Fulwood's Plants

PRICE LIST 1925

SUCCESION

GUARANTEE

If the increased yield of headed Cabbage from my plants, compared with the yield from cheaper plants of same varieties sold by others, planted at the same time and grown under the same conditions, is not worth more than the difference in cost, I will refund the entire purchase price. There is 16 years' reputation of honest dealing behind this guarantee.

P. D. FULWOOD

HIGH GRADE PLANTS

TIFTON, - - - GEORGIA.

Frost Proof Cabbage Plants in Any
Quantity My Specialty.

TO MY FRIENDS AND CUSTOMERS

Last season we had the heaviest freeze in years on the 7th of January killing out all the cabbage plants in the United States as well as all other vegetation. I immediately planted seed in central Florida and began shipping out plants to my customers early in March, or three weeks before they could be had from any other cabbage plant grower. It is my purpose to give my customers good plants and to ship them promptly. This year 1925 I have about thirty million fine cold hardened plants ready to ship and weather permitting I can ship your order the day it is received. My plants are better and hardier this season than ever before. Send in your order now; you will be surprised how quick you will get your shipment of first class frost proof plants.

TERMS

My terms are cash with each order. No plants shipped C. O. D. While I always do all I can to deliver all plants promptly, they are sometimes delayed in transit or lost through no fault of mine. If you do not hear from me in a few days after sending in your order, write me, stating the date you mailed your order and amount sent, together with a list of what you ordered. If your plants should arrive in bad order, pick out the good ones and advise me of the shortage and this will be made good at once.

Make all orders payable to P. D. Fulwood, and remit by postal money order, express money order, registered letter, or personal check. **Do not send stamps.**

P. D. FULWOOD, Tifton, Ga.

MY FROST-PROOF CABBAGE PLANTS

Will Mature Heads Two to Three Weeks Earlier Than Your Home-Grown Plants and Double Your Profits.

FLAT DUTCH

I fill orders from September 1st to June 1st.

Varieties—Early Jersey Wakefield, Charleston Large Type Wakefield, Succession, Early Flat Dutch and Copenhagen Market.

In this section the soil and climatic conditions are just suited for growing tough, hardy cabbage plants during the Winter and early Spring. The plants make a slow but steady growth, until at eight to ten weeks of age they are very tough and hardy. When in this condition they can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants. These **Frost-Proof Cabbage Plants** will stand a temperature of 20 degrees above zero without injury. The land freezing, or the plants being covered with ice, sleet or snow after they are planted will not injure them, providing temperature does not go below 20 degrees above zero.

The top of the plant does not grow until your regular Spring weather opens up, but the roots grow from the time they are planted, and just as soon as spring weather starts the established root growth assimilates the fertilizer in the soil, and the plants grow very fast. You know what the difference in profits will be if your crop is matured and marketed before the general crop from home grown plants is matured.

PACKING

All of my plants are tied in bunches of 50. Packed by experienced help, in the lightest crates possible. I have shipped plants successfully to all the Southern States, Western States, and most all of the Northern States and some places in Canada. Write your name, address and post-office plainly. You will be notified by mail the day your plants are shipped.

My Guarantee—I positively guarantee all plants grown by me to be exactly as described in this Price List; fresh, pure, genuine and carefully selected.

FULWOOD'S CABBAGE PLANTS.

How to Grow Cabbage.—To grow a good crop of cabbage I would advise selecting a deep sandy loam with a southern exposure if possible. Apply broadcast from ten to fifteen loads of well rotted stable manure to the acre and plow in. The land should be harrowed thoroughly and rows laid off three to three and a half feet apart. Apply about 500-lbs. of high grade fertilizer to the acre, and mix well with the soil. If you have no stable manure apply from ten to fifteen hundred pounds fertilizer to the acre, half broadcast and half in the drill. As cabbage are gross feeders bear in mind that you cannot fertilize them too heavily. It is important to set the plants deep in the ground, up to the first leaf, in order to keep the stem from freezing and cracking. You can plant about twelve thousand plants of the Wakefields to an acre and about ten thousand of the flat heads to an acre.

The first cultivation should be deep, but when they start to head cultivate them shallow and apply 200 pounds nitrate of soda per acre.

JERSEY WAKEFIELD

SWEET POTATO PLANTS

Grow your own Sweet Potatoes for the finest eating there is. They are immensely popular as a standard crop and no home should be without them.

PORTO RICOS

Favorite of 80 Per Cent. of Markets and Shippers.

Please write below the names of Plant dealers or any other stores that handle garden and field seed and I will add extra plants to your order.

REMARKS:

FULWOOD'S SWEET POTATO PLANTS

Send me your order for Sweet Potato Plants or Slips as soon as possible. Tell me when you want them shipped and I will send them to you just when you want them, or as near that date as conditions will allow. I ship, from April until July, the finest plants grown.

Sweet Potato Plants are very scarce this season. At bedding time sweet potato seed is worth three dollars per bushel. I only have about two thousand bushels of State Inspected seed. I expect to let my regular customers have these plants and ask that you send in your order as early as possible so you will be sure and get what you want to plant. These seed are specially selected from a pure strain of Porto Rico Potatoes and will give you excellent results.

ONION PLANTS

Onion Plants are much better than sets, as they make larger onions and do not run to seed. They also keep when cured and stored. Land for onions should be manured and fertilized heavily, broadcast and plowed in. Rows should be laid off a foot and a half apart and plants should be set from four to six inches in the row. Ready January 1st to May 1st.

Onion Plants Same Price As Cabbage Plants.

BEET PLANTS

Variety—Early Blood Turnip.

Prices Same As Cabbage Plants.

TOMATO PLANTS

I ship more Tomato Plants than any grower in the plant business, shipping millions of them to canning factories all over the country, as well as to small gardeners and truckers.

VARIETIES:

Greater Baltimore
and Livingston
Globe.

Tomato
Plants
are ready from
April 1
throughout the
summer.

Mr. P. D.
Fulwood,
Tifton, Ga.
Dear Sir:

I am writing to let you know this is my fourth year that I have ordered plants from you, and I am perfectly satisfied with them. Now, listen, I wish you would put the name on each package as you always do, so I can tell them apart.

I beg to remain,
your customer,

Pinkie
Montgomery,

R. F. D. 1,
Grenada,
Miss.
