We Guarantee Safe Delivery of Every Order or Money Refunded

OUR POSITIVE GUARANTEE

Is that our trees and plants are first-class in every way; that they are carefully dug and carefully packed in damp material and securely crated or wrapped to secure safe delivery. Our prices compare with other reliable Nurserymen; quality unsurpassed; grown by expert Nurserymen of wide amount of experience; packed by careful and experienced hands; propagated from the best and most productive bearing trees and plants.

YOU TAKE NO RISK WHEN YOU ORDER NURSERY STOCK FROM ALEXANDER CO. NURSERIES.

TO OUR PATRONS We have been in the Nursery business ever since 1892. Our business has steadily grown until we now have an established trade equal to none in the middle west. Our Nurseries are in the middle of the great Fruit Belt of Illinois, where the soil and climate produce nursery stock of the highest grade, unsurpassed and seldom equalled in thriftiness and healthfulness. It is with great pride that we refer to our large plant and our facilities for doing business which are the result of close application and a desire to please our customers.

Our packing house and grounds are upon the line of the great I. C. R. R. A side track runs into our packing grounds within 10 feet of our large packing house and right by our two-story office with all of its modern improvements. Thanking you for your liberal patronage during the past years, we wish to say that we shall endeavor to merit its continuance by giving the same careful attention to every branch of the business that we have in the past.

ALEXANDER CO. NURSERIES.

ORDER TREES EARLY Wherever you live it pays to order early. Send in your order just as soon as you know what you want. **OUR METHOD OF SHIPPING** C. O. D., requiring one-fourth cash with order, makes it convenient for you to do this, and we want you to get your trees, plants, etc., and plant them as soon as the weather conditions and the preparation of your land will permit, either fall or spring.

OUR SHIPPING SEASON Our fall packing begins about the first of October and lasts all winter, especially to all the Southern States. Our Spring packing usually opens up in February and continues into the month of May. The planting season is not regulated by any particular month or day, nor by the state of vegetation where the planting is to be done, but by the condition of the trees to be planted. Hence, trees can be sent with safety from McClure, Illinois, to localities several degrees south, even if they do not arrive until the ordinary transplanting season in that locality is passed.

BUSINESS TERMS AND SUGGESTIONS

We sell at wholesale direct to the planters, cutting out the middleman's profits. Buy direct from the growers, save rehandling, delays, inferior stock, poor grade and dissatisfaction in many other ways.

CORRESPONDENCE SOLICITED. We give every inquiry prompt attention. We ask that each inquiry be made as brief and clear as possible.

ORDER EARLY. Please write orders on order sheet accompanying this catalog. As far as possible orders are handled here as they are received, specially selected and reserved in customer's name for shipment at the proper time.

IMPORTANT. Please advise when ordering if you wish goods shipped by Express or by Parcel Post, giving your express office in every instance. While we exercise the greatest care to have everything true to name and descriptions, and hold ourselves prepared to replace on proper proof all that proves untrue, we do not give any warranty, expressed or implied.

LOCATION. McClure is on the Great Illinois Central R. R. and the Missouri Pacific, running north and south, connecting with all the great trunk lines running east and west, thus giving quick service.

REMITTANCE. Remittance should accompany the order; but we will book the order if one-fourth of the amount is sent and the balance may be sent before time to make shipment.

REMITTANCE may be made in any way most convenient to our customers, by Check, Money Order, Express Order, Draft or Currency.

Alexander Co. Nurseries

IT PAYS TO PLANT ALEXANDER TREES

Just where to look for values and what to recognize as defects are the problems that confront private buyers of nursery stock every season. Some soils are better adapted than others to the production of good nursery stock, and the process of growing fruit trees for replanting is not a simple one. In the first place there are but few localities in the United States where the work can be advantageously done, for nursery stock requires the best possible soil and the land, used for this purpose, is held at a very high premium here in southern Illinois.

As to the best stock on which trees should be grafted, many nurserymen disagree. We import all our seedlings on which different varieties are budded directly from France because we have found by experience that the elements existing in the United States are not at all favorable for raising seedlings with the full measure of success required. Around January 1st, when these seedlings begin to arrive from France, we carefully place them in our root cellars, and throughout the Winter see that they are properly trimmed and made ready for planting in the Spring.

We plant them during the month of April, and all through the summer months they are carefully cultivated and hoed weekly until early Fall. Budding, which is scientific work and can only be done by experts, is accomplished in the months of June, July and August. In fact, the writer, personally cuts the scions for budding from the best bearing trees, to insure growth the Alexander way, thus making certain of our patrons getting true to name trees.

What the Good Root System Which Alexander Has Developed Means to the Planter

On the root system depends entirely the future growth and development of the tree. In fact, a tree is of little or no value unless it is equipped with sufficient roots. It is regrettable indeed that many nurserymen pay so little attention to this most important feature of the nursery business.

Trees with abundance of roots start quicker, make a faster and more vigorous growth and require about one-half the care of those poorly rooted. Good roots aid materially in bringing the trees into fruiting early for they are essential in quick development. We have made a scientific study of the character of the tree and use only the very best French grown branched rooted seedlings on which to propagate and especially prepare our land for the reception of the stock.

The roots of the seedlings are carefully pruned before they are replanted—this produces a heavy, vigorous root growth. The extra care given the seedlings from the first, results in the well branched, heavy root systems which are formed the next year in the nursery row.

When these roots are produced, they must not be cut off and left in the ground, therefore, digging is of vital importance. We own one of the best up-to-date diggers which are now in operation in the United States. This system of digging is acknowledged by practical nurserymen as being, beyond any question of doubt, the most satisfactory way for taking up trees and insures patrons of being supplied with stock which is equipped with a beautiful fibrous root system. Such a root system enables the trees or plants to start quickly and insures a vigorous growth.

Alexander Root System

PLANTING AND CARE OF STOCK

THIS IS IMPORTANT—READ IT CAREFULLY

Care of Stock on Arrival—All stock should be planted immediately on arrival; but if not convenient to do so, open bundle and heel roots in the ground, covering them thoroughly.

Plant When the Soil is Reasonably Dry—In such condition as you would when planting corn or potatoes.

Pruning—Roots are sometimes bruised in digging. For best results it is imperative that you trim about one-fifth of the root, making a nice smooth cut, thus removing all bruised ends. Cut back one-half of the limb growth.

Planting—Dig the holes deep enough so the trees will be set one inch deeper than they were in the nursery row, and wide enough to admit the roots of the trees to spread out in their natural position. Having dug the hole as directed, let one person hold the tree upright and the other shovel in the earth; fill the hole about one-fourth with the richest dirt, pack it solidly, then put in one pail of water, now fill the hole two-thirds with dirt, pack firmly, then fill up the balance of the hole and pack well.

If There Is Anything You Want to Know About Nursery Stock in General—Write Us

Watering Newly-Planted Nursery Stock—A good soaking once or twice a week if the ground is dry should be resorted to. A mulch of long manure, grass clippings or straw helps to retain this moisture and should be provided if possible.

Labels—Labels should be removed. The wires will cut and damage the limbs.

Cultivation—Ten days after the tree has been planted work around it to keep the soil loose; do this about every two weeks during May, June, July and August.

These planting directions apply to all kinds of nursery stock. When planting evergreens, however, prune the roots only.

Trimming Shrubbery—Newly planted shrubbery should be cut back severely; from one-third to one-half of the top should be removed. If the planting is done in the Fall it is usually best to defer this trimming until early the following Spring.

Buying Direct You Save the Middleman's Commission

NORTHERN-GROWN NUT TREES

Stuart

Illinois

✓ **ILLINOIS PECAN**—Originated near Ware, Ill. ✓

The parent tree measures 6 feet in circumference, is 50 feet high, with a 30-foot spread, and has produced 528 lbs. of nuts in a single season which sold for 30c per lb. wholesale. An acre of such pecans is worth \$800 to \$1200 annually to the owners. The nuts are very large, thin shell, easy crackers, crisp and very fine flavored. Nuts in clusters of 5 to 6 each. Tree early and abundant yielder and has never missed a crop. 3 to 4 ft., \$1.50 each; 4 to 6 feet, \$2.00 each.

✓ **INDIANA PECAN**—The nut is very large, shell soft, kernel full and of excellent quality. Clusters of 4 to 5 each. Tree is the greatest bearer of any pecan tree we have ever seen, and very desirable for any purpose. 3 to 4 ft., \$1.50 each; 4 to 6 ft., \$2.00 each.

Varieties for the Middle and Southern States

✓ **STUART**—Nuts large to very large; shell medium; kernel plump, full and fine quality. Tree heavy bearer. 2 to 3 ft., \$1.25 each; 3 to 4 ft., \$1.75 each.

✓ **FROTSCHER**—Nuts very large; shell very thin; kernel large, easy moved, full, of fine quality. Tree is a heavy cropper and thrifty grower. 2 to 3 ft., \$1.25 each; 3 to 4 feet, \$1.75 each.

SCHLEY—Is medium to large; thin shell; kernel is full, plump; flavor rich, nutty; quality best. 2 to 3 ft., \$1.25 each; 3 to 4 ft., \$1.75 each.

WAGNER'S HYBRID BLACK WALNUT

The most valuable hardwood timber tree. The fastest grown hardwood tree known and one of the most beautiful shade and ornamental trees as well. Price 3 to 4 ft. tree, \$3.00 each.

Mayette English Walnut

Butternut

Franquette English Walnut

WALNUTS**AMERICAN OR BLACK WALNUT**

There is great money growing the improved varieties of black walnuts. It does not require a very large tree to produce a bushel of nuts. Large trees may bear 8 to 10 bushels. One bushel will produce 10 pounds of meat and with the improved nut crackers one can get the kernels out in halves which sell on the market for 80c per pound.

ILLINOIS WALNUT

Originated in Illinois. Nuts are very large; shell thin; kernel full and of very fine quality. When cracked with a hammer is very easily removed in halves. Tree very thrifty, hardy; productive, often bears in 2 years and makes a fine lawn tree. Price 3 to 4 feet, \$1.25; 6 for \$7.00.

THOMAS WALNUT

Originated in Illinois. One of the finest varieties ever produced. Nuts are very large, kernel large and full, of excellent quality. Trees begin to bear when very young; enormously productive; thrifty and hardy as an oak. They make a fine park or lawn tree. Price, 3 to 4 feet, \$1.25; 6 for \$7.00.

Thomas Walnut

CHESTNUTS

PARAGON—Burs of immense size, often 5 inches in diameter; nuts large; kernel sweet, fine flavor. Early and productive. 2 ft., 75c; 3 for \$2.00.

JAPAN—Very distinct, dwarf chestnut; early bearer; extra prolific; burs contain 4 to 8 nuts of immense size and extra fine quality. 1 to 2 ft., 75c; 3 for \$2.00.

SPANISH—Small, handsome, compact tree, producing large, fine flavored nuts. Needs but very little space. 1 to 2 ft., 75c; 3 for \$2.00.

AMERICAN SWEET—Distinctly useful and ornamental tree; broad leaves and profuse in flower and fruit, which is very sweet. 3 to 4 ft., \$1.00; 3 for \$2.75.

FILBERTS

Filberts are easy to grow, in fact, can be grown far easier than potatoes or wheat. They are perfectly hardy and will struggle along in spite of neglect. They bear early and abundantly. The nuts should not be gathered until they are ripe, the condition indicated by the browning of the edges of the husks. Every city and country home should have some of these trees. Price, 2 to 3 feet trees, 50c; 6 for \$2.75; dozen, \$5.00.

ENGLISH OR PERSIAN WALNUT

English Walnuts were imported from Europe and are growing west of the Rocky Mountains in very large quantities. Are now being planted with as much success in the middle and eastern states when they are budded or grafted on our hardy walnuts.

PRICE OF ENGLISH WALNUTS

2 to 3 ft. trees	-----	\$1.25 each
3 to 4 ft. trees	-----	1.75 each

RUSH—A very rapid grower, early bearer. Nuts large, smooth and attractive; kernel plump, of excellent flavor.

FRANQUETTE—Tree very hardy, thrifty and productive. The nuts command the highest the finest flavored and the best price in the market and is for ones use. Nuts very large, oval and very attractive; kernel full, sweet, with a very rich nutty flavor. Blooms late in the spring and escapes the frost.

MAYETTE—This ranks with the Franquette as one of the leading varieties. Nuts quite large, plump, crisp, and of excellent flavor. Tree hardy and abundant bearer; starts late in the spring.

NOTE—English Walnuts will grow anywhere the apple grows successfully when budded or grafted on the hardy native walnuts. We use nothing else.

BUTTERNUT

Produces large, handsome, elongated nuts with rich, sweet, oily kernels, very nutritious. Tree grows rapidly and produces large crops in a few years. At present the supply is insufficient for the demands of a single city market. There are large profits growing the Black Walnuts and Butternuts. A small outlay will bring large returns as soon as the trees begin to bear. Butternuts, like black walnuts, are among the easiest nuts to produce. The trees bear transplanting well and are an object of great beauty, particularly when filled with nuts, which grow in clusters. Price, 3 to 4 ft. trees \$1.25; 6 for \$7.00; dozen for \$12.00.

Filbert

Syracuse, N. Y., June 9th, 1923.

The Strawberry plants and Raspberries bought of you are growing fine; I never saw such fine, large, well rooted plants. Am well pleased. Send your fall catalog.—B. R. Kirkland.

FRUIT DEPARTMENT

Thrifty Fruits for Every Man's Garden—Little Cost, Little Space, Little Labor and Bring Big Returns

The United States Chamber of Commerce says: A fruit grower is engaged in the most profitable department of agriculture. He has ready money for what he needs, and as a rule lives on a higher plane and consumes more of the comforts and luxuries of life.

APPLES, THE KING OF FRUIT

REASONS WHY YOU SHOULD PLANT OUR PURE-BRED TREES

Quality the best. Trees straight, smooth, well formed and true to name.

Prices, Live and let Live.

Trees will thrive and produce fine fruit in every section of the United States.

Trees are triple inspected—only the good trees go to you.

Trees have perfect root system due to whole root grafting and budding, much cultivation and proper digging.

Only standard varieties for home use and orchard planting.

Our trees are grown on land best suited to their needs.

APPLE YIELD PER ACRE—Plant Pure-Bred trees, upland grown, propagated from bearing trees of the best pedigreed bearing qualities of the greatest yielders and get started right.

RED ASTRACHAN

SPECIAL WHOLESALE PRICES OF APPLES FROM GROWERS TO PLANTERS

		One and Two Years Old Budded and Grafted			
		Each	10	25	50
2 to 3 feet	1 year	\$0.25	\$2.00	\$4.50	\$8.00
3 to 4 feet	1 year	.40	3.50	7.50	13.00
4 to 5 feet	2 year	.50	4.50	11.00	21.00
5 to 7 feet	2 year	.75	7.00	16.00	31.00
					60.00

We have some extra fine three-year-old trees 6 to 8 feet that we can furnish for \$1.00 each, in all varieties. These types are extra well rooted and will come into bearing in a very short time.

Write for special prices on all sizes by the 500 and 1,000 lots.

Write for special prices on Apple trees in larger quantity than quoted, naming varieties and number of trees wanted. Also give size and age of trees. We will make you a special price.

In addition to costing less than the older stock, the one-year-old trees suffer less in transplanting than the older trees and will begin to grow more readily. All trees and plants are retarded less in their growth when planted young, because the root system, which is smaller, is less disturbed in the process of transplanting. We advise the planting of young fruit trees.

SUMMER VARIETY APPLES

LIVELAND RASPBERRY—Extra early; skin of a bluish or pinkish red. Flesh white as snow, tender, fine grained, juicy, mild, and just the right degree of tartness. Tree an upright grower, thrifty and abundant bearer; begin to bear the third year.

EARLY HARVEST—Large; pale yellow; tender, with a fine flavor; a good grower and a heavy bearer; about the first to ripen.

RED ASTRACHAN—Large; very handsome; juicy, very hardy, a good bearer.

WILSON RED JUNE—Large in size; deep dark red in color; long season in ripening, very often lasting 4 to 5 weeks from the time of the first ripe apple. Tree very hardy in any of the northern states.

YELLOW TRANSPARENT—An upright vigorous grower; very productive and hardy. Fruit medium size; skin pale yellow; flesh tender and juicy, with very pleasant flavor.

