GENERAL INFORMATION—ON DUTCH BULBS AND PLANTS

Flowering Bulbs, such as Tulips, Narcissus, Jonquils, Crocus, Hyacinths, Peonies and Iris, are planted outdoors in the Fall for Spring Flowering.

Many of our most beautiful flowers are produced from bulbs and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December until May. The culture directions found under the respective headings are worthy of careful attention.

Plants—Small plants can be sent by mail if desired, but we strongly advise our customers to have their plants sent by express at their expense.

We Deliver Bulbs. Charges paid to any postoffice or express office in the United States at prices quoted. This applies to bulbs only—**Not Plants or Seeds—except as specified.**

How to Send Money. Money can be sent safely either by P. O. Order, check, bank draft, express order or registered letter. If your order amounts to \$1.00 or more, it is best to send by one of the above methods. **We receive postage Stamps the same as Cash.**

We Guarantee all bulbs ordered of us shall reach the purchaser safely and in good condition. If the package is lost or any of its contents injured on the way we will refill order.

We cannot promise to fill orders for Dutch Bulbs later than December 1st and urgently request our customers and friends to see that their orders reach us before that date.

Substitution. It sometimes occurs that stock of some varieties of Hyacinths or other bulbs becomes exhausted before the close of the season, in which case we shall take the liberty of substituting others of the same color and price; being equally as good, if not superior, to the ones ordered. Should any of our customers object to this course they will please state so in their orders.

In almost all cases throughout the plant section of this list, we have many more varieties than those listed, so if you do not see what you want, please write us. We ask that our customers keep copies of all orders sent.

Address all orders and remittances to

STATE NURSERY AND SEED CO., HELENA, MONTANA

Depth at which Bulbs Should be Planted

Crocus	3 inches deep and 2 inches apart.
Tulips	4 inches deep and 4 inches apart.
Narcissus, Jonquills	6 inches deep and 5 inches apart.
Hyacinths	7 inches deep and 6 inches apart.

Special Collections of Bulbs

OUR SELECTION OF VARIETIES

COLLECTION NO. 1

Contains 500 Darwin Tulips—the finest Late Flowering Tulips in cultivation. These Tulip Bulbs produce large, splendid flowers with long, stout stems in many different colorings. The collection, our selection, for \$33.00 or one-half collection for \$17.00, delivered free.

ARISTOCRATIC HYACINTH—COLLECTION NO. 2

Consisting of the finest Dutch Hyacinths grown; for a round bed 4 feet in diameter—outside row 24 white, second row 15 pink, third row 9 rose. Center, 5 deep rose. The 53 bulbs, our selection, for \$11.00; one-half the collection for \$6.00, delivered free.

HYACINTH—COLLECTION NO. 3

This collection of **True to Color** unnamed varieties may be relied upon to provide perfect blossoms on good strong stems. They are bulbs of first class quality, suitable for either indoor or garden purposes. 50 for \$8.00; 25 for \$4.50; 12 for \$3.00.

OUR BOUNTIFUL BOX OF BULBS—POSTPAID
A PRESENT DE LUXE

Containing:—4 Hyacinths; 12 Double Tulips; 12 Single Early Tulips; 6 Darwin Tulips; 1 Chinese Sacred Lily; 6 Narcissus Poeticus Ornatus; 12 Jonquills or Daffodils; 12 Crocus Mixed.

The above unequalled collection of bulbs—**postpaid—FOR \$3.75.**

On orders received late in the season we may be compelled to substitute on some of the above varieties but in all cases equal or better values will be sent.

SINGLE HYACINTHS

WHITE

La Grandesse—A pure white with large spike and good form.

PINK

Queen of Pinks—A splendid pink with enormous spikes.
Gertrude—An early bright rosy pink, large compact truss.

RED

Roi des Belges—A very fine deep crimson scarlet.
La Victoire—A bright deep glistening carmine rose, a very fine spike.

BLUE

Queen of the Blues—Bright blue—very fine.

YELLOW

City of Haarlem—The finest yellow single hyacinth known.

PRICE

Any of the above sorts—**FIRST SIZE**—produced in Holland—each, 30c; per doz. \$3.00; 50 for \$12.00.

DOUBLE HYACINTHS

Bouquet Royale—An unrivaled bright pink of large size.

Chestnut Flower—rose color, extra large and considered the best of its color.

Garrick—Deep blue, extra large and of good form.

LaGrandesse—White, very fine.

Either of the above named Double sorts, in 1st size only, each, 30c; per doz. \$3.00; 50 for \$12.00.

ALL BULBS PREPAID BY MAIL OR EXPRESS

Single Hyacinth

The Hyacinth is one of the most popular and beautiful spring-flowering plants for indoor or outdoor cultivation. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end. Brilliant effects can be obtained by massing in beds different colors in varieties that grow about the same height and bloom at the same time.

CULTURE IN POTS

For growing in pots, large, selected, named varieties should be used. They should be potted singly in 4-inch or 5-inch pots. Three bulbs in a 6-inch pot are very effective. The best potting compost is fibry loam and manure, about equal parts, with some sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulb should remain above the soil. The Pots should be buried in the open ground to the depth of 6 inches or in a cool basement, and left there for five or six weeks, until they are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Plant Food fed to the plant after becoming well rooted will increase the size of the blooms, but should be discontinued immediately the spikes begin to show their color.

Temperature

It is impossible to maintain the proper temperature in the dwelling for the different varieties of plants but most plants will, if carefully watered, live in a room where the thermometer at night does not go below 42 degrees, though six to eight degrees warmer would be better.

How to Water Bulbs or Plants

A safe rule is to take a little of the soil between the fingers, and should the soil retain the shape to which the fingers have pressed it, you are then certain the plant has enough moisture. There are many other ways of knowing when to water, but the foregoing is the safest.

Here Is Your Bulb Opportunity

This year we have been extremely fortunate in securing a quantity of 1ST SIZED UNNAMED TRUE TO COLOR Hyacinths suitable for either planting in the garden in varieties, or for indoor cultivation as suggested on page 2. The bulbs produce flower spikes of an even, erect shape and are ideal for pot culture. This type rarely produces "Top Heavy" flower spikes, and the flowers being held up on good robust stems enable them to withstand rough weather when used for outdoor bedding purposes. An ideal dual purpose variety.

We have these bulbs in the following colors: White, Rose, Red, Pink, Dark Blue, Light Blue and Yellow.

Prices: each, 20c; doz., \$2.00; 50 for \$8.00.

FOR OUTDOOR CULTURE

The bulbs may be planted any time from October onwards depending on locality. They succeed in any good well drained garden soil. Dig deep and mix in a little fertilizer. Set the bulbs so that the tops will be between 2 and 3 inches below the surface and 6 to 10 inches apart, with a little sand under and above them if convenient and being careful that none of the fertilizer comes in direct contact with the bulbs. Early planting brings the best results.

A SUGGESTION

Ordinary bedding of Hyacinths may be made less stiff if the bulbs are set about ten inches apart and the intervening spaces planted with spring blossoming plants that come into bloom at the same time as the bulbs. A beautiful bed may thus be made of pink Hyacinths and Forget-Me-Nots, taking care to use Hyacinths of one variety. Other good combinations are Dark Blue Hyacinths and Pink English Daisies, Yellow Hyacinths and Purple Pansies, light blue Hyacinths and Perennial Alyssum, etc.

TULIPS

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design.

Culture—the cultural directions given for Hyacinths above are applicable to Tulips except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 4 to 5 inches between the bulbs is sufficient. They may be planted in October and November; before the ground freezes. For pot culture a compost of two parts loam to one part light manure with some sand intermixed, is suitable. From three to five bulbs according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted or put in basement in the manner recommended for Hyacinths. Most of the varieties named below are equally well adapted for pot culture or the open border.

TULIPS—SINGLE EARLY

Six of a kind at doz. rate: 25 of a kind at 100 rate

NARCISSUS

Narcissus are among the most popular and largely grown of spring flowering bulbs, and deservedly, too. Their exquisite grace, beauty and charming habit have been immortalized in the poetry of all times. No Garden should be without them.

