RESULTS OF FALL PLANTING

Suggestions *for* Fall Gardening

THIS little circular is to remind you of the many beautiful plants and shrubs you saw during the summer which has just passed. Very likely you intended getting some of those things this fall. We are calling your attention here to only a few items taken from a large list of Evergreens, Trees, Shrubs, Vines, and Perennials that we grow in our nurseries. This is also an invitation to visit our nurseries and see the character of the stock we grow.

Fall Planting

is becoming a more general practice each year. By that we do not mean that shrubs, trees, etc. transplant better in the fall, but

that a great many transplant as well in the fall as in the spring.

We shall be glad to quote on whatever requirements you may have for hardy nursery stock, whether it be for one plant or for a large number. We have no agents or salesmen except our price lists. The additional orders we receive from old customers year after year, together with those we receive from new friends, indicate that we are serving a large number to their satisfaction. We do appreciate this business and are doing our utmost to have the best equipment, to grow the best stock, and give the best service possible.

THE BAY STATE NURSERIES

NORTH ABINGTON, MASSACHUSETTS

Paeonies

The fall is the best time of the year for transplanting Paeonies, particularly from September 15th until November 1st. We can furnish more than forty desirable varieties, all of which are listed in our fall price list. We are listing here eight varieties that are of real value. They are as follows:

	Each	Per 10
<i>Dorchester</i> — Large, compact flower, pale hydrangea-pink, fragrant, late	\$.75	\$6.00
<i>Duchesse de Nemours</i> — White tinged with yellow, fragrant	.90	8.00
<i>Edulis Superba</i> — Early, soft pink	.75	6.00
<i>Felix Crousse</i> — Medium, bright red, fragrant	1.00	9.00
<i>Festiva Maxima</i> — Early, pure white with crimson markings in the center, strong grower, fragrant	.75	6.50
<i>Karl Rosenfield</i> — Very large, globular, compact semi-rose type. Dark crimson. Very strong, tall, compact grower and free bloomer. Splendid for cutting.	2.50	22.00
<i>Mons. Jules Elie</i> — An extra fine variety. Pink, very large, compact bomb type. Very beautiful, fragrant.	1.25	11.00
<i>Rubra Superba (Richardson)</i> — A beautiful, rich, brilliant, dark crimson, very late.	1.00	9.00

Acer Negundo

(Boxelder)

The Boxelder is a tree not very well known, but should be used more. It is a rapid growing shade tree and will grow in any fair soil.

No doubt you have a spot where you could use one or two of these trees, which

in only a few years time will give plenty of shade. Like the Catalpa, the Boxelder may be set out in October or November. The price, 8 to 10 ft. tall, is \$2.00 each.

Climbing Roses

Climbing roses were never more beautiful than during the past summer. We grow sixteen varieties, but regard the six below as finest of the list. Arrange now to plant some of these in October or November.

<i>Climbing American Beauty</i> — Large blossoms of rich carmine	Each \$.75
<i>Dorothy Perkins</i> — Shell pink	.75
<i>Dr. Van Fleet</i> — Deep flesh pink, glossy foliage	.75
<i>Excelsa</i> — Double crimson flowers	.75
<i>Paul's Scarlet Climber</i> — Flowers are a rich, vivid scarlet and foliage is glossy	1.00
<i>Silver Moon</i> — Semi-double, pure white flowers, glossy foliage	.75

Plan now for next summer's beauty.

Lilium Candidum

(Madonna Lily)

Of course the autumn is the best time of year for planting the Madonna Lily. It is the most popular of the garden lilies and the flowers are pure white and very fragrant. They are effective when planted near Larkspur, (by the way, have you the Larkspur? We can furnish both belladonna and the bellamosum varieties at 35c each, \$3.00 per 10.)

Madonna Lilies should not be given any manure to obtain the best results. Our price for very best bulbs is 40c each, \$3.50 per 10.

Delphinium Moerheimi

(Improved White Larkspur)

You may have noticed these listed in our fall price list. Nearly everyone who has seen them in bloom has bought one or more. The blossoms are pure white and the plants are strong, hardy growers, surpassing the variety Moerheimi in these respects. Transplant these either in September or October, or next spring. The price is \$1.50 each.

Catalpa Speciosa

(Western Catalpa)

You have probably wondered what the tree is with large leaves and fragrant white flowers in June. It is the Western Catalpa. It is a very hardy tree of fairly rapid growth. Why not plant a few this fall? Priced at \$1.25 each for a tree 6 to 8 ft. tall and \$1.50 each for a tree 8 to 10 ft.

Ten Good Shrubs

Flowering shrubs always add to the beauty of a place. Think of the spots where you can use a few to advantage.

