HARRIS' SEEDS

WHOLESALE PRICE LIST

For Market Gardeners and Florists

1924

Golden Acre Cabbage—A Wonderful Early Variety

JOSEPH HARRIS CO.

SEED GROWERS

Moreton Farm

COLDWATER, N. Y.

About Orders, Shipping, Etc.

The prices quoted in this list do **not include cost of delivery**, which must be paid by the purchaser. We make no charge for bags, or packing.

PARCEL POST

Parcel post rates are very low to places within 150 miles of Rochester. Only 1c per pound after the first pound which is 5c.

The following tables give the rates to different parts of the country:

	Each Additional			Each Additional	
	1 lb.	lb.		1 lb.	lb.
Alabama	\$.08	\$.06	Nebraska	\$.09	\$.08

When ordering seeds sent by parcel post please add enough money to the price to cover the necessary postage which we shall have to pay.

BY EXPRESS. The express rates are now a little lower than parcel post on all lots weighing 50 pounds or more. On smaller packages parcel post is cheaper. Express charges need not be prepaid, but parcel post must be.

BY FREIGHT. Lots weighing over 100 pounds will go cheaper by freight than by express, but it takes longer for freight to get through. If seeds are wanted immediately and you are willing to pay the extra cost it is best to have hem sent by express.

Please state on your order whether you wish the seeds sent by parcel post, express, or freight. If ordered by parcel post please add to the amount remitted enough to pay postage.

CONDITIONS OF SALE. We agree to assume the responsibility of the seeds and plants we sell reaching the purchaser in good condition, and should any seeds fail to grow under favorable conditions, or prove not true to name or of inferior quality, we will **REFUND THE MONEY PAID FOR THEM** or replace them without charge, but all our seeds and plants are sold on the distinct understanding and with the agreement by the purchaser that we will not be liable for any loss or damage that may occur by reason of the failure of seeds or plants to grow or to be of the variety or quality offered. We will not accept or fill orders on any other terms.

JOSEPH HARRIS CO.

TERMS. Our regular terms are cash with order, less a discount of 2 per cent, except Grass seeds, Potatoes and Onion sets, on which no discount can be allowed. We should, however, be glad to open accounts with any gardeners of established credit, or who will furnish us satisfactory references. On such accounts all bills are due September 1, with no discount.

JOSEPH HARRIS CO.,

Coldwater, N. Y.

Crops of Celery and Radish Seed at Moreton Farm

Dependable Seeds

The successful gardener must have seeds that he can depend upon absolutely. If some of the seeds he used turn out to be poor or not of the variety he wanted there is little chance of making any profit from the crop and often the loss is heavy.

Realizing this we have for many years endeavored to produce and sell only seeds of the highest quality regardless of how much it costs to raise them. We know that in the long run it is quality and dependability that count, not fair words or low prices.

Harris' seeds are safeguarded on all sides by very thorough germination tests, the greatest care in selection and breeding, and very complete trial grounds where every kind of seeds we sell and many others also are given a chance to prove what they can produce. In this way we keep thoroughly posted as to the new or improved varieties that are introduced from time to time. When we find anything really superior it is immediately taken up and the seed offered to our customers as soon as it can be produced in commercial quantities.

We are offering this year a new pickling cucumber and a new pepper, both of which we are sure will prove of great value to the commercial grower.

Northern Grown Seeds

It has been abundantly proved that such seeds as tomatoes, corn, peppers, melons, etc. grown in the North produce much earlier and better crops in the northern states than seed raised in the South. Earliness is often of great importance to the market grower, so he should be careful to get seeds **actually raised** in the North where the seasons are short. Many seedsmen doing business in the North get their tomato seeds from California, melon seeds from Oklahoma or Arizona, pepper seed from Georgia, and so on.

We are situated near the northern border, a few miles from Lake Ontario. Seeds raised here must mature early or get caught by frost. This fact insures early strains of such varieties as we raise here.

How Many Seeds Will Grow?

This question comes up every time any of us start to sow or plant seeds. Almost all commercial seeds contain at least a small percentage of defective or dead seeds that will not germinate. This percentage varies very much in different lots of seed, and it is hard for the gardener to tell how thick to sow in order to avoid an excessive amount of thinning, or a poor stand of plants. Carrot seed, for instance, that contains 60 per cent of live seeds must be sown considerably thicker than a lot that contains 80 per cent.

Harris' Seeds are all marked showing what percentage is of good vitality.

According to Our Tests

98 per cent

of this seed germinates

This label is put on every lot of seed (except packets) and tells you what proportion of the seeds germinated in our test of this particular lot.

The seeds are all given accurate tests either in soil or a germinating apparatus so there is no guess work about it.

We believe Harris' seeds are the only ones sold with this statement attached.

THIS WHOLESALE PRICE LIST

This price list is issued especially for the use of the Market Gardener and Florist who use seeds in considerable quantities and quite naturally expect to buy at lower prices than the amateur gardener who buys only small quantities of each kind.

This list **does not include** all the kinds and varieties of seeds we sell, but only such seeds as are used by Market Gardeners and Florists.

Our complete general catalogue containing description and price of all the seeds and plants we offer will be sent in January. If you do not receive your copy, please let us know and we will send another one at once.

Harris' Specialties

The following varieties are of our own introduction or are kinds of which we have developed **improved strains**. They are far superior to the strains usually sold.

Crosby's Egyptian Beet, Harris' Selection

A very highly bred strain of this beet—almost perfect in color and shape. See page 5.

Detroit Dark Red Beet, Harris' Selection

In uniformity of color and shape this strain is superior to any we have seen. See page 5.

Whipple's Early Sweet Corn

The largest early corn. Has proved a very profitable market variety. See page 12.

Whipple's New Yellow Sweet Corn

The **largest** and **earliest** yellow corn. Has proved a great money maker. See page 13.

Harris' Mammoth White Cory Corn

This is an extremely early kind with large ears. It is **earlier** than the old Cory and has **larger** ears. See page 11.

Buttercup Sweet Corn

Like Golden Bantam but **larger**. See page 13.

New Cucumber "Double Yield Pickle"

A wonderfully prolific new cucumber for pickles. See page 15.

Harris' Perfection Cucumber

A very carefully bred long, deep green cucumber for market or pickles. See page 15.

Bender's Surprise Muskmelon, Harris' Special Selection

The Bender melon has proved to be one of the most profitable market varieties. The Harris' strain is very fine. See page 20.

Harris' Model Parsnip

A very carefully bred strain that is much superior to the ordinary Long Hollow Crown. See page 23.

Harris' Earliest Pepper

The earliest and most prolific sweet pepper grown. See page 25.

Harris' Early Giant Pepper

A new very large pepper that is medium early and very prolific. See page 25.

King of Denmark Spinach

A greatly improved variety. See page 30.

Harris' Special Earliana Tomato

Earlier and smoother than other strains of Earliana. See page 32.

Bonny Best Tomato, Harris' Selection

A pedigree strain that produces earlier and better fruit than any other strain that we know of. See page 33.

ARTICHOKE

The Globe Artichoke produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia.

	Oz.	¼ lb.	lb.
Large Green Globe. The standard variety	\$.45	\$ 1.50	\$ 5.50

ASPARAGUS SEED

Palmetto. A very fine American variety	.08	.15	.55
Giant Argenteuil. A large French variety, fine	.08	.18	.60
WASHINGTON. A new rust-resistant strain originated by the U. S. Department of Agriculture at Washington. For full description see our general retail catalogue	.30	.80	3.00

ASPARAGUS ROOTS. See page 34.

BEANS—Dwarf Wax Varieties

Of the wax or yellow-podded bush beans, the earliest varieties are Webber Wax with flat pods, and Valentine Wax with round pods. Wardwell's Kidney Wax is a day or two later and has very long flat pods of high quality. This bean is quite apt to rust in wet weather and for this reason Currie's Rust-proof is preferred by many. The pods are broad and deep yellow, but not quite as long as Wardwell's. Sure Crop Wax resembles Currie's Rust-proof but has longer pods and is more prolific. Both mature very early. Burpee's New Kidney Wax resembles Wardwell's but has narrow pods. Hodson Wax is late and very prolific; pods long, narrow and flat. Refugee Wax is also late and has round pods of the highest quality. It is largely used for canning.

Note. We are now offering all seeds by weight instead of measure as formerly. Beans in quantities of over 25 lbs. will be sold at the 100 lb. rate. We do not sell less than 1 lb. of beans at the pound price. A pound is a pint, 15 lbs. a peck, 60 lbs. a bushel.

Sure Crop Wax. Much resembles Currie's Rust-proof, but has longer pods and matures about the same time	Lb. .22	15 Lbs. \$ 2.40	100 Lbs. \$15.00
WEBBER WAX or "Cracker Jack." The earliest wax bean with flat pods. The pods are long, straight, stringless and quite free from rust. A heavy bearer	.22	2.40	15.00
Valentine Wax. Extra early, round pods, free from rust	.25	2.70	17.00
WARDWELL'S KIDNEY WAX. Very long, flat, deep yellow pods. One of the earliest and most profitable wax beans for market. Very prolific and of the best quality	.22	2.40	15.00
BURPEE'S NEW KIDNEY WAX. Has narrower and thicker pods than Wardwell's and is more prolific	.22	2.40	15.00
ROUND POD KIDNEY WAX. Like Wardwell's with round instead of flat pods. One of the best round podded wax beans	.25	2.70	17.00
Brittle Wax. Same as Round Pod Kidney Wax	.25	2.70	17.00
PENCIL POD BLACK WAX. Pods perfectly round, nearly straight, clear yellow, stringless and of highest quality. Plant healthy and prolific. Matures early. Seed black	.25	2.55	16.00
Davis' White Wax. Hardy and prolific. Long, flat yellow pods of fair quality. Matures early	.22	2.40	15.00
Golden Wax, Improved Rust-proof. Short pods. Early	.22	2.25	14.00
Hodson Wax. Late, very prolific, long, straight, flat pods	.22	2.40	15.00
CURRIE'S RUST-PROOF BLACK WAX. Hardy and very prolific. An early and profitable market variety	.22	2.40	15.00
REFUGEE WAX. Round pods of fine quality, very prolific, matures late	.25	2.55	16.00

BEANS—Dwarf Green-Podded Varieties

If your market requires a **round-pod bean**, Full Measure, Giant Stringless Valentine and Black Valentine are the most profitable. If a **flat pod** is required, Bountiful is one of the best varieties.

	15 Lbs.	100 Lbs.
FULL MEASURE... Very prolific, long, round pods, Medium early and a profitable market variety	Lb. (Peck) .25	\$ 2.55 \$16.00
Stringless Green Pod. Round, thick, light green pods of high quality	.22	2.40 15.00
GIANT STRINGLESS VALENTINE. Larger than the old Valentine, and fully as early. Very prolific and one of the very best green-podded bush beans. Round, light green pods of high quality	.25	2.55 16.00
BLACK VALENTINE. A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance	.25	2.55 16.00
BOUNTIFUL. Very prolific. Long, flat pods of fine quality; very early	.22	2.55 16.00

		15 lbs.	
	Lb.	(Peck)	100 lbs.
Improved Round Pod Valentine. Extra early, long straight round pods	\$.22	\$ 2.40	\$15.00
Refugee or 1000 to 1. Late, very prolific	.22	2.40	15.00
NEW STRINGLESS REFUGEE. A stringless strain of the old Refugee	.25	2.70	17.00
Goddard or Boston Favorite. Used for shelling green	.22	2.40	15.00
Lowe's Champion. One of the Horticultural or Cranberry beans. Pods 5 in. long, flat, green, straight and stringless	.25	2.40	15.00
Ruby Dwarf Horticultural. Used for shelling green. Pods light yellow splashed with deep red	.25	2.70	18.00
FRENCH HORTICULTURAL. The best strain of Dwarf Horticultural beans. More prolific and vigorous and free from disease than other kinds. Pods long, straight and highly colored. Matures a little later than Ruby Dwarf Horticultural and has taller vines	.30	3.00	

LIMA BEANS—Dwarf or Bush Varieties

Where beans are sold in the pods, Fordhook is the most popular bush Lima. The beans are of good size and very plump, and the vines are prolific. For shelling, Burpee's Bush Lima of the old type and Burpee's Improved are often used. The beans are large and flat.

	Lb.	15 lbs.	100 lbs.
FORDHOOK BUSH LIMA. A greatly improved strain of Dreer's or Potato Lima. Large pods and very large thick beans of deep green color. The best of this class	\$.30	\$ 3.90	\$
Henderson's Bush Lima. Small, early and prolific	.25	2.85	19.00
BURPEE'S BUSH LIMA. Wonder Strain. Large, medium early ..	.30	3.25	21.00
Burpee's IMPROVED Bush Lima. (New). Larger pods and thicker beans than the old variety and of deeper green color. A little later than New Wonder Strain	.30	3.40	22.00
EARLY LEVIATHAN LIMA. Very early, large pods. The best early pole Lima	.28	2.90	18.00
IDEAL. Has immense pods containing 4 to 6 large flat beans of high quality, vines very prolific. A few days later than Early Leviathan but the pods are much larger	.28	3.00	19.00
Challenger Lima. An improved strain of Dreer's Pole Lima. Large plump beans of the "Potato" class	.30	3.30	21.00
Golden Cluster Wax. Produces long, broad, deep yellow pods of finest quality; beans white	.35	4.00	
Kentucky Wonder. Long, slender, green pods of fine quality. Early and very prolific	.25	2.85	18.00
Kentucky Wonder Wax. Long, round, yellow pods, very prolific. One of the best wax pole beans	.30	3.45	22.00
SCOTIA. Long, slender, green pods of the very finest quality. Wonderfully prolific	.35	3.75	24.00
White Dutch Runner. Very large white beans often used in place of Limas. Very prolific and early	.35	3.75	
Lazy Wife. Large, flat, green pods; very productive	.35	3.75	
Speckled Cranberry or London Horticultural	.30	3.00	

FIELD BEANS

(Prices per 100 lbs. subject to change. Please write for price if a considerable quantity is required.)

Boston Marrow or White Marrowfat. Large, plump, white beans ...	\$.20	\$ 2.10	\$13.00
Marrow Pea or White Navy. Small white beans. The most popular variety	.20	1.80	11.00
ROBUST PEA BEANS. A select strain of Pea beans that is resistant to the mosaic disease	.20	1.95	12.00
Red Kidney. Large red beans, very prolific and a profitable variety. Special disease-resistant strain	.20	2.10	13.00
WHITE KIDNEY. Large, white, kidney-shaped beans; yields heavy crops and is of the highest quality for baking	.20	2.25	14.00
IMPERIAL OR PROLIFIC TREE. The beans are white, kidney-shaped, somewhat smaller than White Kidney and of fully as high quality. Yields heavy crops	.20	2.25	14.00
Yellow Eye. Large plump white beans with a yellow blotch at the "eye."	.20	2.10	13.00

Crosby's Egyptian Beet

HARRIS' SPECIAL STRAIN

Particular gardeners who want the very finest beets both in shape and color will find this special stock to meet their requirements.

The seed is of our own growing and the most careful selection has been practiced for more than fifteen years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly every one a model for shape and color.

The beets are globe shape, very deep red and perfectly smooth with very small tap roots. The tops are usually small. This beet grows very rapidly and is ready for market **earlier** than any other kind we know of. It is much earlier than Detroit Dark Red and Early Blood Turnip.

This is the finest strain of Crosby's Egyptian beet obtainable no matter what price is charged for the seed.

We are glad to say that our seed this year is exceptionally fine and shows high germination. **Oz. 15c; ¼ lb. 40c; lb. \$1.25.**

Crosby's Egyptian Beet

Your special strain of Crosby's Egyptian Beet is the nearest perfect in shape, color, etc., of any beet I have grown in forty years of gardening."—C. A. Baker, Milford, N. H., Aug. 9, 1920.

"I like your seeds. Your Crosby's Egyptian beet is especially fine—Very early and of better shape than any seed of that variety that I have ever used. All other seed produced so many flat ones and were no good except for earliest bunching. Yours were good and tender as long as Detroit and uniformly dark colored all through, and in every way ahead of all other beets I ever tried."—P. D. Kemrer, Lancaster, Pa., Jan. 31, 1922.

DETROIT DARK RED BEET—Harris' Selected Strain

This strain produces beets of **uniform globe shape** and **deep red color** without light rings when cut.

This is a very superior stock, being more uniform than any other strain we have been able to find.

The seed is of our own growing and the greatest care is taken in selecting the beets to set out for seed. The consequence is that this seed produces beets very small tops, fine tap roots and perfect globe shape and very deep color.

This seed costs twice as much to raise as ordinary seed costs, but the crops from it are so much superior that the seed is really worth ten times as much. **Oz. 15c; ¼ lb. 40c; lb. \$1.25.**

Long Season Beet

This is a late beet not of handsome shape but of extremely fine quality, remaining sweet and tender even when very large.