They are all of the easiest cultivation thriving in almost any soil and situation. The types popularly known as Daffodils, should be extensively planted for naturalization. Nothing can compete with the beauty of these flowers, coming as they do, almost before the snow has left the ground, hardy in the most rigorous climates when planted in clumps among shabby or in pleasure groves, they prove a welcome harbinger of approaching spring, and make beauty spots of the most desolate surroundings. For growth in pots, they require about the same treatment as Hyacinths, three or four bulbs in a 5-inch pot, and they are valuable for this purpose. With the exception of the Chinese Lily and Paper White, they are all perfectly hardy.

Narcissus, Paper White Grandiflora

Narcissus--Paper White

No other bulbs we know of will produce such an abundance of white sweet-scented flowers with so little trouble. A dozen bulbs, set in a bowl of **Prepared Fibre** or water and held in place by pebbles will make a charming pot of flowers for house or church decoration, and can be had in bloom at any time desired.

Imported or French, dozen 75c; 100 at \$4.50.

Domestic or California, dozen 60c; 100 at \$3.50.

Chinese Sacred Lily

For the most part these are grown in water in fancy bowls, with just enough pebbles around them to keep them from toppling over.

They can also be grown in pots in soil, sand, moss or **Prepared Fibre** (see page 6) which is a splendid material in which to grow these bulbs.

Mammoth bulbs, each 25c; doz. \$2.50
Medium size, each 20c; doz. \$2.00

Chinese Sacred Lily

Empress

Hardy Narcissus

Six of a Kind at Dozen Rate
25 at 100 Rate

Golden Spur—Large spreading, full, deep, yellow perianth; trumpet, golden yellow. A charming richly perfumed flower and one of the very best of golden trumpets.

Single Nose Bulbs, per doz. 90c; per 100 \$6.50.

Victoria Bi-Color—A splendid flower for indoor culture with yellow trumpet and creamy white perianth.

Single Nose Bulbs, per doz. 90c; per 100 \$6.50.

Golden Spur Narcissus

Empress—A large rich yellow trumpet with sulphur white perianth. A splendid companion to **EMPEROR**, and one of the very best for the garden. Large single nose bulbs, per doz. 95c, per 100 \$6.75.

Emperor—One of the finest in cultivation; entire flower of richest yellow; trumpet of immense size. Large single nose bulbs, per doz. 95c; per 100 \$6.75.

HARDY NARCISSUS—Continued.

Narcissus Poeticus Ornatus

Narcissus Poeticus Ornatus—Pure white with red cup. Fine for cut flowers, being early and of great beauty and substance, perfectly hardy and at the price quoted should be planted quite liberally. Very large bulbs per doz. 50c; per 100 \$4.00.

Double Narcissus Von Sion

DOUBLE NARCISSUS OF DAFFODILS

Von Sion—The largest double yellow trumpet variety; extra fine for forcing. Our bulbs are Dutch grown of the pure golden variety and of the largest size. Large bulbs, single Nose, per doz. 85c; 100 \$6.25.

Orange Phoenix—also called "Eggs and Bacon." Large double white with orange base. Per doz. 85c; 100 \$6.25.

Crocus

This well known little flower is the earliest to bloom, appearing as soon as the snow is off the ground. They are suitable for all gardening purposes for planting in beds, forming lines and borders; are quite hardy, and increase from year to year, and will flower easily in the house with the same treatment as the Hyacinth.

GIANT NAMED CROCUS

Large Yellow	Doz. 25c; 100 \$2.00
Purple—very large	Doz. 20c; 100 \$1.60
Pure white, very fine	Doz. 20c; 100 \$1.60
White ground with lilac stripes, very large and showy	Doz. 20c; 100 \$1.60
Mixed—All colors	Doz. 15c; 100 \$1.20

SCILLA SIBERICA

We are again able to offer this favorite early spring flower. The low growing blue flowers are among the very earliest of spring flowers. May be planted in lawns as well as in clusters in the hardy border. Doz. 70c; 100 \$4.75.

SNOWDROP (Galanthus) Single

Snowdrops are another of the earliest flowers to herald the approach of spring. Perfectly hardy, they are a source of early beauty planted in clusters in any hardy border.

Single per doz. 50c; per 100 \$3.50
 Double per doz. 50c; per 100 \$3.50

FREESIA (Purity)

Bear peculiar clusters of white flowers, which last a long time and have a delightful fragrance. The bulbs force very easily and will come into bloom in January and February in an ordinary greenhouse. They also grow well and bloom freely in an ordinary sitting room if placed near the window and not kept too hot. Will stand a light freezing without injury. Dozen, 35c; 100, \$2.00. Large size, doz. 50c; 100 \$2.50.

OXALIS

An interesting class of small bulbs, desirable for winter flowering in pots and hanging baskets, producing an abundance of bloom almost continuously.

Bermuda Buttercup—
 (yellow) per doz. 75c.

Grand Duchess—Pink,
 per doz 75c.

OXALIS (Bermuda Buttercup)**EASTER LILIES**

The Easter Lily is one of the most popular blooming plants. Its pure white, large, trumpet-shaped flowers, with their great substance and delicious fragrance, are as desirable for cutting as for every form of decoration. All the lilies quoted require rich soil, and after root action has well started, appreciate frequent application of manure water, until the bloom buds are nearly ready to open, when it should be discontinued.

L. Gigantium—The Easter Lily; each 75c; per doz. \$8.00.

OTHER LILIES

L. Auratum—The gold banded lily of Japan. Each 50c; per doz. \$5.00.

L. Rubrum—Rose pink with Amaranth spots and reflexed petals. Each 50c; per doz. \$5.00.

L. Candidum—The well-known Madonna or Annunciation lily. Each, 25c; per doz. \$2.50.

L. Formosissima—A splendid white lily, can be supplied immediately on arrival from Japan. Each 50c; per doz. \$5.00.

Tiger Lily—Very large flowers, orange and black. Very floriferous, perfectly hardy, and should be in every garden. Each 25c, postpaid 30c; dozen \$2.50, postpaid \$2.75.

CALLA LILIES

Well known house plants, easily grown, requiring only rich soil and plenty of water. A compost of one part loam and one part cow manure is recommended. By the 1st of June, allow the plants to lay dormant until the middle of August, when repot them, removing all old soil, and as soon as root action is well started, give liberal applications of plant food.

Calla Aethiopica—The large white lily of the Nile, each 50c.

Calla—Little Godfrey—A dwarf type that has proven very popular for house growth. Each 50c.

CHRYSANTHEMUMS

We are the largest growers of these wonderful fall blooming plants in the northwest, and offer fine pot plants of the Pom Pon types—in white, yellow, and red—plants about 18 inches high, from 4 to 5 inch pots, at \$1.00; \$1.50; and \$2.00 each by express at purchasers expense. If wanted by parcel post add 25c to the above prices. We are in a position to supply fine specimen plants suitable for presents of these popular flowers at most reasonable prices—by express only.

Prepared Fiber

This is a prepared material in which bulbs do especially well, a mixture of Fibre, Charcoal, Shells, Fertilizer, etc. Always sweet and odorless, ready for use, makes beautiful blooms from bulbs in bowls. Bulbs planted in our Prepared Fibre do not require drainage.

Pkg. of ½ gal., postpaid 50c; Pkg. of 1 gal. postpaid 85c.

Glazed Porcelain Bulb Pans

These are glazed dull finished porcelain pans, in colors, and a very ornamental container for the growing of such bulbs as Narcissus, Hyacinths, etc., when filled with our **Prepared Fibre**.

No.	Opening	Price each
87A	5 inch	\$1.50

A WORTH WHILE GIFT

CYCLAMEN

S.N. & S. Co.

We wish to again call the attention of our patrons to our collection of these magnificent plants which are universal favorites for Winter and Spring blooming. The flowers which are of unique formation are produced in great profusion above a mass of richly mottled foliage, and range in color from pure white to pink and reds in all shades, with others tipped with red and white, etc., etc.

Their culture is of the easiest, a liberal supply of water during the growing and flowering season being one of their chief necessities. Beginning to blossom in Winter, and reaching their best during the Christmas and New Year season places them with the flower loving public on a par with the Poinsettia, in fact, its long keeping qualities is causing it to be much preferred for presentation purposes.

