GLYNLLISON'S DAHLIAS

The Aristocrat of the Dahlia World

Our list of dahlias, while small, embraces the cream of the world's best varieties. We do not know of one in this list which we would eliminate if we were to choose for private growing a collection of forty odd varieties.

We have been growing and breeding dahlias for many years, and intended listing some splendid new varieties of our own this year, but owing to serious losses in storage in the winter of 23-24, we are unable to place these before our customers until 1926. We have produced what we believe is one of the

World's Most Beautiful Dahlias,

together with some twenty others in as many colors, with a perfection of form, stem, and color which has not been surpassed by any other grower.

We will replace any tuber which fails to grow, and we will replace with two tubers any which prove untrue to name. We will assume no further responsibility. Prices for dahlias are for tubers delivered prepaid, except as noted.

AMUN RA OR THE SUN GOD. (Giant Decorative.) One of the most sensational of the new dahlias. Wonderfully perfect in shape. The outer petals of gorgeous orange and copper tones, shading to golden amber. The effect as a whole being of a glorious sunset. Very stout stems and vigorous plants.

Tubers, each, \$3.50.

SHUDOWS LAVENDER. (Decorative.) A beautiful silvery lavender shading to white. Always full, with long, very stiff stems. Blooms from early in the season until killed by frost. A great prize winner.

Each, \$3.50.

MARIPOSA. (Hybrid Cactus.) A perfect flower, of long narrow incurved petals, which curl and twist to baffle an artist. A delightful shade of true pink with a faint violet suffusion. A gigantic flower with depth as well as diameter, on long stout stems. Vigorous grower and free bloomer.

Each, \$4.00.

INSULINDA. (Decorative.) One of Glynllison's favorites. Is described as a beautiful golden ochre with a salmon red suffusion deepening towards the center, but no description can do justice to this gorgeous flower. The petals seem as though dusted with pure gold, glistening in the sun or under artificial light. Brings highest price in cut flower markets. Stems are long and stiff; a thrifty grower and prolific bloomer.

Each, \$1.50.

MRS. CARL SALBACH. One of the most perfect decoratives in existence. A beautiful shade of lavender pink. Immense blooms held far above the foliage on very long stiff stems. Awarded many prizes as the best exhibition decoratives. Long-keeping cut flower.

PRINCESS PAT. (Giant Decorative.) Flowers immense and splendid form, always with full center, a most pleasing shade of old rose, showing up wonderfully under artificial light. Free flowering on splendid stems. Very popular and in great demand.

Each, \$1.50.

U. S. A. (Hybrid Cactus.) With us one of the most free blooming. All the desirable features of the dahlia are found in this—color, formation, and size. Wonderful deep orange, a color hard to find in a dahlia. The formation too is exquisite and novel.

Each, \$2.00.

DR. TEVIS. (Decorative.) The dahlia with a beautiful blending of copper, old rose, and old gold. Immense flower with the best possible stem. A California variety which is becoming very popular. A great prize winner.

Each, \$1.00.

THE MILLIONAIRE. (Decorative.) One of the largest, lavender pink. Flower immense, very deep and heavy. No collection is complete without the Millionaire.

Each, \$1.00.

POLAR BEAR. (Decorative.) The largest and finest pure white dahlia. A great bloomer and flowers on long stiff stems. Lasts a long time on the plant or in water.

Each, \$1.00.

CIGARETTE. (Hybrid Cactus.) This distinct and novel dahlia attracted more attention in our fields than any other variegated variety. Color creamy white, heavily edged pomegranate red, varying greatly, no two flowers being exactly alike. Petals long and curling, forming a deep flower of great substance, on long stout stems.

Each, \$2.50.

CHAMPAIGNE. (Decorative.) The color is rare and delightful. A rich cream, suffused jasper red, giving the flower a pinkish-orange buff shade. Plants full of immense flowers on long stiff stems.

Each, \$7.50.