The beets will keep all winter and retain their fine quality until spring. This is not very often grown for market, but where fine quality is appreciated it finds a ready sale at good price.

The beets are half long, very dark red and have green foliage. **Oz. 20c; ¼ lb. 60c; lb. \$2.25.**

BEETS

For early bunching Crosby's Egyptian is the most popular kind; and if a really first-class strain is used there is no better beet for the purpose. Some gardeners prefer the old flat Egyptian Blood Turnip beet, because it makes salable beets a little quicker than Crosby's. For later use Detroit Dark Red and Edmund's Blood Turnip are excellent. For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South. It requires about 10 lbs. of seed to sow an acre.

CROSBY'S EGYPTIAN, Harris' Selected Strain.	The finest bred	Oz.	¼ lb.	lb.
stock of this beet. See description above. Seed of our own				
growing		\$.15	\$.40	\$ 1.25
Crosby's Egyptian.	Good seed but not equal to our own strain.			
This is the same as usually sold		.10	.25	.75
EARLY WONDER.	Quite similar to Crosby's Egyptian but flatter			
than our strain of that variety. Early and of good color		.10	.25	.80

BEETS—Continued

Egyptian Blood Turnip. Flatter than Crosby's, and is preferred by some for early bunching	Oz. \$.10	¼ lb. \$.25	lb. \$.75
DETROIT DARK RED. Selected Strain. Seed of our own growing, very superior stock. See description above	.15	.40	1.25
Detroit Dark Red. Not of our own growing but good seed, equal to any obtainable for the price	.10	.25	.70
ECLIPSE. Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier	.10	.25	.75
Edmund Blood Turnip. Large flat beets. Excellent for fall use	.10	.25	.85
Early Blood Turnip. A good old variety, much like Edmund's	.10	.25	.85
Early Bassano. Large, flat, light-colored beets	.10	.25	.85
Long Smooth Blood Red. 8 to 10 inches long and very dark red	.10	.25	.90
LONG SEASON. A very late variety of fine quality	.20	.60	2.25

Note. We do not sell half ounces unless the price per ounce is 30c or more.

Mangels and Sugar Beets for Stock

DANISH YELLOW GIANT. An immense yielder. Very large, oval, deep yellow and rich	Oz. \$.08	¼ lb. \$.15	lb. \$.40
Golden Tankard. Oval and easily harvested; yellow flesh. The strain we offer is very fine	.08	.15	.40
NEW "HALF SUGAR" MANGEL. Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar	.07	.12	.30
Mammoth Long Red. Very large, long red roots of good quality. One of the best yielders and keeps well	.08	.15	.40
Giant Yellow Eckendorf. Very large yellow mangel. Blunt at the bottom, easily harvested and immense yielder	.08	.15	.35

BRUSSELS SPROUTS

Cultivation is the same as for cabbage or cauliflower. There is always a good demand for the sprouts, and they bring profitable prices.

DANISH IMPROVED. An excellent late variety that yields well if set out before the middle of June in the north	Oz. \$.35	¼ lb. \$ 1.00	lb. \$ 3.75
LONG ISLAND IMPROVED DWARF. Crop of seed failed.			

CHINESE OR CELERY CABBAGE—PE-TSAI

This Chinese cabbage has proved to be a very profitable crop for muck land. There is a good demand for it from New York and other large markets in carload lots. The seed is sown in July or August and the crop matures in eight to ten weeks. The heads grow nearly two feet tall and are compact and heavy. We have a fine strain. **Oz. 25c; ¼ lb. 75c; lb. \$2.75.**

Golden Acre Cabbage

New Early Cabbage "GOLDEN ACRE"

A wonderfully fine early variety with perfectly round heads of good size and which mature a week earlier than **Jersey Wakefield**. The heads resemble Copenhagen Market of a very finely bred type. The plants are small with few leaves but the head is of good size, weighing 5 to 6 lbs., as round as a ball, very firm and of good bright green color. Every plant produces a good head and they are all just alike.

Owing to its extreme earliness this cabbage will certainly prove profitable for the first early crop. **¼ oz. 45c; oz. \$1.25; ¼ lb. \$4.50; lb. \$16.00.**

Midseason Market Cabbage

This new cabbage has proved to be the most uniform and heaviest yielding medium early variety in our trials the past two seasons. Every plant produces a fine large, round head, every one just alike. The heads are almost perfectly round, quite large and solid.

We highly recommend this new cabbage for market, shipping, or kraut. One of the best we have ever seen for fall market or shipping. Oz. 50c; ¼ lb. \$1.60; lb. \$6.00.

Midseason Market

This price list does not include all the seeds we sell. For other kind see our complete general catalogue which is issued in January each year.

Copenhagen Market Cabbage—Special Strain

We are able this season to offer a special strain of Copenhagen Market cabbage that is much earlier and more uniform than the usual strain of this variety. This strain is the same as the Copenhagen Market used to be when first sold in this country. The heads form very early, are perfectly round, and have but few outside leaves. It is much like the new Golden Acre cabbage described above but the heads are larger and they mature a week or 10 days later.

If you want the cabbage to mature early you should get this strain. For main crop the other strain we offer is just as good. Oz. 45c; ¼ lb. \$1.25; lb. \$4.50.

CABBAGE—Early Varieties

Jersey Wakefield has long been the standard extra early cabbage, but a round head sells better in most markets and on this account the New Golden Acre and Copenhagen Market have proved more profitable. Enkhuizen Glory has larger heads and is a week later. Burpee's All Head has large flat heads and is a week or two later than the Enkhuizen Glory.

	Oz.	¼ lb.	lb.
Golden Acre. See opposite page	\$1.25	\$ 4.50	\$16.00
EARLY JERSEY WAKEFIELD. The standard Early variety. Heads pointed, of medium size and very hard. Our strain is particularly fine, the heads being very uniform and mature early	.30	.85	3.25
CHARLESTON WAKEFIELD. Larger and 10 days later than Jersey Wakefield. Heads larger around and not so pointed	.30	.85	3.25
COPENHAGEN MARKET. Heads round, medium size and very solid. Matures very easily and every plant makes a good firm head	.35	.90	3.50
COPENHAGEN MARKET. Special Strain. Very early. See description above	.45	1.25	4.50
ENKHUIZEN GLORY. A very large, early cabbage. Heads as large as late kinds and mature as early as Charleston Wakefield. Has proved to be a most profitable variety	.30	.75	2.75
BURPEE'S ALL HEAD EARLY. Heads of good size, deep, solid and heavy. Matures medium early. Largely used for main crop for fall market and shipping	.28	.70	2.50
Henderson's Early Summer. A fine early flat cabbage	.30	.80	2.75

Types of Danish Ballhead Cabbage

Solid Emperor

Intermediate

Short Stemmed

CABBAGE—Late or Main Crop Varieties

For Fall Market or for krout the medium early kinds are better than the very large late kinds. Harris' Summer Ballhead, Midseason Market and Enkhuizen Glory are excellent.

For late fall and winter market the Danish Ballhead is the most profitable. The Short Stemmed strain we offer yields more than any other of the Danish type, but is not as deep green as the Solid Emperor or Tall Stemmed strain, which has smaller heads and does not yield quite as many tons per acre. The Intermediate strain is halfway between the two, having shorter stems than the Solid Emperor and larger heads. It is a very fine Danish Cabbage.

Savoy cabbage is often a profitable crop for home market. Red Cabbage is also profitable on good, rich land.

"Proved Seed." Where we offer "proved seed" it means that the seed has been held until a crop of cabbage has been raised from it so we could prove that it is true to name and a first class strain.

	Oz.	$\frac{1}{4}$ lb.	lb.
Volga. The heads are large, round and solid; a heavy cropper	.30	.85	3.00
HARRIS' SUMMER BALLHEAD. Large, round, solid heads which mature medium early. One of the very best kinds for fall market or krout	.30	.85	3.00
DANISH BALLHEAD, Solid Emperor Strain. A very fine strain of the genuine Danish Cabbage. Heads round (not flat) and deep green and very hard. Stems rather long. The best keeper. Proved Seed	.30	.75	2.75
DANISH BALLHEAD, Intermediate. Has shorter stems and larger heads than the Solid Emperor and is of deeper green color than the Short Stemmed strain. A very fine strain. Proved Seed ..	.30	.85	3.25
New Seed, not proved	.25	.70	2.25
DANISH BALLHEAD, Short Stemmed. Matures quicker than the Solid Emperor strain, has shorter stems and larger heads, but not quite as deep green color. Proved Seed	.30	.85	3.25
New Seed, not proved	.25	.70	2.25
Surehead. Deep, heavy heads. A good, late variety	.25	.70	2.25
Succession. A popular cabbage for fall market	.25	.70	2.50
All Seasons. Large flat heads	.25	.70	2.50
Premium Flat Dutch. Old standard kind. Large, heavy head	.25	.70	2.50
Winnigstadt. Pointed heads of medium size	.25	.70	2.50
RED DANISH STONEHEAD. A new red cabbage much like a red Danish Ballhead. Grows to a good size and heads evenly	.35	1.00	3.75
MAMMOTH ROCK RED. The largest red cabbage. Hard, round, deep red. One of the best red varieties for market or shipping. Proved Seed	.30	.90	3.50
SAVOY, Perfection Drumhead. Heads large and quite firm	.30	.80	3.00
SAVOY, Sutton's Best of All. Large heads, quite firm and of a light green color. Produces the largest heads of any Savoy we know of	.30	.80	3.00

CAULIFLOWER

Snowball, of the best strain, makes large solid heads quite early. "Danish Perfection" has more leaves than Snowball which protects the head better. It is a week or ten days later than Snowball, and a little earlier than Danish Giant or Dry Weather, which produces large solid heads, but should be set out earlier. Large Algiers makes loose, flat heads of large size and of high quality, but not of the best form for market.

SNOWBALL, Perfected Strain. A very fine improved strain of Oz. $\frac{1}{4}$ lb. lb.
the true Snowball type. The plant is dwarf and compact and the heads are large, solid, snow white, and with no protruding leaves when well grown under favorable conditions. Matures early but usually the best heads are obtained from plants set out rather late. The seed we offer is the very finest strain obtainable, 95% of the plants make good heads. There is no sense in paying more for the seed than we charge, as no better seed can be obtained at any price $\frac{1}{4}$ oz. .50 \$1.90 \$ 6.50 \$24.00

Danish Giant Snowball or "Dry Weather." Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better $\frac{1}{4}$ oz. .65 2.10 7.50 28.00

DANISH PERFECTION. A new strain of Snowball Cauliflower with more leaves to cover the head, which does away with tying to some extent. Heads very solid and without protruding leaves. Matures a week later than Snowball $\frac{1}{4}$ oz. .60 2.00 6.75 25.00

Erfurt Early Dwarf. Much like Snowball, but not quite so good $\frac{1}{4}$ oz. .60 1.80 6.00

Large Algiers. Large, rather loose heads, but of fine quality 1.35 3.50

CARROTS

Carrots often prove very profitable. They do best on muck or soil of that nature, although very good crops are raised on sandy loam. For late fall market the seed is usually sown in June or first of July. If small carrots for bunching are wanted the seed may be sown as late as August 1st in the north and later further south. It requires 2 to 4 lbs. of seed for an acre, depending upon how far the rows are apart.

Chantenay is considered the best variety for market or table use. The roots grow very smooth and not too long. Danvers Half Long grows an inch or two longer and yields more, so is preferred when the crop is to be used for feeding stock. Coreless or Amsterdam Forcing is of fine quality for table use.

Oxheart makes a nice short, thick carrot for bunching. Early French Short Horn is very short, but grows rapidly and is best for forcing. All of these varieties are deep orange in color.

Chantenay

Danvers

CHANTENAY. The most popular market variety, six inches long, Oz. $\frac{1}{4}$ lb. lb.
stump-rooted, deep orange color and very smooth \$.10 \$.25 \$.80

DANVERS' HALF LONG. Grows about 8 in. long, deep orange color all through; not quite as smooth as Chantenay. A heavy cropper and valuable for stock feeding and market10 .25 .75

CORELESS or Amsterdam Forcing. The carrots grow about 5 in. long and 2 in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core, hence the name "coreless as the small core is inconspicuous. This is a beautiful carrot for bunching or to market in bulk15 .40 1.40

OXHEART or Guerande. Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange, yellow, and of fine quality10 .25 .75

CARROTS—Continued

MASTODON or WHITE VOSAGE. Large, white carrot for stock feeding. Immense yielder. 8 to 10 inches long	Oz. \$.10	¼ lb. \$.20	lb. \$.70
Long Orange. Roots a foot long, yields large crops	.10	.25	.75
Early French Short Horn. For forcing. About 3 inches long; very early	.15	.35	1.25

CELERY

An ounce of seed will produce about 8,000 plants. It requires 20,000 plants to the acre. For very early planting the seed should be sown in February or first of March. For late crop the seed is sown in the open ground as early as possible. Great care must be taken not to cover the seed too deep. More failures to get the seed to germinate are due to this cause than any other.

Two-thirds of all the celery grown is Golden Self-Blanching, or "Paris Golden," which is the same thing. This is the most profitable variety for market up to January. For later use, the green varieties should be used. Easy Blanching blanches quickly and can be marketed early. Franch's Success is one of the very best for late winter market and keeps longest.

Strains of Golden Self Blanching. There are now several distinct strains of this variety. A prominent French grower developed a year or two ago a new strain which is quite different from the old type. The stalks grow taller and resist blight much better. Some growers, however, prefer the old strain with shorter and heavier stalks. On account of its rapid growth the new strain is undoubtedly the best type for the early crop, but for storing there seems to be a difference of opinion among growers. We rather think the new strain will keep just as well as old if properly grown.

Golden Self Blanching From Harris' Seed.

Golden Self Blanching Celery

There are so many different strains and types of this popular variety that it is important that the grower should get the one best suited to his requirements.

Old Strain. The stalks are of medium height, large around and with heavy, well developed heart. Blanches very easily and is solid and crisp. We are able this year to offer "proved seed" from which a crop of celery has been raised, so we know just what the strain is. We have never seen a better stock. The stalks are of strong healthy growth with well developed hearts. The stems are thicker and more solid than usual with this variety. We can strongly recommend this **proved seed** as we know just what it is—the best stock we have seen in years. The seed is of strong germination. **Oz. 95c; ¼ lb. \$3.25; lb. \$12.00.**

New Strain. Grows much more rapidly than the old strain and resists blight much better. The stalks are taller and the heart not quite as heavy. When planted 8 to 10 inches apart in the row the stalks develop properly, forming a good heart which they do not do if planted too close together. For early crop this is superior to the old strain. For the late crop we advise setting the plants rather late so the celery will not get too large. **Oz. 95c; ¼ lb. \$3.25; lb. \$12.00.**

A large celery grower of Fulton, N. Y., writes January 9, 1923:

"Our celery raised from your seed (New Strain) excelled anything raised in this country. We took to market some measuring three feet high without roots, weighing 42 lbs. per dozen. _____'s agent was here and bought four heads of celery from your seed to put in their seed house to show. It was the talk of Syracuse, Fulton, and Syracuse where I marketed it."

A. J. Best.

EASY BLANCHING or Sanford Superb Celery

We find this new celery a first-class variety to follow Golden Self Blanching. It is of the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. It is superior to the Golden Self Blanching in keeping qualities. We have kept a lot of it in good shape until spring, and set it out for seed. We can now offer seed of a superior strain of this variety grown by C. E. Garrahan, a well-known celery grower. The celery has very heavy stalks, blanches easily, and is perfectly firm and solid. We highly recommend this strain. Oz. 95c; $\frac{1}{4}$ lb. \$3.25; lb. \$12.00.

FRENCH'S SUCCESS CELERY

We do not know of any green celery quite equal to French's Success. The stalks are of good length, very thick, firm and brittle. When grown from our selected seed there are no soft stalks.

The keeping qualities of this celery are remarkable. It is not difficult to keep it in good condition until March. It is a better keeper than Columbia, and heavier, more uniform and more solid than Winter Queen and Giant Pascal.

Beware of seed of this variety offered by other dealers. We know by our trials that all of it is far inferior to our own original strain, which we got from Mr. French himself over 15 years ago. Crop of seed very short again this year. Oz. 90c; $\frac{1}{4}$ lb. \$3.00; lb. \$11.00.

	Oz.	$\frac{1}{4}$ Lb.	Lb.
GOLDEN ROSE, or Rose-Ribbed Self Blanching. Like Golden Self-Blanching tinged with red. Keeps better and is of finer flavor..	.90	\$ 3.00	\$
White Plume. We have a very fine, pure strain of this popular celery	.25	.75	2.75

Delicacy. A new variety of Celeric of medium size and of fine quality	.30	.85	3.25

ALPHA—The Earliest Sweet Corn

The Alpha corn has proved to be the earliest in our trials for the past two seasons. These trials included all the very earliest kinds we could get together. The Alpha was ready to pick three days before any other kind except one very small black corn of no commercial value.