We are the largest producers of these wonderful plants in the Northwest, growing our own seed and having produced an unrivaled type of plant both as regards foliage markings and in size, quality and color of blossoms.

Each \$1.50 to \$3.50 by express only at purchaser's risk.

Large well balanced specimen plants—ideal for presentation purposes \$3.50 to \$5.00 each.

BEGONIAS

Flowering Varieties

We are justly proud of our fine collection of Begonias which we have listed below under the headings—Flowering Varieties and the Rex. For range of color, for beauty of leaf and for plants particularly suited for house decoration this specie cannot be excelled.

Corallina Lucerna—One of the showiest and most desirable of the Begonia family producing gigantic trusses of coral-red flowers and blooming continuously from April until November. Its leaves on the upper side are of a beautiful soft green shading to crimson on the under side.

Argenta Guttata—A white flowering Begonia with foliage of rich green, with silver markings. A delightful variety.

Rubra—Light green leaves on long stems producing trusses of deep coral blossoms on light red stems, a very free bloomer, (a Begonia that is a real Begonia).

Wellingtoniensis—or Angel Face—Dwarf leaves of a beautiful green with an overcast of silvery bloom—flowers freely—a quick grower and an exquisite house plant.

Dewdrop—Pure white flowers and very free flowering.

Luminosa—Brilliant fiery dark scarlet.

Metalica—Velvety foliage, rosy white flowers.

Thurstonii—Flowers rosy white; foliage bronzy green.

Fire Sea—Very free flowering large fiery red flower almost covering the plant. Bushy habit with foliage of a reddish green.

Albert Martin—A well known bronze leaved variety.

Pink Profusion—Slender growth with green foliage tinted brown. Rich rose flowers, in wonderful profusion, a single stem often bearing twenty-five buds and blooms.

Prima Donna—Another rose colored variety, very free flowering. Blooms are shaded to carmine at centre.

REX BEGONIAS

Lesondsii—Massive angel winged leaf, with dark green foundation, beautifully mottled in silver.

Robert George—Foundation of light silver edged with shades of light green and bronze—a beauty.

Magnifica—Immense dark green, heavy velvety foliage with the undersides of leaves a beautiful red. Cannot be beaten.

L'Enfant De Nancy—Angel winged leaves on robust stems, center and edges of leaves a dark green with the intervening space having a beautiful silver effect.

Louise Clason—Exquisite foliage of deep bronze with red and silver markings, underleaf and stems a rich red.

Rubrum—Silvery leaf with beautiful dark green veined markings, having the under portions of leaves green and red.

Walter Lamb—Large leaves with arrow-pointed edges, beautifully marked with silver, green and bronze and having an almost black center.

Mrs. Shepherd—Silvery leaves in exquisite markings having edges and veins in shades of green with the under portion of leaves of a reddish brown.

Illinois or Light Spiral—Immense leaves on strong stems having the upper and lower portions of leaves beautifully marked in silver, light and dark green and edged with red.

Bertha McGregor—Finely cut foliage with a bold solid silver zone around the edges. Under side a deep red.

Clementine—Similar to the last named but of taller growth, and smaller leaves, with less silver markings.

Each 50c and 75c
Each, postpaid 60c and 85c

GERANIUMS

The following list comprises those we have found to be the most satisfactory for winter blooming, and can be depended on to be the best of their respective classes.

DOUBLE

S. A. Nutt—A deep crimson and free bloomer.

Helen Mitchell—A clear scarlet semi-double, very large truss and florets, and beautiful lustrous green foliage. Very bushy and compact growth.

SINGLE

Yvette Frost—Rosy pink, a splendid bloom.

Mme. L. Moyot—White center, with vermillion border.

Sentinel—Dark crimson with round flowers.

Mme. P. Morian—Rosy salmon; very free bloomer.

We offer the above varieties single or double at 35c, and 50c each.

Postpaid 45c and 60c each.

TWO ESPECIALLY POPULAR GERANIUMS

Mrs. Kent—This new introduction is one of the very finest single varieties that has been introduced in recent years. Its color is a vivid crimson-scarlet, with a white eye, very large single florets and enormous trusses. It is of bushy habit and very free flowering.

Each, small plants—50c postpaid. Larger plants each 75c and \$1.00 postpaid.

Mrs. R. Glöide—A new semi-double—with bright deep pink flowers. The trusses and florets are very large, and very free flowering. A most desirable addition.

Plants of these two new varieties from 4 inch pots—\$1.00 each postpaid.

FERNS

There is no class of plant so graceful and showy, or more adapted to house decoration than the Fern. Though we are the largest growers of Ferns in the Northwest and our collection most varied, the limited space in this catalog allows us to offer but a few of the best varieties that grow well under ordinary living room conditions.

Nephrolepis Bostoniensis (Boston Fern)—Although many new varieties of Ferns have been introduced, the Boston Fern still remains the favorite. Each year the demand for this long-time favorite is increasing, especially in the larger sizes. It is conceded by all to be the most appropriate Fern used for a present, for which purpose we carry a special grade.

Plants range at 35c, 75c, \$1.50, \$2.50. Postpaid, 40c, 85c, \$1.75 and \$3.00.

Our special "Present size," \$2.50, "Specials" \$3.50, by express only.

Nephrolepis Whitmani—(New Ostrich Plume Fern)—Unquestionably a valuable Fern of its type. They are graceful beyond description, feathery, plumb and nothing describes them better than ostrich plume. Each 35c, 75c, \$1.50 and \$2.50. Each, postpaid, 40c, 85c, \$1.75 and \$2.75.

Nephrolepis Norwood—A new plumed type, very handsome, of a compact and symmetrical habit of growth. This beautiful fern is destined to become one of the most popular of the plumed forms originating from the well known Boston Fern, and is of easy house culture. A vigorous healthy grower. Each, from 4 inch pots \$1.00; from 5 inch pots \$1.50. If desired by parcel post add 25c to above prices.

Nephrolepis Verona—(New)—Very similar to N. NORWOOD—with the fronds and pinnae more finely imbricated. A valuable variety for indoor decoration. From 4 inch pots \$1.00 each, from 5 inch pots \$1.50 each. If desired by parcel post add 25c to above prices.

Pteris Victoriae—This is considered by many to be the handsomest of the variegated Pteris. The fronds are rich deep green, with the centre of the lobes beautifully variegated with silvery white. It is a vigorous and healthy grower. Each from 4 inch pots \$1.00; from 5 inch pots \$1.50. If wanted by parcel post add 25c to above prices.

Pteris Tremula—Commonly called "Lace Fern." This is one of the best known of the family, and the strongest grower, the fronds on a well developed specimen often attaining a length of three feet, of a brilliant shade of green. Succeeds well everywhere as a house plant. Each from 5 inch pots \$1.00; from 6 inch pots \$1.50. If desired by parcel post add 25c to above prices.

Asparagus Plumosa—Commonly called "The Asparagus Fern," is too well known to need description. Each 25c, 35c, and 50c; postpaid, 30c, 40c, and 60c.

Asparagus Sprengeri—Very graceful, showy and well adapted for hanging baskets. Each, 35c and 50c; postpaid, 45c and 60c.

FERNS—Continued.

Table or Fern Dish Ferns

The following list comprises some of the best varieties known for table or fern dish decoration.

Aspidium Tussimense—A general favorite—and one of the very best green foliage.

Pteris Alexandrae—A handsome variegated dwarf Pteris.

Pteris Wimsetti—A pretty crested Pteris with green foliage.

Pteris Wilsoni—Another pretty and peculiar formed green foliage Pteris.

Pteris Rivertoniana—One of the most desirable form of the crested type, with green foliage.

Pteris Mayli—A peculiar dwarf type with large pinnae and green foliage.

Any of the above varieties from 2½ inch pots 25c each, postpaid.

PRIMULA—(Primrose)

(Blooming Plants in Season—November to March)

Primula Sinensis—(Chinese Primrose)—A handsome and easily grown Primrose, in shades of red, pink and white. A very free bloomer with large flowers. Each 50c, 75c. Postpaid 60c, 80c.

Primula Stellata—The Star Primrose. A new type of very robust growth—very free flowering, and a good cut flower. In red, pink, and white.

