GLADIOLI

God has been working his miracles
Out in the garden there;
He has taken a handful of common earth,
And fashioned those flowers so fair.

A clod of earth, with the summer heat,
And a mixture of sun and showers—
So God has been working his purpose out
All through the summer hours.

Wonderful art in the blending of tints
Has the Master Artist shown!
He used our help in planting the bulbs,
But the skill is all his own.

Rev. L. D. Tibbetts.

A garden is Earth's hymn of praise to Heaven,
sung every season in some changing tune, where
chords are colors, and where odors sweet are tender
symphonies.

Alan Estmere.

To our Customers and Friends:

Ever since we have been growing Glads commercially, our motto has been "Pure stock and no substitution." We believe you have a right to get exactly what you order or your money back, in case order cannot be filled as specified.

In further development of the above principle, we have this year done what has never, to our knowledge, been attempted by any other grower in connection with the retail trade.

There are three standard sizes of flowering bulbs. It has been a common practice to fill retail orders from these three sizes promiscuously; but you will find in this catalogue a triple price scale covering each of the sizes, 1, 2 and 3. We believe you have as much right to know the size of the bulbs you buy as you have to know the width of a piece of cloth which you intend to purchase.

To the novice we will say in regard to size:

No. 1 bulbs are those having a diameter of $1\frac{1}{2}$ inches and over. This is the size mostly used for forcing under glass. It is also the size to plant if you wish to grow extra large spikes for exhibition. No. 1 bulbs may be expected to flower a little earlier than smaller sizes.

No. 2 bulbs have a diameter of $1\frac{1}{4}$ to $1\frac{1}{2}$ inches, and are very generally planted out of doors by those growing Gladioli for the cut flower trade.

No. 3 bulbs measure from 1 to $1\frac{1}{4}$ inches in diameter. These will give good blooms if planted by Memorial Day; and, while the spike may not have quite as many blooms as the larger sizes, the flowers will be very nearly as large and just as perfect, so far as form and color are concerned. For those who wish to limit their expenditure to a definite amount, we unhesitatingly recommend this size; for, at our prices, a dollar invested in No. 3 bulbs will give more "flower joy" to the home gardener than a like amount in any other size.

If you will compare our prices with other reliable growers, you will find, in most cases, that our No. 1 price is as low as is usually made on bulbs that may be any size from one inch up. Therefore, if No. 2 or No. 3 bulbs meet your requirements, you are making a very substantial saving when ordering from this catalogue; and if you want to be sure of No. 1 bulbs, you here have the opportunity of paying the price and getting just what you want.

Quality is recognized as being more important than price; but we have made this reduction in price without in the least lowering our past high standard of quality and purity of stock. The bulbs we send out in 1925 will be fully equal in all respects to any we have ever sold.

In reducing prices, we also have the wish to stimulate larger and more general planting of this most wonderful flower, hoping that our customers will reap a larger measure of enjoyment, and that we will realize a satisfactory profit from a larger volume of sales made on a smaller margin. We believe this to be the correct principle of merchandising, and with the promise of a "square deal" all around, we solicit your patronage.

THE GLADIOLUS

If you are a flower lover and have a garden, of course you plant Gladioli. In no other flower are combined so many excellent qualities. Its extraordinary range of color, markings and form, its extended season of bloom and good keeping qualities together with its moderate price and easy culture make it the garden flower supreme.

MAINE GROWN BULBS

Few flowers are as easily grown; but best results cannot be obtained from poor stock. The quality of your flowers depends in large measure on the quality of the bulbs you plant.

Our sandy loam produces bulbs entirely free from disease. Our sea-coast climate is ideal in the way of moisture and moderate temperatures, giving our stock an abundance of vitality. Nowhere in the world are better Gladiolus bulbs produced than we grow here on the Maine coast.

In addition, we give particular attention to the matter of pure stock; and have never had a complaint of bulbs untrue to name.