The ears are 5 to 6 inches long with 8 rows of large white kernels and has a white cob. The stalks are only 4 to 5 feet high.

Owing to its extreme earliness the Alpha will undoubtedly prove a profitable corn for the market grower. With this variety it will be perfectly possible to get corn on the market 4 days to a week earlier than any one else and get the high prices that are always paid for the first corn. Lb. 30c; 12 lbs. (peck) \$2.80; 25 lbs. or more 22c per lb.

HARRIS' MAMMOTH WHITE CORY

There are many varieties of Sweet Corn claimed to be the earliest. We have tried every kind we could get the seed of and planted it side by side with our strain of Mammoth White Cory on the same day. No kind has matured earlier except the new "Alpha" which has smaller ears.

Harris' Mammoth White Corn has good, large ears 6 to 7 inches long, 10 to 12 rowed, pure white and of fine appearance.

The stalks are small but often carry two large ears which grow quite low down. This corn is "Mammoth" only in the sense that it has much larger ears than the old Cory Corn.

It is a profitable corn to raise because it gets on the market before any other kind having ears equally large, and always brings the highest price. It has sold as high as \$1.00 per doz. on the Rochester market. Seed of our own raising, selected for earliness and large 10 rowed ears. Lb. 25c; 12 lbs. (peck) \$2.00; 25 lbs. or more 15c per lb.

WHIPPLE'S EARLY SWEET CORN

A Wonderful New Early Variety

Looks like Evergreen and is as early as Cory.

We introduced this corn in 1919 and claimed it has the largest ears of any corn that matures so early. We have received many very flattering reports from gardeners who tried it and we are quite sure that all who grew it last season were more than pleased with it.

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures **very early**—as early as Pocahontas and Red Cory, **much earlier** than Kendel's Early Giant, Metropolitan, Golden Bantam, etc. The quality of the corn is far superior to Evergreen, the corn being sweet, tender and delicious.

A profitable market variety—Think of putting on the market a big 16-rowed ear of corn as early as others are bringing in Cory! It sells on sight and at top prices. Fully half the stalks have two large ears even when planted quite close together. The yield therefore is immense.

In our opinion it is **the most valuable early Sweet Corn ever produced**, and will take a prominent place in the list of varieties best suited for the market grower.

The ears are 7 to 8 inches long and very large around, as they have 14 to 18 rows of good size kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

We offer seed of our own growing of highest quality. Get headquarter seed. It is very highly bred and the true originator's strain. **Lb. 28c; 12 lbs. (peck) \$2.25; 25 lbs. or more 18c per lb. EARS, \$9.00 per 100 ears.**

What Gardeners Say About Whipple's Early Corn.

"Your Whipple's Early corn is a fine thing. It proved as early as Corn and the ears are twice as large."—Eugene Thayer, Bowie, Md.

"The Whipple's Early Corn which we planted May 14th had some fine ears fit for use July 4th." Mrs. A. Duke, Muskogee, Okla.

"Your Whipple's Early Corn can't be beat. The Golden Bantam corn stands high, but after I make one sale of Whipple's and they try it, it is clear sailing. I shall plant more next year. I am much pleased with the seeds I received from you." Cassander Gilmore, Raynham, Mass.

"I was pleased with Whipple's Early Sweet Corn. Had ears 74 days from planting that weighed one and one-half lbs. each." Fred Griffin, Hamburg, N. Y.

"I planted two quarts of your Whipple's Sweet Corn last year along side of Early Fordhook and at the same time and on the identically same ground, and believe me, I was surprised when the Whipple Corn with its big ears was ready to pull the same day the Fordhook corn was. And such a contrast in the size of the ears of corn! It will certainly make friends for you wherever you sell it."—L. W. Humpton, Coatesville, Pa.

"I take this opportunity to congratulate you and Mr. Whipple upon Whipple's Early Sweet Corn. With me it has ripened about with Golden Bantam, but it is eared much heavier, and the ears are twice as large. The quality is equal to Country Gentleman and is two or three weeks earlier. It is the best all-around corn that I have tried for the Northern latitudes."—L. E. Johnson, Richfield Springs, N. Y.

Whipple's Yellow Golden Bantam
Photograph showing comparative size

BUTTERCUP SWEET CORN

The Sweetest Corn Grown

The market in many cities now demands a **yellow** Sweet Corn of the Golden Bantam type. The Bantam is small and does not yield well. In the Buttercup we have a corn that resembles the Bantam very closely, but has **ears that are much larger** and **yields much more** and it matures at the same time as Bantam. The quality in our opinion is fully equal to Bantam or any other corn. It evidently contains much more sugar and is therefore **sweeter** than other varieties.

The demand for yellow Sweet Corn is increasing every year and it always brings higher prices in the larger cities than white corn.

After trying practically all the different kinds of yellow Sweet Corn now being offered we are convinced that Buttercup and Whipple's New Yellow are superior to any other varieties that mature as early.

The Buttercup is really an improved Golden Bantam with larger ears which mature just as early. It always sells better than the small ears of Bantam.

The ears are 8 to 10 in. long and have 8 to 12 rows. Many stalks produce two ears.

We offer seed of our own raising. It is of a "thoroughbred" strain and the germination is perfect. **Lb. 25c; 12 lbs. (peck) \$1.70; 25 lbs. or more 15c. EARS, \$8.00 per 100 ears.**

WHIPPLE'S YELLOW Sweet Corn

Earlier than Bantam and as large as Evergreen

This is a wonderful early **yellow** corn that has proved very profitable to raise for market. The ears are very large, 8 to 9 inches long, having 12 to 16 rows of deep kernels. They mature ready for use **three to four days earlier** than Golden Bantam. The quality of the corn is very fine, but possibly not quite as sweet as Buttercup.

Its large size and earliness should make it a most profitable market variety. The ears are of the same type as Whipple's Early and mature at about the same time. **Lb. 35c; 12 lbs. (peck) \$3.00; 25 lbs. or more 24c per lb. EARS, \$10.00 per 100 ears.**

"The Whipple's Yellow corn I got of you last spring was ready ahead of Bantam and both were planted the same day. I would have made money by buying all my corn from you." Jack O'Brien, North Troy, N. Y. Oct. 3, 1923.

"It may be of interest to you to state that I planted Whipple's New Yellow corn on May 19th and picked good full ears on July 24th. Quality delicious. A wonderful variety for the market gardener."—H. W. Leggett, Schuylerville, N. Y., July 25, 1922.

"It may interest you to know we got our first corn (Whipple's New Yellow) on July 1st. Beats anything in our experience."—R. H. Rennie, Chicago, Ill., July 4th, 1921.

Buttercup Sweet Corn

GOLDEN BANTAM—Special Strain

We can offer this season an improved strain of Golden Bantam having longer ears and more vigorous stalks than the usual strain. The ears are strictly 8-rowed and average nearly 2 inches longer than the usual type. This strain has been carefully bred for years to get a larger ear and more vigorous stalks, and we are sure gardeners will find it superior. Lb. 25c; 12 lbs. (peck) \$1.70; 25 lbs. or more 14c per lb.

SWEET CORN

Our sweet corn is very carefully cured and is of strong vitality. The percentage that germinates in our tests is marked on the label of each lot we sell, so the planter can tell just how thick to plant. It requires 12 to 15 lbs. to plant an acre.

Note: 25 lbs. of one variety will be supplied at the 100 lb. rate. A bushel weighs 40 to 50 lbs., depending on the variety.

Harris's Perfection Cucumber (Photograph)

CUCUMBER—Harris' Perfection Cucumber

This variety has been selected for many years with the idea of getting a cucumber as near perfection as possible. The fruit is long, straight, smooth and handsome. The color is deep green with clear white rays on the blossom end. The cucumbers retain this deep green color longer than any kind we know of. The fruit will average over a foot long when matured and many reach 15 inches in length.

The vines are vigorous and resist blight well. This is a White Spine variety and is one of the very best of this class. The fruit matures as early as the short kinds and are far superior to them. Our seed is so carefully bred that practically every cucumber is of almost perfect shape. See price below.

CUCUMBER

	Oz.	¼ lb.	lb.
Harris' DOUBLE YIELD Pickle. A new kind that yields double the number of pickles produced by other varieties. For description see our general catalogue, page 5. Pkt. 12c	.65	\$	\$

Broad-Leaved Batavian Endive

ENDIVE

Seed can be sown any time from early spring to August 1, in the Northern States. For late fall market sow in July. Sow in rows 18 to 20 inches apart and thin the plants to a foot apart. To blanch tie up the leaves with soft cord or raffia. It requires about 20 days to blanch thoroughly in cool weather. Green Curled is the most popular market variety. Broad-leaved Batavian is also in good demand. "French Endive" is Witloof Chicory and is quite distinct from True Endive, and its culture is entirely different.

GREEN CURLED. Large leaves finely cut and curled	Oz.	1/4 lb.	lb.
Moss Curled. Finely cut and curled; not so large as Green Curled ..	\$.12	\$.35	\$ 1.10
Broad-leaved Batavian (Ecarolle)	.12	.35	.110

"FRENCH ENDIVE"—WITLOOF CHICORY

This is a crop that can be grown during the winter in a dark place and at very little expense. There is a growing demand for "French Endive" in the markets of all the large cities.

Directions for culture will be sent to any one interested, without charge.

Seed. Pkt. 10c; oz. 35c; 1/4 lb. 90c; lb. \$3.25.

Black Beauty Egg Plant

EGG PLANT

Black Beauty produces fruit of good size and of deep purple color, and is the most popular market variety. New York Improved is very similar, but the plant grows a little taller and the fruit matures a little later. In sowing Egg Plant seed care should be taken not to cover it more than $\frac{1}{4}$ in. deep, and to keep the temperature from 70 to 90. The plants require considerable room and are usually set in 3 in. pots. They are often injured by bugs, to prevent which it is a good plan to spray with arsenate of lead and lime even before the plants are set in the open ground. Plant in rows 3 feet apart each way.

This is a profitable crop where there is a good market. The plants do best on rather light, rich soil. In the North the seed should be sown in March and the plants set out the last of May. An ounce of seed will produce about 2,000 plants.

	Oz.	$\frac{1}{4}$ lb.	Lb.
BLACK BEAUTY. Large, handsome, dark purple fruit, almost black. It matures early and is the most popular variety	.35	\$ 1.00	\$ 3.75
New York Improved (Thornless.) The standard variety	.35	1.10	4.00
Extra Early Dwarf Purple. Very early and prolific, but not as large as above kinds	.40		
Early Long Purple. Fruit 10 to 12 inches long, not over 2 to 3 inches through, deep purple and of high quality. Matures early and is very prolific	.35	1.00	3.75
Florida High Bush. Much like N. Y. Improved but the plant is taller and holds the fruit up better	.35	1.00	3.75

FENNEL

Florence. Forms a large bulb which is excellent when cooked. Oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.40.

KALE

Used principally in the late fall and early winter. Sow seed in July and treat like cabbage.

Dwarf Curled Green. Very finely curled leaves of dwarf spreading growth. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 85c.

Tall Scotch Curled. Grows two feet tall with very finely curled leaves. A very hardy variety. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 85c.

Siberian. Called also Sprouts. Dwarf spreading broad leaves curled only on the edges. Color blue gray. Very hardy. Oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 90c.

Kohl Rabi—White Vienna

KOHL RABI

	Oz.	$\frac{1}{4}$ lb.	Lb.
Large Green. Used for stock feeding	.12	\$.35	\$ 1.00
Early White Vienna. The best variety for table use, very early and can be used 10 weeks after sowing	.12	.40	1.25
Early Purple Vienna. Differs from White Vienna only in the color of the bulb which is light purple	.12	.40	1.25

LETTUCE

For forcing May King is an excellent head variety. It will stand more heat than Big Boston, and matures quicker. Big Boston is fine for cool houses and cold frames. For a curly leaf lettuce Grand Rapids is by far the most popular. Grows rapidly and the leaves stand upright so can be planted close.

For summer planting in the open ground, Iceberg, Unrivaed, Salamander, Holyrood Hot-Weather and Deacon are good. Big Boston is most largely grown on muck land for both early and late crops.

Romaine or Cos Lettuce can be grown both in the hothouse and open ground and is in good demand in many markets. Trianon Self-Folding is the largest kind; the heads often being nearly a foot high. Eclipse is shorter and forms the head earlier. Both do best in cool weather.

Harvesting Harris' Selected Big Boston Lettuce on the Gardens of J. H. Snyder, Sodus, N. Y.

SELECTED BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. Heads uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this country are using Harris' Big Boston and find it equal if not superior, to any other stock obtainable at any price. Oz. 12c; ¼ lb. 35c; lb. \$1.15; 5 lbs. or more \$1.10 per lb.

Mr. F. M. Hull, Red Creek, N. Y., writes:

"The Big Boston Lettuce I received from you this spring was the best I ever had. Only one plant not true to name in the whole piece.

Mr. Roy L. Smith, a large grower at Cato, N. Y., writes:

"I sowed two acres with your Big Boston last fall and every one that saw it said it was the finest piece of lettuce they ever saw. It was the finest I ever raised."

Mr. M. E. Kerwin, an extensive lettuce grower of South Lima, N. Y., writes:

"Your Big Boston lettuce has done fine for me. About 50 members from Cornell University were in South Lima one day last summer and they told me your lettuce was the nicest stock they had seen there."

"Your Big Boston was the finest I ever grew. There was no lettuce like it on the market."—I. Kreigsmann, Elizabeth, N. J.

	Oz.	¼ lb.	lb.
MAY KING. A very early head lettuce for open ground or forcing..	.12	\$.35	\$ 1.20
HOLYROOD HOT-WEATHER. Large, firm heads. Stands well in the summer and is very slow to run to seed	.12	.35	1.25
BIG BOSTON. The most largely used lettuce especially for muck land. We offer a special selected strain	.12	.35	1.15
SALAMANDER. Large heads, light green; stands well in hot weather	.12	.35	1.20
UNRIVALED. Like Big Boston, but lighter green and without the red tinge; stands hot weather better and heads earlier. A fine variety. Called also "Long Lost," "Green Leaved Big Boston," "Cabbage Head Giant," and a dozen other names	.15	.40	1.50
Deacon. Large heads, smooth leaves, of finest quality	.12	.35	1.25
WONDERFUL or NEW YORK. Very large firm heads; almost as large as Wakefield cabbage. We have a very fine strain. This is the "Iceberg" lettuce grown on the West coast and shipped to our Eastern Market during the winter	.18	.50	1.90
ICEBERG. One of the best for open ground. Large, firm heads, curled and blistered leaves. Our strain is very fine	.15	.40	1.50
Prize Head. Early, crisp, loose heads of good quality; leaves curled and tinged with reddish brown	.12	.35	1.25
Mignonette. Small, very compact heads tinged with brown	.12	.40	1.50

LETTUCE—Continued

	Oz.	¼ lb.	lb.
CRISP AS ICE. Forms compact, medium, small heads very early. The heads are tinged with deep brown and the quality is very fine	\$.12	\$.35	\$ 1.25
Grand Rapids. Of upright growth. Curled leaves. Valuable for forcing. Our strain is very fine	.12	.35	1.20
Golden Queen. Compact head, light color. A popular variety for forcing	.15	.40	1.50
Boston Market. A small heading lettuce used for forcing	.12	.35	1.20
Hanson. Large heads of fair quality	.12	.30	1.10
TOMHANNOCK. Very large, loose heads, curly leaves striped with brown	.12	.35	1.20
Black Seeded Simpson. Loose heads of curly leaves; grows very large	.12	.30	1.10
Early Curled Simpson. Earlier and smaller than the Black Seeded ..	.12	.35	1.20
COS or ROMAINE, Trianon Self-Folding. Used for forcing and open ground. Large, long heads of fine quality	.12	.35	1.25
Cos, Eclipse. Forms compact heads very early. A valuable variety for forcing as well as the open ground. Every plant makes a nice firm head	.15	.40	1.50
Chicken Lettuce. Forms a very large bunch of leaves which are excellent for chicken pasture	.12	.30	1.10

LEEK

Large American Flag. The most popular variety	.12	.40	1.50
--	-----	-----	------

MUSKMELON or Cantaloupe

Nearly every market wants a different muskmelon. Rocky Ford and Paul Rose are probably the most popular in many markets, and are excellent melons for shipping. Admiral Togo is an improved variety of this class and better than the older types. Hoodoo or "Hearts of Gold" is another good one of this class; small, firm, heavily netted and deep yellow flesh of high quality. Osage is in demand in some cities and is a large, handsome, round melon of high quality and good for near-by markets. Bender's Surprise is now the most popular of the large melons. It is very firm and keeps a long time after picking and is of the highest quality. Emerald Gem is small, but very early and of high quality. It is not good for shipping.