YELLOW TRANSPARENT

We will replace any unsatisfactory stock if advised five days after arrival.

APPLE TREE COLLECTION

Delicious Apples the year round, earliest to the latest: 2 Liveland Raspberry, 2 Yellow Transparent, 2 Golden Sweet, 3 Winter Banana, 3 Delicious, 4 Stayman Winesap and 3 Rome Beauty and 1 Yellow Siberian Crab. Twenty trees in all, 4 to 5 feet high for

\$6.00

Delivered right to your door by Parcel Post.

DELICIOUS APPLE

DUCHESS OF OLDENBURG—Medium; pale yellow, streaked red; bears young and is good cropper; useful for fall purposes; fine for market with a great demand.

GOLDEN SWEET—Large size; attractive, clear, rich, sweet, very good in flavor and quality. Fine for home use. A good grower, healthy, and productive.

FALL PIPPIN—Very large; yellow; flesh tender and delicious; tree free grower and a fine bearer; valuable for table and market.

WEALTHY—Large; brilliant red; rich sub-acid flavor; excellent quality; good keeper; highly recommended; keeps well in storage.

WINTER VARIETIES

AMERICAN BLUSH—Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. Fruit large, roundish, color bright red on yellow skin; flesh yellow with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. Nov.-Jan.

BALDWIN—This is the leading commercial variety in the American markets. It is to apples what Elberta is to peaches and Montmorency is to cherries. One of the best storage apples for export trade. Thousands of barrels of this fruit are exported to England annually. Baldwin is planted extensively and succeeds wonderfully well in all states east of the Mississippi. No variety yields larger crops, bears shipment better or is more attractive in colors, size and shape.

It is highly esteemed for an eating and cooking apple. Fruit large, bright red, crisp, juicy and rich. Trees vigorous, upright and productive. For a commercial orchard, it can be relied upon. If ever in doubt what kind of apples to plant, select Baldwin. It should be in every orchard. Dec.-March.

BEN DAVIS—Is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities. The fruit is thick-skinned, does not show bruises easily, and presents a good appearance in the package after being handled and shipped in the ordinary way. Nov.-Apr.

DELICIOUS—No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma, of very highest quality. A splendid keeper and shipper. Tree one of the hardest. Nov.-Apr.

DUCHESSE APPLES

Your Dollar Has Twice Its Purchasing Power When Dealing Direct with Us, the Growers, for the Middleman's Commission Remains in Your Pocket

FAMEUSE (Snow Apple)—Medium size; deep crimson; flesh snowy white, melting and delicious, one of the finest dessert fruits. Oct.-Dec.

GANO—An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec.-March.

GILLIFLOWER (Black)—An old dessert apple; tree a good vigorous grower and a reliable cropper. Oct.-Feb.

GRIMES' GOLDEN—Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Tree is very hardy and productive, and one of the best fillers, as it comes into bearing very early. Grimes' Golden is one of our few best sorts. Dec.-Apr.

HUBBARDSTON NONESUCH—Large, striped yellow and red; flesh yellow, juicy and tender, with an agreeable flavor of acidity and sweetness; of the finest quality and very valuable; strong grower; bears well every year; comes into bearing early. You will find it a splendid orchard tree for New York and Pennsylvania. Nov.-Mar.

JONATHAN—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Will keep well without special care and also stand much handling. Nov. Jan.

KING (King of Tompkins Co.)—When you see in the market apples of extraordinary size, beautiful red in color, specimens that

KING

NORTHERN SPY

attract the attention of everybody who passes by, you may know that these are the King apple. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, a good bearer and hardy. Nov.-Jan.

MAMMOTH BLACK TWIG—Resembles a large Winesap. Dark red. A very profitable variety to plant for the market. It is productive and a long keeper. If a late winter apple is desired you will make no mistake in adding it to your list. Dec.-Apr.

McINTOSH RED—An exceedingly valuable, hardy, attractive apple; good size; nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bearer—comes into fruiting early, yielding large crops. Mr. Alexander recommends this variety to our patrons as one of the best used as a filler. The hardiness of both tree and fruit and its great early bearing qualities, coupled with its elegant color and splendid flavor, make it a most valuable apple. Do not overlook McIntosh when selecting varieties for commercial orchard planting; has no superior as an early winter apple. Oct.-Jan.

NEWTOWN PIPPIN—Medium to large; yellow, delicious flavor; a long keeper. Known throughout Virginia as Albemarle Pippin. Nov.-May.

NORTHWESTERN GREENING—A round, large, attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality. Oct.-Apr.

NORTHERN SPY—A hardy, large, red winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong grower, rugged. Blossoms very late, escaping frosts. Its large size, handsome appearance and super-fine quality give it first rank for fancy trade. Dec.-Mar.

JONATHAN

ROME BEAUTY

ROME BEAUTY—Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit. Good grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York, West Virginia and Maryland, will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and surebearing, make it a favorite with the grower.

WINTER BANANA—Fruit large, perfect in form; golden yellow, and beautifully shaded and marbled with bright, crimson red; flesh lemon-yellow, fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. Very popular especially in New York and Pennsylvania. Nov.-Jan.

WINESAP—Large, roundish, oblong; deep red with a few streaks and a little yellow ground color appearing on the shady side; flesh yellow, firm, crisp, with a rich, high flavor; quality very good. The Winesap is an old apple that is well known and highly prized by consumers who desire a good winter variety for all purposes. Its reliability as a cropper can hardly be surpassed by any other apple grown. All orchards should have some Winesaps because of their high market value and large productiveness which make them very profitable when other less desirable varieties are slow moving. Dec.-May.

WINTER

BANANA

WEALTHY—This is one of the best red early winter apples grown and owing to its early bearing qualities it is planted largely as a filler. Its extreme hardiness makes it a valuable variety for the Eastern States and is considered to be one of the best all around early winter apples to grow. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This variety is particularly valuable for cold climates because the tree is very hardy. Wealthy is being planted largely for commercial purposes as a filler in many sections. Oct.-Jan.

CRAB APPLES

Every year more and more Crab Apples are planted. The popularity of this delicious fruit is derived from the many uses to which it can be advantageously put. For jelly it has no equal. We list only those varieties that are the best and can be highly recommended to our customers.

HYSLOP—Deep crimson fruit covered with a blue bloom; very desirable and well known.

MARTHA—Beautiful bright, glossy yellow that is shaded with a bright red.

RED SIBERIAN—Yellow, with a scarlet cheek; fruit is crisp, tender and juicy.

TRANSCENDENT—Color a golden yellow and is beautifully striped with red; flesh is crisp and tender, very juicy and of a yellowish tint.

WHITNEY—A popular variety because of its large size and productiveness. The skin is very smooth, and of a glossy green color striped and splashed with carmine; the flesh is very firm and pleasant.

YELLOW SIBERIAN (Golden Beauty)—Fruit is large and golden yellow; flesh is crisp, juicy and has a splendid flavor for eating or cider. Highly recommended.

TRANSCENDENT CRAB APPLES

PEACHES PAY HANDSOMELY

READ OUR MONEY-BACK GUARANTEE ON PAGE ONE

Our seedlings were started from natural Peach pits produced in Tennessee and raised on land never before occupied by Peach trees. Our peach trees are budded with buds cut from the heaviest bearing trees in our own bearing orchards; we know that they are true to name; we have excellent stock to offer this season; it is thrifty and first class

in every way, and we feel sure you will be more than pleased with them.

If you have a small farm or a little garden space that will grow a tree by all means plant Peaches. They come into bearing in 2 to 3 years, bear heavy crops; always bring high prices and nothing so delicious as a good ripe, juicy peach with the sweet juice running down the corners of your mouth while eating it, especially if it is picked fresh from your own tree.

Mr. Willis Rendleman of Union County, Ill., says: "I have been buying fruit trees from you ever since 1898, and have never had a single tree that was not true to name and first-class."

Selected Specimens, 5 to 7 feet, \$1.00 each.

LISTED IN ORDER OF RIPENING

JUNE ELBERTA (Earliest Yellow Semi-Freestone)—The earliest ripening peach of the Elberta type. They ripen evenly, the flavor is fine and the meat is a deep rich yellow clear to the seed. A rich golden yellow peach with a red cheek and ripens almost in the Red Bird Cling season.

ROCHESTER—The earliest real good yellow freestone peach we know of. It is of the Elberta type. The fruit is large, yellow with a most attractive red blush; ships and keeps extra well; flesh very sweet, juicy, delicious and a fine canning peach. Tree very hardy and a heavy yielder; early and regular bearer. (See inside back cover.)

EARLY ELBERTA—Freestone; midseason, yellow. The Early Elberta is truly named. It is of

the Elberta type, large, golden yellow, which is in beautiful contrast to the rich blush on the sunny cheek. The flesh is yellow like the Elberta but far better quality, sweeter and finer grained. The tree is a strong grower, of the Elberta type, and has a tendency to thin itself, carrying moderate loads of fruits. Adapted to peach growing regions. The Early Elberta originated with Dr. Summer Gleason, of Utah. (See inside back cover.)

ROCHESTER

FRUIT GROWERS ARE GROWING RICH

Most astonishing prices are being paid for fruit during the last few years. Ponderosa as well as the other better varieties of yellow Peaches sell readily for \$3.00 to \$4.50 per bushel or from \$1000 to \$2000 per acre. Peach growers are reaping profits undreamed of a bare 5 years ago.

A. J. Harden of Union county, Illinois, sold his peaches for \$1500 per acre.

If you want fine, large, juicy, rich yellow peaches, fresh from the trees from June till October, plant some of our varieties. If you have 1 to 20 acres of spare land plant our peaches and in 2 to 3 years you will have an income equal to \$20,000 to \$50,000 bank account.

We Employ No Agents. Our Catalog Is Our Only Salesman

ELBERTA—The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow. Season medium early, following quick upon Early Crawford. For those of our customers who contemplate planting the Elberta, we urge you to secure as many as possible. Early Aug. Free.

J. H. HALE—Huge; beautiful; golden; free-stone; solid; delicious; round as a ball, a great shipper, a splendid keeper, brings top prices and big profits; vigorous, sturdy trees. Sensation of the twentieth century, and is being planted by thousands of growers. In size it is one-third larger than Elberta and is more highly colored. The skin is deep crimson, smooth, tight and without fuzz. The pit separates easily from the flesh. It is exceptionally valuable as a commercial peach owing to its unusual keeping and shipping qualities. Will ship nearly as well as an apple. Your collection is incomplete without this variety. We do not hesitate to recommend J. H. Hale to our customers and their friends who desire all the qualities that this peach has. (See inside back cover.)

THE FAMOUS PONDEROSA PEACH — The Giant Four-in-One Peach, the new variety that is making growers rich. Did you ever eat anything so good in all your life? You will say this as many others have said thousands of times, when you taste the "Ponderosa," most delicious of all peaches. Great, flashing red and yellow beauties, with a crisp, tender, juicy laden flesh and an indescribable exquisite flavor, its veritable nectar, clear seed, soft melting, all that a perfect peach can be, and is fully entitled to the name it bears, as it would

J. H. HALE

PEACH TREE COLLECTION

Delicious Peaches from May to November, 20 trees, 3 to 4 feet high, for \$5.00. Two Early Elberta, 3 Rochester, 4 Ponderosa, 4 Elberta, 3 J. H. Hale, 2 Mammoth Heath Cling and 2 Krummel October. 20 trees, 7 varieties, delivered by Parcel Post, for only \$5.00

be from another point of view, to wit: the best seller, the best eater, the best canner, the best preserver. In fact, it is king of all midseason varieties; a quick grower, an early bearer and enormously productive. Has deep yellow, thick skin; flesh deep yellow, firm, fine grained, sweet and luscious. Fruit much larger than Elberta. One grower picked five bushels from one tree that sold for \$4.00 per bushel, Elberta selling for \$3.00. Ponderosa should be planted in every family and commercial orchard. (See inside back cover.)

PONDEROSA

BRACKETT—This very valuable late Peach originated in Georgia, and has been disseminated over a wide extent of country, and succeeds well generally. It has been planted to a considerable extent, and has proved a very excellent and profitable sort. Fruit large and handsome; skin yellow, with red cheek; flesh yellow, melting, sweet, and of the highest quality. We recommend it to the orchardist for its many valuable qualities.

LATE ELBERTA—Big, handsome, highly colored, yellow free-stone Elberta that ripens after Ponderosa is gone, and comes on the market when good peaches are scarce. It is one of the best shipping yellow peaches and fills the gap between Ponderosa and Krummel's October.

KRUMMEL'S OCTOBER—The greatest late peach ever introduced. Has less competition on the markets than any other big yellow peach, as it is ripe after all other good peaches are gone. Of high quality and the only free-stone that will stand up firm when sweet pickled. No peach is sweeter, no bitterness next to pit; flesh firm, fine and it ships perfectly.

NIAGARA—Tree hardy, healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. The stone parts freely from the flesh. Flavor rich and delicious, far ahead of Elberta in this respect. It is indeed a rival for this famous peach. Season is medium early, coming in just before Elberta, overlapping it one week. Last of July. Free.

CARMAN—Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; very hardy and productive every year. This is a favorite variety with many growers, as it is one of the most profitable varieties ever introduced. The fruit stands shipping so well that it always reaches market in prime condition, and its handsome appearance causes it to bring the highest prices. Early July. Free.

CHAMPION — Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; valuable for commercial orchards, extreme hardness and splendid quality make it a favorite. Free-stone. You will not make any mistake by planting this popular and well-known variety of peach.

CHAMPION

BELLE OF GEORGIA (Mid-season White Free-stone)—Has been called a "red and white Elberta" because for years it has been the standard white peach in the large commercial orchards of the Southern and Central States just as Elberta has been the standard yellow sort. The fruit is very large; rich, creamy white flesh, with a bright red blush, and is delicious in quality.

MAMMOTH HEATH CLING—One of the sweetest, juiciest, most luscious of peaches—the housewife's favorite for canning and preserving. It averages very large in size, with small pit; is creamy white in color with a red blush; smooth, clean. In the cling class the Mammoth Heath undoubtedly heads the list, combining all the good qualities of a white peach and coming to market at just the right time of the year, when canning activities are at their best.

ELBERTA CLING—Just a great big handsome yellow peach that looks like an Elberta, but is a perfect clingstone. The queen of cling peaches, both for home use and for market purposes. It is large, yellow, with red cheek, juicy and high flavor. Flesh yellow and sweet.

STINSON'S OCTOBER—Large; white, with red cheek; of very good flavor. The best very late peach. October.

SELECT CHERRY TREES

THE COMBINATION TREE—FRUIT AND SHADE

Few trees combine the useful and ornamental in a large degree as the Cherry. They make an exceedingly handsome shade tree, worthy of a place in every yard or lawn. Or they can be grown in any spare or waste space or corner, no matter how rough and stoney, needing no cultivation after the first two or three years and they are very long lived. A rich pie filled with big, ripe, juicy cherries of unsurpassable goodness is irresistible. None of the cherry's goodness has been lost when it is covered with a flaky, melt-in-the-mouth crust like mother used to make.

How to Plant—For your information cherry roots must not be given much sun or wind exposure—either are just as harmful as a heavy frost. You would not think of leaving them out over night uncovered. It is just exactly as necessary to protect them from sun and wind.

Where to Plant—On any kind of land, other than wet. They will thrive beautifully on a sandy or gravelly soil.

Requires Least Attention of all Fruits, because it has been demonstrated beyond question of doubt that scale cannot live on cherry.

SWEET CHERRIES

ABUNDANCE CHERRY—A wonderful hardy sweet cherry; suitable for the north, south, east or west; succeeds where other sweets are failures, very hardy, productive and fine everywhere; fruit very large, measuring three and one-half inches in circumference. Ripens just after Royal Ann, is sweeter, richer and more delicious and hang on the tree ten days after they are ripe. Will outyield any other variety. One of Burbank's latest productions. Known as the Million Dollar Cherry. (See back cover.)

Fresh Dug Stock Sold Direct Is More Satisfactory

SCHMIDT'S BIGGARREAU

the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripen about June 20th.

SCHMIDT'S BIGGARREAU—The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy with a fine, rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market. July.

WINDSOR—A splendid, large, liver-colored cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

YELLOW SPANISH—Large, pale yellow with red cheeks; firm, juicy and excellent, one of the best light-colored cherries; vigorous and productive. Last of June.

