INTRODUCTION

The increasing popularity of Hardy Herbaceous Plants shows steady progress; a tendency so marked should not be overlooked by anyone engaged in the horticultural trade. The everyday utility of these plants, combined with singular charm and attractiveness, has earned public recognition of their merit; and from comparative obscurity, they have, in a few years, attained a place of first rate importance in the estimation of garden lovers. We are confident that this popularity is enduring, and that they will be more and more used in garden decoration.

We devote ourselves exclusively to their propagation and culture and our business is entirely wholesale. Inquiries are solicited from all branches of the trades, and by careful attention to every detail we give you absolute assurance of satisfaction, no matter how exacting your requirements may be.

The descriptions in this catalogue are taken from plants when in flower and no pains have been spared to make them accurate and dependable.
