To Our Patrons:

WE TAKE PLEASURE in presenting here-
with our 1925 price list of Dahlias and
Glads and wish to express our apprecia-
tion for the liberal patronage given us the past
season.

During the spring of 1924 we received many
complimentary letters on the high quality of our
stock. We desire to build our business with the
trade of satisfied customers only, and every bulb
sent out is guaranteed true to name, in growing
condition and free from insects and disease. Every
dahlia tuber will have one or more visible live
"eyes" or sprouts. None of our stock is propa-
gated from green plants and cuttings. Orders will
be filled from strong, plump, field-grown stock,
and no dried-up, inferior goods will be sold to
anyone. Full directions on culture will be en-
closed with each order, if requested.

No substitution unless permission is given.

Varieties offered are subject to previous sale
and will be sent postpaid in U. S. and Canada on
orders of \$2.00 and over. No orders accepted
for less than \$1.00. Shipments of Glads will be
made about April 1st to May 1st. Dahlias from
April 15th to May 1st. Order early, as many
good varieties are frequently sold out long before
planting time: Terms are cash with order or
before delivery, but a deposit of 20 per cent will
hold early orders for future delivery. C. O. D.
orders must be accompanied by at least 25 per
cent cash. No orders held after May 1st unless
fully paid for.

GUARANTEE—We guarantee our stock to be
true to name and to arrive in growing condition,
and will replace any that may prove otherwise.
If a shipment does not arrive in satisfactory con-
dition, notify us at once. It must be mutually
understood, however, that beyond this we will
not be held responsible, as success with bulbs
depends largely upon treatment received after ar-
rival at destination, weather and other conditions.

Dahlias

For time and money expended few, if any, flowers give greater satisfaction than good varieties of Dahlias, which give an abundance of large blooms during the late summer and early autumn. With so many reasonably priced good varieties on the market, it seems a waste of time and garden space to grow the inferior kinds so often seen.

Types in this list are indicated as follows: (D) Decorative; (C) Cactus; (HC) Hybrid Cactus; (P) Peony flowered; (S) Chow or ball shape. Pompons are listed separately.

“If In Doubt What to Plant--Try Some Glads”

Glads of Merit

Following the example of a number of prominent growers to avoid the old arguments as to the proper pronounciation of “Gladiolus,” we like to call them “Glads,” a name that truly fits the flower. On account of its long keeping qualities the Glad is one of the very best flowers for cutting. If cut in the morning when the first bud is open and given fresh water daily they will last a week or more and every bud will open to the top.

Those marked (K) are some of the famous Kunderd originations, while (D) indicates those from Diener.

Prices quoted are for bulbs about 1½ inches and up in diameter.
