Burton's Lawn Dressing	\$2.00
Burton's Vegetable Grower	2.25

SEED NOTES

With few exceptions, all kinds of Garden and Field Seeds are higher. The prices the Farmers and Seed Growers have had to pay for labor and supplies they had to buy, have been so out of proportion to the prices of the products they had to sell, that many of them have been forced into other lines of business, resulting in reduced acreages being grown last year, which in connection with the extremely hot, dry summer and shortage of water for irrigation, has caused an acute shortage and sharply higher prices on many items. There are no prospects of lower prices until another crop is grown and to those requiring large quantities of seeds would suggest they place their orders at once, as the sooner they buy the cheaper they will get them.

ALFALFA: The extremely hot, dry weather and scarcity of water for irrigation throughout the principal Alfalfa growing district last year has caused an acute shortage of Alfalfa seed, resulting in sharply higher prices for all kinds, and unless there is considerable foreign seed imported, prices will be still higher as there is not enough native seed in the Country to seed more than half of the Country's usual requirements, so don't be surprised at serious shortages and still higher prices.

RED AND ALSYKE CLOVERS: Red Clover, both Common and Mammoth, are perhaps the shortest and highest of any of the Field Seeds. Alsylke is in better supply, but, in sympathy with Alfalfa and Red Clover, is higher.

SWEET CLOVERS: Both White and Yellow Blossom Sweet Clovers are in better supply than a year ago, with prices being held firmly account of scarcity and higher prices of Alfalfa and other Clovers.

TIMOTHY: There was only a fair crop of Timothy produced last year, but with the hold over from 1923, the supply seems ample for usual requirements and unless a foreign demand develops, prices should range around present quotations.

SUDAN GRASS: Sudan is the only Grass in better supply than last year and with the carry-over from last year, supplies are ample for all requirements and prospects are for only moderate prices, unless it should be cornered by speculators who have manipulated the crop for several years past.

OTHER GRASSES: Kentucky Blue Grass is higher again this year not on account of a real shortage, but because it is in the hands of a combine who have controlled it for several years; the facts as nearly as we can learn are: There has accumulated during the combine's control a year's supply of seed, and it is only a question of time until the bubble will burst, but they may be able to hold on for another year or so. The exorbitant prices they have been exacting, and the fact the crop was being manipulated by speculators has greatly decreased the demand, which we hope will hasten the explosion, but until it comes we, with others, will have to swallow the dose and digest it best we can. Red Top, Orchard, Rye and Meadow Fescue are in fair supply with but little change from last year's prices.

OATS, BARLEY, WHEAT AND CORN: All of these are scarce and sharply higher and we are having considerable trouble in securing sufficient stocks of some of them. We specialize in Seed Corn and have secured good stocks of all we Catalog and can supply in any quantity. If buying in large quantities, ask for samples and special prices. Read Pages 111 and 112 of our Catalog and note how we select and handle our Seed Corn.

CANE AND KAFFIRS: These in common with Corn are scarce and higher this year. Last year's low prices discouraged growers, causing them to reduce their acreage, and high prices will prevail until another good crop is grown.

PINTO BEANS: Notwithstanding the unusually large acreage planted to Pintos last year, the crop was the smallest for several years past, which in connection with an almost failure in the California Bean crop has resulted in a real scarcity of all kinds of Beans throughout the entire Country and correspondingly higher prices. Pintos are the surest, safest and most profitable cash crop the Western dry-land Farmer can grow, and the sooner he realizes it the better it will be for him.

POTATOES: Contrary to all expectations and we might say usual experiences, Potatoes are again plentiful and cheap this season. Growers scarcely realizing the price of labor for the crop. It is a long road that has no turn, and sooner or later we will wake up and find a real potato shortage which we would not be surprised to see the coming season, as usually one extreme follows another. Remember, we specialize in Potatoes. If interested in car-lots or large quantities, ask for special prices.

ONION SETS: Not in our experience in the Seed Business have we seen Onion Sets so scarce and high. There are not nearly enough Sets in the Country to supply fifty per cent of the usual demand. It's not going to be a question of price, but of being able to secure them at all. Therefore, if you contemplate planting any Sets this season, the sooner you buy, the cheaper you will get them.

POULTRY AND DAIRY SUPPLIES: It is a well-known fact that the Poultry and Dairy Products of the Farm have tided the Farmer over poor years and saved more from bankruptcy than any other branch of the Farm. Consequently, many Farmers have been forced to turn to them for protection, creating an increased demand for everything in that line. Note the complete and up-to-date stocks we are offering.

PLANTS AND NURSERY STOCK: We wish to call special attention to our Plant growing facilities and to emphasize the fact that we have the largest, most complete, up-to-date Plant growing grounds and facilities in the West. Every plant we send out is grown by us under our personal supervision and when "We Grow Them, We Know Them" and you can depend upon securing from us just what you order, as we grow them by the millions and can supply them in any quantity desired, all pulled and packed the day shipped. Note on Page 71 of our Catalog the large number of varieties we grow and the moderate prices of same. We are also justly proud of our Nursery Stock, all of which is Western-grown and acclimated and we challenge anyone to produce or offer any better.

INSECTICIDES: The average grower pays less attention to Insecticides and sustains more losses to his crops by insects than from all other causes combined. We are calling your attention to this fact early to doubly impress upon you the importance of studying your Insecticide needs and have your supply on hand ready for use when needed. Please note the common method of liquid spraying is fast being superseded by Dust Spraying, which for many purposes has been found much more effective as well as cheaper and more easily applied. Read carefully all we have to say in our Catalog about Dust Sprayers and Dust Powders. Figure up your needs and requirements and order early and have them ready for use upon the first appearance of the insects when they are usually easily controlled.

GARDEN SEEDS: Practically everything in Garden Seeds are scarcer than a year ago and notwithstanding the scarcity and pressure from many sources to increase prices, we are still pricing practically all Garden Seeds at 5c a packet and larger quantities in proportion. Colorado and the Rocky Mountain districts are now considered the summer Vegetable Gardens of the whole U. S., the same as California and Florida are considered the winter gardens. During the past few years the demand for seed and the production of Vegetables with us has increased by leaps and bounds. Being large growers as well as shippers of Vegetables has enabled us to keep in close touch with every phase of the situation and to supply the Growers with just what they want in Seeds, making us really "Market Gardeners' Seedsmen," and if you will read our Cultural directions and notes on Vegetables you will readily see we understand them and are in better position to supply you with what you want than those who are familiar with Seeds in name only. We are especially interested in the growing and marketing of Mountain Vegetables, such as Lettuce, Peas, Cauliflower, Spinach, etc. If you are a Vegetable Grower and want the best seeds that money and experience can produce, send us your orders. We have spent a lifetime in the culture and handling of them and pride ourselves on knowing the critical Growers' requirements. We are satisfactorily supplying thousands of the largest and most successful growers in the West. May we have the pleasure of serving you?

"BUY YOUR SEEDS FROM A FIRM THAT GROWS THEM AND KNOWS THEM."
