Dahlias

1926

SAGAMORE

BADETTY BROTHERS
Huntington, New York

THE past year, generous in its returns for our efforts, has furnished gratifying encouragement and inspiration.

With the fact constantly in mind that the future popularity of the dahlia depends to a certain extent upon its usefulness for other purposes beside exhibition, we have been working toward a high standard.

Our aim has been the selection and development of the finest exhibition types that have the vitality to thrive under various conditions of climate and soil and freely produce large blooms with extraordinary keeping qualities. This great class of exhibition commercial dahlias is of equal value for home decorations, for exhibition purposes, or for the florist.

Many letters from our customers express their delight with the excellent results obtained and the numerous prizes won with our dahlias.

With the great Sagamore as a leader, the daily demand for choice blooms of our long keeping varieties ran into thousands, more than we could supply.

Our tubers are field grown and in excellent healthy condition. Order early, so stock may be reserved for you.

Terms: Full remittance with order. Retail orders sent postage prepaid.

Sagamore

A greater tribute than public demand could not be conferred upon a dahlia.

Sagamore has been accepted by the dahlia loving public as a dahlia standing alone in its class, and with which no other fine dahlia may be compared. There is something particularly charming about its soft golden color that wins friends in the exhibition hall, the garden, and in the florist's shop.

In our fields, the clean uniform plants, immune from attacks of insects or the effects of dry weather, stretched in long, neat rows, forming a picture long to be remembered.

In the garden of one of our customers, a single plant of Sagamore produced 27 perfect exhibition blooms and still had buds developing when killed by frost. The past season has added many prizes to the long list, as Sagamore never fails to win.

As a result of the enormous demand for Sagamore blooms to supply the select New York trade, and for Autumn wedding decorations, we find it necessary to reserve large quantities of stock for our own requirements. Reservations must also be made for our heavy retail demand for tubers. We are, therefore, unable to offer stock of Sagamore to the wholesale trade at the present time.

All tubers are from healthy field grown stock.

Reservations made for early orders.

<i>Tubers,</i>	\$7.50
<i>Plants,</i>	\$3.75

Roseata

A truly magnificent pink decorative suffused with salmon and gold in late season.

This is one of the few varieties that can be cut with 3- and 4-foot stems that are slender throughout their entire length. The plant remains fresh and green the whole season and produces an inexhaustible supply of large perfect blooms on extra long cane-like laterals.

Owing to a limited stock, only a few plants of Roseata were released last season, but we have received the most enthusiastic reports from all who have grown it.

A 1922 seedling that has made good through long rigid tests. A high scoring variety in 1924 at the A. D. S. Trial Grounds.

A dahlia that we can give our highest recommendation.

SAGAMORE
(KIRBY)

Nathan Hale

After three years of careful observation, this true decorative of our origination has been chosen as a worthy companion for the noted Sagamore.

Grown since 1922 under field culture without propagating or forcing, this variety has successfully stood the most rigid tests.

Of vigorous, sturdy growth, it has never in its three years of trial produced a single unhealthy plant, nor a flower without a perfect center.

The well-formed blooms carried on strong stems that are long and straight, are similar to Sagamore, but of a deeper orange or bronze shade. Its delightful coloring fits it admirably for use in decorations with Sagamore where a color scheme of Autumn shades is desired, and while it is still limited in quantity, the blooms are in great demand. As an exhibition variety, it won great favor staged in our big non-competitive exhibit at the New York show.

It seems quite fitting that this remarkable Huntington origination should bear a noted name. For here on the shore, stands a large stone monument marking the spot where Nathan Hale landed and was captured by the British in revolutionary days. Only plants will be available for 1926 Spring orders.

Green plants well established.... \$10.00

Merveilleux

A huge, perfectly formed decorative held rigidly on strong stems. The light rose pink shades to light mallow purple at outer edges.

This is a late blooming variety and is at its best at the time of the Fall shows. Its remarkable size and perfection make it invaluable for exhibition.

Tubers, \$10.00
Plants, \$5.00

Miss New York

A great wavy petaled hybrid cactus of most spectacular beauty. A rich rose showing a trace of Rosolane purple on the reverse of the twisted tips of petals.

This is a wonderful exhibition variety, artistic in form and color and will grow to great size. It was a favorite at the 1924 and 1925 New York shows.

Tubers, \$10.00
Plants, \$5.00
