BULBS - PLANTS

BENTON HARBOR, MICHIGAN

October, 1924.

Gentlemen:

Dependable stock, true to name, of attractive appearance, combined with high vitality is what you are seeking in Gladiolus bulbs. Our ideal location near the shores of Lake Michigan, our clean, fertile, sandy soil produces bulbs of such quality. The customary hot summer winds are tempered here by lake breezes, and our bulbs respond to this ideal condition.

But we offer more than that--modern methods of planting, cultivating and digging enable us to grow these superior bulbs at lower cost. You are to receive the benefit of this saving through our low prices. And looking over the following assortment you will find that each and every kind is a variety of proven merit.

It is not necessary here to confine your choice to a few varieties; we believe we have a selection suitable for every purpose. Our collection contains the best early kinds for forcing, specially cured. For counter trade you will want stock which makes an appeal to the eye -- and brings back your customers (and their neighbors) enthusiastic in their praise of the bulbs you sold them.

ORDER NOW while our stocks are still complete and be sure you will get what you want WHEN you want it. Whether your order is for a quart of bulblets or for several thousand of a variety, you may be equally certain of the careful attention your order deserves. But the best time to order is NOW while you have the matter before you and can do so in a moment. May we expect to hear from you?

Yours very truly,

P. S. An order blank is attached for your convenience--USE IT.
