Gladiolus

The interest developed in the Gladiolus during the past few years has been tremendous, and thousands of bulbs are now planted annually where dozens were used in the past. Their present popularity is sure to continue and increase, as they are, without doubt, the most attractive and useful of all summer-flowering bulbs, and, as a cut flower through the summer and autumn months, hold a place that cannot be taken by any other flower.

Wonderful improvements are being made each year in the size, color and beauty of these flowers, and our list comprises only the best both in mixture and in named sorts.

The bulbs we offer are all top size in every instance, and purchasers receiving bulbs which may appear small, are assured that same are as large as they will or can be grown, and that every bulb is of the best bloom-producing size. Minnesota grown bulbs are conceded to be the best produced anywhere, because of the climatic conditions which tend to develop a much firmer, healthier bulb than those grown under warmer and more humid climatic conditions.

WHEN TO ORDER THE BULBS. Orders for Gladioli are shipped in November, weather conditions permitting, and from March 1st until May 10th, when we plant our stock. Shipments ordered during the winter months must be at the purchaser's risk.

HOW TO PLANT THE BULBS. Plant the bulbs in well worked soil 4 to 6 inches deep. Deep planting will serve to protect the roots from the hot sun, keeping more moisture about the roots, and also serves to hold up the heavy spike after it has grown to its full height.

The Gladiolus will thrive in almost any good garden soil, but seems best results are obtained in soils that are more or less sandy. Plant in a sunny location away from trees and large shrubs. The Gladiolus will not do well in location that does not receive sunshine the greater part of the day.

The first planting may be made in the spring as soon as the ground is warm and in good workable condition. If a succession of blooms are desired throughout the summer, new plantings may be made about 10 days after the foliage of the previous planting show through the ground and additional plantings continued until the last week in June, which is about as late as is safe to make the last planting in order to secure flowers before frost.

CUTTING THE FLOWERS. If the flowers are intended for indoor use, the spikes should be cut as soon as the first bud opens, the balance of the buds will open when placed in water almost to the tip of the stalk; a small part of the bottom of the stalk cut off each day and fresh water used, they will last a week or 10 days when treated this way.

Care must be used when cutting the spike so as to leave as much foliage on the plant as possible at least 2 to 4 leaves. This is necessary if the bulbs are intended to be saved and planted another season.

DIGGING THE BULBS. The bulbs may be dug as soon as the foliage shows signs of turning brown or are hit by a hard frost. Cut the stem close to the bulb as soon as it is lifted from the ground and allow the bulbs to dry in the sun two or three days before storing. Any place suited to storing potatoes will do well. The old core and roots may then be removed when they separate easily.

At prices quoted we pay postage on single and dozen lots, collections included anywhere in the United States and Canada.

At prices quoted in this list 6 will be furnished at the Dozen rate.

TERMS. Remittance may be made by Post-Office order, Bank Draft, Express Money Order or personal check. A remittance of at least one-fifth should accompany all orders for deferred shipments.

SUBSTITUTIONS. We never substitute on filling an order. If upon receipt of an order we find we cannot fill it entire, we always write our customer suggesting substitutions of varieties similar in color and season, and if suggested substitutions are not acceptable we return your money.

CASH WITH ORDER. Please send money with order sufficient to cover the whole bill. We decline sending Bulbs "Collect on Delivery" unless remittance be made on account to guarantee acceptance.