PRIMULA MALACOIDES OR BABY PRIMROSE

We do not recall any other winter flowering greenhouse plant which has become such a general favorite in such a short space of time. *Primula Malacoides* makes a dainty addition to our house plant subjects. Its flowers are borne on long stems in great profusion and are of a delicate lilac to pale mauve in color. No lover of house plants can afford to be without a plant of this variety.

Each 50c and 75c; postpaid 60c and 85c.

PALMS

There is no class of plants that give such an air of refinement to the home as the Palm. Their bold, handsome foliage makes them ideal decorative plants. We have a large stock from which we recommend the following:

Kentia Belmoreana—This Palm is not affected by dust and the dry air of the house, and will grow and thrive where few other plants would live. Each \$1.50 to \$3.00.

Kentia Forsteriana—Very similar to the Belmoreana, but of stronger growth and heavy foliage. Each, specimen plants, \$1.50 to \$3.00.

Kentias—Young plants from three inch pots—suitable for fern dish decoration—splendid subjects for this purpose. 50c each, postpaid.

Cocos Weddelliana—A splendid and most graceful palm. Small plants are much used for center plants in fern dishes. Each from 3 inch pots 50c, postpaid 65c.

Cycas Revoluta—("Sago Palm")—A very handsome decorative plant; excellent for the home. Specimen plants, each \$2.00 and \$3.00.

Cyperus Alternifolius—("The Umbrella Palm")—Very useful as a foliage plant on account of its easy growth and novel appearance. Each 50c; postpaid 60c.

HARDY SHRUBS

It is advisable in planting any hardy shrubs in the fall in this section, to FREEZE THEM IN—that is to plant them as freezing weather is at hand, then soak them in well, allowing them to "freeze in" in the ground. As soon as they are "frozen in" the ground over the roots should be covered well with a good coat of mulch, to prevent the frozen ground about the roots thawing out before spring.

For an extended list of shrubs and small fruits see our general Spring Catalog. Copy sent free on application.

Lilacs—Bush type—Purple and White. In these we have some very fine stock which will if planted this fall and "frozen in" as above described, bloom profusely this coming spring. Each \$3.00, \$5.00, \$7.50 and \$10.00, by express, at purchaser's expense.

HARDY PERENNIALS

The following Hardy Perennials may be planted in the fall, and if well covered with mulch after the first early frosts, for protection the first winter, will well repay in early and plentiful bloom next season for the extra care. For a more extended list of Hardy Perennials suitable for this section see our General Catalog, a copy of which will be sent free on application.

PEONIES

A Field of Peonies in Bloom in our Nursery

This gorgeous kaleidoscope of color is a wonderful sight, and one that attracts a large number of visitors to our grounds yearly.

These old-time favorites are more than ever claiming the front rank of popularity. The new varieties introduced in recent years with their great variety of exquisite colors and such perfect flowers possess a striking individuality, and planted singly or in groups produce a gorgeous effect. Their only requirements are a good rich soil and a sunny position, which however, is not absolutely necessary as they thrive almost equally well in a partly shaded position. A liberal supply of water during the growing season being sufficient to give an abundance and wealth of flowers, producing a gorgeous effect not equalled by any other flower. Whenever possible, Peonies should be planted in September, to get best results.

PEONIA OFFICINALIS

This is the old-fashioned Peony and comes into bloom from ten days to two weeks ahead of the other sorts. All are strong growers, with full fragrant flowers.

***Officinalis Rosea**—Double rose.

Officinalis Rubra—Double blood red, Each \$1.00 and \$2.00; postpaid \$1.25 and \$2.25.

***Officinalis Mutabilis**—Pink changing to white.

NEWER VARIETIES

***Baron Rothschild**—Deep rose, mid-season. Long stem.

***Edulus Superbus**—Dark rose with light rose center.

Eugene Verdier—Pink, very full flower.

Felix Crousse—Brilliant red. Each \$1.00 and \$2.00; postpaid \$1.25 and \$2.25.

Ne Plus Ultra—Dark rose, very large.

***Queen Victoria**—Creamy white, early.

Humei—Deep rose, large fragrant flower.

Rosea Magna—Dark pink, lilac center.

Comata—Very dark red. Each \$1.00 and \$2.00; postpaid, \$1.25 and \$2.25.

***Festiva Maxima**—Creamy white carmine center.

***Lady Bramwell**—Silvery rose.

Each (according to size where not priced) 75c, \$1.00, \$2.00.

Each (postpaid) 85c, \$1.25, \$2.25.

We offer superb field grown clumps of the varieties marked * at \$5.00 each—by express only.

IRIS---(Fluer de Lys)

Iris

We are the most extensive growers of Iris in the Northwest, and our collection embraces only the finest varieties of the type known. Extremely valuable as cut flowers, the only rivals of the Orchids in beauty and wealth of delicate coloring, the varieties we offer would hardly be recognized as the scientifically developed descendants of the old time "yellow and purple flag." They are of easy culture, extremely hardy, and will succeed anywhere. "S" indicates the "Standards" or upper petals, and "F" the "Falls" or lower petals. **Like Peonies, Iris should be planted in September to obtain best results.**

Black Prince—(Kochi)—(S) Purple Lilac; (F) rich velvety black.

Celeste—(S & F)—Azure blue. Thirty inches.

Chalcedonica—(S) Light mauve; (F) Purple. Thirty inches.

Crimson King—(S & F) Rich crimson purple. Twenty-eight inches.

Florentina Alba—(S & F) Creamy white flushed with lavender. Very fragrant.

Khediye—(S & F) Beautiful soft lavender. Thirty inches.

Madame Chereau—(S & F) White, edge of petals frilled with blue.

Plumeri—(S) Coppery rose; (F) Velvety claret. Tall.

Purple Queen—(S & F) Large deep purple. Very early.

Queen of May—(S & F) Soft lilac or lavender pink. The nearest pink in Iris. Very beautiful.

Any of the above varieties, 20c each; postpaid, 25c.

The Collection—No. 1 of the above ten varieties—one of each for \$1.50; postpaid, \$1.75

Darius—(S) Rich canary yellow; (F) Lilac margined with white. Twenty-four inches. Very choice.

Gypsy Queen—(S) Old Gold shaded with pearl; (F) Black maroon, reticulated with light yellow. Late, twenty-four inches.

Her Majesty—(S) Lovely rose pink; (F) Bright crimson tinted with a brighter shade. A most beautiful variety.

Lady Jane—(S) Coppery rose; (F) Madder red, netted with white, a rare color in Iris.

Pallida Dalmatico—(S) Lavender; (F) Clear deep lavender. Flowers extra large and fine, one of the best.

Any of the above five varieties, 25c each; postpaid 30c.

The Collection—No. 2 of the five varieties—one of each for \$1.00; postpaid \$1.25

NEWER VARIETIES

Catrina—(S) A lavender clear light blue; (F) Lilac blue. Tall, with branching stems. Forty-eight inches, a new variety and scarce. Each 50c; postpaid, 60c.

Dr. Bernice—(S) Coppery bronze; (F) Rich velvety crimson. Very large blooms and very beautiful. Scarce. Each, 50c; postpaid 60c.

Iris King—(True)—(S) Coppery yellow; (F) Crimson bordered with yellow. A very large flower and scarce. Twenty-four inches. Each, 50c; postpaid, 60c.

ANCHUSA ITALICA

Dropmore Variety—Very free flowering plants of a branching habit, with flowers of a gentian blue, and very attractive. Almost continuous bloomer in this section after June. 3 feet. Each, 20c; postpaid, 25c. Per dozen, \$2.00; postpaid, \$2.25.

Shasta Daisies

The SHASTA DAISY is a great favorite in this section, blooming profusely with its large Daisy-like flowers. No bed of hardy perennials or hardy garden is complete without this easily grown flower. Each 20c; postpaid 25c. Large clumps, extra fine, each \$2.50.

GYPHOPHILA

Gypsophila—(Baby's Breath.)

The Gypsophila with their attractively arranged masses of minute flowers should be in every garden. If cut and dried will retain its beauty for months, providing decorative material of the very best.

Paniculata—The popular old-time Gypsophila, much admired for its feathery appearance.