IRONDEQUOIT. Large, round, netted; yellow flesh. A fine strain of the well-known Surprise melon	Oz. \$.20	¼ lb. \$.55	lb. \$ 2.00
BENDER'S SURPRISE. A grand melon. See description on next page 20. Seed of our own growing	.55	1.75	6.50
EXTRA EARLY KNIGHT. A very early melon popular in markets where known. The fruit is of medium size, oval in shape and well netted. The flesh is green and is sweet and of good flavor	.15	.40	1.50
"HEARTS OF GOLD" (Hoodoo). A fine melon for shipping in baskets—medium in size, round and well netted. Flesh orange yellow and of high flavor. Very firm and holds up well for a long time after picking	.12	.35	1.25
ADMIRAL TOGO. Oval, netted; flesh yellow and of finest flavor. Very prolific, medium size, slightly larger than Rocky Ford	.12	.35	1.35
Miller's Cream, or Osage. Oval, dark green, slightly netted, yellow flesh of fine flavor. A very fine melon and a profitable one for market	.12	.35	1.25
OSAGE, Perfected Strain. A very carefully bred strain of Osage melon which is 10 days earlier than the old type and the fruit is almost as large and is more uniform in shape and quality. This is a fine melon and will prove very profitable on account of its earliness and fine quality	.20	.50	1.75
EMERALD GEM. Small, round, green, slightly netted, yellow flesh of finest flavor; very early and prolific	.15	.35	1.25
PAUL ROSE. Fruit of medium size, oval netted and very firm. Flesh orange yellow and of high quality. A valuable melon for market and shipping	.12	.35	1.25
ROCKY FORD (Netted Gem.) Small, oval, netted, green flesh	.10	.30	1.10
DELICIOUS GOLD-LINED ROCKY FORD. A very fine improved strain of the Rocky Ford melon. The flesh is green but has a yellow tinge about the seed cavity making it very attractive when cut	.15	.45	1.60
Hackensack. The standard, large netted, green flesh melon	.10	.30	1.10
Honey Dew. A melon that will keep two months after picking. It is shipped to eastern cities from California and the Southwest where it does well. It does not succeed here	.15	.40	1.50

BENDER'S SURPRISE MUSKMELON

A Grand Melon for both Shipping and the Home Market

We have raised muskmelons for many years, but have never seen a melon quite equal to the Bender in fine flavor, size and keeping qualities combined.

Mr. Bender's melons have a wide reputation for high quality among clubs and the best hotels. The seed was never offered by any dealer for a long time, but the public now has an opportunity to get seed that is of the **genuine Bender** strain which we have grown and selected for five years.

The melons are round to oval in shape, ribbed and partly covered with netting. The flesh is very thick, especially so at the blossom end so that the melons rarely crack.

When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 lbs. and more. We have had melons that weighed 16 pounds.

A valuable point about these melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We offer seed of our own growing and from melons of the highest quality. The quantity of this high grade seed is quite limited. We advise early orders. **Oz. 55c; ¼ lb. \$1.75; lb. \$6.50.**

WATERMELON

Harris' Earliest, Cole's Early, and Ice Cream or Peerless are valuable for the North because they will ripen before frost.

For places south of New York City, Tom Waston and Kleckley Sweets are better because they are longer and of high quality.

	Oz.	¼ lb.	lb.
HARRIS' EARLIEST. The earliest large melon of good quality.			
One of the best varieties for the North	\$.10	\$.25	\$.75
Halbert Honey. Long, dark green, flesh red and of finest quality.			
Medium early	.08	.20	.70

FORDHOOK FANCY. Finely cut and curled leaves, very ornamental	.12	.25	.75
Giant Southern Curied. Very large	.08	.20	.60
White London. The seed is used for flavoring pickles	.08	.15	.45

Yellow Globe Danvers Onion

ONIONS

For market and storage a globe-shaped, yellow onion is usually preferred, although for some markets a red onion sells best. Yellow Globe Danvers is nearly round. Ohio Yellow Globe is slightly flattened on the bottom, and Southport Yellow Globe is more pointed at the bottom, forming an oval shape rather than perfectly round. These are the typical shapes for the different strains as they are supposed to be, but of course there are some onions of all these shapes in any of these different strains. The Danvers and Ohio strains are a little earlier than the Southport and are the most popular varieties. Round Yellow Danvers is flatter than the Globe and matures earlier. Prizetaker is larger than the Globe Danvers and a little later.

Ebenezer or "Japanese" is a flat yellow onion that keeps the year around. It is especially valuable for raising large onions early in the summer from sets.

For pickles Early Barletta is best. The seed should be sown very thick so the onions will be small and the yield heavy.

Special prices will be quoted on large lots of Onion Seed. Please write us stating what kinds and quantities you want.

Note.—Our Onion seed is all tested for germination before it is sent off, and the per cent that germinates is marked on the label. We should be glad to give results of our tests to any grower who is interested.

	Oz.	¼ lb.	lb.
YELLOW GLOBE DANVERS, Harris' Selected Strain. Our seed of this variety is grown from very carefully selected bulbs, and will be found much superior to the seed usually sold. It produces bulbs of uniform globe shape, deep yellow color and with small tops	\$.15	\$.40	\$ 1.50
OHIO YELLOW GLOBE. A very fine strain of Yellow Globe Onion especially suited to muck land. The onions are globe shaped, but a little more flattened on the bottom than the Globe Danvers or Southport	.15	.40	1.50
ROUND YELLOW DANVERS. Earlier and flatter than Globe Danvers	.15	.40	1.45

ONIONS—Continued

SOUTHPORT YELLOW GLOBE. A very fine strain of this onion grown from perfect globe-shaped bulbs of deep yellow color ...	Oz. .15	$\frac{1}{4}$ lb. \$.45	Lb. \$ 1.60
PRIZETAKER. Large yellow onion of very handsome globe shape and mild flavor. Does not keep as well as Danvers. Fine for fall market	.20	.55	2.10
SOUTHPORT RED GLOBE, Harris' Special Selected. Large, perfectly round, deep red onion; keeps well and is the best red variety. Our seed is raised from carefully selected onions and will be found very fine	.18	.50	1.75
Early Large Red. Large, flat, red onion. Matures early and yields well	.15	.40	1.50
LARGE RED WETHERSFIELD. Very large deep red, flat	.15	.40	1.50
Southport White Globe. The largest and finest white onion. The seed we offer is of extra fine strain	.25	.70	2.50
EBENZER or "Japanese." A very fine yellow onion that will keep all winter and is of mild, pleasant flavor. The onions are flattened and of a light yellow. The seed is used principally for raising sets, which when set out the following spring produce large, handsome ripe onions in July. Our seed was raised by one of the original growers and is the genuine Ebenezer	.30	.85	3.25
Australian Brown. Will keep the year around; matures early. The onions are flattened, of a golden brown color, and of fine quality	.18	.40	1.35
WHITE PORTUGAL, or SILVER SKIN. Flat, white onion of mild flavor, early. Excellent for pickling	.20	.60	2.25
EXTRA EARLY BARLETTA. The best small white onion for pickling	.18	.50	1.75
GIANT GIBRALTAR. This is the largest Spanish onion which is sold in our markets. The onions are almost perfectly round or globe shaped, bright yellow and of very mild flavor. They grow very large, often weighing a pound or more. Matures rather late and should have plenty of room to develop. Genuine imported seed	.30	.85	3.25
Mammoth Silver King. Very large white, flat onion used principally for bunching while green. Seed sown in the spring will make large bunching onions in July and August	.20	.55	2.10

ONION SETS

White sets make the whitest and most attractive bunching onions. The Yellow sets, especially the Ebenezer, are best to produce large dry onions for early use.

Harris' Model Parsnip—Every One a Model. Photographed Exactly as Dug.

HARRIS' MODEL PARSNIP

We have been improving the old Hollow Crown parsnip by careful selection for some years until we have obtained a very fine strain which we call "Harris' Model." The shape is shown in the photograph above.

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance.

Our seed is grown from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold. Oz. 12c; ¼ lb. 30c; lb. \$1.10.

From a very extensive gardener.

"We sold our crop of Harris' Model parsnips to-day. They were the finest we ever grew. They sold for \$1.25 per bu. unwashed at wholesale. I cannot say enough in praise of them. Leonard W. Brotzman, Binghamton, N. Y. April 10, 1923.

	Oz.	¼ lb.	lb.
Long Hollow Crown. Long, smooth roots	\$.10	\$.25	\$.65

PARSLEY

DWARF PERFECTION. The finest parsley we have ever seen. Oz. ¼ lb. lb.

Dark green and very finely curled\$.12 \$.30 \$ 1.10

Champion, or Triple Moss Curled. Finely curled deep green leaves .. .10 .25 .75

Extra Double Curled. Not quite as fine as the above08 .20 .70

Plain. Leaves not curled08 .20 .70

Turnip-rooted or Hamburg. Form large roots that are cooked as a vegetable. We have a fine variety called "Thick Sugar" with smooth white roots of the best quality. Far superior to the common variety in both shape and quality10 .20 .70

Hundredfold Pea—Natural Size

PEAS

The very earliest peas like Alaska and Surprise have small pods, but Thomas Laxton Acquisition and Gradus are only three or four days later and have much larger pods. Laxtonian and Hundredfold are two or three days later than Gradus and have still larger pods. Little Marvel matures a day or two earlier than Sutton's Excelsior and produces wonderful crops, but the pods are not as large, being about the size of Nott's Excelsior.

Duke of Albany and Alderman are strains of Telephone, but are better than the old type, having darker colored peas and large pods. Heroine is later and has long pods and is very prolific. Prizewinner is a little later than Telephone, has short heavy vines and very large deep green pods, and is one of the best late varieties.

Horsford's Market Garden is a great bearer, but the pods are rather small for market.

A Valuable New Pea—ACQUISITION

This new pea is as early as Thomas Laxton and Gradus and has much larger pods. This makes it a profitable market variety. The vines are 2½ ft. high and produce large crops. See price below.

NOTE—*We are now selling peas by weight only. A pound is about 1 pint, 15 lbs. equal a peck and 56 lbs. a bushel by measure. Any quantity over 30 lbs. will be supplied at the 100 lb. rate.*

Early Varieties

	Lb.	15 lbs.	(Bu.) 56 lbs.	100 lbs.
Alaska. Very early, small pods. 2 ft.	\$.22	\$ 2.25	\$ 7.84	\$14.00
ACQUISITION. A very profitable variety. See description above	.28	2.85	10.08	18.00
Surprise or Eclipse. Very early and of fine quality. Small pods. Very prolific. 2 ft.	.25	2.55	8.96	16.00
First and Best. Extra early; pods three inches long, well filled. This is the earliest variety. 2 ft.	.25	2.40	8.40	15.00
THOMAS LAXTON. Very early; medium-sized pods. One of the most profitable market peas. Our stock is very fine	.25	2.70	9.52	17.00
GRADUS, or Prosperity. Large pods, early and highest quality. 2 ft.	.25	2.70	9.52	17.00
LAXTONIAN (Pioneer). A dwarf pea with pods as large as Telephone and matures as early as Little Gem. Pods and peas dark green. 18 in. high	.28	2.85	10.08	18.00
HUNDREDFOLD. Much like Laxtonian but yields more. Vines very strong and sturdy, 16 to 18 in. high. Pods 4 in. long and deep green. A very fine early dwarf pea	.28	2.85	10.08	18.00
Blue Bantam. Practically the same as Hundredfold	.28	2.85	10.08	18.00
LITTLE MARVEL. Very prolific, matures a day or two later than Nott's Excelsior and has pods a little larger; vines stocky. 15 in. high	.25	2.55	8.96	16.00
Nott's Excelsior. Early, dwarf vines, medium-sized pods; one of the best early dwarf peas. 15 in. high	.25	2.55	8.96	16.00
SUTTON'S EXCELSIOR. Larger pods than Nott's and only a day or two later. A valuable variety. 18 in. high	.25	2.55	8.96	16.00
McLean's Little Gem. The standard early dwarf pea. 15 in. high	.25	2.55	8.96	16.00
American Wonder. Very dwarf, early, 15 in. high	.25	2.55	8.96	16.00

Medium and Late Varieties

Advancer. Pods three inches long, well filled; a heavy yielder. Vines two feet tall	.25	2.40	8.40	15.00
Dwarf Champion. Good large pods 4 in. long, vines 2½ ft. and very profitable. One of the best late peas with short vines	.25	2.40	8.40	15.00
Horsford's Market Garden. Very prolific; medium size pods; late. 2 ft.	.25	2.40	8.40	15.00
Carter's Daisy or Dwarf Telephone. Similar to Telephone except that the vines grow only 20 inches tall	.25	2.55	8.96	16.00
DUKE OF ALBANY. An improved Telephone with dark green pods well filled; called in some localities "Dark Telephone." 4 ft.	.25	2.55	8.96	16.00
ALDERMAN. Pods larger than Telephone and much better filled. One of the very best, if not the best pea of the Telephone class. Pods often 6 in. long and of deep green color. 4 ft.	.25	2.55	8.96	16.00
Telephone. Our seed is of a superior strain, having large pods of very deep green. 4 ft.	.25	2.55	8.96	16.00
HEROINE. Very fine pea with long pods well filled. A profitable late market sort of best quality. 2½ ft.	.25	2.70	9.52	17.00
Champion of England. The standard tall, late pea. 4½ ft.	.25	2.55	8.96	16.00
IMPROVED STRATAGEM. Large pods, stocky vines, 2 ft. tall. A very fine late market pea of highest quality ..	.25	2.55	8.96	16.00
PRIZEWINNER. A new variety of the Stratagem type, but is much more productive. Vines 2½ ft. tall, very sturdy and produce good crops of large deep green pods. A very fine late market pea	.25	2.70	9.52	17.00
White Marrowfat. Tall, late, large pods. 4 ft.	.20	2.00	6.72	12.00
Mammoth Melting Sugar. Edible pods, 4 ft.	.25	3.00		

“HARRIS’ EARLIEST” SWEET PEPPER

THE EARLIEST AND MOST PROLIFIC SWEET PEPPER

Gardeners who have trouble getting peppers that will produce a good crop of fruit early enough for the Northern States should try **Harris’ Earliest**.

**“Harris’ Earliest” Sweet Pepper (Photograph
Actual Size)**

Seed of our own growing. $\frac{1}{4}$ oz. 25c; oz. 75c; $\frac{1}{4}$ lb. \$2.75; lb. \$10.00.

WHAT MARKET GROWERS SAY

“Harris’ Earliest peppers have been a veritable gold mine and I have never been able to make any other variety produce in this locality.” L. E. Johnson, Richfield Springs, N. Y.

“Your seeds have done the best for me of any I ever bought, but you do not seem quite strong enough in your recommends for the peppers. I have picked 18 good sized peppers at one picking from a plant of Harris’ Earliest and still left a lot of small ones on the plant. They have got it over any pepper I ever saw for yield and flavor.” W. J. Ingersoll, Angola, N. Y.

“The Harris’ Earliest pepper I got of you is the earliest pepper I have ever seen. At this date, July 24th, the plants are loaded with large fruit and also full of bloom.” John H. Withey, Skaneateles, N. Y.

A New Big Pepper—HARRIS’ EARLY GIANT

This is the earliest and most prolific **very large** pepper with which we are acquainted. The fruit is immense, measuring $4\frac{1}{2}$ inches high and 4 inches across, deep green turning to bright red. The plants are medium tall and produce large numbers of peppers.

We have counted more than a dozen large ones on a plant at one time and many small ones. Planted side by side with such varieties as Chinese Giant, Ruby King, Giant Crimson, etc., Harris’ Early Giant produced twice as many peppers and they matured two weeks earlier.

(Continued on next page)

This pepper has been raised for a good many years here in the north, seed being saved only from plants that produced large peppers early and in liberal quantities.

Although not as early or prolific as Harris' Earliest, yet the peppers are so much larger that gardeners will find this a most valuable variety on that account.

We should advise gardeners to raise a few this season to see how valuable a variety it is. We are sure it will be found the earliest and most prolific **very large** pepper.

We can offer the seed in packets only this season. Another year we hope to raise a more liberal supply of seed. **Pkt. (100 seeds) 25c; 5 pkts. \$1.00.**

PEPPERS

Giant Crimson, Magnum Dulce and Chinese Giant are the largest peppers, but do not bear as well as the varieties with smaller fruit, such as Neapolitan and Harris' Earliest which are also earlier. Of the two, Giant Crimson is more prolific and earlier than Chinese Giant with just as large fruit. Ruby King produces well and is a very large pepper, but somewhat late for the northern parts of the country. Harris' Earliest has fruit as large as Bull Nose and is earlier, more prolific and the fruit is mild and sweet. Of the pungent or "hot" peppers, Giant Cayenne is one of the best.