SOUR CHERRIES

DYEHOUSE—A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies, and especially for canning it has no superiors among cherries. Early June.

EARLY RICHMOND—This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Fruit is medium size, round and dark red. The flesh tender, juicy, and sub-acid. Ripens in June.

ENGLISH MORELLO—Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

MAY DUKE—A very large red cherry; juicy and rich; an old, well-known, excellent variety; very vigorous and productive. You should include some of this variety in your order. A cherry unsurpassed for canning and table use. Ripens in June.

BURBANK—The earliest of all the large cherries; very attractive, deep crimson color, superior quality; flesh firm, meaty and delicious. Enormously productive, hangs on the tree well, bears heavy crops every year; brings the highest price on the market on account of their fine size, color and quality. On account of their extreme earliness it means big profits to you. Tree hardy, thrifty and begin to bear when quite young (See back cover.)

BALDWIN—Large, dark red sweet cherry of great value. Flesh firm, sweet and juicy; fine for canning.

LAMBERT—A fine sweet variety originating in Oregon, and one of the largest of all cherries, dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

NAPOLEON—Tree medium size, erect with roundish head, fruit borne generally in twos, very large, oblong cordate, light lemon yellow with red cheeks in

CHERRY TREE COLLECTION

Two Abundance, 2 Burbank, 3 Montmorency King and 3 Early Richmond. 10 trees, 3 to 4 feet, by prepaid express or parcel post, for

This is a great bargain.

LAMBERT CHERRY

✓ **MONTMORENCY**—This is the finest of all the sour varieties of cherries. There is a greater demand on the market for this cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearer of all sour varieties. No matter how unfavorable the season may be Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always wanting them by the hundreds of tons.

✓ **MONTMORENCY ORDINAIRE**—(Improved.)—The most popular of hardy cherries for market and home use. The fruit is in great demand by canning factories and others, and sells at fancy prices, never enough to go around. Montmorency has been growing in popularity all over the country each year, so that it has been almost impossible to grow trees fast enough to keep up the demand. It is of large size, light red in color, stem rather short. Tree very hardy, vigorous grower. Bears fruit soon after planting.

MONTMORENCY KING—

Cannot be too highly recommended for quality and quantity of fruit, hardiness and beauty of tree, and for its never failing crops. The most popular sour cherry; ripens a week or ten days after Early Richmond. They should be planted in every cherry orchard by the thousands for the big markets as well as for the home market. For profits it has no rival, for yield it is unsurpassed. Fruit extra large, firm, fine quality, ships well, beautiful color and a great money maker all over the country.

✓ **WBAGG**—A Russian variety. One of the hardest cherries, vigorous and productive, medium size,

dark purple, fine quality and has produced annual crops at the northernmost limit.

✓ **ENGLISH MORELLO**—The most valuable late cherry. Easily grown, producing a heavy crop every year. Fruit dark red; quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes.

✓ **OLIVET**—A tree of this variety should be in every garden. The fruit is very large, has a shining deep red color; tender, mild sub-acid flavor. Finest table and canning cherry you can get. Ripens in June.

ENGLISH MORELLO

The berry plants are doing fine, you only sent me 11 La France instead of 12, but you sent 13 King of Cliffs instead of 12. Will need more in the fall.—Geo. A. Dubreuil.

Syracuse, N. Y.,
June 9th, 1923.
The Strawberry and Raspberry plants purchased of you are all growing fine; I never saw such fine, large, well rooted plants. Am well pleased. Send your fall catalog.—B. R. Kirkland.

Elmira, N. Y.,
June 10th, 1923.
The fruit trees I bought are all making a wonderful growth; every one lived. They were without doubt the finest lot of trees I have ever seen. I will want more in the fall so please send a copy of your fall catalog.—J. H. Jones.

Sparta, Wis.,
June 10th, 1923.
The Prunes, Cherries and Apples bought of you are growing fine; they are a fine lot of trees, the best I have ever planted.—J. A. Jones.

STANDARD PEARS

The pear is one of the highest quality fruits. In nothing else that grows, and in no confection made, can you get the refreshing acid, rich in spices, the honeyed sweetness, and delicacy of flavor which you find in your own garden or orchard. Plant the right selection of varieties and you can have Pears from early summer until Christmas. The following are varieties that have stood the test and are the best.

WHOLESALE PRICE OF STANDARD PEARS

Our 5 to 7 feet Pear trees are extra fancy trees, almost bearing size, and are selected specimens.

✓ **BOSC PEAR**—The king of Pears, after fruiting it many years we find it to be one of the most perfect pears grown. Extra large size, beautiful shape and color; sweet and very delicious; keeps and ships well; heavy yielder and begins to bear when quite young; vigorous and healthy grower, free from blight; one of the best for family use. (See inside front cover.)

✓ **LINCOLN PEAR**—One of the greatest pears ever introduced; blight proof, large size, fine quality, heavy cropper; tree hardy, healthy and enormously productive. Best for eating fresh, canning, preserving and general family use. (See inside front cover.)

✓ **BARTLETT**—Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored. The tree bears early and abundantly. May be grown either as dwarf or standard, but succeeds best as standard. Aside from the fact that it bears early, regularly and abundantly, the Bartlett pear is justly popular on account of its size, beauty and excellence. It originated in Berkshire, Eng., about 1770. When introduced to this country its name was lost. Since it was cultivated and discriminated by Enoch Bartlett, it became universally known as the Bartlett. Aug. and Sept.

✓ **LAWRENCE**—Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

✓ **SHELDON**—A large, round, russet and red pear of very fine quality, melting, rich and delicious. Tree vigorous, erect and handsome, bears well and should be more largely planted. Oct.

PEAR TREE COLLECTION

Two Bosc, 2 Lincoln, 3 Bartlett, 2 Seckel and 2 Winter Nelis. Eleven trees, 4 to 5 feet, for only

\$5.00

Delivered right to your door by Parcel Post. This is a big bargain.

BARTLETT

LAWRENCE

✓ **SECKEL**—A beautiful and delicious little pear that is the standard of excellence in its class. One of the richest and highest flavored pears known, always in demand for desserts and luncheons and better known than any pear of its class. The tree makes a somewhat slow but stout and erect growth. Owing to its extreme hardness it can be planted in cold climates with the assurance of best results. Sept. and Oct.

✓ **VERMONT BEAUTY**—Yellow, bright carmine cheek. Tree is very hardy and thrifty. October and November.

✓ **WILDER**—One of the very earliest pears, of excellent quality. Of medium to large size, irregular, bell-shaped; pale yellow with shadings of russet-red. Early August.

✓ **WINTER NELIS**—Winter Nelis is held in very high esteem by experienced pear orchardists in general. It is without exception the finest winter variety yet produced. The tree is very hardy and a very heavy cropper. Fruit is of medium size and roundish in appearance, yellow in color, covered with russet. The flesh is yellow, sweet and fine grained. Unexcelled for quality when fully ripe. December.

✓ **FLEMISH BEAUTY**—Large size; greenish yellow and brown; rich and juicy. An old and highly esteemed variety; a strong grower and a great bearer; hardy and desirable. Fruit almost covered with light russet, becoming reddish-brown when ripe. Large, beautiful, melting, sweet and rich.

✓ **JAPAN GOLDEN RUSSET**—Unusually productive, bearing in clusters; commencing to fruit 2 years after transplanting from the nursery. Valuable for canning. Of strong, luxuriant growth, large, dark green leaves until late in the season, when they become a beautiful bronze, changing to a brilliant crimson, and with branches bending under their loads of golden russet pears it is a thing of beauty, and an ornament in any lawn or fruit garden. Fruit is medium size, flat or apple-shaped.

✓ **KIEFFER'S HYBRID** — Originated near Philadelphia.

SECKEL PEAR

Supposed to be a seedling of a Chinese Sand Pear crossed with the Bartlett. Size large, very handsome; skin yellow with a bright vermillion cheek; very juicy, with a musky aroma; quality good when ripened to perfection. Rather coarse grained, but one of the best pears for canning or preserving. A very young and prolific bearer. As near blight-proof as a pear can be called.

FLEMISH BEAUTY

in all sections. Earlier than Bartlett and resembling the Flemish Beauty in growth. August.

✓ **CLAPP'S FAVORITE**—Large; pale lemon yellow with red cheek; flesh of fine texture, melting, buttery, juicy, with a rich vinous flavor; good for market and kitchen. Tree hardy and very productive, does well

KIEFFER

ORDER EARLY

There is one favor that we would like to ask of our customers and that is to please help us by sending in your order early, thereby being assured of receiving stock in plenty of time to plant so that it will have all the advantages to insure a rapid and healthy growth.

All orders are given the same prompt attention, regardless of size. Turn to page one and read our terms and shipping instructions, also other valuable information.

HARDY PLUMS

Plums are especially fine for eating fresh, for jellies, preserving, marmalades, canning and drying. Children and invalids eat the best sweet varieties not only with safety but positive benefit. It is one of the best fruit trees for the home garden and offers great capacity for development commercially.

door by Parcel Post

ABUNDANCE—The popular plum. Tree thrifty, hardy and beautiful; fruit large, showy and good, richly perfumed. "From one Abundance tree we picked ten pecks of fruit. The quality is excellent. When fully ripe they are full of juice. The flesh is tender, and there is mingled with the plum a peach flavor that is refreshing and agreeable." First of August.

BURBANK—The best and most profitable among growers for market; ripens 10 to 14 days after Abundance. Burbank is one of the best of Japan Plums. Unsurpassed for beauty and productiveness, as well as great hardness of tree, with a foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval often with a slight neck; skin reddish purple;

flesh yellow, juicy and good. Its beauty and value as a market variety is unsurpassed.

IMPERIAL GAGE—Rather large, oval, greenish. Flesh juicy, rich and delicious. Parts from the stone. Tree a vigorous grower, very productive and one of the best of plums. Middle of August.

RED JUNE—The great early market plum. Medium to large; deep vermilion red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. It is the best in quality of any of the early Japanese plums, free from rot. Ripens in early August.

WICKSON—This, largest of the Japan plums, is superb in every way. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet, tender, and rather dry, indicating good keeping and shipping qualities. September.

CHABOT—Very vigorous grower; leaves large with conspicuous reniform glands; young wood dark green; fruit oval heart-shaped, large, 2 inches in diameter; color greenish purple with little gray dots; suture distinct, small pit, flesh adheres. Flavor very good. Ripens July 5 to 12. Deserves the attention of all fruit-growers.

GOLD (GOLDEN) (*P. Munsoniana* and *P. triflora*) (Early Plum).—Gold is one of the most beautiful plums grown, good size, bright yellow color, often entirely covered by a brilliant currant red when fully ripe. Flesh is yellow, juicy. The skin is tough which makes it a splendid shipper in spite of the juiciness of the flesh. Splendid for canning and jellies. Sells well on all markets. Tree vigorous, very hardy. Gold should be planted in every garden because of its beauty and hardness; and is especially valuable in the Central and Southern States.

MALONEY PRUNE—Color dark blue. Flesh yellow and delicious. Tree is a splendid grower, extremely hardy. It comes into bearing at an early age. This is just the variety that the orchard man has been looking for. Season extending from September until freezing weather.

ABUNDANCE

GOLD PLUM

HANSKA PLUM

NIAGARA — Red. large size, makes an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit. Tree is an upright grower, vigorous and healthy. Middle of August.

KELSEY—Size large to very large; often 7 to 9 inches in circumference; heart-shaped; color greenish yellow, overspread with reddish purple and blue bloom; flesh very solid, yellow, rich and juicy, and with excellent flavor; pit very small, adheres slightly to the flesh. Middle of August.

SHROPSHIRE DAMSON—Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters of groups, dark purple color, esteemed for preserving. Oct.

HALE—Originated by Luther Burbank. Large round; orange, overspread with red; flesh yellow, soft and juicy, with delicate peachy flavor; clingstone; tree vigorous and productive. Ripe early in August.

Providence, R. I., June 8, 1923.

Roses and shrubs bought of you are doing very nicely. Am well pleased with everything.—J. H. Ross.

Augusta, Me., June 6, 1923.

Strawberry and Raspberry plants are growing fine; never lost a plant. The premium grape is making wonderful growth.—J. E. Smith.

Minneapolis, Minn., June 9, 1923.

Fruit trees growing nicely, except one cherry tree; it has not leaved out yet, but as a whole I am well pleased. — J. E. Farmer.

JUICY—This magnificent plum is a cross between Abundance and Robinson; the fruit is the size of the Abundance, skin thin and transparent, light yellow underlaid with scarlet, as beautiful as wax. It has a delicious sweetness mingled with acid and a high melting plum flavor; when fully ripe it is so juicy that when the skin is broken its delicious pulp flows out like honey. The tree is a luxuriant grower; blooms late in the spring thus escaping frosts; begins to bear when very small and produces enormous crops; keeps well, and the tree is perfectly hardy.

LOMBARD—It is a handsome reddish plum, the flesh yellow, juicy and pleasant. It is an excellent variety and can be relied on for a crop when other varieties fail. August.

HANSKA—Fruit large; best quality for eating from the tree, canning, preserving and jelly.

OPATA—Begin to bear at one year old; hardy, thrifty and productive. Is dark red, rich, sweet and delicious.

SAPA—Medium; fine flavor, excellent shipper; tree hardy and productive.

WANETA—Most delicious of all plums; immense size, delicious, long keeper; beautiful color; small pit; is a great yielder; hardy and thrifty.

BRADSHAW—Very large and early; dark violet red; juicy and of good quality. Vigorous and productive.

AMERICA—Large glossy, coral red, is very beautiful; firm, sweet and juicy; abundant bearer; tree hardy and productive.

Boston, Mass., June 7, 1923.

Shrubs, roses and privet bought of you were extra fine, well rooted and are growing nicely. I am well pleased with your treatment.—F. E. Baker.

LOMBARD PLUMS

A fruit grower is engaged in the most profitable department of agriculture. He has ready money for what he needs.

POMEGRANATES

The Pomegranates are very hardy shrubs. The brilliant scarlet flowers are produced in profusion, and an abundance of fruit usually follows. The fruit is used in making jellies, marmalades and acid drinks. For this latter purpose they are highly esteemed. The fruit has a fresh crispness, and a delicate, sprightly flavor found in few fruits. As a commercial fruit, the Pomegranate is steadily gaining in favor.

They are valuable as ornamentals. The new shoots and leaves in early spring vary in color

from light green to delicate pink and maroon. The showy flowers follow in early summer, and the fruit makes the shrubs attractive in autumn.

\$5.00

Standard

SUGAR SWEET PRUNES

NEW STANDARD PRUNE—One of Burbank's latest and best productions and adds millions of dollars to the prune industry. Trees enormous, never failing bearers, and good, strong healthy growers; very hardy in all climates. Well grown fruit measures 4½ inches around one way by nearly 6 inches the long way. Skin purple, with a heavy blue bloom; flesh amber or honey yellow, fine grained, very sweet, perfect freestone and never rot but dries up while on the tree.

Price, 4 to 6 foot trees, \$2.00 each; 3 for \$5.00. Stock very scarce. Why not grow and put up your own prunes? You can very easily do so by planting a few trees of the Standard Prunes.

SUGAR PRUNE—Trees are enormous never failing bearers, good, healthy and hardy growers. Fruit very large, purple skin, fine grained; flesh tender and rich in sugar and very fine for drying. Price, 4 to 6 feet trees, \$1.25 each; 3 trees for \$3.25.

GIANT PRUNE—Largest prune known: fruit averaging 2 ounces each; retaining the good qualities of the smaller varieties. Skin purple, with a heavy blue bloom; flesh yellow or amber, fine grained, juicy, firm and very sweet and a perfect freestone; never rots. Tree hardy, thrifty and very productive. Price, 4 to 6 feet trees, \$1.50 each or 3 for \$4.00.

AUSTRALIAN PRUNE—Fruit is the handsomest and as large as Giant; dark reddish purple in color. Flesh golden yellow; is very sweet, delicious, melting and mild, excellent quality. Good keeper, never rots; ships well. Tree vigorous, upright, hardy, thrifty grower, young and is an abundant bearer. Price, 4 to 6 feet trees, \$1.75 each; 3 for \$4.50.