TERMS

Cash with all orders. Stock offered subject to prior sale. When orders amount to \$1.00 or more, we prepay shipments to all points in the United States and Canada. On orders for less than \$1.00, add enough to cover postage; balance, if any, will be returned. The above offer of prepayment DOES NOT apply to the mixtures or collections, priced by the hundred.

GUARANTEE

We guarantee all bulbs to be healthy, true to name and up to size; and will replace any found otherwise if claim is made during the present calendar year.

We DO NOT guarantee the crop; as, obviously, failure may result from the neglect or inexperience of the purchaser. We are always willing to give advice, to the best of our ability, on all matters pertaining to the growing of Gladioli. We want you to be so well satisfied that you will come back next season for more bulbs.

SUBSTITUTIONS

We never substitute without permission. The stock of some varieties is limited and will be exhausted before the close of the season, therefore, if you prefer substitution to the return of your money, please advise and we will try to please you.

If stock of a given size is sold out, we may be able to substitute **equal value** in a different size of the same variety if you wish us to do so.

PRICES

Prices are shown in cents per single bulb. Six bulbs of same variety and size at five times the single rate. Thirteen bulbs of same variety and size at ten times the single rate.

CULTURE

Plant in good garden soil, 4 to 6 inches apart; and cover about 4 inches above the top of the bulb. If stable manure is used, it should be thoroughly rotted and mixed with the soil. High grade potato fertilizer will likewise give good results. Avoid planting near foundation walls of buildings, close to trees or large shrubs or in the shade. Cultivate often and thoroughly. Water freely when spikes begin to form. Cut flowers when first bloom begins to open. Leave at least 4 or 5 leaves to mature the bulb. Dig bulbs after killing frosts, or earlier if foliage begins to ripen. Cut off tops close to the bulb; and store in a cool, dry cellar.

COLLECTIONS

100 bulbs, 10 varieties, our selection, labeled and postpaid to any address in the United States, east of the Mississippi River as follows:

Size No. 1,	\$4.00
“ “ 2,	3.25
“ “ 3,	2.50

This will represent a discount of at least 10% from catalogue prices. We can afford to make this discount for the privilege of filling your order from the varieties which we have in the largest supply.

This is not a scheme to work off a lot of inferior stock; but a plan to keep our stock in balance as late in the season as possible, and avoid disappointment to customers who order specified varieties. This presents a good opportunity to the beginner who is not familiar with the various sorts, and may find it difficult to make selections from catalogue descriptions.

MIXTURES

Our DIRIGO MIXTURE contains a general assortment of large flowered varieties, and also a few primulinus hybrids and some unnamed seedlings. Prices as follows:

Size No. 1,	\$2.00 per hundred
“ “ 2,	1.65 “ “
“ “ 3,	1.25 “ “

Our FLORISTS MIXTURE is composed entirely of large flowering named varieties, all of which are first-class cut-flower market sorts. Size No. 3 only, \$2.00 per hundred.

No orders for less than 100 bulbs mixture can be accepted at these prices. Transportation will be prepaid to points in New England only. Stock limited, so come early.

REGARDING TESTIMONIALS

We receive many gratifying reports from our customers. Testimonials, however, remind us strongly of patent medicine advertisements; and none will be printed in this nor any future issue of our catalogue.

WHOLESALE

If interested in larger quantities, or in planting stock and bulblets, write for quotations, stating varieties and quantities desired.

THE LORD GOD PLANTED A GARDEN

The Lord God planted a garden
In the first white days of the World,
And set there an angel warden,
In a garment of light unfurled.

So near to the peace of Heaven,
The hawk might nest with the wren;
For there, in the cool of the even,
God walked with the first of men.

And I dream that this garden closes,
With its shade and its sun-flecked sod,
And its Lillies and bowers of Roses
Were laid by the hand of God.

The kiss of the sun for pardon,
The song of the birds for mirth—
One is nearer God's heart in a garden
Than anywhere else on earth.
