Now and March the First*

Mr. L. C. Corvett,
Hort. Bureau Plant, Industry,
Washington, D. C.

Do the Wise Thing and Provide for the Future NOW!

USEFUL INFORMATION

NUMBER OF TREES TO SET TO THE ACRE. On rich bottom land set 12 trees, 60 feet each way. On average up land set 17 trees, 50 feet each way.

BEST LAND TO SET A PECAN GROVE ON. Most any land that will produce other crops well, and especially cotton and corn, or that will grow other trees, will as a rule, produce good Pecan Trees. Don't set sour or soggy land, but be sure its well drained. In dryer sections set bottom and second bottom land, but where there is a good rain fall up land gives first class satisfaction if not better results than bottom land. Set a Pecan Grove on the best land you have as you can make practically as good crops for at least 10 years, and fair crops for 20 years. Grow Pecans in the **AIR AND A CROP ON THE GROUND.**

INSTRUCTIONS on how to SET, PRUNE, FERTILIZE AND CULTIVATE will be furnished with each order.

ALL OUR TREES are dug fresh from the Nursery, packed well and should reach you in first class shape in a few hours.

EXPRESS RATES will be much cheaper on our trees to any point in the Southwest than it will be on trees that come from Mississippi, Georgia or Florida.

TERMS—25 per cent with each order when sent in and balance when trees are to be shipped or balance sent C. O. D., if preferred.

SET 100 TREES OR MORE N-O-W!

RESULTS SOME OF OUR CUSTOMERS ARE GETTING.

TEXAS PECAN NURSERY, Tyler, Texas.

Brazoria, Texas, Dec. 16, 1925.

Gentlemen:

I bought 300 of your Well Rooted Pecan Trees last season and set 273 personally and only lost one. A friend set the other 27 and lost one. Am sending an order for 400 to be shipped soon.

Yours truly,

H. C. HAYSLIP.

Guy T. Anderson, Calvert, Texas, writes on Dec. 15, 1925. "I set 700 of your 2 to 3 foot Pecan Trees last year and only lost 30 trees."

It was so dry through that section that their cotton did not come up, so they made no crops. It pays to buy good Well Rooted Trees.

\$600.00 Per Acre Per Year

IS WHAT THE GROVE SHOWN BELOW HAS AVERAGED EACH YEAR
FOR THE LAST THREE YEARS WHAT THIS GENTLEMAN HAS
DONE CAN BE DONE BY OTHERS IF YOU WILL TRY.

The above grove is owned by Theo. Bechtel, of Ocean Springs, Miss. It contains 12 trees to the acre and has for three years made an average of 100 pounds of nuts to the tree, and 1200 pounds to the acre. These nuts have been very fine and should have sold wholesale for 40c to 60c per pound. At an average price of 50c per pound Mr. Bechtel should have received \$600.00 per acre. This would have been 10 per cent on a valuation of \$6000.00 per acre. Is the statement that a pecan grove is worth \$1000.00 (if cared for) correct? Mr. Bechtel is one of the leading pecan men in the South, but what HE HAS DONE YOU CAN DO IF YOU WILL TRY.

:o:

Grow Other Valuable Crops While You Are Growing a Pecan Grove Like Is Being Done in the Grove Shown in Picture Below.

A SIX YEAR OLD PECAN GROVE, WITH ROSES GROWING
BETWEEN THE TREES

\$500.00 worth of roses are being produced to the acre while growing this Pecan Grove. The trees are now six years old and have a nice sprinkle of nuts on them.