APRICOTS

The leading characteristics of the apricots are extreme hardness, early bearing, productiveness, and freedom from disease. Every garden should have one or more trees. In the selection of choice garden fruits it is quite indispensable. It succeeds well trained against a house wall, fence or trellis, leaving the open ground for other trees.

Wholesale Prices for all Varieties of Apricots

✓ **ALEXANDER**—Very hardy, an immense bearer; fruit large, yellow, flecked with red; very beautiful, sweet and delicious. July.

✓ **GIBB**—Tree hardy, grows symmetrical, productive; fruit medium, yellowish, sub-acid, juicy and rich; the best early variety, ripening soon after strawberries. Last of June.

✓ **ALEVIS**—Very hardy; an abundant bearer; yellow, with red cheek; large to very large; slightly acid, rich and luscious. July.

✓ **J. L. BUDD**—Tree a strong grower and profuse bearer; fruit large, white with red cheek; sweet juicy, with a sweet kernel, as fine flavored as an almond; the best late variety.

✓ **ST. AMEROISE**—One of the largest and finest apricots, ripening early in August.

ALEXANDER APRICOT

✓ **HARRIS**—Equal in size and quality to the best cultivated, recommended for its hardness and good bearing qualities. June 20th to July 1st.

✓ **MONTGAMET**—Deep yellow, one of the best for preserving. Sub-acid and of good quality. Tree vigorous and productive.

SELECT VARIETIES OF QUINCE

The Quince is a fruit very useful for cooking, canning and preserving and should be more generally planted. It always brings good prices on the market. Very desirable in making preserves, as it imparts the fine quince flavor to any other fruit with which it is prepared.

Wholesale Price for all Varieties of Quince Trees

Extra Size	2 Year Trees	4 to 6 Ft.	XXX	95c each	10 for \$9.00
Orchard Size	2 Year Trees	3 to 4 Ft.	XX	85c each	10 for \$8.00

CHAMPION QUINCE

✓ **REA**—(Rea's Mammoth)—A large and fine variety of the Orange Quince. Rich and aromatic, one of the largest and handsomest. Bears young. A strong grower and productive.

✓ **VAN DEMAN**—A strong grower, the hardiest, surest and youngest bearer. Fruit golden, big, fine flavored. Tree productive.

✓ **CHAMPION**—Very large, greenish-yellow, flesh cooks as tender as an apple and without hard spots or core; flavor delicate imparting an exquisite quince taste and odor to any fruit with which it is cooked. Trees are vigorous growers and bear heavy crops of superior fruit; one of the best for sections not subject to early frosts.

✓ **MEECH'S PROLIFIC**—A large, late ripening variety; one of the best.

✓ **MISSOURI MAMMOTH**—Rich and aromatic, one of the largest and handsomest. Bears young and prolifically.

✓ **ORANGE**—Large; roundish, of a bright golden yellow color, flesh firm and tough until cooked, when it becomes tender, juicy and of excellent flavor. Tree has rather slender shoots and oval leaves; very productive. This is the variety most extensively cultivated for the fruit. Ripen Oct.

All our fruit trees, shrubs and vines are guaranteed to be true to name and if a mistake should be made we will be glad to rectify same.

FIGS

No fruit is more valuable in the fruit-graden than Figs. They can be closely planted—10 to 12 feet apart—and yield heavily. The Fig-canning industry is gradually extending throughout the country, and since several tons of fruit can be produced on an acre of ground, it is well adapted to intensive culture. The preserved product put up at the present time in no wise supplies the demand, and we look for a very material increase in the Fig-canning industry.

The fresh Fig is also finding its way into the markets, and meeting with a ready sale. Carefully picked at the right stage of maturity and packed in strawberry crates, they can be placed by express in distant markets, four or five hundred miles, or even more, in good condition.

Figs come into bearing very early, and for that reason commend themselves to the fruit-grower. With a proper selection of varieties, fruit may be secured from June to November. Figs often succeed best when planted so the roots may run beneath buildings. Orchard plantings should be made on heavy soils, clay soils, or on lands where the clay is very close to the surface.

Figs succeed best with little or no cultivation and such shallow because the roots are close to the surface. Mulching gives satisfactory results because it supplies needed vegetable material as it decays and keeps the roots cool and moist.

CELESTE FIGS

ADAMS IMPROVED ELDERBERRY

A new fruit perfected from the common elderberry. The small white flowers come in large handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse, ripening in August. Grows 6 to 8 feet high. Berries are highly esteemed for pies, sauce, cordials and highly flavored wine, which is very refreshing. Everybody likes these improved elderberries; they are easy to grow and do well anywhere. Price, 50c each; 3 for \$1.00; 6 for \$1.75.

HORSERADISH ROOT

This variety ranks hardy and desirable.

CELESTE—Small to medium, pear-shaped, ribbed; violet-colored, sometimes shading to purplish brown, covered with bloom about half way up from the neck; stem short, stout. Flesh whitish, shading to rose-color at center; flesh firm, juicy, sweet, excellent quality. One of the hardiest varieties of Figs, and can be grown far outside of the usual limits of culture; very desirable for canning and preserving.

PRICES ON FIGS

	Each	10	100
2 to 3 feet-----	\$0.65	\$6.00	\$50.00
3 to 4 feet-----	.80	7.50	70.00

BUNSWICK—Fruit very large, broadly pear-shaped, with short, rather slender stalk; ribs well marked, eye large, open, with rosy scales; skin tough, dark brown in color; pulp thick, soft, quality very good. Satisfactory variety.

BROWN TURKEY—Size medium to large; broadly pear-shaped, with short, thick stalk; ribs few in number; color coppery brown; flesh white, or slightly amber-colored, shading to pink about the seeds; flesh solid, excellent quality.

HOLT'S MAMMOTH SAGE

The plants of this grand new variety are very robust, making a good growth the first season. The leaf is broad, thick and is borne well above the ground, is of unusual substance, strong in flavor and of excellent flavor and quality. The plants are perfectly hardy and increase with age. They do not run to seed. 15c each, 10 for \$1.30 by mail. By express, \$10.00 per 100.

HORSERADISH SETS

NEW BOHEMIAN—Roots extra large, producing about twice as much as the common sort; flesh pure white, tender and free from stringiness. Is never affected with any kind of insects; produce 3 to 4 tons per acre when cared for. Fine sets, 50c per doz.; \$1.50 per 100; \$12.00 per 1,000.

PAW PAWS

WINTER BANANA—A small, handsome tree with large purple flowers which make it a handsome tree for the park or lawn. The large yellow fruit has the flavor and shape of the banana and is very delicious. First class trees, 50c each, 3 for \$1.25.

HOLT'S MAMMOTH SAGE

PERSIMMONS

A selection of varieties will give fine delicious fruit from July to December. Trees are vigorous, healthy, easy to cultivate and very productive; carefully graded, well packed persimmon fruit meets with ready sale and prices are steadily increasing as the fruit becomes better known. The bulk of the crop last season sold at \$3.50 to \$7 per crate in the Northern and Western markets.

Persimmon trees can be set out any time from October until April. They should be given a distance of 18 to 20 feet apart each way, 108 to 130 trees to the acre. The tops should be cut back to 2½ feet.

Varieties of Persimmons Described

TANE-NASHI—Large to very large, roundish, conical, pointed, very smooth and symmetrical; diameter 3¼ inches longitudinally, 3¾ inches transversally; skin light yellow, changing to bright red; flesh yellow and seedless; quality very fine; perhaps the most highly estimated of the light-flesh kind. Vigorous, prolific. Uniform size, quality and shape combine to make the most desirable variety. Price, 3 to 4 feet, \$1.50, 3 for \$4.00.

HYAKUME—Large to very large, varying from roundish oblong to roundish oblate, but always what flattened at both ends; generally slightly depressed at the point opposite the stem; diameter 2-7-8 longitudinally 3¼ inches transversally; skin light buff yellow, nearly always marked with rings and veins apex; flesh dark brown, sweet, crisp and meaty, not astringent; good while still hard. The tree is of good growth and a heavy bearer. Price, 3 to 4 feet, 1.00; 3 for \$2.75.

FUYUGAKI (New)—This variety possesses several characteristics which place it in a class

TANE-NASHI PERSIMMON

by itself. It is never astringent, it is always light fleshed, it is edible while still hard and may be peeled and eaten like an apple. It keeps well and in quality it is one of the very best. Fruit large in size, rather flattened, beautiful deep red in color, tree very prolific. It can be placed on the market while still hard, and can be eaten without waiting for the fruit to soften. Price, 3 to 4 feet, \$1.00; 3 for \$2.75.

SPECIAL PRICE—One tree each of the 3 varieties for \$2.90.

MULBERRIES

The Mulberry is well adapted generally to Southern conditions, and no fruit tree is more valuable on the farm. Its wide-spreading branches afford splendid shade throughout summer, and it is without question the best shade tree for poultry yards and hog pastures. The fruit is readily eaten by poultry and pigs, and as some varieties continue in fruit for several weeks, or even months, it is no mean source of food supply.

Prices on Mulberries

On Mulberry Stock	Each	10
3 to 4 feet.....	65c	\$6.00
4 to 6 feet.....	80c	7.50

NEW AMERICAN MULBERRIES

HICKS—Fruit sweet; tree grows rapidly and bears young; productive; should be grown by every farmer who keeps swine or poultry, this variety being of special value for this purpose; continues in bearing four months of the year, which makes it an exceptionally valuable variety.

STUBBS—Large, black; acid; excellent; prolific. Fruit from 1½ to 2 inches long, superior to any other. Tree vigorous and handsome.

TOWNSEND—Berries of medium size and fair quality. Ripens very early; should be planted where birds are apt to ruin other early fruits.

NEW AMERICAN—Largest of all the Mulberries. It bears heavy crops at three years old. The fruit is jet black and excellent quality. Tree a rapid grower, handsome shape and form, making a very handsome shade tree for the park or lawn; they bear fruit continuously from May to August.

DOWNING EVERBEARING—The beauty and handsome shape of this as a lawn or park tree is quite enough to command it but in addition it yields an abundant supply of its large refreshing berries for about 3 months. No raiser of chickens can afford to be without them even if they cost \$5 a tree.

OUR SELECT HARDY GRAPES

FOR THE MILLIONS AND THE MILLIONAIRES

Grow your own Grapes. Have fresh grapes from early summer till winter. Make your own grape juice, jelly etc. Book of culture instructions furnished on request with each order for Grape Vines.

The grape is the most healthful of all fruits and the most highly esteemed for its many uses. It can be and should be grown by everyone who has a garden, a yard, a fence or a wall. It can be confined to a stake, bound to a trellis, trained over an arbor, or extended until it covers a large tree or building and still it yields its graceful bunches of luscious fruit. They are hardy, vigorous, productive—and begin to bear the second or third year.

BLACK GRAPES

CAMPBELL'S EARLY

—Handsome black berries, with purple bloom; bunch large, is double shouldered and compact. Flesh sweet to the center; skin tough and a good shipper. Early.

BETA—Bunch is large and compact; berry of medium size, very early; rank grower, extremely hardy and enormously productive. Does well in the extreme north.

DAISY — The earliest grape known; bunch and berry medium size; fine quality; very hardy, robust and very productive; fine for all cold sections.

CONCORD — The most extensively planted and generally successful grape in America. The bunch and berry large, fair quality, is medium early; rank grower, is healthy, hardy and productive.

HERBERT—Bunch and berry very large; flesh sweet, tender and of fine quality. Early, hardy and productive; one of the best.

IVES—Bunch and berry medium; compact. Very healthy, hardy, vigorous and productive. A successful market grape.

HUBBARD

✓ **MOORE**—Bunch large, berry very large; is equal to Concord in productiveness and quality but sweeter and 10 days earlier.

THE WONDERFUL HUBBARD GRAPE

✓ **HUBBARD**—The famous table grape, the finest early black grape, the sweetest, richest and most delicious grape yet produced. Texture tender, pulp melting, flavor pure and refined, brisk, refreshing and honey sweetness. Ripens 10 days before Concord; bunch extra large, very compact; berry very large, jet black thin skin, few seeds. Hubbard was awarded the Silver Medal at a meeting at Berkley, Calif.

✓ **MARVELOUS**—Extra large size bunch and berry; very early. Sweetest and best in quality, pulp sweet, melting and tender. Very hardy and a vigorous grower and very productive.

✓ **WORDEN**—This excellent grape is as hardy, healthy, vigorous and productive as Concord, of better quality, sweeter, larger in bunch and berry, and several days earlier.

Marvellous Grapes

Brighton Grapes

RED GRAPES

✓ **BRIGHTON**—Bunch large, long and shouldered; berries are medium size, skin thin, flesh very tender, sweet and best quality. Ripens early; very productive and vigorous.

✓ **CACO** (Catawba-Concord)—The most delicious of all pink or red grapes. Berry very large, bright wine red; bunch large, compact and of good form. Quality unsurpassed, rich in sugar, sweet, tender and very delicious. (See front cover.)

GRAPE COLLECTION

2 Hubbard, 3 Marvellous, 8 Concord, 2 Green Mountain. 15 strong, well rooted grape vines for **\$3.00**

Delivered right to your door by Parcel Post. This is a wonderful bargain.

WHITE GRAPES

GREEN MOUNTAIN—An extra early grape; skin very thin, tender and sweet; contains only one or two seeds; superb quality.

MOORE'S DIAMOND—Bunch and berry large; quality extra fine; strong healthy grower; very hardy, productive; fine for home or market.

NIAGARA—Very valuable for both garden and vineyard; bunch and berry large; skin thin; flesh tender and sweet.

AMBROSIA

BLACKBERRIES ARE PROFITABLE

Blackberries are among the best known and most valued of our berries. No fruit of any kind is more wholesome. A liberal use of berries and other fruit will save doctor's bills. Blackberries should be planted in every home garden; as a money-maker they cannot be beaten; they are easily grown and succeed on any and all the different kinds of soil.

AMBROSIA BLACKBERRY—The earliest blackberry in cultivation, ripening 10 days before the Early Harvest, earlier than any dewberry; ripening with the earliest raspberries and before all of the strawberries are gone. Berries extra large, long, meaty, sweet, mild, of exquisite flavor and surpassing quality; rich in sugar and free from the bitter taste contained in most blackberries; firm texture, compact and free from any hard core; seed small and so soft that the whole berry melts in one's mouth while eating. Berries hang in large, long clusters more like grapes, easily picked, does not scald, rust or blight and hold their large size through entire season. Berries very attractive and fine for the table, pies, jelly, jam, and blackberry juice. Canes are absolutely always and everywhere hardy, thrifty and enormously productive, producing 250 cases of 24 quarts per acre; sold in Chicago for \$8 per case on account of extreme earliness, fine flavor, large size and fine appearance.

THE WORLD'S GREATEST BLACKBERRY WONDER

CORY THORNLESS BLACKBERRY—Smooth as a grapevine. As early as Ambrosia, the earliest blackberry in cultivation. Mammoth in size, many measuring 3 inches in length. The greatest home garden, market and commercial crop in the United States. Nothing approaches it in size, beauty, fine flavor and productiveness. Will add millions to the fruit growers over the entire world.

Blackberries are a great favorite among fruit growers and gardeners; the greatest objection in growing the blackberry is the sharp thorns that puncture the hands while picking the berries and working among and handling the vines. With this objection eliminated the picking of blackberries is delightful and a pleasure; we have all of these objections removed in the Cory Thornless, absolutely thornless and smooth as a grape vine.

This wonderful blackberry was first discovered growing in the mountain passes near the snow line near Jamestown, California; it is now being grown very extensively over the great berry growing district of California and is gaining in popularity wherever grown and far surpassing all other varieties.

HOCO (Honey Coreless)—The giant of all blackberries. The berries are extra large in size, $1\frac{1}{2}$ to 2 inches long and as large as a man's thumb. Enormously productive, producing at the rate of 8,500 quarts to the acre; begin to ripen medium early and continue over a long period of time; berries of the finest flavor, sweet, juicy, delicious, and almost coreless hence its name. As a fresh fruit from the vine to the table it is a berry d'luxé. For cooking it is superior to other blackberries, as it contains much less acid than even the Loganberry, making it possible to make luscious jams, preserves and jellies with much less sugar than any other blackberry. We consider the Hoco the finest flavored, heaviest cropping, best appearing berry ever grown.

