NEWTON NURSERIES

NEWTON, MISSISSIPPI

J. R. WOODHAM, Proprietor

FALL OF 1924—SPRING OF 1925.

My stock this season is equal to the high quality maintained in the past.

After this season we will discontinue growing all ornamentals, roses, shrubs and evergreens, and make the growing and propagating of fruit trees a speciality.

We realize that this is a day of specialization and that we can serve our customers more satisfactory by growing fruit trees, shades and vines only. By doing this we hope to be able to give better service than ever before.

Prices are as low as any nursery can make. They remain the same throughout the season. Our prices are positively the same to each and every customer. No discounts will be made to anyone.

The Grasselli Chemical Company, Brown Marx Building, Birmingham, Ala.

We have one of the best fumigating houses, made entirely of concrete and brick. All stock is fumigated in this house and kept under the deadly fumes of poisonous gases for 45 minutes before being packed.

This insures all stock from having any living insect pest when leaving the nursery.