Each 20c; postpaid, 25c; per doz. \$2.00; postpaid \$2.25.

HARDY PERENNIAL. PHLOX

Upper centre—Drago; Centre—P. G. Von Lassburg; Lower Centre—Bouquet de Fleurs; Left—Vesuvius; Right—De Miribel

This is one of the hardy perennials in which we have been selecting and specializing for several years, until we have secured a collection that has no equal in the Northwest, well tested for hardiness, beauty of bloom and free flowering proclivities. The large beds of these—in the open field—are the admiration of every visitor to our nurseries in their season, and until the early frosts prevented their blooming longer, were a kalidescope of wonderful color.

P. G. Von Lassburg—The purest and largest white known.
Geo. A. Stroheim—Bright scarlet with crimson red eye.
Edmund Rostand—Reddish violet, shading brighter toward the center of petals.

Siebold—Bright scarlet and one of the very best of its class.
Vesuvius—Red with bright purple eye. Quite showy.
Von Hochberg—The finest crimson.
Elizabeth Campbell—Very bright salmon pink with dark red eye.
Pantheon—Bright carmine rose.
R. P. Struthers—Bright rosy carmine, with claret red eye.
De Miribel—White suffused with rosy scarlet; crimson eye.
Bouquet de Fleurs—White with a cherry eye.
Hyon—Rich deep red.
Miss Lingard—A grand early dwarf white variety.
Drago—Light red with dark eye.
Elegantissima—A large flowered early white.
Verdi—A beautiful rosy-pink.

Each, 20c; postpaid, 25c. Per doz. \$2.00; postpaid, \$2.25.
 Large three-year-old clumps from the open field, each, \$2.50; postpaid, \$3.00.

HOLLYHOCKS

Our careful and scientific selection has resulted in the production of an unequalled strain of this magnificent plant in the best shades of color known, with colossal spikes of bloom, lasting and blooming until frosts put a check on their wonderful vitality and growth. Used as individuals well back in the hardy border, or dotted here and there amongst a bed of hardy shrubs, which they brighten with their brilliant spikes of gorgeous color after the shrubs are through flowering for the season, or as a hedge at the rear of a bed of hardy perennials they cannot be surpassed. The strain we offer must be seen to be appreciated, with flowers whose petals seem as if made of the finest China Silk. Give them a well fertilized soil with well rotted manure, deeply spaded, sufficient drainage, a plentiful supply of water in the growing season, and success is assured in any location. Their enormous sale every season proves their popularity.

DOUBLE WHITE	DOUBLE PINK
DOUBLE DEEP ROSE	DOUBLE BLOOD RED
DOUBLE CRIMSON	DOUBLE SALMON
DOUBLE MAROON	DOUBLE YELLOW

Each, 25c; postpaid, 30c; doz. \$2.50; postpaid, \$3.00.

STATICE

(Giant Sea Lavender) (Limonium)

S. Latifolium—A noble plant for hardy border. Producing clumps of feather-like leaves, with heads of bloom which frequently measure 24 inches across, covered with small flowers and lasting until frost. The flower sprays when cut and allowed to dry will keep in almost their fresh cut appearance for months. We cannot recommend this valuable hardy perennial too highly, not only for its appearance in the hardy border, but also for its wonderful keeping and decorative qualities when cut and dried.
 Each, 25c; postpaid, 30c; per doz. \$2.50; postpaid \$2.75.

S. Sinuata—Another splendid variety, with purple flowers, larger than those of *S. Latifolia*, and also a splendid subject for cutting and drying for decorative purposes in winter.
 Each, 25c; postpaid, 30c; per doz. \$2.50; postpaid \$2.75.

EVERBLOOMING SWEET WILLIAM

D. Latifolius Atracoccineus—(Everblooming Hybrid Sweet William.) A beautiful summer bedding variety producing masses of brilliant fiery crimson flowers throughout the entire season. Each, 20c, postpaid, 25c; per doz. \$2.00, postpaid \$2.25.

Lychnis Chalcedonica (Ragged Robin)

L. Chalcedonica—Produces Brilliant scarlet flowers on long stems during June, July and August. Each, 20c, postpaid 25c; per doz. \$2.00, postpaid, \$2.25.

POPPIES

The Perennial Poppies with their rich and brilliant colors make a dazzling effect during the summer months, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position. They are of the easiest culture, almost any kind of soil suits them, but they do best in a deep rich loam. Give them water occasionally during dry weather and they will increase in size and floriferousness for several years.

Oriental King—Large size, rich crimson.

Princess Victoria Louise—Salmon pink.

Goliath—A large flowered bright scarlet of strong growth. Each, 25c, postpaid, 30c; per doz. \$2.50, postpaid, \$2.75.

Oriental Poppy

ICELAND POPPIES

Perennial Poppies are particularly useful, for their gorgeous colorings come to the help of the garden just at the period when the Spring flowers are waning and before the Summer varieties are at their best. The plants have a graceful and neat formation and the blossoms are useful for cutting for which purpose pick when in bud. If the seed pods are picked off the plants will continue in flower the entire season. We offer the noted Sunbeam variety of European origin, in colors lemon, white, deep orange, from 3 inch pots at 25c postpaid.

FIELD SEED DEPARTMENT

OUR FOREWORD in our spring catalog pointed out that we believed Montana was about to experience one of her best years. From observations and details to hand at this writing everything points to those words being fulfilled—practically every section with one or two scattered exceptions reporting crop conditions as being far above normal and some sections as having the best crops in the State's history—Naturally we are very vitally interested in these conditions and results, and as our business is one that enters very closely into the State's welfare we are doing our utmost to keep our customers and friends in tune with conditions so that they may reap the benefit to which they are entitled.

Our main object in issuing this Fall catalog—which contains items particularly adaptable to Fall planting—is to encourage farmers and others to take advantage of this particular season, as it not only relieves the general Spring rush but has many advantages for special crops over Spring planting.

The early ripening and maturing of crops generally is going to give the farmer a longer season for Fall work, hence we anticipate a big demand for Winter Wheat and Fall Rye in grain, and an additional demand for Alfalfa, Clover, and pasture grasses. We therefore suggest that you place your orders early and that you get your hand to the plow at the earliest possible opportunity. The greater the amount of work accomplished this Fall the bigger your bank account will be in 1926.

A cordial invitation is extended to all our customers and friends to inspect not only our up-to-date seed warehouse and machinery at the G. N. depot, and our store on Fuller Ave., but also our large nurseries and greenhouses situated at the Broadwater car line terminal. A visit to the city is not complete unless you include all the above in your itinerary together with an inspection of our trial grounds which are of special value to every rancher, farmer, and gardener living in the great Northwest. We believe in the old adage that the "proof of the pudding is in the eating"—and right here we have unparalleled opportunity not equalled by any other nursery for testing for germination and hardiness all varieties of seeds, nursery stock, shrubs, etc., particularly suited to our rigorous climatic conditions.

At the Great Northern Depot is situated our new and commodious fireproof seed warehouse to which we have previously alluded. It is four stories high and has a floor space of about 20,000 square feet. This building is devoted entirely to field seeds, poultry and dairy feeds. Here we have ample facilities for the efficient handling of large quantities of seeds by the most modern machinery, equipped with electric motor-driven power for cleaning, recleaning, and grading all our stocks, which without exaggeration are second to none in the country.

In conclusion we again wish to emphasize the advisability of Fall plowing and Fall seeding for results, for our progress depends entirely on the amount of prosperity enjoyed by the farmer.

CLOVERS

Medium Red Clover

Medium Red, "Peerless"—Looking to the future, no time should be lost in introducing the bacilli of the Red and Alfalfa Clovers. The use of nitro cultures may tend to hasten their establishment, but nature's way, and the best way, is to use a small quantity of seed, say a pound or two of Red and Alfalfa Clover to the acre with whatever crop you are seedling. After a little you have a prized bacilli in your land, then you may safely call your farm doubled in value from a producing standpoint. Red Clover is regarded as the most important of the whole genus for practical agriculture; valuable not only for forage but also a fertilizer for the soil. Long, powerful tap-roots which in decaying add largely to that black mass of matter we call soil.