	Oz.	$\frac{1}{4}$ lb.	lb.
HARRIS' EARLIEST. See description preceding page	\$.75	\$ 2.75	\$10.00

Large Bell or Bull Nose. Early, medium size, quite prolific, somewhat pungent or "hot"	.30	.80	3.00
Cayenne. Long, slim and very "hot"	.30	.90	3.50
GIANT CAYENNE. Much larger than the old Cayenne and equally pungent. Fruit 3 to 4 in. long and $1\frac{1}{2}$ in. through at top coming to a point at the bottom. Very early and prolific	.40	1.40	4.50
OSKOSH. The largest and best yellow pepper we know of. The fruit before it ripens is large deep green, smooth and regular in shape, thick walled and very sweet. Medium early and prolific. One of the best to produce green peppers for market..	.80	3.00	
Golden Dawn. A fine yellow pepper. Large and sweet	.45	1.50	
PIMIENTO. Very thick, heavy fruit of medium size pointed at the bottom. Very deep green when young, bright red when ripe. Of mild flavor. Matures rather late, but plants are quite prolific	.45	1.25	4.50
SQUASH OR TOMATO. Small round peppers the shape of a tomato. Very prolific and the peppers are mild and sweet	.35	1.00	3.75

POTATOES

Disease-Free Seed. "Certified" potatoes are supposed to have not over 5% diseased plants on first inspection. Our potatoes are raised from seed taken from the best hills only and the crops are carefully inspected and the few diseased plants are at once removed. Some of our crops showed practically no diseased plants at all, being much better than crops from ordinary certified seed in the same field. (See our general catalogue.)

About Shipping.—The potatoes are shipped in sacks holding 150 pounds ($2\frac{1}{2}$ bu.) or barrels holding 180 lbs. (3 bu.) We can usually ship safely by the middle of March, but not before, except to the Southern States.

If seeds and potatoes are ordered, please state on the order whether the seeds are to be held to go with potatoes, or to be sent at once, and the potatoes later when it is safe to ship them. We cannot safely ship potatoes until the last of March.

Prices subject to change.—The prices here quoted are subject to changes of the market after March 1st and to our acceptance on receipt of order. Lowest prices will be quoted by letter at any time. Please state the kinds you are interested in.

Varieties.—Of the early kinds Early Six Weeks, Early Ohio and Bliss' Triumph are the earliest and are light pink in color. Irish Cobbler is a very early white potato. Green Mountain is medium late and of finest quality. Golden Rural or Rural Russet is one of the best late varieties.

Bliss' Triumph

Early Ohio

BLISS' TRIUMPH. One of the very earliest varieties and a heavy yielder. The potatoes are round and of a handsome deep pink color. Certified seed	\$ 2.85	Sack Bu. 150 lbs. \$ 6.50
IRISH COBBLER. The most popular round white early potato. Our stock is very fine, being pure and true to name. Grown from hill-selected and certified seed and practically disease-free	2.75	6.25
Irish Cobbler. Second size. All good potatoes for planting	...	5.00
Early Ohio. The standard extra early potato. Light pink, nearly round with blunt ends. Certified	2.75	6.00
Early Six Weeks. Of the Early Ohio class and resembles that variety closely. One of the very best extra early kinds. Grown from hill-selected pedigree seed	3.25	7.50
Spalding Rose. Large round potatoes of the Rose type. A heavy yielder but later than Early Rose	2.75	6.00
GREEN MOUNTAIN. A standard late potato of finest quality. Yields well in many localities, notably in New England. Crop inspected and certified and all diseased plants removed. Very fine seed	2.75	6.00
NUMBER 9. One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease. Grown from certified seed and disease-free	2.00	4.75
Heavy Weight. One of the heaviest yielding yet produced. Round to oblong, medium shallow eyes, purple sprouts, pure white skin. Very vigorous grower. Grown from certified seed, disease-free	2.00	4.75
GOLDEN RURAL or RURAL RUSSET. One of the very best late potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome, round, white potatoes. Disease-free seed from fields that yielded nearly 250 bu. per acre	2.00	4.75

Potatoes in barrels.—We can ship potatoes in wooden barrels holding 3 bu. (180 lbs.) if so ordered. The price of a barrel is three times the single bushel price. For example, if the bushel price is \$2.00, a barrel would be \$6.00.

PUMPKIN

SMALL SUGAR or Pie Pumpkin. Small, round, deep yellow and of good quality. Early and prolific	Oz. \$.08	¼ Lb. \$.25	Lb. \$.75
WINTER LUXURY. A little larger than Small Sugar, netted skin, light yellow, and of very fine quality. Keeps well	.10	.25	.80
Mammoth Potiron, or King of Mammoths. Immense fruit, often weighing over 100 lbs. Color salmon pink, flesh deep yellow. Easily raised and a valuable pumpkin for market or stock feeding	.15	.40	1.30
Large Cheese. Flattened, ribbed, mottled green and light yellow ..	.08	.20	.60
Connecticut Field, or Big Tom. The common yellow field pumpkin ..	.08	.20	.55

RHUBARB or PIE-PLANT

	Oz.	¼ Lb.	Lb.
Myatt's Linnaeus. Early, large red stalks	\$.12	\$.30	\$ 1.15
Rhubarb Roots. Good roots \$6.00 per 100			

RADISH

For forcing, Early Scarlet Globe and Harris' Special Scarlet Forcing are the most popular the former is oval in shape while the latter is round. Both grow very rapidly. Crimson Giant Globe is similar to Early Scarlet Globe, but grows larger and requires a little more time to mature.

For the open ground, Early Scarlet Globe is excellent. Earliest Scarlet White Tipped is very handsome and resembles French Breakfast, which is more oval in shape. Icicle is a fine long, white radish, smooth and of fine quality.

Philadelphia White Box is round, grows rapidly and is excellent for forcing and open ground White Strasburg, Giant White Stuttgart and Delicacy are large, white radishes for summer and fall use.

Winter radishes are sown in July or August and used in the fall and winter. Chinese Rose is the best red variety. Long Black Spanish is also of fine quality.

	Oz.	¼ lb.	lb.
Earliest Scarlet Globe Short-leaf. Called also "Red Rocket," "20 Days" and "Startle." Oval shaped, of very rapid growth and good for forcing	\$.12	\$.35	\$ 1.25
EARLY SCARLET GLOBE. The most popular variety for forcing and outdoor culture. Oval to round in shape, very bright red, flesh white, firm and crisp. Our seed is very fine, being grown from transplanted roots; especially good for forcing	.10	.25	.90
Early Scarlet Globe. Not grown from transplanted roots. Good for open ground but not recommended for forcing	.08	.20	.60
CRIMSON GIANT GLOBE. Very large forcing radish. Not so early as Early Scarlet Globe, but larger and stands longer without becoming pithy	.10	.25	.90
Harris' Special Scarlet Forcing. Round, deep red, small leaves and extremely early. Valuable for forcing and the open ground ...	.12	.30	1.00
EARLIEST SCARLET WHITE-TIPPED. (Sparkler). The radishes are round and are white on the bottom and part way up the sides. This is the finest strain of white-tipped radish	.10	.25	.90
PHILADELPHIA WHITE BOX. A fine pure white, round, or ball-shaped radish for forcing or open ground. The radishes are handsome and of the best quality	.10	.25	.90
DELICACY. A very fine white radish for summer or late fall use. Of globe shape, pure white and of fine quality. One of the best white summer varieties	.10	.25	.85
ICICLE. Long, slim, white radish of very rapid growth. The best long white radish for forcing in open ground	.10	.25	.75
Lady Finger or White Vienna. Long, slender white radish of fine quality. Excellent for forcing and open ground	.10	.25	.70
Long Scarlet Short Top. Excellent long radish for open ground ...	.10	.25	.85
Chartier. Grows 4 to 5 inches long, bright red with white tips	.10	.25	.90
French Breakfast. Oval, with white tips; early	.10	.25	.80
White Strasburg. Large, long, white summer radish	.10	.25	.85
Giant White Stuttgart. Very large, round or top shaped white summer radish	.10	.25	.90

Winter Varieties of Radish

Sow in August and store in moist sand for winter market.

	Oz.	¼ lb.	lb.
Chinese Rose. About 5 inches long, red skin, with white flesh of best quality	\$.10	\$.25	\$.80
Long Black Spanish. Skin black, flesh white and very solid, 6 inches long	.10	.25	.75
Black Spanish Turnip. Round or turnip-shaped roots	.10	.25	.85
California Mammoth White. Very large white radish; keeps well..	.10	.25	.85

SQUASH—Summer Varieties

The Giant Crookneck, usually sells best in market, although Mammoth White Bush Scallop (called "Cymling" in the South) is in demand in many cities. The fruit is saucer-shaped and scalloped around the edge.

Italian Vegetable Marrow, called also "Cocozelle" (Italian—"Zucchetta nana de Milano"), is now in much demand. The fruit is long, mottled, dark and light green, and grows on a bushy plant without runners. It is used when half grown.

	Oz.	¼ lb.	lb.
Early Bush Crookneck. Most popular summer squash. Very early..	\$.12	\$.40	\$ 1.10
GIANT BUSH CROOKNECK. Larger than the old Bush Crookneck and equally early	.12	.30	1.10
Mammoth White Bush Scallop. Large, flat, white fruit	.12	.30	1.00
Early Yellow Bush Scallop. Similar to the White, except in color ..	.12	.30	1.00
ITALIAN VEGETABLE MARROW. Long, mottled green fruit of high quality	.12	.30	1.10

Improved Warted Hubbard Squash

SQUASH—Fall and Winter Varieties

Boston Marrow and Prolific Marrow are the first to ripen and are excellent for market in the fall, but do not keep as well as the later varieties like Hubbard, Delicious and Quality, which can be kept all winter if put in a dry place where they will not freeze.

The Improved Warted Hubbard grows larger than the true Hubbard, and the shell is covered with lumps or "warts" making a squash that sells well in market, but we do not think the quality is quite as good as the true old Hubbard.

Delicious and Quality are both finer squashes than Hubbard, but do not yield quite as much and are profitable for market only where there is a demand for squash of high quality rather than size and appearance.

	Oz.	¼ Lb.	Lb.
QUALITY. A new winter squash, small in size, but of very fine quality—better than any squash we know of	\$.30	\$.70	\$ 2.50
Boston Marrow. Popular fall squash, deep orange color. Used principally for canning and pies	.08	.20	.70
Prolific or Orange Marrow. Very similar to above, but earlier. A valuable squash for fall market	.08	.20	.75
Essex Hybrid. Large, flattened at ends, thick flesh of high quality	.15	.40	1.40
DELICIOUS. Smaller than Hubbard, but of finer quality	.12	.30	1.25
HUBBARD—True. Smooth, dark green fruit of high quality	.12	.30	1.10
Improved Warted Hubbard. Larger and more warted than the true Hubbard	.12	.30	1.10
Golden Hubbard. Deep orange yellow	.12	.30	1.10
BLUE HUBBARD. A very large squash of the Hubbard type but the color is blue-gray. The shell is very hard and the squash keep a long time	.15	.40	1.40

SALSIFY or VEGETABLE OYSTER

Mammoth Sandwich Island. The largest and best variety	.20	.60	2.20
--	-----	-----	------

SORREL

Improved Broad-leaved	.12	.40	1.40
------------------------------------	-----	-----	------

Photograph showing two rows of King of Denmark Spinach between Victoria and Long Seasons. Note that both the latter have run to seed while the King of Denmark is still in good condition and

KING OF DENMARK SPINACH

Those who have tried this new Spinach know it is a wonderful improvement over all other kinds. It not only grows fast and produces a large yield, but it stands **two weeks** longer before running to seed. The leaves are broad, heavy, dark green, and somewhat blistered like a Savoy cabbage. The remarkable thing about it is that it stands so long before putting up a seed stalk. This is a great advantage to the gardener, as he does not have to sell the whole crop within a few days as with the other kinds.

The King of Denmark spinach resembles Long Season, but grows **much larger** than that variety and stands **ten days or two weeks** longer.

A letter worth reading—from Prof. W. A. Orton, U. S. Department of Agriculture, Washington, D. C., June 17, 1920.

"I write to compliment you on the spinach, King of Denmark which you introduced this year. I find it of very exceptional merit as a long-standing spinach under our spring conditions. Planted March 25th on fairly fertile Norfolk sandy loam it was still in good condition on June 10th when the last was cut, with leaves covering nearly two feet of row, very tender and of superior quality. Two seedings of Savoy spinach on the other hand have come up and gone to seed during the interval.—W. A. Orton, Pathologist."

Price of King Denmark Spinach for 1924. **Oz. 10c; ¼ lb. 18c; lb. 55c; 10 lbs. or more 50c per lb.**

SPINACH

Norfolk or Bloomsdale Savoy-leaf has deep green blistered leaves, but runs to seed very quickly. It is used principally for fall sowing for which it is one of the best kinds. Long Season has similar leaves and stands much longer. The new "King of Denmark" is similar to Long Season, but is larger, stands up better and remains without running to seed longer. Viroflay is a very rapid grower and has long, somewhat pointed leaves not as thick as Eskimo, which does not grow quite so rapidly, but stands a longer time and is darker green. Giant Crumpled Leaf grows very rapidly, has large broad round leaves, somewhat crumpled or blistered and is one of the best early kinds for spring sowing. Victoria has round, very dark green leaves and stands well without running to seed. For wintering over, we recommend Eskimo, Norfolk Savoy-leaf and Long Season, all of which are hardy.

KING OF DENMARK. Stands longer in hot weather than any other kind. 10 lbs. or more 50c per lb.	Lb. \$.55
ESKIMO or GIANT THICK-LEAVED. An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over. 10 lbs. or more, 30c per lb. ...	.35
VICTORIA. Round, thick leaves, deep green and blistered. An excellent kind for spring sowing. 10 lbs. or more at 25c per lb.	.30
Long Season. Very deep green, round thick leaves. Stands a long time without running to seed. 10 lbs. or more 35c per lb.	.40

SPINACH—Continued

GIANT CRUMPLED LEAF. Very large rounded leaves blistered or crumpled. Grows rapidly and yields more than most other kinds and is ready earlier. A valuable variety. 10 lbs. or more 28c per lb.	Lb. \$.30
Norfolk Savoy-leaf. Round, blistered leaves. One of the best for Fall sowing. 10 lbs. or more 25c per lb.	.30
VIROFLAY. Very large pointed leaves, rapid grower and comes on very early. 10 lbs. or more 25c per lb.	.30
Long Standing. Round, deep green leaves. 10 lbs. or more, 30c per lb.	.35
NEW ZEALAND. Not a true spinach. Valuable for summer. Oz., 10c; ¼ lb. 25c	.80

Harris' Thoroughbred Tomatoes

We have for years made a special point of raising high quality tomato seed. We raise the seed on our own farm and practice the most careful breeding methods to improve the strains.

Harris' Special EXTRA EARLY Strain of EARLIANA TOMATO

We are quite sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the **earliest** and **smoothest** and **best colored** stock of Earliana obtainable. This is a good deal to say, but we have tried all the best strains of Earliana and cannot find one that is quite equal to our own stock either in earliness or quality. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

This special strain of Earliana is not only extremely early (there is no tomato earlier), but the fruit is perfectly smooth, very solid and firm and is well colored right up to the stem. The vines are more vigorous and healthy than most strains of this variety.

Gardeners find this is a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings almost as much as the later varieties.

We offer seed of our own growing at Moreton Farm. It is Northern Grown as we are on the north border near Lake Ontario. Ounce 40c; ¼ lb. \$1.25; lb. \$4.50.

"I had a test of different strains of Earliana last year and yours was by far the best, beating the Langdon strain in a big way." D. C. Paschke, North East, Pa.

"I have used your strain of Earliana tomato for five years in competition with several others and can find none to compare with it. It comes earlier and the later ones round up nicely for the factory men." W. T. Chaffy, Marion Sta., Md.

HARRIS' SUCCESS TOMATO

We have been "breeding up" this tomato for years and now have a strain that we consider superior to any other main crop variety with which we are acquainted.

The fruit is practically perfect—large, well colored, smooth, firm, and of exceptionally fine quality, being quite free from acidity when cooked. In addition it yields more than any other kind we raise. Ripens almost as early as John Baer and Bonny Best and is larger, more solid and yields more.

Gardeners and canners will find this a most satisfactory main crop tomato. **Oz. 40c; ¼ lb. \$1.10; lb. \$4.00.**

JOHN BAER

We have improved our stock of John Baer so that it is now even better than when first introduced. We know of no other kind quite equal to it for second early or main crop.

The fruit is large, smooth, deep red, and colors right up to the stem.

We regard this variety as one of the best medium early tomato for market or canning.

Seed of our own growing from very choice fruit. **Oz. 40c; ¼ lb. \$1.10; lb. \$4.25.**

"I have grown John Baer tomatoes ever since it was introduced and think more of it each year and I want to say that the seed I got of you last year was the best I ever had. I sold over \$1,000 worth from 2,200 staked plants, and tomatoes were plentiful and very cheap in this section of the country." W. O. Kindig, Medina, Ohio. March 3, 1922.