We have made a list of ten good shrubs which present a variety of color and bloom at different periods. *Our list is:*

1. *Forsythia fortunei*: Fortune Forsythia. This is one of the first shrubs to bloom in the spring, producing a profusion of deep yellow flowers. 3 to 4 ft. 50¢ each.
2. *Spiraea thunbergii*: Thunberg Spiraea. This Spiraea has not only a graceful form and feathery foliage, but also an abundance of white flowers early in May. 3 to 4 ft. 70¢ each.
3. *Spiraea vanhouttei*: Vanhoutte Spiraea. This is one of the best shaped shrubs there is. The beautiful white blossoms are borne on drooping branches. Flowers appear about the last of May. 3 to 4 ft. 50¢ each.
4. *Physocarpus aureus*: Goldleaf Ninebark. The flowers of this plant are not particularly showy, but the bright yellow foliage makes the plant very attractive in the spring and early summer. 3 to 4 ft. 50¢ each.
5. *Lonicera tatarica*: Tatarian Honeysuckle. This shrub bears a profusion of pink flowers in June, and later an abundance of small red berries. 3 to 4 ft. 50¢ each.
6. *Weigela rosea*: Pink Weigela. This is one of the showiest shrubs on this list and has quantities of beautiful pink flowers in June. 3 to 4 ft. 60¢ each.
7. *Hydrangea arborescens grandiflora*: Snowhill Hydrangea. This hydrangea blooms from June to the first of September at a time when there are few shrubs in blossom. Flowers are pure white and average from 4 to 5 inches in diameter. 2 to 3 ft. 75¢ each.
8. *Symphoricarpos racemosus*: Common Snowberry. This is a smooth shrub with slender branches, which are loaded in the autumn with white, waxy berries. 3 to 4 ft. 60¢ each.
9. *Hydrangea paniculata grandiflora*: Hydrangea Peegee. This is the common hydrangea, whose white blossoms, appearing the latter part of August, turn pinkish as the fall advances. 3 to 4 ft. 90¢ each.
10. *Viburnum opulus*: European Cranberrybush. This is one of the best shrubs for general planting. It is most attractive in the fall and early winter, with its clusters of red berries. 3 to 4 ft. 75¢ each.

Ten shrubs in variety \$6.30

These may be shipped during October, November and until the ground freezes in December.

Phlox

There is nothing more showy during the summer than a bed of Phlox. You have possibly looked at our very long list of hardy Phlox, and wondered what varieties to use. We have made a list of eight excellent varieties given below. Most of our customers buy enough plants of one kind to make a clump of color. They have found that one

plant of a kind will not make a garden. September and October are good months in which to plant Phlox. Remember that five plants of one kind take the rate per 10. These are strong field grown plants.

	Each	Per 10
<i>Annie Cook</i> — Flesh pink	\$.30	\$2.40
<i>Coquelicot</i> — Orange scarlet	.35	3.00
<i>Etta's Choice</i> — Pure white, late	.30	2.40
<i>Eugene Danzanvilliers</i> — Lavender	.30	2.40
<i>Independence</i> — Pure white, early	.30	2.40
<i>Le Soleil</i> — Brilliant china-rose, rose center	.30	2.40
<i>Prof. Vierschow</i> — Brilliant carmine, overlaid with orange scarlet	.30	2.40
<i>Victor</i> — Bright salmon pink, large blossom	.30	2.50

Japanese Iris (Sea Crest)

Here is something that is not only new but very desirable. The photograph does not do justice to this beautiful plant, because it does not show the color, which is a glistening pure white with blue center. This makes a very pleasing combination of colors as the blue fades away into the pure white outside. The petals of the fully developed flowers are slightly curled, which gives the blooms a very pleasing ruffled effect. The flowers are six petalled.

Sea Crest is a strong healthy grower averaging about 3 ft., under ordinary conditions is very hardy, is one of the earliest to bloom, and blooms over a long period.

The price for the Japanese Iris (Sea Crest) is \$1.00 each.

Berberis Thunbergii

(Japanese Barberry)

We know of no better hedge plant and slow growing shrub for New England and other northern states than the Japanese Barberry. The plant is not only hardy, but attractive. The foliage is of a rich green in the summer and in the autumn becomes very bright colored. The fruit is equally showy and remains on the plants from the last of the summer until midwinter.

Like any other hedge plant, the barberry should be planted at the rate of one plant

to one foot of ground. In other words, a space of 75 feet will require 75 plants.

Our plants are well grown and very bushy. Our prices are reasonable for stock of this quality. Remember that we allow the hundred rate on forty or more plants of one kind.

Prices are viz:		Each	Per 10	Per 100
12 to 15 in.	2 yr.	.25	\$2.00	\$12.00
15 to 18 in.	3 yr.	.35	3.00	18.00
18 to 24 in.	4 yr.	.50	4.00	27.00
2 to 2½ ft.	4 yr.	.60	5.00	36.00
