HAYES CABBAGE WORM DESTROYER

It Blows Them Up

Not a Poison

Directions for applying this mixture: Use a duster or sifter spray of any kind. Sprinkle over the heads or cabbage plants. Late in the evening or while the dew is on the plants in the morning. You will notice that the green worm will suck this mixture, which expands and causes the worm to burst—or blow up. Price, 1 lb. package 20c; 2 for 35c.

EARLY JERSEY WAKEFIELD

A NEW VARIETY OF CABBAGE IMPORTED FROM COPENHAGEN, DENMARK.

First tried out here last season with wonderful success. It is an improvement over Copenhagen Market, matures 10 days earlier. It is one of the finest early round-headed cabbage in cultivation. It is desirable on account of the remarkable characteristic of maturing the heads all at the same time, enabling the grower to gather his crop with less expense and permitting the clearing of the land at the first cutting. The heads average about ten pounds each in weight, are hard and solid, with small core. The leaves are light green, rather small, saucer-shaped and tightly folded, making it possible to set them close together in the field. Pkt., 10c; oz., \$1.00; 1 lb., \$10.00.

Price per pkt., 10c; per oz., 25c; ¼ lb., 75c; 1 lb., \$2.50. Post paid.