BONNY BEST TOMATO

This tomato is much like the John Baer. Our selected strain has very smooth, handsome, bright red fruit of good size and well colored. Ripens almost as early as Earliana.

The fruit does not often crack and we did not see a single one affected with black rot in a large field we had growing at Moreton Farm.

One good point about this tomato which is not possessed by the John Baer is that the stem comes off the fruit when picked, so does not injure other tomatoes when they are packed together.

We are sure there is no finer strain of Bonny Best tomato than the seed we are offering this season. It was saved from very carefully bred plants and practically every fruit was of perfect color and shape. **Oz. 40c; ¼ lb. \$1.10; lb. \$4.25.**

EXTRA EARLY EARLIANA (Harris' Special Strain.) See opposite **Oz. ¼ lb. lb.**

TOMATOES

The very earliest tomatoes are never quite as large and well colored as the later varieties, but Earliana of a carefully selected strain is the nearest perfect of any really early variety we know of. **Harris' Extra Early Earliana** is earlier than the old strain, and also colors better. John Baer is about a week later than Earliana, ripening with Bonny Best and has slightly larger fruit than that excellent variety. Chalk's Jewel is a little later and larger. Success is the heaviest yielding variety, quite similar to Stone, but ripens earlier.

Of the pink varieties, June Pink is the earliest and resembles Earliana, except in color. Early Detroit is a little later, but has large, smooth, well-colored fruit. Globe is a few days later and the fruit is as round as an apple. Ponderosa is very large, but irregular and does not color well around the stem and is not suitable for market. Trucker's Favorite is large, smooth and matures medium late.

page	Oz.	¼ lb.	lb.
JOHN BAER. Large, smooth fruit, colors perfectly even bright red all over. Does not crack, very prolific. One of the best second early kinds	.40	1.10	4.25
BONNY BEST. Very early, large, smooth and bright red with no green around the stem	.40	1.10	4.25
June Pink. Very similar to Earliana except as to color, which is pink like Beauty	.35	.90	3.50
EARLY DETROIT. A pink variety with smooth, evenly colored fruit of good size. A very fine pink tomato	.35	.95	3.75
Chalk's Early Jewel. Medium early, smooth and well colored	.30	.80	3.00
SUCCESS. Very fine main crop variety. Smooth, well colored and solid	.40	1.10	4.00
STONE. There is nothing finer than a first-class strain of Stone, but it ripens rather late for the most northern parts of the country. Seed of our own growing at Moreton Farm	.40	1.10	4.00
New Dwarf Stone. Plants like Dwarf Champion with fruit like Stone, very prolific and a valuable variety	.40	1.10	4.00
Trucker's Favorite. Large, smooth, pink, medium late	.35	.90	3.25
Imperial. One of the best pink tomatoes for main crop	.35	.90	3.50

GLOBE. (Livingston's). As round as an apple; color deep pink. One of the very best varieties of this color	Oz. .40	$\frac{1}{4}$ lb. 1.10	lb. 4.25
PONDEROSA. Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium early; does not color very well	.45	1.25	4.75
Dwarf Champion. Early, pink, medium size, dwarf plant	.30	.80	3.00
Livingston Beauty. Large, late, pink, very smooth	.35	.90	3.50
Red Cherry. Very small red fruit in clusters	.40	1.10	
Yellow Plum. Plum shaped, small, yellow fruit	.40	1.25	
Red Plum. Small plum shaped fruit	.40	1.00	4.50
Red Pear or Fig. Small pear-shaped red fruit	.40	1.10	
GOLDEN QUEEN. Large, smooth yellow fruit	.40	1.00	
Ground Cherry or Husk Tomato. Yellow fruit in husks	.40	1.00	
Superb Salad. Small, very smooth red fruit suitable for serving whole in salads. Very prolific	.40	1.00	
White Beauty. A pure white tomato of fine quality, smooth and handsome	.60		

TURNIPS

Both the Purple Top and White Milan grow rapidly and are the first to mature. The next is Purple Top Strap-leaf, which is very similar but a little later. Purple Top White Globe is a little later but a much better turnip and is the most popular variety for market. White Egg is a handsome white-egg shaped turnip, and Golden Ball a nice, smooth, round, yellow variety which grows rapidly. Snowball is round in shape like Golden Ball, but snow white. Yellow Stone is larger and more flat, while Yellow Aberdeen is globe-shaped and grows to a large size, but is better suited for feeding stock than for market.

EARLY WHITE MILAN. Very early, flat, white turnip	Oz. \$.10	$\frac{1}{4}$ lb. \$.25	lb. \$.75
EARLY PURPLE TOP MILAN. The earliest purple top turnip, very fine	.10	.25	.75
PURPLE TOP WHITE GLOBE. Like Strap Leaf, but round instead of flat. Very fine fall turnip	.08	.15	.50
Purple Top Stap-leaf. White, purple top, flat, very rapid grower ..	.08	.15	.40
Snowball. Pure white, round as a ball; early, with small tops	.08	.20	.60
White Egg. Pure white, globe shape	.08	.20	.60
GOLDEN BALL. Round, smooth, yellow. A fine turnip	.08	.20	.60
Cowhorn. Long, white, green top	.08	.15	.45
Yellow Stone. Very firm, round, light yellow, medium early	.08	.20	.60
Yellow Aberdeen. Large, round yellow turnip; very firm and keeps a long time	.08	.20	.60

RUTA BAGAS OR SWEDE TURNIPS

Macomber. A white purple top Swede of very fine quality for table use	Oz. \$.25	$\frac{1}{4}$ lb. \$.75	lb. \$ 2.50
PERFECTION SELECTED SWEDE. A fine selected strain of purple top yellow ruta бага. Grows large but is very smooth and of fine grain. The best yellow ruta бага for market	.08	.20	.65
Imperial Purple Top. Large, yellow, smooth and a heavy yielder ..	.08	.18	.60
White Sweet or French. A good White Swede turnip with green top ..	.08	.20	.65

HERBS FOR FLAVORING, Etc.

Basil. Used for flavoring soups and sauces. Plant about 18 in. high. \$	.15	\$.35	\$ 1.25
Borage. Often used for bee pasture. Sow in spring in the open ground	.25	.75	2.50
Caraway. Hardy biennial seeding the second year after sowing. Sow in spring or fall	.08	.20	.50
Coriander. Sow in the spring in the open ground	.08	.20	.60
DILL. Used for flavoring cucumber pickles, etc.	.08	.20	.55
SWEET MARJORAM. Easily grown from seed sown in the open ground in the spring	.15	.40	1.50
Fennel (Sweet.) The leaves are used for flavoring. Easily raised ..	.10	.25	.90
Lavender (true)	.40		
Rosemary. Hardy perennial	.60		
SUMMER SAVORY. Easily grown by sowing seed in the open ground in the spring. Plant grows about a foot high with small, narrow leaves, which are dried on the stems and used for seasoning	.15	.40	1.25
SAGE, Broad-leaved. When once started will last for years. Should be in every garden. Sow in the open ground and thin the plants to six inches apart	.25	.80	3.00

THYME. Very largely used for flavoring. The plant will survive the winter if given a little protection	Oz.	¼ lb.	1 lb.
Wormwood. A medical herb used largely for planting in poultry yards for chickens to feed on	\$.60	\$ 2.00	\$
	.15	.50	1.75

VEGETABLES, PLANTS, ROOTS, ETC.

Orders for plants will be entered at any time and the plants sent when ready or when it is time to set them out. 500 plants will be supplied at the 1000 rate.

	100	1000
ASPARAGUS ROOTS, Washington. New rust-resistant strain bred up by the U. S. Department of Agriculture. We offer strong 1-year-old plants	\$ 2.00	\$15.00
HORSE RADISH. Common variety. Sets	1.00	7.50
New Bohemian. ("Maliner-Kren.") Superior to common Horse Radish. Earlier, grows faster and yields better	1.25	10.00
RHUBARB ROOTS, Myatt's Linnaeus. Large divided roots	6.00	
SAGE. Holt's Mammoth. The best sage. Dozen, \$1.00	7.00	
BRUSSELS SPROUTS. Ready June 20. Danish Improved	.60	3.50
CABBAGE PLANTS. Early transplanted plants, ready April 15-May 15. Well hardened in cold frames and will stand considerable frost. Early Jersey Wakefield, Golden Acre, Copenhagen Market	1.25	10.00
Field grown plants, ready middle of June. All leading varieties	.40	2.50
CAULIFLOWER. Early transplanted plants ready May 1. Snowball	1.25	
Field grown plants ready June 20. Snowball and Danish Giant	.75	4.50
CELERY. Early greenhouse grown plants ready May 15th. Golden Self Blanching	1.00	8.00
Field grown plants, ready last of June. Varieties: Golden Self Blanching, White Plume, French's Success. Giant Pascal, Easy Blanching	.50	2.50
PEPPERS. Strong transplanted plants, ready last of May. Ruby King, Harris' Earliest, Giant Crimson, Giant Cayenne	1.75	15.00
PEPPERS. Untransplanted Plants. Ready April 15 to May 15. Same varieties named above. Weight packed for mailing 100 1 lb.; 1000 4 lbs.	.60	4.50
TOMATOES. Ready May 10 to June 15. Strong transplanted, well-hardened plants. Extra Early Earliana, John Baer, Bonny Best, Success, Stone, Dwarf Champion, Ponderosa (pink)	1.50	13.00
TOMATOES. Untransplanted Plants. These are taken direct from the seed bed and should be set in frames and allowed to grow for two weeks or more before setting in the field. They are strong, stocky seedlings 3 to 4 in. high. Ready April 10 to May 15th. Same varieties as named above. Weight packed for mailing 100 1 lb.; 1000 5 lbs.	.50	3.50

New Washington Asparagus

This improved strain of asparagus was obtained by selecting a few superior plants and isolating them so the seed would not be "crossed" with any other inferior types. By separating the best of these seedlings and raising seed from them a very fine strain has been produced.

All of the work was done under the direction and at the expense of the U. S. Department of Agriculture so the strain has been called "Washington."

We have found this variety far superior in size, vigor and resistance to rust. In fact it is the only kind in which we could ever find any distinct improvement. It will certainly pay any one who is setting out asparagus to use the Washington. We set out some one-year-old roots in the spring of 1922 and last year (1923) had shoots as large as a man's thumb.

We are convinced that properly raised one-year-old roots are superior to older roots for transplanting.

We have raised asparagus roots on a large scale for 30 years and never had finer roots than we have this season. See price above.

One of Our Asparagus Roots

HARRIS' FLOWER SEEDS

Our flower seeds are maintained at the same high standard of quality as our vegetable seeds, as we appreciate that the floral grower, as well as the vegetable grower, is dependent upon the quality of the seed he sows. Our flower seeds are always tested for germination as well as tried out in our extensive trial-grounds. This gives us the opportunity of selecting those varieties we consider the best. Many of these varieties are grown here on Moreton Farm where our customers are always welcome to come and inspect our stocks and look over our trials.

For a more complete list and descriptions see our general catalogue which will be mailed to you in February.

NOTE.—We do not furnish less than Trade Packets. Fractions of ounces are supplied as under:

Royal White Aster

Extra Early Express

This is the earliest good Aster and one of the most profitable to raise for cut-flowers. The flowers are large and fluffy of the Crego type and come into bloom a little earlier than Queen of the Market. They should be started inside by March 1st.

	Tr.	Pkt.	Oz.
W1141—WHITE	\$.25		\$2.00
W1142—ROSE	.25		2.00
W1143—LIGHT BLUE	.25		2.00
W1144—DARK BLUE	.25		2.00
W1140—MIXED COLORS	.20		1.75

Queen of the Market

The standard second early Aster and on this account often the most profitable to raise for market. The flowers are full double and of medium size. For good results the plants should be started very early in the greenhouse or hot-beds and set out as early as possible.

	Tr. pkt.	oz.
W1201—WHITE	\$.15	\$.80
W1202—SHELL PINK	.15	.80
W1203—BRIGHT ROSE	.15	.80
W1204—LAVENDER	.15	.80
W1205—PURPLE	.15	.80
W1200—MIXED COLORS	.10	.60

Royal or Early Branching

An early Aster to follow up Queen of the Market. The flower and plant resemble the Late Branching in form and size but blooms fully two weeks earlier. These are the earliest of the large flowering.

	Tr. pkt.	oz.
W1301—WHITE	\$.20	\$1.00

W1305—PURPLE	.20	1.00
W1300—MIXED COLORS	.15	.75

ASTERS

This year we are adding to our list a few new Asters that are of interest to the cut-flower grower, such as the Extra Early Express, Mammoth Branching White, Imperial Salmon and Ball's White. The large fluffy types named in the order of their blooming season are as follows:—Extra Early Express, Moreton Pink, Crego, and Ostrich Feather. The Late Branching or plain types named in their order of blooming are as follows:—Queen of the Market, Royal, Imperial Salmon, Heart of France, Peerless Pink, Late Branching, Ball's White, Mammoth Branching White and American Beauty.

Good Asters are one of our specialties and you will note that we are able to reduce the price this year. At the same time our quality is of the best.

Please order by number, as it will help us in filling your order.

Peerless Pink Aster

Crego Asters

This is the large fluffy flower so much admired. The fluffy mass of long twisted petals make an aristocratic flower, that is the admiration of every one. We have a splendid strain of this type, the plants being robust growing and the stems long.

	Tr. Pkt.	Oz.
W1401—WHITE	\$.15	\$.75
W1402—SHELL PINK	.15	.75
W1403—ROSE	.15	.75
W1404—LAVENDER	.15	.75
W1405—PURPLE	.15	.75
W1406—LAVENDER PINK	.15	.75
W1400—MIXED COLORS	.10	.60

Peerless Pink

W—1066. Although one of the older varieties, Peerless Pink is still unsurpassed as an all-around dependable light-pink. We have an exceptionally good strain of our own growing. The color is a delicate shell-pink, deep enough to have character yet soft enough to be dainty. The very mammoth, full double flowers are borne on great long stiff stems that keep the flowers well up off the ground. Its season is just a few days earlier than Late Branching. Tr. Pkt. 15c; oz. \$1.00.

American Beauty Asters

A handsome late blooming variety from California. The plants are of the branching type, unusually vigorous and produce a profusion of very large, full flowers on exceedingly long, strong stems. The flowers have incurved petals, making them almost globed shaped. This is the latest blooming Aster and will prove very fine for late cutting.

	Tr. Pkt.	Oz.
W1802—SHELL PINK	\$.25	\$1.50
W1803—ROSE	.25	1.50
W1804—LAVENDER	.25	1.50
W1805—PURPLE	.25	1.50
W1800—MIXED COLORS	.20	1.00

ASTERS—Continued

Moreton Pink

W1025—Without question this is the finest bright-pink Aster. The color is a deep cerise, like the Paul Neyron Rose, and the only Aster of this color. The flower is of the Rochester or Crego type, very full double, with long twisted petals. This is one of our Moreton Farm specialties and florists are finding it an indispensable variety. Tr. pkt. 20c; oz. \$2.00.

Mammoth Branching White

W1621—A new very late white that is almost late enough to go with the American Beauty. It is an exceptionally late and large-flowering strain of Late Branching White. The plants are non-lateral and the stems are long and stiff, holding the blooms off of the ground during the late fall rains. Tr. pkt. 20c; oz. \$2.00.

Imperial Salmon

W1335—A remarkable florists' color and one of those odd colors that is very attractive at present. It is a sort of flesh color suffused with salmon. Stock somewhat variable. Tr. pkt. 25c; oz. \$2.50.

Sensation

W1059—A popular red Aster of medium size. Tr. pkt. 20c; oz. \$1.00.

Late Branching Asters

Ball's White

W1061—A large white Aster that has been quite popular with the florists. The flowers are so full double that the petals appear to be heaped on top of each other. The stems are stiff and non-lateral, and the season the same as Late Branching. Tr. Pkt. 20c; oz. \$1.50.

Heart of France

W1078—There is no Aster of recent introduction that has enjoyed such widespread popularity as Heart of France. It is the best 'red' Aster for cutting and the most popular for the plant trade. The color is a bright garnet-red and the flowers are large and double on tall robust branching plants. Tr. pkt. 20c; oz. \$1.00.

Late Branching Asters

The standard mid-season to late variety blooming a little later than Cregos, and remaining in flower a long time, the plants carrying a wealth of bloom until late in the fall. The flowers are very large and have broad incurved petals and show no yellow centers. The plants are of branching habit and carry the flowers on long stems, often reaching two feet high. We offer very fine strains of the most desirable colors.

