clouded light pink like Beauty of Hebron always excellent cookers all the year round, fancy, fine, floury.

GREEN MOUNTAIN IMPROVED

Mid-season. A reliable originator of seedlings sold the entire stock of Green Mountain to a seedsman who sent a small potato having numerous eyes to each subscriber for his Farm Newspaper. His seed catalogues, great pictures looked like a heavy cropper [chunky with few eyes] claimed yield of 1360 bushels per acre; price seemed high even with many eyes, one barrel planted in check rows one eye to each check about three feet apart each way in rich loamy soil yielded 35 bushels early, white, oval mostly having many but very shallow eyes, excellent cookers, but too small for heavy croppers, they set heavy, so led growers to hope for greater crops next time. In helping potato experts select the nicest ones from which to make pictures for a seedsman's catalogue our Chas. W. Ford selected five chunky square-ended ones having only a few but strongest appearing eyes. Three men who had harvested them declared these chunky ones having few eyes had grown on the same vines with oval ones having many eyes. This natural change to larger size with few eyes continued resulting in GREEN MOUNTAIN IMPROVED, one of the very best for the principal crop. Dealers and housekeepers want these good cookers, white, handsome, right size, hardly leave enough for seed this heavy yielder, good keeper.

WORLD WONDER

Medium-late, fresh from seed-ball of Rural New Yorker having purple sprouts and blossoms, broad dark green leaves and large tree like vines which branch freely before they fall; WORLD WONDER in line with Carman and Sir Walter Raleigh makes very heavy crops. Large, smooth, round white, handsome, very profitable to grow for wholesale carload markets. Paul Fredericks originated and named this Wonder. He says, it made 60 bushels more per acre than Rural New Yorker right along side. His neighbors who grew large fields of Rurals, Carmans and Sir Walter Raleigh satisfied with good crops of the heavy yielders until they saw their favorite heaviest croppers out yielded 60 to 100 bushels per acre now they are glad to plant this new seedling at any reasonable price.

I had six short rows of this new kind (World Wonder) and harvested nineteen bushels, and from rows, the same length of Rural New Yorker adjoining them, I only got ten bushels. I don't want to sell any of this new kind. I want to plant them. Fred Gibke. Lewellyn Matthews grew 24 bushels World Wonder from 1 bushel of seed.

THERE KINDS IN LARGE BARREL OR SACK

On every farm should be a few early, some medium and more of a later kind, so the family may have the very best all the year round. 10 pounds either **HUSTLER** **EARLY QUEEN**, **EARLY ROSE**, **SIX - WEEKS** or **IRISH COBBLER**, and 40 pounds either **DIBBLE** **RUSSET**, **LONGFELLOW** or **SPAULDING ROSE** No. 4, and **ONE HUNDRED POUNDS** either **CARMAN**, **HEAVYWEIGHT** or **WORLD WONDER** well packed with something between to keep separate three kinds in a large barrel or sack for \$8.00, soon before prices go higher. May soon be sold out of some kinds.

LONGFELLOW

Medium late, very large, long, somewhat flattened, eyes shallow. Smooth, glossy, white skin, flesh white, good to boil and fry; just right to make Saratoga chips. **THE HEAVIEST CROPPER IN CULTIVATION.** Vines are very luxuriant, branching freely and have many more leaves than potato vines usually have. When full grown, **LONGFELLOW** vines generally cover the ground completely. **LONGFELLOW** sets a good many potatoes which grow to be **VERY LARGE**, smooth and handsome. It has made immense crops, doing remarkably well on all kinds of soil.

DIBBLE RUSSET

This new round white netted skin variety is giving excellent satisfaction here. The vines are stocky and thrifty, and not susceptible to blight or disease of any kind. The tubers grow round and plump, and are of excellent cooking quality. It is an easy potato to harvest, will keep late in spring without sprouting, and is one of the best new sorts at the present time. When you sell your customer the Russet, he will always come back after more.