JEAN CHAZOT OR GAY PAREE. (Hybrid Cactus.) This new dahlia is fast becoming one of the most popular show varieties. A beautiful golden bronze with just a faint suffusion of nasturtium red, that intensifies its brilliancy and adds to its charms. A prize winner wherever shown. Each, \$1.50.

Nearly every flower has two distinct colors, the flat outer petals being one color and the shorter densely set tubular inner petals another color, sometimes contrasting and sometimes blending colors. Do not fail to try one or more of these wonderful little dahlias.

Tubers, each, \$1.00; per dozen, \$10.00.

SEEDS of the above Double Peter Pan Dahlia can be furnished. They will come a large per cent double and bloom the first year. Plant early in flats, and transplant to the garden at the proper time. Seeds, per packet, 50 cents.

Dahlia Seeds

GROWING DAHLIAS from seeds is one of the best garden sports. Being hybrids they do not come true from seeds, so no matter what you plant, no two will come alike. There is nothing more fascinating than watching Nature create new forms and colors in your own garden. Dahlias will bloom the first year from seeds, in fact, the plants are usually more vigorous than those grown from tubers, and should produce good large tubers, which you can save for next season's planting.

GLYNLLISON'S FINEST. Dahlias saved from Amun Ra, Shudows Lavender, Mariposa, Salbach and others of the finest varieties grown. Last year our seeds of this grade gave us over 60% double.

We do not know of a better grade of dahlia seeds and have not a large quantity to offer.

POMPON DAHLIA seeds. These beautiful little flowers are becoming very popular. Our strain is from a collection of the best named varieties, and will give excellent results.

CAUTION. One common cause of failure of dahlia seeds to germinate is in allowing the seeds to dry out. If allowed to become dry after planting they will fail to grow. Sow seeds in flat or seed pan, keep moist but not too wet, and in a warm place. They will begin to germinate in three days, but germination is very uneven, some requiring thirty days. Most of the seeds, however, will germinate within a week.

GLADIOLI

This deservedly most popular flower is one of our specialties, and each year we are devoting more space to their growing. We offer this year a limited selection of what we consider the best of the old and many new varieties, out of some 800 growing in Glynllison Gardens.

We will gladly replace next season all bulbs which do not come up to this Guarantee, it being understood that this is the extent of our liability.

Bulbs at the dozen and each rate are postpaid. At the hundred and thousand rate are sent by express not prepaid, unless otherwise stated.

SEEDS OF HYBRIDS

Grow New Varieties from Seeds

One of the most fascinating of garden games. Dahlias, Gladioli, Iris, Cannas, Roses and many hardy plants, being hybrids, do not come true from seeds, and thus new varieties are obtained. Plant seeds of these and every morning during the flowering season you will get a new thrill watching Nature produce new colors and varieties.

The better the parent plant which produced the seeds the better will be the varieties obtained. My seeds are saved only from the best specimens, many being hand pollinated. You can buy cheaper seeds, but they will not give results equal to mine.

DAHLIA SEEDS. See page 3.

GLADIOLUS SEEDS. Some Gladioli will bloom the first season from seeds, others will bloom the second and third season if bulbs are saved. Sow in the open ground early, covering about one-half inch, and do not allow the seeds to dry out.

GLYNLLISON HYBRIDS. These seeds are saved from only the best varieties, carefully hand pollinated. We plant them ourselves by thousands and with splendid results.

Ye Olde Fashioned Garden

Have you an old-fashioned hardy garden of the kind Grandmother used to grow? The tall blue Larkspur, stately Hollyhocks, brilliant Oriental Poppies, Lupines, Sweet William and many others in groups, beds, borders, and as single specimen plants beautify your garden and grounds and will live and increase in size and beauty for many years, with little care more than to cultivate and give them plenty of food.

Our hardy plants are all strong field grown transplanted, and will give excellent results, blooming the first year with ordinary care. Start an Old-Fashioned garden, making your selection from our list herein, or if you are not familiar with varieties we will gladly make a selection if you will tell us what your conditions are.