Spokane, Wash., June 6, 1922.

The nursery stock I received from you are doing fine; could not be better.—S. P. Fogwill.

TEXAS EVERBEARING BLACKBERRY

—First introduced by Mr. Texas, who brought it from South Africa. This is the greatest acquisition of the day. One grower claims he has picked 108 quarts from a dozen plants. The fruit is borne in enormous clusters, with a long fruiting season. The fruit is firm, melting, sweet and fine for shortcake, for dessert, jam, jellies and preserving and almost as large as English walnuts. Canes very hardy, thrifty and an upright grower; seem to do well everywhere and on any kind of soil. These berries are becoming very popular everywhere.

Everybody likes them and those who have them want more. Should be planted on every farm and in every garden.

BLOWERS—This is one of the most remarkable new fruits ever produced. One single bush has been known to have produced 2,694 berries. It has the longest fruiting season of any blackberry, lasting from July to October, producing its greatest crop in August, and much in September. It is very attractive for market both on account of its size and its excellent appearance. Usually sells at from one to two cents a quart higher than other kinds.

TEXAS BLACKBERRY

ELDORADO—The vines are very hardy and vigorous, enduring the winters of the far northwest without injury, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well together; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired. Perhaps the most valuable sort in cultivation. A great favorite with buyers of large quantities of fruits, such as commission men.

MERSEREAU — A remarkably strong grower, upright, producing stout, stocky canes. Claimed to be the hardiest blackberry, standing uninjured 20 degrees below zero without protection. An enormous producer of extra-size berries, which are brilliant black and retain their color; extra quality; sweet, rich and melting, without core.

WARD—This is a vigorous grower and gives large annual crops of beautiful large berries. The fruit is black throughout, firm and good for shipment, yet tender and melting and of the best quality. This is more largely grown than any other variety. The plant is rust-resistant, and the berries are almost wholly without a core. Midseason.

EARLY HARVEST—Anyone with a good local market will find this variety very profitable as it bears early and over a long season. The fruit is medium sized, good quality, a very sweet delicious flavor. The canes are strong, healthy, upright growers, and produce an enormous amount of fruit. You will find Early Harvest a good dependable variety and much better than a lot of the newer introductions.

ELDORADO BLACKBERRY

Rochester, N. Y., June 7th, 1923.

All the trees I bought of you are growing nicely; lost one rose out of 25; all the Spireas and privets are doing well. Am well pleased.—R. F. HALL

NEW LOGAN BERRY (Blackberry-Raspberry)

—This thornless blackberry-raspberry is an exceedingly strong grower, making the growth of 10 feet in one season. The fruit is as large as the largest sized blackberry, of the same form and shape, and the color, when fully ripe, is a dark bright red. It is excellent for the table. The fruit ripens before raspberries and blackberries.

MAMMOTH—The giant of all. The berries are enormously large; measure from 2 to 2½ inches long. For cooking purposes fulfills all the desired qualities of other blackberries, and as a fresh fruit is generally preferable, owing to large size and having more pulp and less core.

BURBANK'S HYBRID BERRY "PHENOMENAL"—Burbank's latest berry triumph, largest berry known. The color and flavor are those of the raspberry, while in size and shape it is more like the Dewberry. The berries grow in clusters from five to ten, and single berries have measured 3 inches. The color is a bright crimson. They are of delicious flavor.

BLACKBERRY COLLECTION No. 1—3 plants each of the 12 varieties for \$3.50, postpaid. Blackberries all season, from the earliest to the latest.

WARD BLACKBERRY **MAMMOTH**

BLACKBERRY COLLECTION No. 2—12 plants each of the 12 varieties for \$8.50, postpaid. 144 plants in all. Regular price \$14.00. This is a wonderful bargain.

New York, June 8, 1923.

The Shrubs and Fruit Trees bought of you are making a fine growth, every one lived; the roses were the finest I ever bought from any nursery.—J. L. Cope.

DEWBERRIES

GARDENA—The earliest and largest Dewberry known. Its superior points are extreme earliness, extra large size, great productiveness, its black glossy color. Fruit very firm, sweet, juicy and delicious, fine for eating in pies, jellies, jam and makes excellent juice or wine.

LUCRETIA—Is an old standard variety, is well liked and popular and profitable. Berries large, long, sweet, juicy and good quality. Vines very productive, hardy, thrifty, and succeeds everywhere.

Our Pure-Bred Raspberries

Among the berries we consider the raspberry to be second only in importance to the strawberry. It should be grown in every family fruit garden. The fruit is very delicious and healthful and is greatly appreciated almost by every lover of fine fruits. It is fine for pies, canning, jellies, and jam. Surely no one will do without raspberries when they can be so easily had.

LA FRANCE, GIANT EVERBEARING RED RASPBERRY

Genuine Everbearing Raspberries, the daintiest and most delicious of all fruits. Big, rich, sweet juicy berries from July until November.

The berries are twice the size of other raspberries, wonderfully delicious in flavor; firm; the size of the berry and its delicious flavor are the same from the first to last. The late crops, when raspberries are scarce and therefore highly priced, are heavier than the earlier ones.

La France is a prodigious bearer throughout the season, from late June until all vegetation is killed by frost.

The bushes of this remarkable raspberry are rapid, vigorous growers, often reaching a height of nine feet. The canes are strong and erect, frequently an inch or more in diameter with practically no thorns. This makes berry picking comfortable. The canes branch freely adding greatly to their productivity.

La France Red Raspberries are more than three times the size of those in such favorites as the Cuthbert and the berry contains less than half as many "drupes" therefore, the fruit contains fewer seeds than all other berries.

The La France is all "meat," all berry; not all seeds.

La France Red Raspberry fruits early in June continuing throughout the growing season; after being established they will bear as early as June and as late as November last and later, so long as heavy frost has not killed all vegetation.

La France is perfectly hardy and has been thoroughly and successfully tested in various parts of the country.

In the Northwest, the great berry growing section of America growers are most enthusiastic over La France and are planting it heavily.

It is the best for home garden and a great money maker for berry growers.

La France will take the place of all other Red Raspberries and the demand for plants will be enormous as soon as they become better known.

We want every one of our customers to give this wonderful raspberry a trial and our word for it you will never have cause to regret your purchase.

We have made the price very low so they would be in the reach of all lovers of fine, delicious red raspberries.

LA FRANCE

RASPBERRIES ARE NEEDED BY EVERYONE—EVERYWHERE

Raspberries to can, to make into delicious preserves, jellies, jam—so good they will make the mouth of a mummy water; raspberries for all the children—for all the grown-ups—for every meal—when you just can't think of anything for dinner. You can grow them yourself on your own ground at little cost; you can have these fresh on your table from June till November by planting the Everbearing varieties.

ST. REGIS—Another very early Everbearing Red Raspberry; very early, bright red color, fine flavor and produce fruit from spring till fall. Fruit small to medium in size, firm and a good shipper.

WELCH (Honey)—Red. So sweet and rich in flavor, and is known as "Honey Raspberry." Berries large size, good bright crimson color and honey sweetness, melting and luscious; very fine quality. Canes vigorous, hardy and productive. Especially recommended for home use.

KING OF CLIFFS (Everbearing Black Raspberry)—The most wonderful black raspberry ever introduced. Another season has proven the "King of Cliffs" to be very delicious, of honey sweetness, small soft seed, black glossy color, long season of ripening places it in a class unapproached and alone as an Everbearing Black Raspberry. The "Earliest and the Latest" is truly a wonderful raspberry, extremely early, ripening before strawberries are gone. Canes of iron clad hardness, enduring the severest cold uninjured. Large, upright, thrifty, rank grower; wonderfully productive. Canes never affected by Anthracnose or any other disease or fungus. Withstands the heat and drouth of summer and the blizzards of winter better than any other variety. We especially recommend this excellent tried variety for table use as well as for market.

KING OF MARKET RED RASPBERRY

—The famous King of Market Red Raspberry is the largest red raspberry we have ever tested with the exception

WELCH, RED

of the La France.

The berries are showy and attractive in color, firm, sweet, juicy, very small soft seeds. It bears very heavy crops spring, summer and fall; as a spring variety it has few equals as to large size of berries and productiveness; sells at a premium over other raspberries on the market. This variety is being planted here in Southern Illinois more than any other variety.

As an everbearing variety it has no equal. The vines in the fall are so laden with large, brilliant red berries, that they are bent to almost breaking in a rainbow shape, and they continue to bear until checked by hard freezing. There never was a better opportunity for the fruit grower to make big money.

KING OF THE MARKET

Chicago, Ill.,

June 13th, 1923.

The Rose bushes are doing fine; all of them full of blooms. They were the finest bushes I ever received. Also the grapes are doing well and I am well pleased.

Very truly,
HARRY HEHL.

HONEYSWEET—Black. Berries extra large, glossy black, firm, and remarkably rich, of honey flavored sweetness and very luscious; oblong in shape, very meaty, has very small seed; flavor unsurpassed; it hangs on the vine a long time. Berries are produced in great abundance; sells for a premium over any other variety. The fruit pulp surrounding the seed is full of thick sweet juice, very little sugar is necessary in serving or canning.

CUTHBERT—Red. The leading red raspberry, the standard main-crop variety. It is very productive of large, conical, rich crimson berries, and altogether it presents a very handsome appearance. The flavor is delicious and the fruit as a market berry and a shipper has no superior in red raspberries. The season is medium to late.

BLACK DIAMOND—One of the best for home and market use. For drying and evaporating it excels all others. The fruit is large, sweet and excellent.

PLUM FARMER—Has been thoroughly tested in western New York where it is a great favorite for market and home use. The fruit is very large, often measuring an inch in diameter. Brings the highest prices on the market.

CUMBERLAND—The business blackcap. It is of wonderful productiveness, producing regularly and uniformly very large crops. In size the fruit is simply enormous,

HONEYSWEET

far surpassing any other variety. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter. In quality it is similar and fully equal to the Gregg. It is unusually firm and is well adapted for long shipments. It is an unusually strong grower, throwing up stout, stocky canes, well adapted for supporting their loads of large fruit.

100 plants
\$6.00

JUNIOR COLLECTION

Three plants each of the 10 varieties, 30 plants in all for \$3.50 postpaid.
Regular value, \$4.50.

Jonesboro, Ark., July 16th, 1923.

I want to commend you on the strawberry plants; every one grew and all bloomed and have five and six berries now to each plant. This is ahead of any experience I have before had.

N. B. LAMB, Attorney.

RHUBARB OR PIE PLANT

This deserves to be ranked among the best early vegetables of the garden. Scarcely has the grass begun to grow when your table can be supplied with this earliest of all vegetables. Excellent for sauce, pies, cakes, jellies, puddings, wine, etc. Continuing long in use and is valuable for canning for winter use. Succeeds everywhere, easy to grow and should be in every garden or lot as you get more value for your money than any other vegetable.

Culture—Good plants are easily grown in any good soil. Plant 4 feet apart each way, in deep, warm and very rich soil. The more manure the better the stalks. For winter forcing take up 2-year roots in fall, leave out to freeze, then bed close together on cellar bottom or under greenhouse bench in the dark.

GIANT CRIMSON

BURBANK'S GIANT CRIMSON

This is one of the greatest and most valuable vegetables we have ever offered. It is the earliest, tenderest, sweetest and best of all rhubarbs; fit for use in early spring, summer and all fall, while the common or sour sorts are fit for use only a few weeks in the spring. As fast as stalks are pulled new ones take their places. Scarcely has the frost disappeared until your table is supplied with this delicious, refreshing and healthful article of food which is so much desired and appreciated. The stalks are twice the size of the ordinary kind, and of a bright crimson color, very tender, crisp, and of mild delightful flavor; the skin is so tender it does not have to be removed when cooking and the sauce has a deep crimson color. Stalks will average 18 to 24 inches long, broad, thick, and solid, stalks will weigh on an average $\frac{1}{2}$ pound each and often weigh a full pound. Enormously productive, bring high prices and is a great money-maker and in great demand. Try a dozen or two, our word for it you will never have cause to regret your purchase and you will never be without some of this variety. Price, strong roots, 3 for 50c; 7 for \$1.00; 15 for \$2.00; 50 for \$5.00, postpaid.

RHUBARB COLLECTION

Four strong roots each of the three varieties postpaid. 12 roots in all, making one of the finest Rhubarb Collections that could be had at any price and will make plenty of fresh stalks all summer for any family. For \$1.50.

NILES GIANT RHUBARB

New. Originated in California. Stalks are very large, tender, crisp, sweet and very delicious. It is a very rapid grower and very early; it has deep red stalks which give the sauce when cooked a fine light red color. This variety of Rhubarb is so sweet that it needs but very little sugar; do away with the old expensive sour varieties and plant the Niles Giant. This is a very promising variety which succeeds in all climates and in all soils and we want every person to plant some of each of the three varieties. Price, 3 for 50c; 7 for \$1.00; 15 for \$2.00; 50 for \$5.00, prepaid.

WAGONER'S GIANT RHUBARB

This wonderful new variety is creating quite a sensation all over the country, everybody wanting some of this variety, all that have tried it wants more. It is displayed at the market in apple boxes and the boxes are barely long enough to accommodate the long, large thick red stalks that will average 8 to 12 ounces each. It is remarkably early, bearing large stems within five months from planting of the seed; and grows nearly the entire year when the frost is out of the ground. The stems are so tender that they do not need peeling. Price, 3 for 60c; 6 for \$1.00; 25 for \$3.00, postpaid.

Write for special prices on Rhubarb roots by the 100 and 1,000 to be shipped by express or freight. Our stock is large and very fine and can make "Special Prices" on large lots.

ASPARAGUS

No home garden is complete, and no housewife has justice done her unless provided with a bed of this excellent and most wholesome vegetable. What is more healthful or more appetizing than a dish of asparagus, coming as it does in early spring when the appetite is craving something of this sort? One of the earliest vegetables. It is most beneficial in bladder and kidney troubles, very easily digested and very highly recommended by all physicians. When eaten freely it tones up the system, purifies the blood, drives away malaria and saves many a doctor's bill. A bed once established will give abundant supply for a generation; 200 to 300 roots will produce enough for an ordinary family, but 500 is better. You can cut it every day for months and it will come as fast as cut; easily grown anywhere and everywhere in the corner of the back yard, garden or along the fence or in any vacant spot. Every home should have its asparagus.

ASPARAGUS—A Great Money Crop

More than \$500,000 worth of Asparagus are shipped from Southern Illinois every spring. Great fortunes are being made here growing this early vegetable. It is no uncommon thing for the first shipments of asparagus to sell for \$12.00 to \$20.00 per bushel or at the rate of from \$300 to \$500 per acre. There is always a great demand for fine large asparagus to sell for \$12 to \$20 per bushel or at the rate of from \$300 to \$500 an acre. There is always a great demand for fine large asparagus in every home market. Why not grow asparagus and supply your local markets? Free culture instructions furnished with each order for asparagus when requested.

MARTHA WASHINGTON—A new rust resistant asparagus. This new pedigreed rust resistant variety was bred up by the United States Bureau of Plant Industry co-operating with the Massachusetts Agricultural Experiment Station covering a period of 14 years. The name Washington was applied because the original or first acceptable rust proof male plant was given that name. Stalks extra large in size, purple color, very tender, crisp and extra fine flavored. Grows very fast and comes up thick on the rows; making it the most productive variety in existence. The heads stay very compact, solid and always bring a premium over any other variety. We have reduced the price so they will be in reach of all. We want every lover of fine delicious vegetables to try this wonderful well tested variety. Price, strong 2 year old roots, doz., 75c; 100, \$2.00, postpaid. By express, not prepaid, 100 for \$1.75; 500 for \$7.50; 1000 for \$14. Price, 1 year old roots, doz., 50c; 100, \$1.80; postpaid. By express, not prepaid, 100 for \$1.15; 500 for \$5.00; 1000 for \$9.30. Write for price on large lots.

READING PURPLE GIANT—A remarkable strong growing and a very valuable variety. It has such vigor that it gives shoots large enough for cutting in one year from planting, if planted in good soil and well cultivated. The shoots are of a decidedly purple color and are produced in great numbers from early till late—a season of 2 to 3 months. It is so valuable in every way it will be planted for market as well as the table more extensively as soon as it is better known. Price, strong 2 year old roots, doz., 50c; 100 for \$1.50, postpaid. By express, not prepaid, 100 for \$1.25; 500 for \$5.50; 1000 for \$10.00. Price, 1 year old roots, doz., 35c; 100 for \$1.00, postpaid. By express, not prepaid, 100 for 85c; 500 for \$3.65; 1000 for \$6.60.

