Prices About Normal for 1925

ANNOUNCEMENT: This catalogue is the only medium we employ in selling our seeds, we have no agents, and our business is conducted along the lines of efficiency and economy and on practically a cash basis, in selling direct to the planters we are able to do so at reasonable prices.

NOTICE: Most failures with seeds are due to unfavorable weather or soil conditions, too deep or too shallow planting, or other causes entirely beyond our control, which make it impossible for us to guarantee success. We take all possible care to supply seeds that will under proper conditions produce satisfactory results; seeds that will grow and prove true to name and description.

STOCKS: We are prepared to furnish every item in this catalogue until stocks have been sold out. All prices are subject to change without notice; some may advance, others may be reduced which is governed by the market.

MAIL ORDERS: Particular attention is given to orders received by mail. In the Spring of each Season our orders for seeds by mail increase to such an extent that in some instances we are forced to delay orders a short time. It is advisable to send in your order early.

HOW TO ORDER: Please be sure to sign name, post office, county and state on every order you send us. Cash should accompany the order, registered mail, or post office or express money order, bank-draft or check; postage stamps accepted for small amounts.

TERMS: Prices in this catalogue are Net Cash F. O. B. Reading, Pa.

NON WARRANTY: We give no warranty express or implied as to the description, purity, productiveness or any other matter for any seeds we send out and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

SEEDS OF THE BETTER KIND

In conformity with present day conditions, we have reduced the prices of both vegetable and field seeds, wherever possible, and we have increased the quantity of seeds in the packets.

One of the first elements to success is to sow good seeds. The results depend almost entirely on the quality. Buy only from a reliable house with a reputation; avoid the bargain counter in buying seeds.

We are in a position to serve you to the best advantage. Give us an opportunity to supply you with both garden and farm seeds. We confidently believe you will return and say your success was due to planting "Seeds of the Better Kind."

We urge our customers to send in their orders at once, before the Spring rush begins. Our stock of both garden and field seeds is large, clean and complete, and our prices are right.

CULTURE—To succeed best they should be sown as soon as the ground can be worked in the spring. Good soil thoroughly mixed with well rotted manure dug to a depth of one foot or more will give splendid results; when well up give brush or strings to support them. May also be sown late in fall, about middle of November, and will bloom earlier. They commence to bloom early, and if the flowers are picked as soon as they fade, will continue all summer.
