LODENSE PRIVET

LIGUSTRUM NANUM COMPACTUM

Per 100

3 Year field grown.....\$ 35.00

This is a new, dwarf and distinct form of Privet of extremely compact and low growing habit. It has been under observation for the last four years and its habits of growth are unquestionably fixed. The foliage is rich dark green and of extreme hardness. It is particularly useful for low hedges and borders as it stands shearing very well and can be kept low and compact very easily.