NEW PERFECTION—This standard and popular variety is planted here in Southern Illinois very extensively. This is a great money-maker and at 3 years old have netted the growers \$500 an acre in 5 to 10 acre fields with ordinary cultivation. In short it has all the qualities demanded for the market and will prove itself to everyone who grows it to be true to its name—Perfection. It is deliciously tender, extra large, very early, uniform, prolific, crisp and deep purple. Price,

PALMETTO

strong 2 year old roots, doz., 50c; 100 for \$1.50, postpaid. By express, not prepaid, 100 for \$1.25; 500 for \$5.50; 1000 for \$10. Price, 1 year old roots, doz., 35c; 100 for \$1.00, postpaid. By express, not prepaid, 100 for 85c; 500 for \$3.65; 1000 for \$6.60.

PALMETTO—Stalks purple, medium size and prolific; season early and regular in growth. This grand good variety has been planted very extensively all over the country but is now being surpassed by better varieties. Price, 50c doz., \$1.25 per 100, by mail, 100 for 90c, 500 for \$4.50, 1000 for \$8.00, by express. Price, 1 year old roots, doz., 35c; 100 for 85c, by mail, 100 for 60c, 500 for \$3.00, 1000 for \$5.30 by express.

READ OUR MONEY BACK GUARANTEE ON PAGE ONE.

GOOSEBERRIES

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit.

Price for all varieties of Gooseberries named below, strong 2-year bushes, 40 cents each, 10 for \$3.00, 100 for \$25.00.

DOWNING—The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Enormously productive.

JOSSELYN—Marvelously productive and bears second. If not the first year planted. The fruit is of large size, color dark red.

RED JACKET—An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper.

CURRENTS

The currant is one of the most reliable of small fruits

They mature just before raspberries and can be used either raw or cooked. Being hardy, they do not winter kill, are easy of cultivation and require little care. They can be grown in any good garden soil.

Price of All Varieties of Currant Bushes

	Each	10	100
2-year No. 1 strong bushes—	\$0.25	\$2.25	\$20.00
Parcel Post—Currants can be sent by parcel post, postage prepaid for 2 cents per bush extra.			

CHERRY—Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin skinned, juicy and fine flavored. One of the most productive of the large currants.

DIPLOMA—Large, solid and of good quality, very attractive appearance, both clusters and berries being very large. Vigorous grower and the most productive red currant.

FAY'S PROLIFIC—Bush vigorous but not quite so strong a grower as Cherry. Cluster medium to long, with rather long stems. Color darker and berry averages large. Juicy and less acid than Cherry.

PERFECTION—In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries is maintained to the end of the bunch.

RED CROSS—A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

RED CROSS

Flowering Shrubs

They are absolutely hardy and once planted, last indefinitely, increasing in size and beauty year after year and lasting a lifetime. They supply that something which is lacking in every yard where a hardy shrubbery is not planted. We recommend a liberal planting of this class of plants; they increase the value of the property, make the home more attractive, life worth living, giving satisfaction and contentment that nothing else can.

Every man's heart has a place for the old-fashioned flowering shrubs,—and some of the new fashioned ones are even more enticing. No home makes quite a home-picture without them.

They complete and blend all the other parts of the composition, making a unity of trees, evergreens and flowers.

BUTTERFLY BUSH

Seems to attract butterflies in large numbers. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long. It blossoms from early summer till frost; splendid for cutting. 2 to 3 ft., 50c each, 5 for \$2.00.

CALYCANTHUS (Allspice or Sweet Shrub)—It blooms abundantly in June and at intervals through the summer. Has rare and peculiar fragrance of wood and flowers. 2 to 3 ft., 35c.

CEIONANTHUS (White Fringe)—Has large, glossy leaves; has long clusters of white flowers in May and June that droop and appear like fringe. 2 to 3 ft., 80c each.

CORNUS (Dogwood)—One

AN ATTRACTIVE PORCH PLANTING

BUTTERFLY BUSH

DEUTZIA

of the handsomest variegated-leaved shrubs. Bark brilliant red, leaves green, broadly margined with white. 2 to 3 ft., 50c.

CORNUS (European Red Osier)—A shrub with blood red bark and clusters of fine white flowers. 2 to 3 ft., 35c; 3 for \$1.00.

CYDONIA (Japanese Quince)—Bears a profusion of bright scarlet-crimson flowers before the leaves appear. Makes a lovely hedge and can be trimmed to any shape desired. 2 to 3 ft., 40c; 10 for \$3.50; 100 for \$30.00.

DWARF BARBERRY—See page 41.

DEUTZIA (Pride of Rochester)—Large double white flowers, produced in great profusion through June. 2 to 3 ft., 30c; 10 for \$2.50.

DEUTZIA (Gracilis)—A charming dwarf variety. Yields a mass of pure white flowers about Decoration Day. 15 to 18 in., 40c; 10 for \$3.50.

DIERVILLA WEIGELIA

D. CANDIDA—Flowers are pure white; produced in

great profusion in June; also more or less all summer. 2 to 3 ft., 40c; 10 for \$3.50.

D. EVA RATHKE—Flowers brilliant crimson. Very fine; blooms all summer. 2 to 3 ft., 75c; 10 for \$6.50.

D. SIEBOLDI ALEA MARGINATA—When the leaves are young the variegation is yellow; as they become mature they turn to a silvery white. Flowers rose colored. 2 to 3 ft., 50c; 10 for \$4.00.

ELEAGNUS LONGPIPES—Handsome silvery-leaved shrub bearing bright yellow flowers, and orange-red, edible berries, ½ inch long, which makes delicious sauce. Showy and useful. 2 ft., 40c; 10 for \$3.75.

EXOCHORDA (Pearl Bush)—Produce large, pure white flowers in May and June. 2 to 3 ft., 60c; 10 for \$5.00.

CREPE MYRTLE—Vigorous deciduous shrubs or small trees, reaching a height of 15 or 20 feet. The leaves are small, bright green and glossy. The flowers, which appear in spring, are fringed and colored in different shapes of white, purple, and scarlet. The trees, when in blossom, are covered with large panicles of bloom and remain in flower for several weeks. They are very beautiful, and make a noticeable object in any landscape. Hardy, easily grown, and succeed on a wide range of soils. 2 to 3 ft., 75c.

JAPAN SNOWBALL

FORSYTHIA (Fortune's Golden Bell)—Blossoms early in spring before the leaves appear. Flowers golden yellow, often with twisted petals. One of the best hardy early flowering shrubs. 2 to 3 ft., 40c; 10 for \$3.50.

HIBISCUS (Althea or Rose of Sharon)—Blossoms late in summer when flowers are very scarce. It bears abundantly, large, double flowers similar to the holly-hock. We have them in white, red, pink, purple and striped; all double. 2 to 3 ft., 40c; one of each 5 colors for \$1.75.

HYPERICUM (St. John's Wort)—A small shrub bearing large, yellow flowers in great abundance during most of summer. Very fine. 12 to 18 inches, 50c.

HARDY HYDRANGEA (Paniculata Grandiflora)—It beats the world; fine shrub growing from 8 to 10 feet high. It is hardy, enduring the severest winters outdoors without protection. Easily transplanted not one in a thousand dying. Never fails to bloom the first year planted; blooms in great profusion; flowers as large as a full grown child's head. It is thus attractive immediately after it is planted; gaining in beauty and grandeur for ten to twenty years if properly pruned. 1 yr., 50c; 2 yr., extra large, 75c.

HYDRANGEA ARBORESCENS (or Hills of Snow)—Hardy bush; begins to bloom in June and continues throughout August. Plant attains a height of 6 ft. Grows with nearly the same breadth with large trusses of dazzling whiteness rendering this plant a peerless beauty. 1 yr. plant 50c; 2 yr., 75c.

LONICERA -- TREE HONEY-SUCKLE

L. FRAGRANTISSIMO—The upright growing honeysuckles are valued for their bright and fragrant flowers and showy berries. Fine for specimen plants or hedges; very hardy. 2 to 3 ft., 40c; 10 for \$3.50. 3 to 4 ft., 60c.

L. MORROWI—Strong upright grower, creamy white flowers followed by deep red berries which ornament the bush until autumn. 40c; 10 for \$3.50; 3 to 4 ft., 60c.

TAMARIX--TAMARISK

AFRICANA—Strong, slender growing shrub, with feathery foliage and small delicate pink flowers, borne profusely on graceful, drooping branches which have red bark. 3 to 4 feet, 35c; 10 for \$3.00; 4 to 6 ft., 50c.

VIBURNUM--SNOWBALL

V. STERILIS (Snowball)—One of the best known old shrubs, bearing large balls of beautiful snow-white flowers in June. The old fashioned Snowball. Perfectly hardy. 2 to 3 ft., 50c each; 3 to 4 ft., 75c each.

V. PLICATUM (Japanese Snowball)—A very popular shrub. An upright grower, with fine, dark, crimped foliage and densely covered with large balls of pure white flowers in June. 2 to 3 ft., 75c each; 3 to 4 ft., \$1.00 each.

V. OPULUS (High Bush Cranberry)—Ornamental as well as useful; its white flowers are followed by clusters of red berries resembling cranberries, which remain on the bushes all winter. A credit to any lawn. 2 to 3 ft., 40c.

PRUNUS (ALMONDS)

DOUBLE FLOWERING ALMOND—A beautiful small shrub blooming in May. The branches are literally covered with flowers the size and shape of daisies, double white and double pink in color; hardy anywhere. 2 to 3 ft., \$1.00; either color.

DOUBLE FLOWERING PURPLE—Blossoms much like flowering Almond, but earlier and larger, of a delicate pink color; hardy and exceedingly handsome. \$1.00.

FLOWERING PLUM—This Plum is one of the finest small-sized deciduous trees for planting in the south. In northern Florida it blooms in January, before the leaves appear, producing a gorgeous mass of double, pink, sweet-scented flowers. It is very handsome and desirable. Does equally as well in northern climates as in the south. You should include a few of these in your order. 3 to 4 feet., 75c each.

FORSYTHIA

HARDY HYDRANGEA P. G.

SMOKE TREE (Rhus)—A small tree of spreading habit covered in mid-summer with a profusion of dusky hair-like flowers that give the appearance of mist; very beautiful. 3 to 4 ft., 75c each.

SAMBUCUS--ELDER

S. ACUTILEGSA (Cut-Leaved Elder)—Its foliage is finely split up like the fingers of the hand. Very fine and interesting; besides it bears great clusters of fragrant white flowers with an abundance of useful berries. 2 to 3 ft., 50c; 10 for \$4.00.

S. NIGRA AUREA (Golden Elder)—Very handsome, with golden yellow foliage; elegant either in a mass by themselves or with other shrubs having a foliage of contrasting colors. 2 to 3 ft., 40c; 10 for \$3.50.

S. VARIEGATUS (Variegated-Leaved Elder)—Similar to Golden Elder except that the green leaves are variegated with white and yellow; quite pretty and interesting. 2 to 3 ft., 50c; 10 for \$4.00.

All the Elders bear berries of superior quality for use in pies, jelly and sauce.

MOCK ORANGE, PHILADELPHUS, SYRINGA GRANDIFLORA—One of the most vigorous shrubs having large, snow-white, fragrant flowers in great abundance. 2 to 3 ft., 20c; 10 for \$3.50.

BOUQUET BLANC—A real white bouquet of immense size; we urge you to include it with your order; we know you will not be disappointed, because it has no equal anywhere. They have to be seen to be fully appreciated. 2 to 3 ft., 60c.

P. AVALANCHE—Flowers white, large and fragrant; its bloom is abundant enough to cause the bush to droop. 2 to 3 ft., 50c; 10 for \$4.00.

LILAC--SYRINGA

PURPLE LILAC—Old fashioned sweet scented purple lilac of our childhood. Their fragrance should bless every home and fasten the memory to the scene we knew as children. 40c; 10 for \$3.50.

WHITE LILAC—Same as above except flowers are white. Same price.

SPIREA VAN HOUTTEI

JAPONICA (Japan Tree) — Largest lilac known; produce large panicles of creamy white; very fragrant. 2 to 3 ft., 75c.

LILACS--NEW FRENCH VARIETIES

We have the following varieties that we can furnish in 2 to 3 ft. size, for 75c each; 10 for \$6.50: Josikaea, single purple; Chas. Dix, purple red; Alphonse Lavalle, blue shaded violet; Emil Lemoine, double pink; Ludwig Spaeth, dark purplish red; Rubra de Marley, reddish purple. The same varieties in tree form, 3 to 4 ft., \$1.00.

THE SPIREAS

Comprising a large family of low shrubs; very hardy and of easiest culture; very satisfactory ornamental shrubs.

S. ANTHONY WATERER—Has large heads of dark crimson flowers, blooming all summer. 15 to 18 in., 50c; 10 for \$4.50.

BILLARDIA—Produce rose-colored flowers in great abundance nearly all summer long. Should be in every collection of shrubbery. 2 to 3 ft., 30c; 10 for \$2.50.

VAN HOUTTEI (White Queen)—A well known Spirea, a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom; the foliage hardly showing. It is of a drooping habit, reaching a height of 6 to 8 ft. when matured, producing a profusion of white flowers in June. 18 to 24 in., 25c; 10 for \$2.00; 2 to 3 ft., 35c; 10 for \$3.00.

S. PRUNIFOLIA (Bridal Wreath)—Bush covered with pure white, double daisy-like flowers in great masses in May and June. 2 to 3 ft., 60c; 10 for \$5.

SUMAC (Staghorn)—Thrives in the driest soil; is very desirable on account of its brilliant fall coloring, which begin to show in August. The crimson fruit remains on all winter. 2 ft., 40c; 10 for \$3.50.

SUMAC (Cut-Leaved)—This variety with its deeply cut leaves is very handsome, turning scarlet in autumn. Same as Staghorn. 1 to 2 ft., 40c; 10 for \$3.50.

MOCK ORANGE

OUR HARDY ROSES

HARDY GARDEN ROSES, QUEEN OF FLOWERS, BLOOMS THE FIRST YEAR PLANTED—The demand for hardy field grown 2-year-old Roses has reached enormous proportions, for the reason they yield an enormous lot of blooms the first year they are planted. They are sure to live and grow right off, when they are properly pruned after planting.

We properly prune all Roses we send out unless we are otherwise instructed; the average planter does not know just how these 2-year-old roses should be cut back and pruned for the best results.

Our hardy field grown roses combine hardiness, vigor of growth and size of flower; they are very popular, hardy, and most useful of all roses. Everybody likes roses, and you should have an abundance of them growing on your premises.

Price, 85c each; 4 for \$3.00; doz., \$8.00. 3 year old, extra fine, \$1.00 each.

SPECIAL NEW VARIETIES OF GREAT MERIT

KING GEORGE V.—Color rich, blackish crimson, deep velvety brilliant color. Very free flowering and perpetual. The perfume is strong and very pleasing. Awarded the Gold Medal of the Festival of Empire, Crystal Palace, London.

GEO. DICKSON BLACK BEAUTY—Color a velvet black crimson, full and very large. We have had blooms all summer 5 inches across with wonderful lasting qualities. Was awarded the Gold Medal of National Rose Society, of England.

FRAU KARL DRUSCHKI

ROSA HUGONIS (Yellow) — Has been known to bloom during a snow storm. When in bloom the whole plant is covered with bright, shiny yellow blooms and buds making a wonderful show. Its flowers sell for more than any other rose.

FRAU KARL DRUSCHKI (White American Beauty.) The bloom of this rose is perfect in form, on fine long stems, of the purest possible white. There is nothing in the line of perfectly hardy roses than can compare with this one in form, color and general appearance. In rose gardens they commence blooming in June, are conspicuous throughout the summer with their perfusely furnished, large flowers of waxy paper white.

GEO. AHREND'S (Pink American Beauty) —The growth and makeup of this rose is superb; while the delicate pink color is unapproached; you will need this rose in your collection.

