GROWERS AND IMPORTERS

1925

TERMS:

Payment in advance. All retail orders amounting to \$1.00 or over, sent prepaid.

ORDER

Order Early to Avoid Disappointment. The Stock of Some of the Varieties is limited.

SHIPMENT

Will Be Made About May 1st.

GUARANTEE

All tubers are sent in a growing condition and true to name. Please notify us if any prove otherwise. The tubers are strong divisions of field grown roots and **will be much stronger than those intensively cultivated**, for the production of exhibition flowers.

PLANT

After May 15th about 6 inches below the surface. The single tuber should be planted at an angle of 25 degrees, crown or sprout end uppermost. Use calcium super-phosphate as a fertilizer. When three sets of leaves appear, pinch out the top, so as to allow the plant a chance to branch. If large flowers are desired, mulch with manure, as soon as the flower buds appear, and if large exhibition flowers are your objective, allow only one bud to the branch. Dahlias require plenty of moisture, but will not grow in a water-logged soil.

We also stock a number of varieties impossible to include in this list, which we will be pleased to quote on request.

DAHLIA SEED

Dahlias may be grown from seed as readily as tomatoes. If sown indoors or in a hot bed in March they will produce flowers earlier than those raised from tubers. There is a fascination in growing them from seed, as they rarely produce flowers like the parent plant or plants, each seedling being a new variety.

Grade "A"—Saved only from the finest varieties and those which, from our experience, will produce the best seedlings; the parent plant or plants are especially selected for color and strength of stems.
Per packet\$5.00

Grade "B"—From the finest varieties but not especially selected.
Per packet 3.00

Grade "C"—Without any selection.
Per packet 1.00

Grade "BB"—Assorted from at least six of the leading California producers. If purchased separately, would cost about \$5.00 or \$6.00.
Per packet 2.00
