DEKALB NURSERY BULLETIN

De Kalb Street, Norristown, Pa.

Price list;

APRIL, 1924

A MONTHLY VISITOR

Full of practical suggestions—what and when to plant, prune and spray—and seasonable offerings of the many varieties of Trees, Hardy Flowers, Hardy Shrubs, grown and distributed by the DeKalb Nurseries.

Adolf Müller
DeKalb Nurseries
Norristown, Pa.

April—Whatever your plans are for this spring's improvement, now is the time to begin to plant and to replant; if you have any trees or shrubs that ought to be transplanted, do it now.

Be careful now, that the great rush is on and everything needs to be done, if the ground is too wet, wait till it gets reasonably dry before transplanting.

Many fine trees die every season for the simple reason that they were really planted into sloppy wet ground.

When planting trees or shrubs take time to dig the hole big enough so that the roots can be spread out, they should not be crowded in, they must lay out flat so that the earth can be filled in all around them.

It pays to plant carefully. In my observation of the past thirty years, I have come to this conclusion: that if the people would be as careful planting trees, rose bushes, flowering shrubs of any kind as they are when planting tomatoes or cabbage plants, there would be nearly 100 per cent success all around.

When any one plants a tomato plant and it is hot and dry, the planter usually shades the little plant from the sun, and waters it most carefully, does everything for it that seems good to help it get a start, now that's just what everything else needs, and this is a set rule to apply without variation, the whole problem is, do just all you can to protect and assist the newly planted plants and you will succeed.

We beg to present here a short list of plants with prices including Roses and respectfully ask you to come see our very high quality plants and be convinced that it pays to buy at the DeKalb Nurseries.

We have many acres of other plants not listed here. To buy plants direct from the Nursery is the best possible way to buy, because you can see what you are getting.

I will appreciate your visit and you will be given every courtesy and attention when you come.

Sincerely,

ADOLF MÜLLER.

PRICE LIST

DECIDUOUS SHADE TREES

Norway Maples	10-12 ft.	Each	\$3.00
Schwedler Maples	10-12 "	"	5.00
Schwedler Maples larger specimens		\$7.50 to	10.00

Field grown big plants \$1.00 each, \$10.00 per doz., \$75.00 per 100.

While we do not intend or pretend to offer this as a catalog or complete price list, it will naturally help you a little in making some selections, and will also tend to give you an approximate price of some of the plants, shrubs and trees that are more often used, for almost any kind of purpose that you may have in view.

I have on many other occasions in this little messenger laid stress on the advantages gained in coming here, or to any other Nursery; to see the actual habits and growth of the many treasures that we all strive to raise to healthy maturity.