GEO. AHREND'S

Your Garden Is Not Complete Without Roses

BEST HARDY OUTDOOR ROSES

Vigorous Summer Blooming Roses, Noted for Delightful Fragrance; Flowers Large and Lasting; Colors Intense and Striking

Price: 2-year-old field grown, 60c each, 10 for \$5.00; heavy 3-year old, 85c each.

GENERAL JACQUEMINOT—Bright crimson, rich and velvety; exceedingly brilliant and handsome; makes magnificent bud and flowers, and is highly esteemed as one of the most desirable roses for open ground work, also for forcing.

AMERICAN BEAUTY—Rich, rosy crimson, exquisitely shaded a superb rose.

ANNA DE DIESBACH—A beautiful flower, one of the best and most satisfactory Hybrid Perpetual Roses. A strong, vigorous grower, extremely hardy, producing very large, double flowers, of a lovely shade of carmine and delightfully fragrant.

HUGH DICKSON—Intense, brilliant crimson, shaded scarlet; large, full and high pointed center; very fragrant; the best in color of its class.

J. B. CLARK—Very deep scarlet; is heavily shaded blackish crimson; very vigorous. This is a comparatively new rose but has proven itself to be one of the most popular of the hardy varieties, blooming in a flood of beautiful dark crimson which is set off by the bright green foliage.

MADAME PLANTIER

LOUIS VAN HOUTTE—Fiery red, bordered and shaded with blush crimson; large, full flower; very beautiful and free blooming.

MADAME PLANTIER—Pure white flowers produced in great abundance early in the season; very double.

MAGNA CHARTA—Bright rose, very large, sweet scent and fine texture; a vigorous grower; profuse bloomer and very hardy.

PAUL NEYRON—Largest of all roses; flowers of immense size and beauty; one of the largest roses grown and one of the finest; color deep crimson-pink, fresh and pretty. You will make no mistake by including this popular rose in your collection.

PRINCE CAMILLE DE ROHAN—Deep velvety crimson; large flower; profuse bloomer; beautiful color.

VICK'S CAPRICE—Cup-shaped blooms with thick petals; clear shell-pink, striped white and red or variegated.

HUGH DICKSON

Waco, Tex., March 15th, 1923.
Plants received in good condition, am well pleased. Thank you.—Tony Gooch.

Our Hardy Field Grown Roses Are the Best That Can Be Had

HYBRID TEAS OR MONTHLY ROSES

This class of Roses for general purposes are preferred by most growers as they have the subtle shading and delicious fragrance of the Teas. But the strength of growth resembles the June roses. They bloom continually all the summer long, even into cold weather.

Strong 2-year-old field grown, 60c each; \$5.00 per 10; heavy 3-year-old, 85c each.

AMERICAN LEGION—This wonderful new rose is named in honor of the World's War heroes. Beautiful glowing crimson-scarlet color. Large, full, well-shaped flowers sweetly scented. Constant bloomer which is sure to please all who grow it.

ADMIRAL WARD—Deep crimson red overlaid black; a profuse bloomer. Strong grower with fine, large lustrous foliage.

ANTOINE RIVORE—Rosy flesh on yellow ground, shaded with carmine; a splendid variety.

BESSIE BROWN—Creamy white; flowers very large and full; highly perfumed.

BELLIANT—Described as being the brightest scarlet produced in a rose. Color is intense and fast not turning to purple. Very attractive rose.

BRITISH QUEEN—Of the purest ivory white, the substance of Druschki and shape of Madame Cochet. Blooms freely and continually.

CARDINAL—Pleasing, fragrant, red rose; robust grower with large blooms.

COLUMBIA—A big pink open flower rose measuring 6 inches across; called a giant pink ever-blooming rose.

DAD STERLING—Has large blooms of fine form; yellow with warm, deep pink center; delicate scent; flowers freely.

EDWARD HAWLEY—Velvety crimson with large, thick petals and a high center; carried on good stems.

FLORENCE FORRESTIER—In bud it is white, tinted yellow, expanding to a beautiful snow white flower; fine fragrance.

GRUSS AN TEPLITZ—The brightest scarlet-crimson; satiny texture; very free flowering, vigorous in habit.

HELEN GOULD—Large red flowers; free bloomer; strong grower; constantly in bloom.

HOOSIER BEAUTY—A beautiful velvety red rose that no description can give the faintest idea of its grandeur and beauty. Strong grower.

IRISH FIREFLAME—Has long pointed buds, expanding to a large flower of a fiery orange

KAISERINE VICTORIA

FLORENCE FORRESTIER

crimson, with yellow shades venated and tinted. A wonderful color combination.

KAISERINE AUGUSTA VICTORIA—The greatest white rose in existence; strong sturdy from early spring till late fall. grower: free bloomer, blooming from early spring till late fall.

LADY ASHTON—Pale yellow rose of great beauty; a profuse bloomer of good substance.

LOS ANGELES—The finest pink rose ever introduced. Vigorous grower; always in flower with long stemmed luminous flame-pink colored blooms. In richness it surpasses the Marechal Neil.

LADY PLYMOUTH—Rich creamy bud bordering on yellow; opening to a splendid flower.

LA FRANCE—Bright pink, very large, double and of excellent form; flowers continually through the season.

MRS. AARON WARD—Distinct Indian yellow, with lighter shade on the edges of petals. Free bloomer.

OPHELIA—Opening to a beautiful salmon-flesh shaded with rose; long buds on long stems. A wonderful rose.

RADIANCE—Beautiful carmine-rose, flushed with copper, large, round flowers.

RED RADIANCE—Is constantly in bloom from early spring till freezing; extra large; a strong hardy grower; a great favorite.

SUNBURST—Large fine yellow; long pointed buds; full and double; a constant bloomer, good grower, and hardy.

AMERICAN LEGION ROSES USED AS A HEDGE

Everblooming Roses Give You Beautiful Flowers All Summer

NEW HARDY CLIMBING ROSES

These varieties live forever, are perfectly hardy and will stand the winters anywhere in the United States.

Price: 2-year-old field grown, 60c each, 10 for \$5.00
Strong 3-year-old field grown, 75c each, 10 for \$7.00

AMERICAN BEAUTY (Climbing)—A very strong, vigorous grower, will grow anywhere; the early fragrant flowers a deep rosy carmine-crimson.

AMERICAN PILLAR—A fine shade of pink, with clear white eye; flowers large, often 3 or 4 inches across and produced in great clusters.

BALTIMORE BELLE—Pale blush, variegated carmine, rose and white; flowers borne in large clusters.

CHRISTINE WRIGHT—Wild rose pink; large and double; vigorous free grower.

CRIMSON RAMBLER—Crimson; a profuse bloomer in large clusters.

DR. W. VAN FLEET—This is indeed a wonderful rose; soft shell pink; very large, full, high, and measures four inches in diameter, borne on long, sturdy stems. Foliage a fresh green color, gradually changing to a bronzy hue. Extremely hardy.

DOROTHY PERKINS—Soft light pink; flowers profusely in large clusters; very lasting. Strong, rank, hardy grower.

EXCELSA (Red Dorothy Perkins)—Intense crimson, with lighter edges; fine for foliage. Strong, rank grower and hardy.

FLOWER OF FAIRCHILD—An everblooming variety of Crimson Rambler. Color and habit are identical with that variety; except it is an ever-bloomer.

HAWATHA—Brilliant scarlet flowers in large clusters; most brilliant and effective; one of the very finest.

SHOWER OF GOLD—Very fine coppery gold; pretty buds and very floriferous; glossy foliage.

SILVER MOON—Immense flowers measuring on an average of 4 inches in diameter, semi-double of pure waxy whiteness. A profuse bloomer of all climbers; has large dark foliage.

THOUSAND BEAUTIES—Flowers pink, rosy carmine, showing many different shades of coloring. Clusters very large; flowers large, free from thorns.

WHITE DOROTHY PERKINS—Same as Dorothy Perkins except the color is white.

WHITE MEMORIAL—Pure white flowers in pyramidal clusters, and beautiful foliage. A splendid rose for growing in the cemetery, allowing it to spread over the ground, or trained to a bush.

AMERICAN PILLAR

THE ILLINOIS ROSE

MISCELLANEOUS ROSES

40c each, 10 for \$3.50, 100 for \$30.00.

MULTIFLORA JAPONICA—Single, white flowers, borne in large clusters; very vigorous; a valuable rose for massing and bramble work.

ROSA LUCIDA ALBA—A fine white form of the pink type, single but very free; beautiful foliage.

STIGERA—Large single, flowers of deep rose color; fruit bright red; very ornamental and desirable.

RUBRIFOLIA (Red Leaved Rose)—Bush very ornamental; flowers pink, 1½ inches in diameter and in abundance.

THE ILLINOIS ROSE—The hardiest, prettiest and most charming rose ever grown. This wonderful rose is the only native climbing rose in America. Perfectly hardy in every state, regardless of climate and location. The Illinois Rose is an ideal climber to use on porches or trellises, and it can also be kept trimmed into a beautiful hedge. The blossoms are single and borne in abundance in July after other roses are gone. Color most beautiful shade of pink. The stems turn red in winter. There are also clusters of crimson fruits making an attractive winter decoration. Fine strong plants 70c each, 3 for \$2.00. Large 3-year-old plants, \$1.25 each, postpaid.

DWARF BARBERRY HEDGES (ILLUSTRATED ABOVE) ADD DISTINCTION TO YOUR HOME

ARTISTIC HEDGES FOR FENCES

GROW A PERFECT HEDGE AS QUICK AS A HILL OF BEANS

Yes, just as quick. Plant this spring and before July, there, as if by magic, stands your hedge. Three months of growing makes it instead of three years. With more time the hedge can be grown to any height up to 10 feet, if desired as a wind-row to give privacy to back yards, etc. Most hedges are thin along the bottom; ours are as solid as a brick wall.

CALIFORNIA PRIVET—One of the leading hedge plants and undoubtedly the largest planted of them all; its foliage produces abundantly the deepest, richest green, almost an evergreen; does not shed its foliage until late winter and then only in an exposed condition. Very hardy, easily and quickly pruned, you may shape it in any position desired by trimming. They should be planted $1\frac{1}{2}$ inches deeper than they stood in the nursery row; where you set it dig about 12 inches deep and 12 inches wide, use some stable manure at the roots (do not use any commercial fertilizer) set the plants 6 inches apart in the row, dip the roots in water before planting; after plants are set cut them down to 4 inches from the surface of the ground, this will cause a thick new growth to start, and is very essential for a beautiful hedge, do not cut back again until they have made 10 inches of new growth, when cutting each time allow 1 to 2 inches above where it was cut before until you get the height desired. After planting spread barnyard manure at surface of ground; keep free from weeds the first two years, by this time it will get its start, then nature will do the rest. To find the exact number wanted, measure the space where it is to be planted and multiply the number by 2, this will give the exact number. Our privet is strictly first class, well branched and heavy rooted. Can be successfully set any month in the year that the soil is not frozen, except June, July and August.

PRICES OF CALIFORNIA PRIVET

	10	100	1000
12 to 18 inches, well branched....	\$0.75	\$4.50	\$40.00
18 to 24 inches, well branched....	.85	5.50	50.00
5 to 30 sold at the 10 rate; 30 to 300 sold at the 100 rate; 300 or more sold at the 1000 rate.			

DWARF BARBERRY (Thunbergii)—Very attractive, neat and dense in growth, yet graceful because of its drooping branches. It produces yellow flowers in the summer which are followed by scarlet fruit, borne in dense profusion on long stems and clinging throughout most of the winter. The leaves color to scarlet and gold. This is a very attractive shrub for planting as single specimens on or about a lawn, or for planting in the corners nearby the house or porch or along the base of the wall to take away the bleak, barren effect of the wall. We highly recommend it. Dwarf Barberry is not subject to rust. It is immune. 2 year 12 to 18 in., 25c each, 10 for \$2.00; 100 for \$15.00 for extra well rooted plants.

AMOR RIVER PRIVET (North)—The best for hedges in the North, has stood 20 degrees below zero uninjured; upright grower; foliage similar to California Privet. Where a stiff, upright hedge is wanted nothing surpasses the Amor. To add to its attractiveness in foliage, it bears erect panicles of beautiful white flowers in June, which are followed by black berries. 2 year strong plants, well branched, 12 to 18 inches, 10 for \$1.25; 100 for \$7.00; 18 to 24 inches, 10 for \$1.75; 100 for \$9.00.

ATTRACTIVE PRIVET HEDGE

HARDY VINES AND CLIMBERS

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established and are much more desirable and less trouble than annual or tender varieties.

AMPELOPSIS VEITCHII (Boston Ivy)—This is one of the finest climbers we have for covering walls as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of being shingles with green leaves; quite hardy and very popular. 35c; 3 for \$1.00.

BIGNONIA RADICANS (Trumpet Flower) — A grand old favorite, hardy climbing plant, with mammoth trumpet-shaped, scarlet blossoms in August. In bloom all summer. Is fine for covering old stumps, verandas or for growing in single specimens. 35c, 3 for \$1.00.

VIRGINIA CREEPER (American Ivy) or Woodbine) — Fine for trellises where a rapid growing vine is needed, with their scarlet, green and mixed foliage they are very attractive. 35c, 3 for \$1.00.

DUTCHMAN'S PIPE

CLEMATIS PANICULATA

DUTCHMAN'S PIPE—An attractive vine of rapid growth. Foliage is light green and the yellowish brown flowers are pipe shaped. 2 years, \$1.00.

SWEET SCENTED HONEY-SUCKLES

HECKROTTI—Flowers open pure white and change to yellow, very fragrant and floriferous; blooms unceasingly all summer; leaves remain green all winter, 40c; 3 for \$1.00.

HALLIANA—Flowers are intensely sweet scented; hardy and almost evergreen; constant and most profuse bloomer; flowers buff yellow passing to white 40c, 3 for \$1.00.

RED CORAL—Very rapid grower, producing clusters of scarlet trumpet-shaped flowers in great abundance; very pretty and fragrant. 40c, 3 for \$1.00.

CLEMATIS

PANICULATA (Virgin's Bower)—A rapid grower and a profuse bloomer; flowers small, white, fragrant, produced in great panicles; is very popular, 2 years, 50c.

JACKMANII—Flowers from 4 to 6 inches in diameter; rich purple, with velvety appearance. Blooms continually from July till frost. 3 yr., \$1.00.

HENRII—Blooms white as snow; larger in size than Jackmanii; a wonderfully perfect bloom. 3 year, \$1.00.

RAMONA—The flowers are very large; the blooms are a beautiful light blue and very abundant; is a vigorous grower, and one which you should include in your order. 3 year, \$1.00.

MAD. ED. ANDRE—Beautiful and bright velvety red; free bloomer. 3 year, \$1.00.

CHINESE PURPLE WISTERIA—This is one of the most elegant and rapid growing of climbing plants. The flowers are of beautiful color. Blooms in July. 2 year, 50c.

CHINESE BLUE WISTERIA—Is indeed the most elegant, the most rapid growing of all the climbing plants, growing from 15 to 20 feet in height in one season. Has a long pendulous cluster of pale blue flowers which are in bloom from May till fall. 2 year, 50c.

CHINESE WHITE WISTERIA—Similar in all respects to Chinese Blue; flowers pure white. 2 year, 75c.

BOSTON IVY USED EFFECTIVELY ON A HOME

BULBS FOR SPRING PLANTING

Most of the bulbs for spring planting produce beautiful blossoms, but some of them are raised principally for the foliage effects. Altogether they are much to be desired, and no garden is complete without dozens of these bulbs. They are all of easy culture and they will grow in most any good garden soil. Of course, like other plants, they will amply repay the caretaker for any extra work bestowed upon them. All of the bulbs that we are offering are first class and will give good satisfaction. After the first killing frost in the autumn, all of these bulbs should be lifted, allowed to dry off, and then store in a dry place, secure from frost.

CANNA

LARGE FINEST MIXED GLADIOLI PRIMULINUS "SUNBEAM" HYBRID GLADIOLI—The flowers are gracefully arranged on very slender, very tall and strong spikes, medium sized and somewhat hooded in form. The range of colors is remarkable, running mostly in shades of yellow, orange, pink and crimson. All colors. Mixed. Large bulbs (sure to bloom), 60c dozen, 100 for \$3.50.