Medium Red, "Placer"—An exceedingly good second grade seed. **Mammoth Red, "Peerless"**—This variety of clover matures about two weeks later than the ordinary red clover, and will produce a heavier yield per acre than any other variety. It is also better adapted to poor sandy soil than other sorts. Alsike included. On account of its vigorous heavy growth, it should be cut for hay before the bloom fully matures, otherwise the heavy growth will have a tendency to become woody. It is by far the best variety known where clover is desired for a hog pasture.

Alsike or Swedish "Peerless"—This Clover originally came from the Little Province of Alsike in Sweden. One of the hardest varieties known, is perennial and does not winter kill; stands alike drouth or wet. We know of many who have used Alsike Clover to sow in boggy land, making this land produce a crop or pasturage and at the same time enabling it to be driven over as the mass of roots make a heavy sod. Favorite with bee keepers. Flowers with sweet agreeable odor.

Alsike or Swedish "Placer"—Second only to our "Peerless" grade. We anticipate a big demand as the price is very low.

White Dutch—Excellent for pasture and when mixed with Kentucky Blue Grass, makes the finest and most nutritious food for sheep and cows, used universally for lawns in the Northern section of the United States. Sow 5 to 8 pounds to the acre alone for pasture; for lawn, 1 lb. to 400 square feet.

SWEET CLOVER

WHITE BLOSSOM SWEET CLOVER

Sweet White Blossom "Peerless"—Thoroughly cleaned, brightest color seed of the highest grade, its purity being 99% or better. None better anywhere at any price. Samples with quotations on any quantity cheerfully furnished.

Sweet White Blossom "Placer"—Second only to our "Peerless" grade and running 98% pure or better. Don't overlook the fact that Sweet Clover should hold a very important place in your crop rotation.

Sweet White Blossom "Quartz"—This grade will run 90% or better purity and contains some unhulled seed. The run of seed is a little smaller than the higher grades, but does not, as many think, require more pounds per acre, as it contains more seeds per pound.

YELLOW BLOSSOM SWEET CLOVER

Sweet Yellow Blossom "Peerless"—The growth of the plant is somewhat different. It has a more spreading habit of growth. Its production in hay is not equal to the White Blossom, but is preferred by some for Pasture on account of its recovery in growth when closely pastured. Most of our demand for yellow comes from dairymen who seem to have a preference for the variety, claiming they can get more pasturage.

Sweet Yellow Blossom "Placer"—A good grade of seed, but containing some unhulled seed.

CYCLONE...The World's Standard Seed Sower

CAN SOW Fifty acres in a ten-hour day—seeded evenly, thoroughly and easily. That's what you can do with a Cyclone Seeder. Use it with any seeds that can be sown broadcast or with ground bone, ashes or fertilizer—a Cyclone will pay for itself in three hours' work. Because its absolutely even distribution will make three bushels to the work of four. Each \$2.50, postpaid \$2.65.

THE SOWER THAT SATISFIES

WINTER WHEAT

Winter Wheat—Turkey Red—We offer a true strain of the **Old Reliable Turkey Red**. The Farmers' and Millers' Friend. Can Supply one Bushel or a Car Load.

Winter Wheat—Kanred—This variety was introduced by the Kansas Experiment Station. It being a selection of the hardiest Prolific Turkey Red. It is classed as a high grade milling variety and highly recommended by millers. In a three year test the Montana Experiment Station reports a yield of 17.8-10 bushels per acre.

FALL RYE

Fall Rye—Amber—Winter Rye is much hardier than Wheat and can be grown in a greater variety of soils. It will thrive in dry seasons and on light sandy loam. It is grown for grain, fodder, soiling purposes and green manure. Sow Aug. 20th to Sept. 15th—1½ bu. per acre if for grain, and 1½ to 2 bu. per acre for Fall pasture. If drilled 2 to 2½ in. deep there will be less danger of Winter Killing. Our seed is selected, graded, and thoroughly cleaned.

FALL RYE—"Rosen"—Rye cross-breeds like corn. In this respect it differs from wheat, which will not cross fertilize if two or more kinds are grown together for years. To keep a pure rye pure, it should be grown away from a common crop, like you must grow yellow corn distant from white corn.

Farmers who have grown rye know that 15 to 20 bushels per acre is about what they can expect. Such farmers, who changed to the Rosen Rye, are now getting 25 to 30 bushels, and 10 to 50 bushel yields are not very uncommon.

FIELD SEEDS

Prices on seeds listed below are based on present stocks. All prices quoted **NOT** under pp. (postpaid) will be forwarded at purchaser's expense by express or freight.

FARMOGERM

Montana Hardy Alfalfa Seed

is today acknowledged to be without a peer. Experiment Stations of several State Agricultural Colleges, bear out in every case the final superiority of Montana seed, for hardiness, vitality and productiveness. Located as we are, in the heart of the Rockies, we have facilities for the selection and acquisition of the highest grades of Alfalfa for the Northwestern Country that are not equaled by any other house, and our customers may rely on the assertion that seed secured from us is of the hardest and best obtainable quality in the grade in which we class it.

Registered Grimm Alfalfa

Grimm Alfalfa as it is generally called, was first grown by Wendelin Grimm, at a point in Minnesota. The wonderful advance made by this type over the ordinary Alfalfa led to its being subjected to the most severe tests by the Agricultural Colleges and others. Our Registered Grimm has been grown under the supervision of the Montana State College and Montana Seed Growers Association for years, and is harvested, threshed and sealed under the care of their representative.

True Grimm Alfalfa has been so well advertised and described that any attempt at further praise would be superfluous. In every respect it has proved itself a most wonderful variety or type, and its reputation has been so well established that the true registered and sealed seed always commands a high price. Our stock of Grimm is the best that can be procured at any price, grown from the original stock, fully registered, inspected, tested and sealed under the most stringent regulations to protect consumer.

FREE—Pamphlet on Registered Grimm for the asking.

We have discontinued the offering of so-called Certified or Affidavit Grimm as this seed is not eligible for registration nor can seed from it be registered by the Montana Seed Growers Association. If you ever intend to raise Grimm for seed play safe and buy only registered stock.

Our Registered Grimm Alfalfa seed is classified as No. 1 with purity of 99.5% or better by the Montana Seed Growers Association.

BLUE GRASS

Kentucky "Peerless"—We wish to call particular attention to the cleanliness of our Blue Grass. The seed we offer is strictly reliable in every respect, is extra fancy new crop and we guarantee its Germination.

Kentucky "Placer" Grade—Used extensively for lawns and street parkings, also makes excellent pasture hay. Should be used extensively this season in all pasture mixtures at the low prices quoted.

BROME GRASS

Bromus Inermis—A wonderful drouth resister. A grass for the stock raiser. All cattle like it. Will drive out Russian Thistle, also Black Mustard. Drouth defying, frost resisting. Yields enormous crops of splendid hay and affords early and abundant pasturage. We have seen some very fine crops of Brome Grass and Alfalfa mixed, which makes an excellent hay for horses and cattle. Try it. These both mature and cure at the same time. Our peerless grade of this magnificent grass is unequaled for purity and high germination, and less seed is required to the acre than any other grade. From good seed, good crops grow.

MEADOW FESCUE

Also known as English Blue Grass. Produces a large amount of seed of good quality all through the season. Is one of the earliest of spring grasses and persists latest. Does not freeze out or winter kill. Very desirable for use in meadow and pasture mixtures. Livestock relish it highly. 18 to 22 lbs. of seed are sown to the acre.

Grass Mixture For Permanent Pastures

Though many farmers so rotate their crops that permanency is not of great consideration, there are always locations that must remain permanent meadows. It is a known fact that failure is practically impossible when a mixture of grasses is sown. These mixtures are composed of grasses that give a succession of rich pasturage from early Spring to late Fall.

The following mixture has proven to be well adapted to Montana soil and conditions:

- 4 lbs. Brome Grass.
- 4 lbs. Orchard Grass.
- 3 lbs. Timothy.
- 3 lbs. Kentucky Blue Grass.
- 3 lbs. Clover, Medium Red.
- 3 lbs. Alfalfa.
- 2 lbs. Clover, Alsike.

22 lbs. will sow 1 acre.