	Tr. pkt.	oz.
W1601—WHITE	\$.15	\$.75
W1602—SHELL PINK	.15	.75
W1603—ROSE	.15	.75
W1604—LAVENDER	.15	.75
W1605—PURPLE	.15	.75
W1606—CRIMSON	.15	.75
W1607—PEACH BLOSSOM	.15	.75
W1600—MIXED COLORS	.10	.50

ASTERS—Continued

Ostrich Feather Asters

Ostrich Feather Asters

This is a new type of Aster that is proving a remarkable florists' flower. The flowers are much like the Crego, only not so flat. Many of the petals are very narrow and long, giving the flower a feathery appearance that is quite distinct. The flowers are larger than any other variety and the plants are much larger and more vigorous than Cregos. Their season is between Crego and Late Branching, and as only a few flowers mature at a time they carry through a long season.

	Tr. pkt.	oz.
W1701—WHITE	\$.20	\$1.00
W1702—SHELL PINK	.20	1.00
W1703—ROSE	.20	1.00

W1707—CRIMSON	.20	1.00
W1700—MIXED COLORS	.15	.75

Choice Mixture of Tall Varieties

W1000—This is a very carefully made mixture of the different varieties of tall branching Asters, such as Royal, Late Branching, King, Crego, Ostrich Feather, etc. It is well balanced as to colors and types. There are no dwarf or poor sorts in it. It is not a mixture of discards, and it is all fresh seed of good germination. Tr. pkt. 10c; oz. 50c; lb. \$10.00.

Ageratum

Splendid bedding plants for spring sales. These are the two best varieties.

w2015—Swanley Blue. Large growing with clear blue flowers. Tr. pkt. 15c; oz. 50c.
w2011—Little Blue Star. Very dwarf. Flowers bright blue. Tr. pkt. 35c; oz. \$3.00.

Alyssum

w2021—Little Gem. (Carpet of Snow). Dwarf, compact growing white for borders. Oz. 45c; ¼ lb. \$1.25.
w2020—Maritimum. (Sweet Alyssum). Sweet scented and large flowering. Oz. 20c; ¼ lb. 60c.

Asparagus (Ornamental)

These are the varieties so highly prized by the florists, surpassing the most delicate ferns in elegance of habit and delicacy of spray. Our seed is a fine strain of the correct type.

It is very easy to raise Asparagus from seed by sowing in flats and keeping at a temperature of about 60°.

w2092—Plumosus Nanus. Greenhouse-grown seed. New seed ready last of January. 50c per 100 seeds; \$4.00 per 1000 seeds; \$18.00 per 5000 seeds.
w2090—Plumosus Nanus. Open-air Seed. New Crop seed ready in March. 30c per 100 seeds; \$2.25 per 1000 seeds; \$9.75 per 5000 seeds.
w2091—Sprengeri. New crop ready Feb. 1st. \$1.00 per 1000 seeds; \$4.50 per 5000 seeds; \$8.00 per 10,000 seeds.

Begonia

w2130—Semperflorens. A fine everblooming bedding or house plant easily grown from seed. Mixed Colors. Tr. Pkt. 25c.

Calendula

Calendula are profitably raised for both cut flowers and for the spring bedding-plant trade. We have two splendid strains of our own growing that are far superior to the ordinary strains.

	Oz.	¼ lb.
w2201—Orange King Harris' Special. Large double deep orange	\$.30	\$.80
w2202—Lemon Queen Harris' Special. Large bright yellow, very double	.30	.80
w2203—Prince of Orange	.20	.50
w2204—Sulphur Yellow	.20	.50
w2200—Mixed Colors	.10	.35

Candytuft

Easily grown for cutting during the spring. Also sown late in autumn for earlier spring cutting.

	Oz.	¼ lb.
w2271—Empress. The popular florists' white	\$.30	\$1.00
w2275—Giant Hyacinth-flowered. A select strain with immense spikes of white	.40	1.25
w2272—Rose Cardinal	.30	1.00
w2273—Crimson	.25	.75
w2270—Mixed Colors	.15	.50

Carnation

w2300—Giant Marguerite. Double Mixed Colors. The most desirable sort for out door blooming, and of good demand as spring bedding plants. Tr. pkt. 20c; oz. \$1.25.

Centaurea

CYANUS or Double Bachelor's Buttons. The new double Cornflowers or Bachelor's Buttons are proving very profitable as cut-flowers. We have a superior strain that is quite double and clear colors. One ounce will sow 150 feet of row.

	Tr. Pkt.	Oz.
w2321—White. Without the blue eye	\$.15	\$.75
w2322—Rose. Pink shades	.15	.65
w2325—Blue. A favorite color. ¼ lb. \$1.50....	.15	.50
w2320—Mixed Colors. ¼ lb. \$1.00	.10	.35

W2350—GYMNOCARPA. This is the finely cut, white-leaved "Dusty Miller" so much used for edging and in porch boxes. Seed sown in January or February will make nice large plants for early spring. Tr. Pkt. 10c; oz. 60c.

W2351—CANDIDISSIMA. The popular broad leaved "Dusty Miller." The leaves are smooth and much whiter than those of Gymnocarpa. Also a slower grower, but preferred by many, especially for porch boxes and vases. Tr. Pkt. 25c; oz. \$1.75.

Coleus

w2510—Extra choice large-leaved mixture. Richly colored foliage plants for groups on lawns, ribboning and pot culture. Universally used in porch boxes and conservatory. Easily raised from seed the first season. Our mixture is the best we can obtain. Tr. pkt. 50c.

Cobea Scandens

w2572—Blue. A good blue-flowered vine to grow for the spring plant trade. 30c per oz.

Cardinal Climber

w2315—Popular annual climber that sells well. Tr. pkt. 25c; oz. \$1.75.

Castor Oil Bean (Ricinus)

	Oz.	¼ lb.
W2500—ZANZIBARENSIS. Gigantic leaves and very tall	.15	.50
W2501—RED SPIRE. A new variety of medium height with bronze leaves and bright crimson clusters of seed burrs. Exceedingly showy	.35	1.25

Cyclamen

The choicest of winter-blooming house plants and in great demand every winter. As the price is always high, they are sure to be a profitable crop to grow. If grown without check they should bloom freely in 15 months from sowing. Our seed is the best obtainable.

w2491—Giant White. Mammoth pure white flowers. One of the best sellers. \$1.50 per 100 seeds; \$12.00 per 1000 seeds.
w2492—Giant Salmon. Makes a wonderful plant. \$1.50 per 100 seeds; \$12.00 per 1000 seeds.
w2493—Giant Blood Red. A deep, rich color. \$1.50 per 100 seeds; \$12.00 per 1000 seeds.
w2490—Persicum, Mixed Colors. A splendid strain of all colors mixed with large flowers. Though not quite as large as the "Giants" they are more free blooming. 50c per 100 seeds; \$4.00 per 1000 seeds.

NOTE.—We do not furnish less than Trade Packets. Fractions of ounces are supplied as under:
 Where price per ounce is 25c 30c 35c 40c 50c 60c 75c \$1.00 \$1.25 \$1.50 \$2.00 \$2.50

 We will supply ¼ oz. for 10c 10c 10c 15c 15c 20c 25c .30 .35 .40 .60 .65

Canna

w2285—Mixed Colors. It is easy to raise Cannas from seed and they will bloom the first year if sown inside very early. Our mixture is saved from named varieties. 35c per oz.; \$1.25 per ¼ lb.

Didiscus (Blue Lace Flower)

w2746—Coeruleus. One of the new popular outdoor cut-flowers. Lavender-blue, lace-like flowers on good stems and a profuse bloomer. Tr. Pkt. 20c; oz. \$1.00.

Dracena

w2750—Indivisa. The popular center plant for vases, porch-boxes, etc. As the seed is sent out in the berry, it should be rubbed out before planting. 10c per Tr. pkt.; 30c per oz.; \$1.00 per ¼ lb.

Helichrysum (Straw flowers)

The most popular of the "Everlastings" and extensively grown for florists' trade. Price of each color; Tr. pkt. 15c; oz. 40c.

w3071—White

w3072—Red

w3073—Violet

w3074—Yellow

w3075—Salmon

w3070—Mixed Colors

Gypsophila (Baby's Breath)

w2991—Elegans Alba Grandiflora. (Florists' Selected Strain). A splendid large-flowered strain that is one of the most profitable to raise for the cut-flower market. The fine sprays of dainty white are in constant demand. Sow at 14 day intervals. Oz. 15c; ¼ lb. 40c; lb. \$1.25.

Heliotrope

One of the best plants to grow for the spring bedding trade, as there is always a big demand for good Heliotrope. We have at last found a strain of Heliotrope that is really what is wanted; having a decided fragrance and low growing with enormous heads of uniform color. This is the best strain we have ever seen and comes in both light-blue and dark-blue.

w3131—Giant Queen Helen. Growing 18 inches high with mammoth heads of light-blue. Of uniform color and growth and very fragrant. Tr. Pkt. 35c; oz. \$2.50.

w3132—Giant Queen Margaret. Has the same splendid characteristics as Queen Helen, except that the color is dark-blue. Tr. Pkt. 35c; oz. \$2.50.

w3130—Lemoine Giant, Mixed Colors. Taller growing with not as large heads. Mostly in shades of blue. Long stems and a very branching plant good for cut-flowers. Tr. Pkt. 20c; oz. \$1.50.

Giant Heliotrope

Larkspur

The Tall Double Stock-Flowered Larkspur are most excellent to raise as an out-door cut-flower, blooming profusely all fall. We have some new colors this year that make wonderfully attractive bouquets.

	Tr. Pkt.	Oz.		Tr. Pkt.	Oz.
w3241—White	.15	.80	w3245—Sky Blue	.15	.80
w3242—Lustrous Carmine	.20	.90	w3246—Dark Blue	.15	.80

W3500 —TALL OR CLIMBING. Mixed Colors	\$.45
W3600 —DWARF. Mixed Colors	.55

PANSY

Each year we are improving the quality of our Pansy seed as we realize the importance of highest quality seed to the Pansy plant grower and we feel sure that we are offering the highest grade Pansy seed for the lowest possible price.

W3700—**HARRIS' SPECIAL MIXTURE.** This is our own mixture that is especially made up of some of the very best varieties and choicest colors. We make a special point of the mixture as a medium priced mixture for the florists' plant trade. The flowers are all large, many of them ruffled and with bright colors predominating. Tr. pkt. 20c; oz. \$2.00.

W3704—**'HARRIS' BEST' PANSY MIXTURE.** As the name implies, these are our BEST Pansies. The flowers are extremely large with the deep velvety colors. A large percentage have fluted or ruffled petals. Our price for this quality of Pansies is very low. Tr. pkt. 35c; oz. \$4.50.

W3702—**MASTERPIECE MIXTURE OR GIANT RUFFLED.** The flowers of this mixture have fluted or ruffled petals, which adds much to the beauty of the wonderfully rich colors. This stock may be depended upon to be well ruffled. Tr. pkt. 25c; oz. \$3.00.

W3701—**GIANT TRIMARDEAU.** Mixed Colors. We make this high grade mixture by mixing together proportionate quantities of choicest colors of the large-flowering Trimardeau Pansies. This assures you of a mixture well balanced as to color and of large flowers. A really good mixture at a low price. Tr. pkt. 15c; oz. \$1.50.

W3710—**GOOD MIXTURE.** A good bright mixture of the common sorts. Tr. pkt. 10c; oz. 75c.

	Tr. pkt.	oz.
W3730 —FAIRY QUEEN (Trimardeau)	\$.20	\$1.50
W3731 —SNOWFLAKE (Trimardeau)	.20	1.50
W3732 —GOLDEN YELLOW (Trimardeau)	.20	1.50
W3733 —ROYAL BLUE (Trimardeau)	.20	1.50

PETUNIAS

One of the most popular bedding plants to raise, especially the large double and single ruffled. They are easily grown from seed sown in February or March and always command a good price.

- w3800—Harris' Perfection Double.** Our strain of Double Petunias is exceptionally fine, coming 85% to 95% true double and the balance semi-double. The flowers are very large and in a splendid range of colors. This seed is grown especially for us by a Petunia expert and is the very best Double Petunia seed: 200 seeds 75c; 500 seeds \$1.40; 1000 seeds \$2.25.
- w3815—Ruffled Triumph.** This splendid Petunia of recent introduction we consider not only the best pink Petunia, but also the best self-colored single Petunia. The color is a very bright shade of deep salmon-pink while the flowers, though not exceptionally large are of the superbissims type and thoroughly ruffled. It produces true to type from the seed and is really a very satisfactory variety to raise. 200 seeds 30c; 500 seeds 65c; 1000 seeds \$1.00.
- w3801—Ruffled Giants or Giants of California.** The best ruffled Petunias we can possibly obtain. Very large, single flowers with beautiful ruffled edges in many shades of color. 200 seeds 25c; 500 seeds 50c; 1000 seeds 85c.
- w3803—Fringed Hybrids.** These are beautiful single petunias for bedding. The flowers are not so large as the Ruffled Giants, but are much larger than common Petunias and the edges of the petals are beautifully fringed. 500 seeds 20c; 1000 seeds 35c; 1-16 oz. \$1.50.
	Tr.	Pkt.	Oz.
w3823—Rosy Morn. A pretty pure pink with no purple shade. The one so much used for bedding	\$	.15	\$1.50
w3821—Snowball. Pure White		.15	1.50
w3804—Special Mixture. A specially made mixture of the best colors only		.10	1.00

PRIMROSE

Primroses are one of the florists' most important flowers and some of each class should be grown. We have an exceptionally good mixture each of the most satisfactory varieties. They are all easily grown from seed if carefully sown. To insure more even germination it is well to soak the seeds 24 hrs. in water before sowing.

- W4020—PRIMULA VERIS ELATIOR.** (Polyanthus or Oxship) **Splendid Mixture.** This is the superb Polyanthus or Hardy Primrose for outdoor growing. Also good for pot culture. Easily raised from seed. Tr. pkt. 40c.
- W4030—PRIMULA OBCONICA GRANDIFLORA.** **Mixed Colors.** The Obconica Primrose are large flowering and the most free-blooming, making a splendid pot plant that is literally perpetual blooming. Seed sown early in spring will make fine plants for early winter. A fine mixture of all colors. Tr. pkt. 60c.
- W4040—PRIMULA SINENSIS STELLATA** (Star Chinese Primrose) **Mixed Colors.** The Chinese Primrose is one of the finest and most graceful of Primroses for the greenhouse. The star-like flowers are produced in whorls on long, erect stems and bloom from November to May. Seed should be sown in February or March. This mixture contains a splendid variety of colors from white to dark blue. Tr. pkt. 75c.
- W4050—PRIMULA SINENSIS FIMBRICATA.** (Fringed Chinese Primrose). **Splendid Mixture.** For greenhouse culture this is the old standby, easily grown from seed and requiring but 7 months from date of sowing to bloom. Sow in March and a second sowing in May. A wide range of unusual colors. Tr. pkt. 65c.
- W4060—PRIMULA SINENSIS FIMBRICATA GIGANTEA.** (Giant Flowering Fringed Chinese Primrose). **Excellent Mixture.** These are the same as the other Fringed Primroses except that the flowers are much larger and the plant very robust growing, although not quite as free flowering. Tr. pkt. \$1.00.

SALVIA

There is no other bedding plant so much in demand as Salvia, and a good even stand of Salvia is always appreciated by the customer. Our own strain of **New England Grown Bonfire Salvia** has all the qualities necessary to please your customers.

- w#600—Bonfire.** This is our own special strain grown in New England for a number of years and thoroughly acclimated to this latitude. It grows evenly as to height, and is the earliest to bloom, every plant coming into bloom at the same time. Tr. pkt. 25c; oz. \$2.25.

- w#601—Splendens.** Later blooming and taller growing than Bonfire. Tr. pkt. 20c; oz. \$1.50.

Salvia Splendens

Blue Salvia

- w#603—Farinacea.** A new light-blue Salvia that makes a wonderful cut-flower and a splendid bedding plant. The long flower spikes of clear light-blue are most graceful and attractive and are fine to use in bouquets with other flowers. Plants treated the same as Salvia Splendens will bloom continually from mid-summer until winter, not being injured by frosts. Also does well when moved into the green house. Tr. Pkt. 50c; oz. \$4.00.

New Giant Flowering Snapdragon

SNAPDRAGONS

Snapdragons are continually gaining in popularity both as a cut-flower and as bedding plants. This year we are offering a new class of Snapdragons which far surpasses anything heretofore offered.

New Giant-Flowering Snapdragons

(Antirrhinum Maximum)

These are not only the largest-flowered Snapdragons grown, but they have the largest and most vigorous plants. The unusual colors are exceedingly rich and attractive.

- w5001—Cerberus. Deep carmine-rose with yellow lip and white throat. Tr. Pkt. 15c; oz. \$1.00.
- w5002—Gotelind. Brilliant light orange A magnificent flower. Tr. Pkt. 20c; oz. \$2.00.
- w5006—The Rose. A bright, brilliant rose that is most attractive. Tr. Pkt. 20c; oz. \$2.00.
- w5007—Snowflake. Pure white. Tr. Pkt. 20c; oz. \$1.50.
- w5010—Apple Blossom. A new apple blossom pink that is beautiful. Tr. Pkt. 20c; oz. \$2.00.
- w5000—Mixed Colors. A splendid mixture of all colors. Tr. Pkt. 15c; oz. \$1.00.

