BERBERIS THUNBERGI ATROSANGUINEA

Purple or Red Leaved Barberry

This variety of barberry is more showy than the Red-leaf Japanese Maple as it holds the color of red throughout the season and does not turn green as the Maples do. The early Spring growth is bright red or scarlet. As the season advances the color changes to a deep red. Very showy planted in a flower garden or along a walk. Something entirely new.

This splendid new variety will not be ready until October, 1926, but we are booking orders now.

JAPANESE IRIS

This variety blooms much later and is very unusual and exotic in appearance. Large flat flowers carried high on tall stems. The colors range from white through lavender to deep purple. They love moisture but will thrive in any rich soil. They may be naturalized along streams.

PLANTS. 35 cents each; \$3.00 per ten; \$20.00 per hundred; \$150.00 per thousand.

GERMAN OR BEARDED IRIS

Afterglow (Sturtevant 1918) 8.6—Flowers of loose Pallida form. Soft grey-lavender shading to buff with rich yellow at the haft. Well branched and of strong growth. 75 cents each.

Alcazar (Vilmorin 1910) 8.9—A giant in flower and growth. S. light bluish-violet. F. deep purple with a bronze veined throat. One of the most magnificent and striking. 50 cents each.

Ambassadeur (Vilmorin 1920) 9.4—A strong growing late variety with very large flowers. S. reddish-violet. F. deep velvety beard and style arms yellow. Of exceptional merit and superior to many varieties of a similar color. \$2.00 each.

Anna Farr (Farr 1913)—A beautiful white Iris of splendid form and substance. The standards and falls delicately margined pale blue. Probably the best of the frilled varieties. \$2.00 each.

Ann Page (Newlands 1919) 8.4—Lovely pale lavender-blue self with large flowers of splendid shape. F. long, heavily pencilled with brown at haft. Stem stout and erect. One of Sir A. Hort's best and possibly the finest of the pale purple varieties. \$7.50 each.

The haft exceptionally broad and heavily reticulated brown on a white ground with a gold margin. The base of the S. is also heavily reticulated and colored gold. Beard bright golden-yellow. The whole effect of the flower is unusual and the plant stands out as one of the finest Irises in cultivation. \$10.00 each.

Asiaticus (Trojana)—S. light violet-blue. F. deep purple-violet. 25 cents each.

Aurea (Jacques 1833) 7.4—Beautiful form, rich chrome-yellow, nothing to do with the species Aurea. 25 cents each.

Belladonna (Koehler 1922)—The forerunner of an early Plicata. Belladonna blooms regularly and profusely. It is distinct in that its standards are darker than the falls, caused by a more heavy mottling and striping of purple on the white ground. An

excellent and showy variety that has been greatly admired. \$1.00 each.

B. Y. Morrison (Sturtevant 1918) 8.8—A strikingly beautiful purple bicolor of American origin. S. pale lavender-violet. F. raisin-purple, velvety texture, its wide lavender border has a dark outline. Slender in growth and strong in constitution. \$1.00 each.

F. of exceptional substance expanding at the base to a deep rich indigo-purple velvet. Beard orange, very pronounced. \$10.00 each.

Elberon (Koehler 1922)—An entirely new shade in the deep red, not as tall growing as Rosedale, but a good size flower of artistic form. \$1.00 each.

Eldorado (Vilmorin 1910)—A peculiar and distinctive blending of violet-purple and yellow. An open flower on stalks thirty inches high. There is nothing else like it. 50 cents each.