TIMOTHY

Timothy

As a crop for hay, Timothy is probably unsurpassed by any other grass. It is greatly relished by all kinds of stock, especially horses. It yields more nutritive matter than any other grass or forage plant. It is not suited for a permanent pasture, as it will in the course of a few years, run out. It is, however, well adapted to early spring grazing, as it starts up quickly in the spring and in favorable weather can be pastured in the autumn as well. The largest crops of hay are raised on rich land. It is not suited for light, sandy soil as well as some other grasses.

"Peerless"—Thoroughly cleaned. Brightest seed, showing a purity of 99 per cent or better.

"Placer"—This grade, like the above, is the plump native grown seed, unequaled by the stocks of most eastern firms. If you use large lots write for special price, stating quantity you expect to use.

Alsike Clover and Timothy Mixed—Where Alsike Clover and Timothy are grown together, and the seed is saved therefrom, it is impossible in cleaning to make a complete separation of the two. On this account we purchase the seed for less money and we can sell it for less money than would be the case if a perfect separation could be made. Those desiring to sow Alsike and Timothy together can save considerable money by buying the seed of these two varieties together as originally harvested. This makes a splendid mixture for hay or pasture, with just enough Alsike Clover to make splendid hay for horses or dairy cows, carrying about 20 per cent of clover.

SLENDER WHEAT GRASS

Or Western Rye Grass—This is a valuable native grass, very hardy and makes good hay. Much valued for crop rotation. Seed about 20 lbs. to the acre, and do not cover too deeply. Some growers advise the mixture of Red Clover with this grass and for hay this assures easier handling in harvesting. It has proven a valuable crop in Montana and also in Northwestern Canada. This is frequently called Blue Joint by farmers, and resembles it somewhat.

ORCHARD GRASS

"Peerless"—A valuable grass for pasture or hay land, and on account of its earliness is very valuable for permanent pasture. It furnishes early green grass in the spring and until late in the fall. When closely cropped it grows up very quickly and is ready for grazing again in ten to twelve days. When grown for hay sometimes two crops can be obtained in one season, and when one crop is cut the aftergrowth is very heavy and gives splendid and rich pasture till late in the fall. It will stand drouth and is hardy. It grows in tufts, and is therefore best sown with red clover, rye grass, etc. It is well suited for shady places, such as orchards and groves.

PERENNIAL RYE GRASS

The life of this grass is from two to five years and is a very valuable grass to use in meadow mixtures as, on account of its rapid growth, it assists in making a longer pasturing season. When used alone for a Hay crop it will, when seeded at the rate of about 50 lbs. per acre, produce from 2 to 2½ tons per acre. We do not recommend this as a dry land crop as its root system is not deep enough for this purpose.

PRATT'S

POULTRY AND ANIMAL REMEDIES AND SUPPLIES

WE CARRY A COMPLETE LINE OF POULTRY REMEDIES, ETC., WHICH ARE ABSOLUTELY THE BEST THAT EXPERIENCE CAN SUGGEST OR MONEY CAN BUY. IT WILL PAY YOU TO BUY THEM.

PRATT'S POULTRY REGULATOR AND EGG PRODUCER

"Helps Make Hens Lay"

Contains all the necessary elements in accurate and scientific proportions that hens need for egg making. It builds up vitality and stimulates egg production. Poultry Regulator is used by the most successful poultry raisers everywhere. Perfectly pure and free from harmful substance. Price 20 oz. 30c; 4 lbs. 65c; 12 lb. sack, \$1.65; 25 lb. sack, \$3.00.

NOTICE—If wanted by mail add postage.

PRATT'S LICE KILLER POWDER

One of the most perfect lice killers especially valuable for use on young chicks and sitting hens. It rids horses, cattle, hogs, dogs and cats of lice, also ticks on sheep. It is thoroughly effective as a destroyer of vermin and absolutely harmless to the chick.

Price, 1 lb., 30c, postpaid, 35c; 2½ lbs., 60c; postpaid, 70c.

PRATT'S HEAD LICE OINTMENT

Thousands of little chicks are killed each year by head lice. Pratt's Head Lice Ointment is a carefully prepared non-poisonous article and is instant death to the murderous lice, while it is absolutely harmless to the little chick. Price, box 35c, postpaid.

SPECIAL COMPOUND FOR CHOLERA

Cholera creates a continuous and violent desire for water. For the treatment of cholera, indigestion, bowel trouble, and all kindred troubles in chicks or grown fowls this remedy is excellent. As cholera is very contagious, Cholera Remedy should be kept on hand by every one who raises little chicks.

Price 25c; Large Size 50c, postpaid.

PRATT'S HEALING OINTMENT

Injuries of any kind are healed naturally and permanently, and pain quickly relieved by applying Pratt's Healing Ointment. Sores, cuts, scratches, wounds, burns, barbwire cuts, as well as skin eruptions, eczema and itching are quickly cured. Corns, harness and saddle galls disappear in short order. You should have this ointment handy at all times. Price, tubes 30c postpaid.

PRATT'S CONDITION TABLETS

An easy and effective remedy for "run-down" birds. Keeps show birds in condition and prevents colds, roup and liver trouble. Price, 25c, postpaid.

NOTICE

We handle and make up a FULL LINE OF POULTRY FEEDS including Pratt's and Blatchford's Products. If Interested Send for Price List.

WHITE DIARRHOEA REMEDY

"The Baby Chick Life Saver"

This is one of the greatest chick life savers ever put on the market. Thousands and thousands of little chicks die each year from the fatal white diarrhoea. It carries off from 60 to 75 per cent of all chicks hatched. Pratt's White Diarrhoea Remedy in the drinking water kills the specific organism which cause the disease, and saves the hatch. Used as a preventative when hens are laying, because it will prevent this deadly organism from developing in the egg. If a hen is used for hatching give her Pratt's White Diarrhoea Remedy in the drinking water so there will be no chance of infection from droppings. This is preventative treatment.

Price 25c, large size 50c, postpaid.

PRATT'S ROUP REMEDY

This wonderful remedy is used in every civilized country in the world. The reason is it cures. It is for fowls that sneeze, gasp and wheeze, also for those having a watery discharge from the nostrils and eyes. It prevents colds and is excellent for turkeys. Pratt's Roup Remedy will save your fowls and make them profitable. In powder or tablet form.

Price, 25c; large size 50c, postpaid.

PRATT'S SCALY LEG OINTMENT

This disease is caused by a parasite working underneath the scales of the feet and legs, often making it difficult for the bird to walk. Scaly leg is contagious, and while not fatal, is injurious to the bird and its sale value as well as its usefulness. It is simple to apply and is guaranteed to cure. It is also excellent as a dressing for the feet and legs of show birds, increasing their "point" value and putting them in the very best possible condition as prize winners. Price 35c, postpaid.

PRATT'S RED MITE SPECIAL

Is the most powerful liquid lice killer and mite destroyer ever put on the market. Painted and sprayed around the poultry house according to directions it will keep it free of these blood-sucking pests. Economical, powerful, non-poisonous, safe, sure and guaranteed. Few liquid lice killers are effective against red mites, ticks, fleas, etc. Pratt's Red Mite Special knocks them all. Quart 70c.

PRATT'S ANIMAL WORM POWDER

Is a special preparation for the destruction of all kinds of worms in horses, cows, hogs and sheep. It is purely vegetable and is unquestionably the quickest, surest and most thorough worm destroyer procurable. Price, pkg., 50c, postpaid.

PRATT'S POULTRY WORM POWDER

For use in the treatment of Round Worms, Tape Worms, and other Intestinal Worms of Poultry. Thousands of chickens, young and old, are lost annually through the ravages of worms. One chicken saved will pay for sufficient powder to treat a large flock. Powerful, efficient, easy to use. Price 25c, large size 50c, postpaid.

PRATT'S COW TONIC

Cow tonic increases the milk supply and makes it rich in butter fat. Cow tonic enables the cow to turn more of the feed into milk and keep up the full flow for a much longer period. It is a positive remedy for scours. A wonderful all round tonic. Price, 2 lbs. 65c, postpaid 75c.

PRATT'S BUTTER-MILK BABY CHICK FOOD

PRATT'S BUTTER-MILK GROWING MASH

Liquids Cannot be Sent by Parcel Post.

