OPERATING FOUR THOUSAND ACRES

BELL PHONE 625

BRIDGETON, N. J., U. S. A.,

April 21, 1926.

DEAR FRIEND:

We recently had the pleasure of sending you our descriptive literature and price list of our Giant Washington Asparagus Seed and Roots.

Your inquiry might have been prompted by one or more advertisements similar to those shown on the other side of this letter, which have been appearing regularly in about 15 of the foremost Farm and Garden magazines with national and international circulation. Each of these magazines are noted for their discriminating care in the selection of their advertising clientele, accepting only bona-fide advertisements from reliable concerns.

To appear at all in these high class magazines, means that the advertiser must not misstate or overstate his product and that he must have an article of distinct merit and must first, last, and all the time, give absolute satisfaction to the purchaser. Our advertisements have been appearing in these magazines for several years past.

Giant Washington is the latest development in asparagus and is the acme of asparagus culture to date. We are now digging and shipping Roots. The earlier asparagus is set in the Spring, the better your success.

An order card and return envelope is enclosed for your convenience. Order now!

Very respectfully yours,

RIVERVIEW FARMS

N. B.—The roots we are now shipping are exceptionally large and well-developed. The Giant Size that we guarantee in our price-list to average 115 lbs. per thousand in weight are running 150 lbs. or better. The Prime Size, which we specify in our price-list as averaging 50 lbs. per thousand, are running better than 60 lbs. At the time of printing our pricelists, some time in advance of digging time, we thought it advisable to be somewhat conservative. Now that we actually know the size and weights, we thought a word or two along this line would be timely. The roots made a very fine growth last year.

4 STALKS TO THE POUND GIANT WASHINGTON ASPARAGUS

The *Rust Resistant* Asparagus, noted for its delightful nutlike flavor, beautiful verdant foliage, 9 to 11 feet tall, and the enormous size of its stalks. Stalks are a rich green with a delicate purple overtone, ranging from 1 to 2 inches thick and frequently weighing a quarter pound apiece.

Asparagus Culture Simplified Plant Now---Enjoy It Next Year

Every garden should have its Asparagus Bed, as simplified modern methods of culture have been made so plain that anyone without previous experience can easily understand and follow them. If you plant our Giant One-Year-Old Roots now, you can have this delicious asparagus on your table next year and for 15 to 20 years to come, all from the one planting.

Plant Only One-Year-Old Giant Roots

Asparagus Specialists now know that the largest and most vigorous *One-Year-Old Roots (Giant Roots)* thrive best and yield the largest stalks. Small inferior roots are worthless; 2-year, 3-year or 4-year old roots that are no larger than our One-Year-Old Giant Roots have been stunted in growth and will never do well.

SUCCESS GUARANTEED

Plant our Giant One-Year-Old Roots and follow our Complete Cultural Directions (copy free with each order) and you are positively assured of a successful planting. We Guarantee You 90% to 100% Stand or money refunded if you wish it.

50 Giant Roots—\$5.
