WHOLESALE - PRICE - LIST

FALL 1925 - SPRING 1926

Hardwood cuttings, Seed, Seedlings, and lining out stock.

Southern Grown Cuttings Best

Ask any florist which roots the best, and propagates the best and grows off most freely—CUTTINGS from outdoor wood or from indoor wood, (wood grown under glass). Ninety nine per cent will answer, "Indoor wood." WHY IS THIS TRUE? The indoor wood is more porous, is not as hard grained, and, therefore callouses and throws out roots more readily than the hard grained outdoor wood.

The outdoor wood is likely to make big hard callouses with no roots, while the indoor wood makes SOFT callouses which throw out healthy young roots, and the plants start off freely, and grow vigorously.

In the same way and for the same reason, SOUTHERN grown Cuttings root more FREELY, and start off more vigorously than Northern grown cuttings.

Ask any florist, or try a few southern grown cuttings and be convinced. We make a specialty of southern grown cuttings.

Hardwood cuttings should be fresh, with all their vitality in them. For this reason we try to ship our cuttings as fast as they are made up.

The enclosed list of QUALITY CUTTINGS will give you good results if you place your order with us.

ROSENBANK NURSERY CO., Inc.
Huntsville, Alabama.

HARDWOOD CUTTINGS

		Per	Per
		1,000	10,000

ROSEBANK NURSERY CO., Inc.,

Huntsville, Alabama.

NOTICE

Huntsville, Ala., is the largest nursery center in the South.

The soil and climate are ideal for propagating and growing.

Many items can be produced for one-half the cost in the East and North.

Many items can be grown from Hardwood cuttings, PLANTED in the "OPEN FIELD" in the fall.

Huntsville, with a population of 23,000 including suburbs, is as pleasant a small city to live in as can be found anywhere.

It costs less to grow ornamentals in Huntsville than elsewhere.

Our soil is the most fertile in the state.

Our climate is ahead of any of the southeastern states for "year round."

Come to Huntsville and grow old gracefully.

Land and labor are cheap and profits certain in the nursery business at Huntsville.

Advantageous soil and climate enable us to grow a better plant in two years for less expense than three years north or east.