PLANT FOODS AND FERTILIZERS

EXCELSIOR PLANT FOOD—The original odorless house plant food. Producing vigorous healthy growth. Endorsed by the leading horticulturists, private and market gardeners, and park superintendents.

5 oz., pkg., 25c; postpaid, 30c.
12 oz., pkg., 50c; postpaid, 55c.

BONE MEAL

A well known fertilizer, for all purposes, safe and effective. 1 lb. 10c; postpaid 15c; 10 lbs., 65c; postpaid 85c; by express or freight, 100 lbs. \$4.25.

"FEARLESS BRAND"

SHEEP MANURE—Pulverized

The Best Fertilizer for the Lawn and Garden

As a spring or fall top-dressing for lawns, it is the best that can be procured. No offensive odor, and no unsightly chunks to rake off. The first shower or watering carries the soluble particles down to the roots, and rapidly produces a most luxuriant growth. SHEEP MANURE is the very best for securing rapid growth and adds humus to light soils.

Can also be used as liquid manure, in water. For general use apply 50 lbs. to every 100 square feet. 600 to 800 lbs. per acre for lawns. For general field and garden use—1 Ton per acre.

100 lb. sack \$2.00; 25 lbs. sack 90c.

Price F. O. B. Helena, by express or freight.

We also carry the above brand of sheep manure put up in small packages for the benefit of our customers who have only a few house plants. The fertilizer has been specially treated and rendered practically odorless. Each package contains full directions for use.

2 lb. package 25c, postpaid 37c; 5 lb. package 50c, postpaid 68c.

For larger quantities write for special prices.

STIM-U-PLANT

PLANT STIMULANT TABLET

Trade Mark Registered U. S. Patent Office

THE MAGIC FERTILIZER IN TABLET FORM

GLORIOUS GARDENS—PERFECT HOUSE PLANTS

The most modern, efficient and scientific method of fertilizing growing plants.

As every kind of plant grows in the garden, orchard, and farm, feed it along with Stim-U-plantT tablets. These tablets contain highly concentrated, immediately available forms of plant food for use in stimulating fruit, flower, vegetable, and ornamental plants, and may be used in liquid or tablet form.

They increase production, hasten maturity, improve quality and better the color of the plants and products. Their use is highly profitable, for all these benefits cost only a fraction of a cent for each application.

Once in the soil they immediately dissolve and mingle with the soil-water, pass into the root hairs and roots to begin feeding the plants. No matter how fertile the soil may be, Stim-U-plantT is effective in feeding the crops because of its rich, available food content. Full directions on every package.

Small size, 30 tablets\$.25; Postpaid \$.30
Medium size, 100 tablets75; Postpaid .80
Large size, 1,000 tablets 3.50; Postpaid 3.65

CEL-O-GLASS

CEL-O-GLASS is a new, unbreakable glass. It is the most economical and practical glazing material on the market. It replaces ordinary, fragile, costly glass for nearly every purpose.

You can cut CEL-O-GLASS with ordinary scissors to fit any space or opening. A hammer and a box of ordinary galvanized staples are the only tools necessary to put up CEL-O-GLASS any where. Tack it on as you would mosquito netting. No putty or glazing points needed.

CEL-O-GLASS weighs about one-seventh of a pound per square foot. A complete roll of 300 square feet, packed for shipment, weighs forty-four pounds. It is sold by the square foot, in rolls one yard wide. CEL-O-GLASS may be obtained in any length up to 100 feet (300 sq. ft.)

Some of its commonest applications follow:

Hotbed and coldframe sash; Plant protectors; Windows and fronts for poultry houses, brooders and scratch pens, etc; Windows and doors for barns, dairy houses and outbuildings; garage doors and windows; office and factory partitions; contractors' shacks; electric signs, color screens, lamp shades, etc.; emergency repairs everywhere.

CEL-O-GLASS lets in practically as much light as clear glass. It spreads the light evenly so that there are no dark shadows anywhere. It breaks up the direct sun rays and diffuses the light and for this reason variation in temperature is reduced to a minimum.

20c per square foot. 17½c per square foot by the roll of 100 yards by 3 feet wide.

FLY CHASER

(New Improved)

Why let your animals suffer needless torment from flies all summer long. Your cows waste time when standing in the pond or rushing through the underbrush trying to escape the constant torture of flies, mosquitoes and other winged pests. Your horses will do more work when relieved from fighting flies and save your time and trouble. Fly chaser does not injure hair or animal when used as directed. Fly Chaser should be used in every stable and every barn. Price—½ gal. \$1.10; 1 gal. \$1.85.

Liquids Cannot be Sent by Parcel Post

PANSIES

We have found that for good strong plants that produce blossoms weeks ahead of spring sown seed, pansy seed should be sown in the fall. The advantage of an early start showed its benefits in blossoms extremely rich in color. The list below includes some of the most choice varieties.

Adonis—(New)—Blues and lavender shades.
Beaconsfield—(New)—Bluish purple lavender tinge.
Bronze Mastodon—Light and dark shades of bronze.
Black Mastodon—Of immense size, satiny jet black.
Grand Duke Michel—(Improved Candidissima)—Largest white.
Madame Perrett—Contrasting colors, beautifully frilled.
Madame Steele—(Elks Purple)—Very attractive shade.
Mlle Irene—(New)—Henna or tango red, an entirely new shade, a really beautiful pansy.
Panama Pacific—Huge deep yellow, many with a dark eye.
Prince Henry—Finest dark blue known.
Parisian Yellow—A pure yellow of fine form and size.
White Mastodon (with dark eye)—One of the largest known.
Pansy Fine Mixedpkt. 5c; ¼ oz. \$.50
S. N. & S. Co.'s Peerless Mixedpkt. 10c; ½ oz. 1.25
S. N. & S. Co.'s Premium Mixedpkt. 20c; ½ oz. 1.50
Any of the above varieties, not including **Mlle Irene**, 10c per pkt.
Mlle Irene—Henna or Tango Red pkt.20c

Whitepkt. 15c; ½ oz. 50c; oz. 90c
Pinkpkt. 15c; ½ oz. 40c; oz. 75c
Mixedpkt. 10c; ½ oz. 35c; oz. 65c

Wild Cucumber—This is a useful climber where a rapid and vigorous growth of vine is desired. Sow late in fall. Usually the plants are produced from year to year by self sown seed.
Hardy annual. Pkt. 5c; oz. 25c; ¼ lb. 75c, postpaid.

SWEET PEAS

For Fall Planting

For the past two seasons we planted Sweet Peas late in the fall outdoors after the ground was frozen (about Nov. 10th at our trial grounds and had wonderful success. They had the advantage of getting an early start in the spring and produced large blooms of exceedingly rich colors, blooming weeks ahead of those planted in the spring. We suggest you try this method and recommend the following varieties: White, cream, deep pink, light pink, cream pink, salmon blush, rose, orange, orange scarlet, scarlet, crimson cerise, lavender, blue, mauve, purple, maroon. Pkt., 10c; oz. 40c; ¼ lb. \$1.20.

Spencer Mixed, ½ oz., 20c; oz. 35c; ¼ lb. 90c; ½ lb. \$1.55; lb. \$3.00.

ONION SETS—PLANT NOW

Egyptian Winter—or Perennial—These sets are usually planted in the fall, being hardy everywhere. They never form large bulbs but produce small green onions weeks before any other sort. They are unsurpassed in sweetness and tenderness. The sets are produced on the top of the stalks.
1 lb. 25c, postpaid, 30c; 5 lbs. \$1.20, postpaid, \$1.35.

RHUBARB (Pieplant)

33 to 100 ft. of row. 5,000 to acre. 5 ft. x 3 ft.

Requires a deeply cultivated and thoroughly manured soil—the more the manure the better the stalks.

Very easily grown and becoming yearly in greater demand. No housewife can afford to be without it. Our MONARCH strain is not surpassed by any for its fine grain, its early propensity and delicious flavor. Excellent for pies and sauces and of great value for canning for winter use.

Rhubarb can be cured for winter use by cutting the stalks into small pieces; stringing them and exposing to the sun until perfectly dry. Keep in a dry place.
