1926 BULBS TO PLANT IN THE FALL 1926

Lock Box 35 JOSEPH BANCROFT & SON Cedar Falls, Iowa

Darwin Tulips

SEND BULBS TO YOUR FRIENDS—

As a gift, nothing will give them more pleasure, as they are permanent and lasting.

Time of Delivery

Practically all Dutch and French bulbs will be ready this year during September and early in October. All import regulations are now off so there will be no delay in shipping. Bulbs this year will reach here in plenty of time to plant out before freezing weather.

WHEN TO ORDER. It is best to order promptly on receipt of this list, but they may be planted outside any time up to freezing weather. Practically all the bulbs in this list are ready in October, some of them before.

QUALITY OF OUR BULBS. Our bulbs are the best we can buy—the same as we use ourselves for forcing and must not be compared with stock bought to sell cheap.

OUR PRICES are as low as this grade of bulbs can be sold. Labor conditions in Europe are such that our bulbs cost us more than they did several years ago. All Bulb Prices in this Catalog are prepaid.

How to Plant Your Bulbs

A careful study of the engraving will show you the exact depth and distance to plant your bulbs outside. Spade your ground up well—good and deep—well pulverized and rich. Then smooth off the soil and firm with brick or board. By using a round stick a little larger than the bulb you are planting, you can easily make holes the right size and depth. Drop your bulb in right side up, fill the hole and again pack solid firm and give thorough watering when the ground is dry outside.

When the ground freezes in the Fall give a thorough mulch, leaving same on all Winter and gradually remove the mulch in the Spring. We consider it advisable when the ground is thoroughly moist after you have placed your mulch on the same to cover the entire bed up with boards or roofing paper, so as to prevent it from getting very wet in the Winter and then freezing and thawing.

For inside use, plant your bulbs in light sandy soil, firming them well in the soil with crown of bulb below the surface. Give them thorough watering; then plunge the pots in the cellar to a depth of three or four inches above the pot. Examine them occasionally and if they become dry give them a thorough watering, keeping them buried from four to six weeks till they are started. Then remove them to the light and grow cool. Do not bring them to the light until they are thoroughly rooted and started and do not put them in a hot, sunny place, as this will have a tendency to make short, inferior blooming stalks. A light, cool, sunny window is best for the growing of all bulbs in the home. Hyacinths will have longer spikes if grown in the shade.

HYACINTHS

Planted in a bed outside in a protected place will give you satisfaction. Assorted colors for outside planting. Owing to conditions in Europe Hyacinths are very high this year.

IMPORTANT

For indoor culture plant one bulb in 4-inch or 3 or 4 in a 6-inch pot. Use light, rich soil. Plant about 1 1/2 inch below surface—give a good watering and set away in cool, dark place for 6 to 8 weeks, bringing them in as wanted.

CANDIDUM—The finest hardy white lily grown.

BULBS FOR NATURAL EFFECTS

Narcissi, Crocus and Tulips are especially suitable for planting in clumps along streams and in fence corners. If planted in clumps in a sheltered spot, they will produce a mass of color in the spring. We put up the following collections for this purpose:

Narcissi. Hardy varieties, in assortment, our selection, 50c a dozen, \$4.00 per 100.

Tulips. Late flowering Cottage in special mixture varieties. \$3.00 per 100.

Tulips. Early Flowering varieties, assorted colors, \$3.60 per 100.

LATE FLOWERING TULIPS

This section of the Tulip family deserves more attention. Being of great beauty and coming into bloom in May, a splendid success of bloom can be had when planted along with the early tulips. They are extremely hardy and particularly fine for planting in clumps among shrubbery or in the herbaceous border. The flowers being borne on extra long stems make them invaluable as cut flowers and they have the added value of lasting a long time when cut and placed in water. (Unless noted are all single.)

PARROT TULIPS

Very odd twisted petals. Mostly fringed. Medium late in flowering. All colors mixed. 60c a doz. \$3.50 a 100.

COTTAGE MAY FLOWERING TULIPS

These include several shades not included in Darwins.

Iscomb Scarlet. Brilliant, vermilion, crimson base.

Isabella. Primrose, flushed rose, changing to rosy red.

Gesneriana Spathulata. Scarlet, blue center, sweet scented.

The Fawn. A charming shade of fawn.

Gesneriana Orange Globe. Bright orange.

Iscomb Yellow. Bright yellow.

Iscomb Pink. Salmon pink.

Maidens Blush. White tinted pink.

60c per dozen, \$4.20 per 100

DARWIN TULIPS

Baronne la Tonnage. Bright pink.

Clara Butt. Soft salmon pink.

Glow. Brilliant red, 75c per doz.

La Tulipe Noire. The blackest of all tulips.

Gretchen. Soft blush.

Mrs. Potter Palmer. Rich glowing purple.

Painted Lady. Creamy white.

Bartigon. Crimson scarlet.

Sultan. Maroon black.

Pride of Haarlem. Glossy pink.

F. Sanders. Rich brilliant scarlet. 75c per dozen.

Mme. Krelage. Soft pink.

Except Noted—Price of late named Tulips 55c per dozen, \$4.00 per 100

SPECIAL ON LATE FLOWERING TULIPS
