PRICE LIST NO. 73

LIBRARY
MAY 26 1931
Department of Agriculture.

We invite those contemplating the purchase of trees and shrubs to visit our grounds and see with what care we grow our trees and shrubs. We give our stock the best fertilizing, pruning, cultivation, transplanting, etc. This puts the pep into them and makes them the most satisfactory stock for your needs.

Downers Grove is a suburb of Chicago, 21 miles out on the C. B. & Q. R. R. It is quickly and conveniently reached, there being about 40 trains each way per day.

The nurseries are one mile north of the depot on the Ogden Avenue cement highway and three miles south of Roosevelt Road on the Downers Grove road. They are easily reached by auto. Visitors are welcome.

We carry a general line of Shade, Fruit, Evergreen and Ornamental Trees, Shrubs and Vines that our observation and experience has shown are hardy and adapted to this climate.

Prices listed herein include the packing and delivery to express or railroad company. During the spring and fall seasons we make frequent deliveries to the surrounding suburbs west of the city; deliveries at these times are made without extra cost to our customers.

PLANTING SERVICE

So far as possible on orders amounting to \$25.00, we will for a moderate additional charge plant the stock (if suitable soil and drainage conditions are provided,) and furnish a written guarantee to replace stock that dies during the first season. A copy of the guarantee will be gladly furnished on application.

LANDSCAPE WORK

Landscape designing and planting is a specialty with us. We are prepared to do work of this kind from the 50 foot city lot to the large country estate. Many places hereabouts testify as to the character of our work.

We will be pleased to consult with you regarding this or any other branch of our business.

TERMS AND CONDITIONS OF SALE

TERMS: Cash with order, or on large orders we will ship if one-fourth cash is remitted with order, balance to be paid on arrival. On landscape or planting contracts of sufficient size, if desired, we will extend terms, which are a matter of agreement at time of ordering.

SPECIAL QUOTATIONS — ESTIMATES: We make special prices on large orders. Write for estimate; give list of requirements, varieties, sizes, etc.

NON-WARRANTY: In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree to replace that portion of the order proven untrue to name, or refund the purchase price thereof. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, growth, productiveness, or any other matter.

NURSERY INSPECTED: Our nurseries are inspected once each year by an accredited representative of the State Department of Agriculture to see that no dangerous insects or plant diseases become established; a copy of the Department's Certificate of Inspection is attached to each shipment.

LARGE TREES: We have large trees especially in the American Elm, to give immediate results. These are moved in the winter time. We are fully equipped for this work. Prices on application.

Landscape Gardening

It is with pleasure we call your attention to this department. We believe that almost everyone has a deep appreciation of that which is beautiful in nature, but usually have not the training to compose, as they would. This work of laying out of ground is often entrusted to the gardener who understands the details, but, generally, lacks in his knowledge of the composition, its underlying principles. He does not appreciate the demands of unity, variety, character, propriety and finish. How often we see homes with fine houses, but with the shrubs and trees dotted here and there in a promiscuous manner, with neither unity nor harmony.

The grounds should, generally speaking, form a framework or setting for the house, harmonizing with its architectural features.

Many people carry the impression that "landscape work" is only for the wealthy, but this is not so. Fifty or one hundred dollars expended on a 50-100 foot lot often increases the value of the property to double the amount of the expenditure, and is surely a source of great satisfaction to the owner.

We are prepared to do work of this kind from the 50-foot city lot to the large country estate. Sometimes, for convenience, the work extends over several seasons, each planting being done with regard to the unity of the ultimate composition.

We will be pleased to consult with you regarding this or any other branch of our business.
