4 to 5 feet, each.....	1.00
5 to 6 feet, each.....	1.50
6 to 7 feet, each.....	2.00

The demand for these wonderful new plums is almost beyond belief, and as the supply is very limited, orders must be in early to insure getting sorts desired. (*) Sorts in Postpaid size only.

- ✓ ***ELLIOT** (No. 8)—Very hardy; strong grower; productive annual bearer. Good size and quality, firm; small pit, clingstone; bright red. Excellent medium season market plum. Season September 1st.
- ✓ ***WACONIA** (10)—Hardy, vigorous; very productive; large, late, firm, pointed, clingstone, red.
- ✓ **RED WING** (12)—Very large midseason, freestone, high quality; peels freely, firm, good color and regular bearer.
- ✓ **TONKA** (21)—Very hardy, productive and dependable. Firm, good quality, nearly freestone. Ideal, early market variety. Season Aug. 15.
- ✓ **WINONA** (30)—Hardy, vigorous and regular; large, round, red; semi-clingstone; high quality, firm; September 1st.
- ✓ **MONITOR** (70)—Very vigorous, productive, regular; large dark red, firm, good quality market plum; late.
- NO. 76**—Very large plum similar to Red Wing but hardier.
- NO. 56, 83, 85 and 92** are Japanese x Nigra crosses. Very hardy, vigorous, extra early; particularly promising for the North; good quality, large, not subject to plum pocket. Early August.
- ✓ **UNDERWOOD** (91)—Very hardy, vigorous and regular; large, early, juicy, good quality, hangs well and ripens over a long period. August 1st to 15th.
- ✓ **La CRESCENT** (109) also 105 and 111—These are **YELLOW**, of excellent quality, large and very promising.

Zumbra Cherry

ZUMBRA CHERRY—Sand cherry hybrid of the Opat type; extremely productive (but needs pollenization). The only hardy cherry having texture and flavor like the sweet cherry; small free pit; quality good when fully ripe; excellent canning fruit. Color black with green flesh, hangs well, long season and very free from disease. For home use and commercially the Zumbra will not disappoint, as we consider it one of the most promising fruits sent out by our Fruit Breeding Farm.

***ST. ANTHONY (145)**—Cherry Hybrid similar to Sapa but much hardier and fully as vigorous as Opat. Fruit black, purple flesh; quality good when fully ripe and excellent for canning. As a pollenizer for the Zumbra (which blooms late) we suggest planting a few of these nearby.

***FOLWELL APPLE (237)** — Malinda seedling; very vigorous tree; large yellow with red cheek; pleasant sub-acid; keeps longer than Wealthy. A few 1 year trees top-worked on Hibernal at \$1.00 each, **postpaid**.

***LORING PRIZE PLUM**—Very vigorous, moderately hardy; of largest size and excellent quality. A very promising plum and should be given a trial.

***STELLA**—Hardy, vigorous and a regular annual bearer; large, semi-clingstone, very firm, dark red, excellent market variety. Season Sept. 1st.
