This is our last call of the Season, we will be with you again with seedlings for Winter of 1924-25.

We have already booked some nice apple seedling orders for next winters delivery. These orders are from large firms, who have made comparisons, and know that there is a difference. Just had word from a party in Utah who says: "Seedlings passed inspection 100 per cent." That is doing good in Utah.

Another party tells us that when our seedlings arrived at his place, he took a bunch of ours and a bunch of the same grade received from another party and, although ours were not as large as the others, that when they were put upon the scales our seedlings weighed considerable more than the others. His comment was: "The vitality was there giving them the weight."

We do not try to grow a large acreage but do grow good, healthy, clean seedlings and will appreciate your order.