Tall Large Flowering Snapdragons

These are not as magnificent as the New Giant sorts, but they are the best of the Tall kinds, with good long spikes of large flowers in the best of colors.

Price of each of the following: Tr. pkt. 10c; oz. 50c.

- w5031—Queen Victoria. Pure white.
- w5032—Venus. Light pink on white ground.
- w5034—Firefly. Scarlet and yellow.
- w5035—Golden King. Canary yellow.
- w5036—Cresica. Crimson-scarlet.
- w5039—Fire King. Glowing scarlet with white throat.
- w5040—Harmony. Terra cotta orange, shaded rose.
- w5030—Mixed Colors. Well balanced mixture of all colors. Tr. Pkt. 10c; 40c per oz.

STOCKS

Double Mammoth Flowering Beauty

We have given our Stocks very careful consideration and find that this strain is the most satisfactory for outdoor blooming. The branching plants grow about 2 feet high and are covered with long sprays of sweet-scented, double flowers.

	Tr. Pkt.	Oz.

SMILAX

W4950—This is the Smilax all florists use to put with cut flowers. It is easily grown from seed sown in February. They will then be ready for 3-in. pots in May and can be planted in solid beds in July. 30c per oz.; \$1.00 per ¼ lb.

SCABIOSA

The annual Scabiosa are a very good proposition to raise for the cut-flower market, blooming late in the fall after all other outdoor flowers have been injured by frost. Price of each color: Tr. Pkt. 10c; oz. 50c.

- w4654—Azure Fairy.
- w4653—Rose
- w4655—Cherry Red.

SWEET PEAS

We have some new varieties of Sweet Peas, in both Winter-flowering and Late Flowering that should prove of interest. All these varieties have been carefully tested in our trial grounds and we consider that we have the best possible selection of varieties and at as low a price as possible.

New Winter or Early-Flowering Sweet Peas

These new Winter-flowering Sweet Peas are the best for forcing under glass or for early flowering outdoors.

We have carefully selected the best varieties in each color, all with large Spencer type flowers and good clear colors.

Price. Any of the following varieties (except where noted): 55c per oz.; \$1.75 per ¼ lb.; \$6.00 per lb.

White

W7001—**SNOWFLAKE**. The most prolific pure white.

W7016—**IMP. SNOWSTORM**. Largest pure white.

Cream and Pink

W7005—**HERCULES**. Large rose-pink.

W7024—**ZVOLANEK'S ROSE**. A very rosy-pink especially good for forcing. •

W7013—**YARRAWA**. A standard rich rose.

W7008—**MEADOW LARK**. Bright primrose yellow.

W7021—**ROSE CHARM**. A new bright deep-rose. Oz. 80c; ¼ lb. \$3.00.

W7022—**COLUMBIA**. Salmon-rose with white wings.

Lavender

W7023—**HARMONY**. Good clear lavender.

W7003—**SONGSTER**. Giant lavender.

W7019—**NIGHTINGALE**. Long stemmed mauve lavender.

Red

W7010—**GLITTERS**. Bright orange-scarlet.

W7025—**TORCH**. Large salmon-orange.

W7026—**AVIATOR**. Dazzling crimson scarlet.

W7007—**LIBERTY**. Bright sun-proof crimson.

Blue

W7018—**BLUE BIRD**. Bright light blue.

Mixed Colors

W7050—**HARRIS' SPECIAL EARLY FLOWERING VARIETY MIXTURE**. A mixture especially made up of the above named varieties. This is a well balanced mixture containing a good proportion of pink shades. 50c per oz.; \$1.50 per ¼ lb.; \$5.50 per lb.

W7000—**MIXED COLORS**. A good mixture of all good varieties, grown as a mixture. 40c per oz.; \$1.25 per ¼ lb.; \$4.50 per lb.

Spencer Sweet Peas

The following varieties are the large waved or orchid-flowered Sweet Peas that come into bloom out doors a little later than the Early-flowering. Our list has been carefully chosen to include only the best varieties of the leading colors.

Price of any of the following varieties (except where noted), 25c per oz.; 75c per ¼ lb.; \$2.75 per lb.

White

w7501—**CONSTANCE HINTON**. Vigorous growing white.

w7514—**KING WHITE**. Mammoth white of perfect form.

Cream, Pink and Rose

w7508—**NEW MIRIAM BEAVER**. Soft pink suffused with salmon.

w7516—**FLORADALE FAIRY**. Large creamy white.

w7507—**MRS. CUTHBERTSON**. Giant rose and light pink.

w7518—**DORA**. Rosy cerise with cream wings.

w7519—**HAWLMARK PINK**. Popular rose-pink shaded salmon.

w7520—**HEBE**. (Improved Hercules) Large bright pink.

Lavender

w7503—**MARGARET MADISON**. A perfect azure blue.

w7522—**MRS. TOM JONES**. Latest and best bright blue.

w7515—**HAWLMARK LAVENDER**. A pure lavender free of mauve.

Red

w7517—**PRESIDENT**. Large brilliant orange-scarlet.

w7510—**TANGERINE**. Bright orange self.

w7509—**DOBBIE'S SUNPROOF CRIMSON**. Rich crimson-scarlet.

w7523—**ROYAL SCOTT**. The most brilliant scarlet.

Blue and Purple

w7513—**ROYAL PURPLE**. Distinct rich purple.

w7524—**JACK CORNWALL V. C.** Dark violet-blue.

Mixed Colors

W7550—**HARRIS' SPECIAL SPENCER VARIETY MIXTURE**. Like our Early Flowering Variety mixture, this is an especially made mixture, insuring a good range of the above named varieties. 20c per oz.; 65c per ¼ lb.; \$2.00 per lb.

W7500—**MIXED COLORS**. A good mixture of good varieties grown as a mixture. 15c per oz.; 50c per ¼ lb.; \$1.50 per lb.

Grandiflora Sweet Peas

W7700—**MIXED COLORS**. For those who want a good mixture at a cheap price we offer this mixture of good Grandiflora varieties. Oz. 10c; ¼ lb. 20c; lb. 50c.

Mammoth Verbenas

For porch boxes, lawn vases, or bedding, there is no plant better than Verbena. They are easy to raise and can be sold at a price that will attract your customers. Our Verbenas are the **Mammoth Flowering** variety and are the largest and best we can possibly obtain.

Harris' Double Giant Zinnia

ZINNIA

Zinnias are one of our specialties and we give them a great deal of attention in an effort to have the best Zinnias grown. We have quite a few additions to our list this year, having three separate classes.

Harris' Double Giant Zinnias

Our own growing of giant flowering Zinnias that we consider superior to other stocks, being uniform in size and color.

	Tr. Pkt.	Oz.
w8104—SCARLET	\$.15	\$1.25
w8105—YELLOW	.15	2.00
w8100—MIXED COLORS	.10	1.00

Giant Double Dahlia-Flowered Zinnias

w8150—Mixed Colors. A new strain of mammoth size and tall growing with long stems. These are the grandest Zinnias we are able to get from California. Many of the colors are new and truly marvellous. Tr. Pkt. 20c; oz. \$2.00.

Large-Flowering Double Zinnias

Real good double Zinnias of large size and fine colors. These are, in some ways better than the Dahlia-flowered, as they are more uniform and flower more abundantly. Price of each color: Tr. Pkt. 10c; oz. 75c.

w8201—WHITE.	w8208—APRICOT.	w8207—ROSE.
w8203—ORANGE.	w8202—SHRIMP PINK.

w8200—MIXED COLORS.	A well proportioned mixture of all the above colors. Tr. Pkt. 10c; oz. 60c.	

Dwarf Double Bedding

w8256—Salmon Rose. A very popular color of medium size that is exceptionally attractive for display bedding and borders. Tr. Pkt. 10c; oz. 50c.

NOTICE

Do not mistake low prices for poor quality. Our seeds, in all varieties, are the very best that can be had at any price and we make our prices as low as we can possibly afford to. In the case of seeds not produced on Moreton Farm, we have searched out the best possible sources of supply, regardless of price, and then made our prices to you to correspond, rather than attempting to furnish seed at competitive prices. Is this not fair?

You will notice that this year we are offering more seeds for greenhouse growing, such as Cyclamen, Primrose, Smilax, etc. As these are all of the highest grade we feel sure you will be satisfied with the quality. We wish it were possible to get together with you and talk over your needs in flower-seeds. Our desire is to get into line with the sort of varieties you want.

For outdoor cut-flowers our Asters, Calendula, Centaurea, Gypsophila, Larkspur, Marigold, Sweet Peas, Snapdragons and Zinnias are the best stocks we have been able to procure. These varieties have been specialties with us for a number of years.

Having the very best Petunias and Pansies has been another of our hobbies for some time. Do not fail to try the **Ruffled Triumph Petunia** and **Harris' "Best" Pansy**.

A row of our Delphinium, Moreton Hybrids, growing for seed

SEEDS OF HARRIS' HARDY PERENNIALS

We are large growers of the choicest varieties of hardy perennial plants and seeds and, with very few exceptions, all of the seed offered is of our own growing and all is good fresh seed of the highest germination. The seeds of most perennials do not retain their vitality for very long while many varieties, even at their best, germinate poorly or very slowly, so, for that reason it is best to sow only the freshest and best seed.

If you are interested in Perennial Plants we will be pleased to quote you wholesale prices on such varieties as we have onhand.

GLADIOLI

Each year we grow more and more Gladioli. Not only are we growing a larger amount of bulbs, but we are producing better and cleaner bulbs, and in a better selection of varieties. Every year we try out a hundred or more of the new introductions, and those sorts that have no real merits over the staple varieties are discarded.

We have a number of new kinds listed in our retail catalogue that we do not have in large enough quantity to offer wholesale. Our descriptions are also more complete in that catalogue.

If you are interested in second-size bulbs we will be pleased to quote you rock-bottom prices.

There is no more popular flower to raise for cut-flowers than good varieties of Gladioli. This list is very carefully selected from the innumerable varieties on the market, and represents the most desirable sorts. All are first size bulbs (over 1½ inches in diameter). No less than 50 sold at the 100 rate and no less than 500 sold at the 1000 rate.

Please state below whether you raise vegetables for home use or market.

[illegible]

Insecticides and Fertilizers, Etc.

TOBACCO DUST. Used extensively for dusting plants to destroy or repel bugs and plant lice. For fumigating green-houses the tobacco dust we sell is most excellent. It burns evenly and will light without the use of kerosene. Five pounds will fumigate a house 20 x 100 feet. 5-lb. package 50c; 10 lbs. 75c; 50 lbs. or more at 5c per lb.

HALL'S NICOTINE SULPHATE (40% Nicotine). Often called "Black Leaf 40." A very effective insecticide for aphids, "lice" and all soft-bodied insects, such as rose aphids, apple tree aphids, etc. It is so concentrated that one part to 800 or 1000 parts of water makes an effective spray, costing less than two cents per gallon. Directions for use are printed on the can. 1 ounce bottle 35c; 1/2 lb. tin \$1.25; 2 lb. tin (qt.) \$3.50; 10 lb. tin \$12.50.

FORMALIN (Formaldehyde, 40 per cent). A valuable disinfectant for destroying germs that cause diseases in plants. It is very effective when used to destroy smut germs in oats and scab on potatoes. To treat oats use 1 pound (pint) formalin to 50 gallons of water and soak ten minutes. For potatoes use 1 lb. to 30 gallons of water and soak two hours. In one-pound cans 50c per can; 6 cans \$2.50; quart 75c; gallon \$2.50.

Pulverized Sheep Manure. This is an excellent fertilizer for all crops. It is rather costly to use on a large scale but for small gardens and especially for greenhouses and frames it can be used to great advantage. It not only furnishes actual plant food but also humus which is not supplied by chemical fertilizers. This dried sheep manure contains 2 1/2% nitrogen, 1 1/2% phosphoric acid and 1 1/2% potash. There is no straw or other rubbish in it. It is pure dried and pulverized sheep manure. Use about 1 lb. to 4 or 5 square feet of surface.

Price	5 lb. box		\$.35
	10 lb. bag		.60
	50 lb. bag		1.50
	100 lb. bag		2.50

Price of larger lots on application.

Nitrate of Soda. Gardeners should always have some nitrate of soda on hand and use it whenever they want to promote a quick, strong growth in plants. A little nitrate dissolved in water at the rate of about a tablespoon (1 oz.) to 2 gallons of water will stimulate a rapid growth either when applied to plants in frames, greenhouses or the open ground. If your plants don't grow well, try nitrate on them—but don't use too much. 10 lbs. 65c; 50 lbs. \$2.75; 100 lbs. \$4.75; 200 lb. bag \$9.00. Price for larger lots will be quoted by letter.

Bone Meal. This is one of the best fertilizers for gardens, lawns, shrubs, fruit trees, etc. It is perfectly harmless and can be used with safety in any quantity desired. The plant food in bone meal is not immediately available so its benefit extends over a longer time than is the case with other fertilizers that are more soluble.

This bone meal is raw bone finely ground and contains 4 1/2 per cent ammonia (nitrogen) and 50 per cent phosphate of lime. 10 lbs. 60c; 50 lbs. \$2.25; 100 lbs. \$4.00. Bags of 167 lbs. (12 bags to a ton) \$6.25 per bag. Lowest price will be quoted on large lots at any time.

Pot Labels and Garden Stakes

Keep a record of the kind and variety of seeds sown, dates, etc. Every gardener should use stakes and labels.

Pot Labels	Plain		Painted	
	100	1000	100	1000
4 in. long	\$.20	\$1.30	\$.25	\$1.70
5 in. long		1.60		2.10
Garden Stakes				
12" long, 1 1/4" wide	1.25	9.50	1.50	11.00

These are nice smooth, white wooden labels of best quality. Weight for mailing: Pot labels 3 lbs. per 1000. Garden stakes 2 lbs. per 100.

Save Cabbage Plants from Maggots

Tar Paper Pads. To protect cabbage and cauliflower plants from injury by maggots at the roots nothing has been found more successful than these pads or collars which consist of a round piece of tarred paper with a slot on one side and a hole in the center. These pads are slipped around the stems of the plants after they are set out. They prevent the flies from laying the eggs which produce the maggots on the stems at the surface of the ground. We have found that when these pads are put on the day the plants are set out and are not covered with earth they save fully 90 per cent of the plants. Price 100 pads 40c; 1000 pads \$2.50; 5000 or more \$2.00 per 1000.

Raffia. Used for tying bundles of plants, for tying plants to stakes, for budding and grafting, and many other purposes. It is very economical as it costs less than string. 1 lb. 25c; 10 lbs. or more 15c per lb.

"AUTO SPRAY No. 1"

This is the most convenient hand sprayer we know of. We use it on our own farm and can highly recommend it. In construction and workmanship it is superior to other similar sprayers.

To Operate: Remove pump with a half turn, fill tank two-thirds full of solution. Replace pump and with a few strokes compress air on solution.

Then direct the spray. Two pumpings will discharge contents.

Uses: For spraying trees, shrubs, vines, field crops, green houses and poultry houses; for applying Paris green, arsenate of lead, bordeaux, lime and sulphur emulsions, disinfectants, cattle-fly oil, whitewash, cold water paints, etc.

Special Features: Strength, simplicity and balanced construction, a nozzle which does not and cannot clog, and the only clog proof nozzle on a compressed air sprayer, no matter what competitors claim, as automatic shut-off device (Auto-Pop) which saves the solution and operates without fatigue, spreader to prevent wrinkling leather cup, iron parts malleable, and hose of extra quality. Remove nozzle to get solid stream.

EQUIPMENT: Carrying strap, 2 ft. 1/2 in., hose, fine spray nozzle and stop-cock or Auto-Pop as ordered.

Auto-Pop No. 1—Patented automatic shut-off. To stop the flow of solution it is necessary only to release the fingers.

SPECIAL EQUIPMENT: Extention Pipe—brass, 2 ft. lengths. Connects direct to the shut-off. Three lengths generally used for trees.

Brass Elbow—For reaching the under side of leaves or spraying at an angle.

Auto-Spray No. 1 Brass tank with auto-pop		\$9.50
Auto-Spray No. 1 Galvanized tank with auto-pop		6.50
Extention pipe 2 ft. length brass each		.50
Elbow for extension brass		.35

Delivered Free by parcel post anywhere east of Indiana and north of Virginia (except Canada). If to be sent with seeds or other goods by express or freight not prepaid 50c may be deducted from the price of the Auto-Spray No. 1.

HARRIS' SEEDS FOR MARKET GROWERS

HARRIS' PERFECTION DOUBLE PETUNIA—85 to 90 per cent of seedling plants produce double flowers. See page 42.