MIXED GLADIOLI—Gorgeous colors and marvelous markings. We call special attention to our Famous Mixed Gladioli which have been constantly improved year after year by discarding all undesirable flowers and developing new shades and combinations of colors. This mixture contains all splendid flowering bulbs that will make a grand show, and at such a low price that every one can afford a bed of this most popular bulb. Price, postpaid, 50c per doz.; 50 for \$1.50; 100 for \$2.75. By express, not prepaid, \$2.25 per 100.

JAPANESE LILIES

The Lilies have always been looked upon as among the noblest of the garden flowers.

RUBRUM—Handsome, dark, pinkish-red flower. Extra strong growing sort. 30c each.

ALBUM—Beautiful nearly white flower. 30c each.

SPECIOSUM—White, more or less tinted with pink and dotted with red. 30c each.

OUR DALIAS-- FINEST OF ALL TYPES

Dahlias are taking the United States flower lovers by storm. So much can be done with them and they are such beautiful flowers in the garden or yard and also for cut flowers in the house that we urge you to grow them. Our Dahlia Collection includes the Decorative, Show and Cactus varieties in all colors. Price, 20c each; 6 for \$1.00; 12 for \$1.75; 25 for \$3.25.

ELEPHANT'S EAR

CALADIUM ESCULENTUM—A handsome plant of tropical aspect, bearing leaves sometimes a yard or more in expanse. Effective as a single plant on a lawn, or in groups. Large bulbs, 25c each, \$2.50 doz. Mammoth bulbs, 45c each, postpaid.

CANNAS The Cannas with their large, various-colored leaves, easily hold first place for producing a tropical effect on the lawn. Excellent effects may be secured by planting them singly or by planting in small clumps in the hardy, shrubby border. Against a heavy background of green, the bright colored, variously-marked leaves show to their best, are very attractive and interesting. Following kinds, 10 for \$1.00; \$7.50 per 100 roots, except where noted.

BLACK PRINCE—Velvety maroon, green foliage; 3 to 4 ft.

GLADIATOR—Yellow spotted; green; 4 feet.

RICHARD WALLACE—Canary yellow, green foliage, 4½ ft.

AUSTRIA—Pure canary yellow, 3 feet.

WYOMING—Orange, foliage is purple; 7 feet.

PENNSYLVANIA—Orange scarlet; green; 5 feet.

INDIANA—Golden orange, green foliage; 3 to 4 feet.

SHENANDOAH—Salmon, bronze foliage; 6 feet.

DAVID HARUM—Vermillion scarlet; bronze foliage; 3 feet.

KING HUMBERT—Orange scarlet; foliage coppery bronze; 5-6 ft. 20c each, 6 for \$1.00.

CITY OF PORTLAND—A new variety. Green foliage, growing pink flowers. 3½ ft. Price, 25c each, 6 for \$1.20.

MRS. ALFRED CONARD—Another new kind. Green foliage. Salmon pink flowers. 4 ft., 25c each; 6 for \$1.20.

JAPANESE IRIS

IRIS, JAPAN—Flowers are of the richest colors, ranging from white to purple, with delicate markings and veinings. 25c each; 6 for \$1.25.

PERENNIAL PHLOX

LA VAGUE—A beautiful shade of violet.

CHAMPS ELYSEE—Bright red. A great favorite and highly prized for grouping.

PANTHEON—Peerless pink. Extra large.

CARAN D'ACHE—Variegated with old rose shadings. One of the most beautiful varieties.

R. P. STRUTHERS—Rosy carmine, dark red eyes. Very flashy and attractive.

FRAULEIN G. VON LASSEBURG—Pure white.

Our Phlox are 2 years old, strong and hardy; will bloom the first year. 30c each; 6 (one of each) for \$1.50, \$20.00 per 100.

GLADIOLI

Hardy Ornamental Shade Trees

Ornamental shade trees play an important part in the arrangement of all lawns and yards. They are often invaluable as windbreaks, supply shade and help to retain the moisture—conditions that are essential to the growth of many of the choicest shrubs and perennials.

There are trees noteworthy for their profusion of bloom; some for their unusual color of bark or leaves; some trees will endure smoke much better than others, making them valuable for city planting.

ASH, AMERICAN WHITE—A handsome, hardy, broad-headed quick growing shade tree, sometimes reaching 120 feet high. Very valuable in landscape work, for park and street planting. 6 to 8 feet, \$1.00; 8 to 10 feet, \$1.50.

BEECH, AMERICAN—A noble native tree of large size and round, spreading habit. Attractive at all times but especially so in winter and early spring, when the bark is grayish-white. The medium sized, triangular shaped nuts are sweet and fine flavored. 3 to 4 ft., \$1.50.

BEECH, PURPLE—A vigorous tree with purple leaves. Should have one in every park, cemetery or lawn. Small sized trees transplant well. 3 to 4 feet, \$2.00.

BIRCH, CUT LEAF (Weeping)—White bark, drooping

AMERICAN ELM

ing branches, finely cut foliage. Especially desirable for park or other ornamental planting, 3 to 5 ft., \$2.00 each; 5 to 6 ft., \$2.60.

ELDER, BOX—Large spreading tree of rapid growth; very hardy, a good drouth resister. Largely planted for windbreaks, timber and shade; leaves resemble those of the ash. 8 to 10 ft., \$1.25.

ELM, AMERICAN — Very valuable for park planting, for avenues, and as a shade tree for lawns. One of the most majestic and graceful

CATALPA BUNGEII

of our shade trees. Hardy, rapid grower and long lived. 6 to 8 ft., 75c; 8 to 10 ft., \$1.25.

CATALPA (Speciosa)—A rapid growing park, street or forest tree. Bears large heart-shaped foliage and clusters of flowers similar to the horse chestnut but larger. Ornamental as well as useful. 6 to 8 ft., 75c; 8 to 10 ft., 90c.

CATALPA, BUNGEII—Grafted on stems 6 to 8 feet high, it makes a symmetrical, umbrella-shaped head without pruning. Leaves large, heart-shaped, look like shingles on a roof. Hardy and succeeds everywhere. A very desirable buy. 4 to 5 feet trees, \$1.50 each; 5 to 6 feet trees, \$2.00 each.

AMERICAN WHITE ASH

Our Stock Is First Class Quality

CAROLINA POPULAR

CORNUS (White Flowering Dogwood)—Small native tree producing pure white flowers 3 to 3½ inches in diameter, early in spring before the leaves begin to appear; very showy. 3 to 4 ft., \$1.00.

CORNUS (Red Flowering) -- Similar to the above, except that the flowers are a deep rosy pink color. 3 to 4 ft., \$1.50.

MAGNOLIA (Grandiflora)—The grandest broad leaved evergreen of the forests. Leaves large, bright shining above, usually coated with brownish hairs beneath. Flowers beautiful, often 8 to 10 inches across, waxy white, very fragrant of lemon scent, produced throughout a period of two or three months. 3 to 4 ft., \$2.00; 4 to 6 ft., \$2.50 each.

M. ACUMINATA (Cucumber Tree)—A beautiful native tree with rich, large leaves and fragrant flowers. 5 to 6 ft., \$1.50.

M. SOULANGEANA—The hardest of the Chinese dwarf Magnolias. Flowers cup-shaped, 4 to 5 inches in diameter, white and purple, appearing before the leaves. 3 to 4 ft., \$3.00 each.

MAPLE (Soft or Silver) (Scarlet)—This is a very beautiful ornamental tree and is in great demand for street, lawn and park planting. A very rapid growing, hardy shade tree. Thrives equally well on well drained or low swampy, wet locations. The foliage is of an attractive, silvery color and the tree is bell shaped. Should be planted in large quantities. Wholesale price: 6 to 8 ft., 60c; 8 to 10 ft., 90c; 10 to 12 ft., \$1.25. Special price on large quantities.

MAPLE (Sugar or Rock)—A well known native tree, a universal favorite for street or lawn planting and is desirable everywhere. Makes a thick, dense head; valuable for sugar making and a long lived tree. 6 to 8 ft., \$1.00; 8 to 10 ft., \$1.50; 10 to 12 ft., \$2.50.

MAPLE (Norway)—A distinct, foreign variety with large, broad leaves of a deep, rich green color. The most desirable for street, park or lawn. This is one of the hardest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple. Price, 6 to 8 ft., \$2.00 each; 10 for \$17.50; 8 to 10 ft., \$2.75 each; 10 for \$25.00; 10 to 12 ft., \$7.50 each.

MAPLE (Wier's Cut-Leaved)—One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut-leaved birch. 8 to 10 ft., \$1.50; 6 to 8 ft., \$1.25.

MULBERRY (Tea's Weeping)—The most graceful, and hardy weeping tree in existence. Perfectly hardy in summer or winter. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground. Price, \$2.50 each.

POPLAR, CAROLINA—Takes first rank among the best poplars. The most rapid grower among shade trees, frequently growing eight feet during one season and thus making fine shade tree in two or three years. Very desirable when planted at the roadside, in parks or along rivers and streams. Will grow on any kind of soil. 6 to 8 ft., 55c; 8 to 10 ft., 65c; 10 to 12 ft., \$1.00.

SYCAMORE, American (Platanus)—Lofty upright growing tree, with spacious head, and large deep green foliage. A free grower and very desirable for park or street planting. Where quick growing shade tree is desired for street or yard planting, there are no

better trees than the sycamores. 2 to 3 ft., 35c; 10 for \$3; 3 to 4 ft., 65c, 10 for \$6; 4 to 6 ft., 80c, 10 for \$7.50; 6 to 8 ft., 90c, 10 for \$8.50; 8 to 10 ft., \$2, 10 for \$17.50. Special sizes, \$3.00 and up.

SYCAMORE, European —Oriental plane. Same price as American Sycamore.

SWEET GUM—Rapid growing native deciduous tree. Branches often corky winged. The leaves are bright green, 5 to 7 pointed; in autumn brilliantly colored in shades of red and crimson, very attractive, makes a handsome shade tree. 4 to 6 ft., 85c; 6 to 8 ft., \$1.25.

LINDEN, American—Beautiful rapid growing tree with large broad leaves and fragrant flowers. 5 to 6 ft., \$1, 6 to 8 ft., \$1.25.

NORWAY MAPLE

SYCAMORE

NEW GROUND STRAW-BERRIES

Our Purebred Strawberry Plants are sold on a positive Guarantee that every plant is dug from new fields, grown for plants only. They are worth more to you than plants taken from the middle of the rows, as is practised by many nurserymen and dealers handling Strawberry Plants.

OUR BANK ACCOUNT STRAWBERRIES

THE COOPER—The largest and best strawberry ever introduced. Berries enormous in size, plenty of the berries are 5 to 6 inches around; 18 to 30 berries fill a quart box. Plants very large and produce 6 to 8 fruit stems to a plant with 8 to 24 berries to a stem; each individual stem 2 to 3 inches long. For hill culture it is wonderful.

WORLD'S WONDER—This is truly a wonderful strawberry; season of ripening following Cooper; berries extra large, deep red, strong thrifty grower; with a mass of long roots and is adapted to any soil or climate. It is wonderful as to productiveness, producing great clusters of large berries.

THE EXTRA EARLY GIANT—Earliest of all, and decidedly the finest

WORLD'S WONDER STRAWBERRIES

THE COOPER STRAWBERRY—ENORMOUS IN SIZE

ST. MARTIN STRAWBERRIES

and best very early strawberry grown. This variety will bring you extra money on account of being extra early and extra large in size. Color brilliant scarlet crimson conical with pointed tips, color all over at once, no green tips; have a very delightful aroma and very rich, mild flavor; very firm, sweet and delicious and red to the center; have large caps, hence exceptionally showy and very attractive.

ST. MARTIN—Extremely late, enormous size, many specimens measuring 6 inches

and over in circumference, averaging about 30 to the heaping quart basket. Excell all other very late berries in productiveness, size and beauty. Berry deep red all through with rich red juice; flavor very delicious and of high quality.

AROMA—The greatest money making strawberry for the middle west of any other variety. In matter of productiveness, large size, color, shape and quality it is unsurpassed. It is the one great market berry; if you want to make big money growing strawberries plant heavily to the Aroma. We have one of, if not the best strain of Aroma to be found anywhere; we have been propagating from heavily fruiting plants until we have a great improvement as to productiveness over any other strain we know of; every plant loads itself with berries, no loafers to be found. Our plants this season are extra large, fine well rooted plants and will give you splendid results. We do not hesitate to recommend the Aroma to our customers and at the same time urge than you plant a large amount.

BIG JOE STRAWBERRIES

BIG JOE—Midseason. Big Joe is one of the highest priced and most popular berries in the northern markets. Berries large, handsome, firm and of fine quality. Plants large, strong, well rooted.

DR. BURRELL (The Million Dollar Strawberry)—Strong, vigorous plants, long, heavy roots, which always build up a heavy mother plant. It is a heavy producer of strictly high class berries, which average in size from large to very large.

KLONDYKE, IMPROVED—We have a very superior strain of this wonderful variety. A standard berry for all of the Southern and Middle States. Productive, brilliant color and so firm that to the northern markets it classes as a reshipper, that is, a berry firm enough to reship to the smaller tributary markets and therefore commands top notch prices.

SENATOR DUNLAP

MISSIONARY—This is a great favorite as an early berry for the Southern States, as well as on the western coast. Medium size, firm, uniform size and a good shipper; sells well on the market and is a favorite with many growers.

SENATOR DUNLAP—A great producer and a money maker and a good all purpose variety. Easy to grow and just the variety for the beginner; will grow a full crop on most any kind of soil. One of the best for canning and home use. One of our customers writes: "Berry plants received and set out. They were the largest and best rooted plants I ever bought from any nursery. Am more than pleased."

EVERBEARING STRAWBERRIES

For big, quick money, full crop of berries the same year you plant them, berries for the table, for canning, plant the Champion and New Perfection. The sensation of the present century.

Our Pure-Bred Everbearers begin fruiting the first year about three months after plants are set and continue to fruit heavily until checked by severe freezing. They are not injured by light frosts or light freezing. We have picked and served Everbearing Strawberries for Thanksgiving dinner and very often in December after the snow flies.

Our Pure-Bred Everbearers produce an enormous crop the same season the plants are set, makes them highly desirable for the home garden as well as for the home market. The high prices the fall berries command makes them very profitable to grow in quantities for the market.

WORLD'S CHAMPION—Unsurpassed as to productiveness, strong, hardy, vigorous grower. Great flashing red beauties of extra large size, firm, fine, delicious flavor. Bears all summer, fall and up

PROGRESSIVE EVERBEARING

WORLD'S CHAMPION STRAWBERRIES

NEW PERFECTION STRAWBERRIES

till the snow flies. The most productive strawberry in all the world. The United States Department of Agriculture Bureau of Plant Industry, Washington, D. C., has no record that has exceeded the following record from any one acre. It is no uncommon thing for one plant to produce two quarts of fine large berries in one season. We have found 275 berries on one plant. 60 days after they are set out they are loaded with buds, bloom, green and ripe berries in all stages of development. We are receiving many flattering reports from growers all over the country who bought plants of us last spring; orders are coming very fast for this wonderful Everbearing Strawberry.

NEW PERFECTION—New Perfection won the \$1,000 cash prize offered for the Everbearer proving the most perfect in every way, hence its name. It is unusually productive, is uniformly large, well formed berries of very rich red color, fine delicious flavor. New Perfection fruits regularly summer and fall; fine berries remaining under the dense foliage till November. This is an ideal variety for home use as they are so delicious and mild flavored that invalids unable to touch other fruits eat them with great benefit. During September, October, and up into November the plants were loaded with green and ripe berries in great abundance, often 100 to 150 berries were on a single plant. The plants were large, strong, vigorous with large, long clusters of roots that enable the plants to mature their great loads of berries to perfection.

PROGRESSIVE—Is a persistent bearer, producing from the time other plants begin to bear in the spring until a very heavy frost in the fall. Has strong, vigorous plants, and is very productive. Fruit of high quality, firm, delicious and sweet.

Varieties marked (P) are perfect-flowering varieties and can be grown alone.

Plant More of Our Everbearing Strawberries This Year for Berries All Season

A collage of four different cherry varieties. The top section shows clusters of dark red, almost black, cherries. The middle section shows clusters of bright red cherries. The bottom section shows clusters of dark red cherries. The background is a light, textured surface with some green leaves visible.
