Twentieth Anniversary 1925

ON the turn of the calendar to 1925 marks the beginning of the Twentieth Anniversary Year of the founding of what is now the business of the Brainard Nursery & Seed Company, and to commemorate this event, though without the slightest trend of boasting, it seems fitting to devote a little space to the review of the early years of the business, which was started in such a small and modest way.

Seeing, as the community grew, the possibility of establishing a Nursery and Seed business, it was in the spring of 1905 a business venture was made by Chester F. Brainard under the firm name, North End Nurseries. This was carried on to quite a degree of success. In 1911 a partnership was formed with D. William Brainard, a brother, then conducting a local florist business in the south end of Thompsonville; and the combined businesses continued under the name Brainard Floral & Nursery Company. The year 1914 brought about another change when the cut flower or florist department of the business was discontinued for the purpose of devoting undivided attention to the development of the Nursery and Seed business. This again necessitating a change in name and it was then that the present firm name, Brainard Nursery & Seed Company, was adopted. In 1917 D. William Brainard withdrew from the partnership, the entire business interests being taken over by the present proprietor under whose management the business has since been and is now conducted.

prompt and efficient service, and never wavering from the early adopted slogan, "Our aim is Quality".

Through the intervening years to the present time, each year has been marked with advancement and progress in the various departments, and better than words can tell it our illustration 1925 and the following page of pictures, taken during the past year, together with a few outstanding facts (at right) gives you a fair conception of the present extent of our business.

We count among our assets one that money cannot buy—your good will, not as a customer alone, but as a friend.

FROM the beginning, as shown in our illustration 1905, passing through the changes noted on the foregoing page, has been built the firmly established present business of the Brainard Nursery & Seed Co.

From the very start it has been our aim and desire to build substantially upon the policies of square dealings, fair prices,

OUR SEED DEPARTMENT

Under this department, we offer on the following pages the varieties of vegetables and flower seed that have proven, after careful study of their every quality, to be the most suitable in their respective classes.

As soon as the seed is ready for shipping, whether of our own production or received from our contract growers, a sample is immediately taken and soil tests made for germination in our own greenhouses under careful supervision.

It is gratifying to note the continued steady and rapid growth of our Seed Business; proving that our customers appreciate the method we employ. "We do not compete in low prices. Our aim is Quality."

If you grow for profit, or plant in large quantities, send your printed letter-head with your order and your goods will be invoiced at the Market Gardeners' wholesale rate.

LAWN GRASS SEED

One of our Specialties, and here's where we are strong

The mixing and blending of grasses has long been one of our hobbies, and our past practical experience and careful study of the various kinds has enabled us to produce such mixtures as, for their specific purposes, are giving the best of satisfaction. These facts, together with a positive statement that we use in our mixtures of Lawn Grass absolutely none but the very best of clean, high-grade grass seed, we hope will convince you that our "Rex," "Golf and Tennis" and other mixtures will give you the results you are looking for.

OUR "REX" BRAND of Lawn Grass is a perfect blend, consisting of a number of high-grade grasses most suitable for the purpose, which will stand the close cutting, extremes of weather and other adverse conditions which ordinary lawns have to endure. It contains grasses giving quick but permanent results, as well as others slower in growth with heavy root action, making, under favorable

conditions, a strong, beautiful, green sod. This brand weighs about twenty-two pounds per measured bushel. Following are the prices per measured quantities: Quart 35c. 2 quarts 65c. 3 quarts 90c. $\frac{1}{2}$ peck \$1.15. peck \$2.00. $\frac{1}{2}$ bu. \$4.00. 1 bu. \$7.75.

BRAINARD'S "SHADY CORNER GRASS"

This mixture of grasses has helped to solve many such questions as "What can I do with that bare, unsightly spot?" It is difficult to establish a good turf in a dense shade with any grass, but in ordinary shaded places this mixture, composed of dwarf-growing, strong-rooting grasses which thrive in sheltered and shaded locations, will make a quick showing and gradually build a strong, green turf. This mixture weighs about twenty pounds per measured bushel and is sold per measured quantity as follows: Quart 35c. 2 quarts 70c. 3 quarts \$1.00. $\frac{1}{2}$ peck \$1.30. peck \$2.50. $\frac{1}{2}$ bu. \$4.80. 1 bu. \$9.60.

HARDY HERBACEOUS PLANTS

The Old-Fashioned Flower Garden

This grand class embraces many of our most showy Summer-blooming plants, all of which are of easy cultivation and of various flowering seasons, from May to November. By a careful selection of varieties you may have a continuous display of bloom from early Spring to late Autumn.

Many varieties of Herbaceous plants such as Pæonias, Iris, Spireas, etc. are necessarily handled in field grown plants but in most all of the finer rooted varieties, we much prefer a well established pot grown plant, in preference to field grown divisions so often used by many firms. We have grown for this season's sales many thousands of pot grown plants, which are in splendid condition for Spring sale. Our list is made up of only commendable varieties and our stock is fine.

PANSY PLANTS "OF QUALITY"

Pansies for years with us a specialty. Brainard's Giant Flowered and Monster Strain Pansies which we grow by thousands are not to be compared to the ordinary basketed plants commonly sold as good Pansies. Why? Our plants are all raised from hand picked seed of our own growing, from plants selected for their uniformity of growth, enormous flowers and gorgeous colorings. Our seed beds are thinly sown and the plants twice transplanted, permitting wonderful root development and sufficiently spaced to produce strong, short, sturdy plants.

Brainard's Giant Flowered, 60c. per doz.; \$4.50 per 100.

Brainard's Monster Strain, \$1.00 per doz.; \$6.50 per 100.
